FINANCE.

18TH CONGRESS.] No. 706. [1ST SESSION.

NINIAN EDWARDS' CHARGES OF FINANCIAL MISMANAGEMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 19, 1824.

WHEELING, VIRGINIA, *April* 6, 1824.

SIR: I have the honor to request you to present the address herewith transmitted, with its accompanying notes and documents, to the House of Representatives of the Congress of the United States.

I have the honor to be, very respectfully, sir, your most obedient servant,

NINIAN EDWARDS.

Hon. HENRY CLAY, *Speaker of the House of Representatives of the Congress of the United States.*

ADDRESS.

To the honorable the House of Representatives of the Congress of the United States:

As certain proceedings, at the last session of Congress, under the authority of the House of Representatives, and a recent report to your honorable body, by the Hon. Wm. H. Crawford, Secretary of the Treasury, seem to have been intended and are calculated to cast upon me imputations injurious to my character, which I know to be unjust, and which, I think, I can demonstrate to be so, I trust no apology can be necessary for my requesting leave to present my vindication against those imputations directly to your honorable body, in order that it may be conveyed to the nation through the same channel by which I have been assailed.

This is a right which, under similar circumstances, I should suppose, ought not to be denied to the humblest individual in the Union. In this case, it is due to the nation itself, in consideration of the station I lately held, and that which I have now the honor to hold; and, owing to the peculiar circumstances of my case, it is emphatically demanded, on my account, by every principle of honor, and every regard to justice. Nor is it unprecedented in either house of Congress, in cases which certainly had no greater claim to such indulgence.

It will be seen that I was called upon by a committee of the House of Representatives of the last session, as a witness, to testify before it; that I was subjected to an examination which has not its parallel in the records of any free country; and that, after the lapse of about twelve months, and just as I was on the eve of my departure for a foreign country, an attempt has been made to impeach my credibility, on grounds which must have been, at all times since my testimony was given, within the command of the honorable gentleman by whom they have been so *opportunely* alleged.

To refuse to permit me to repel such an attack in the manner proposed would be to overthrow the longest established precedents, and to establish in their place the odious, oppressive, unjust, and indefensible principle of allowing the credibility of a witness to be impeached, and yet denying to him the right to support it before the tribunal under whose authority he had been called on to testify.

But, independent of all considerations, in regard to myself, personally, I humbly conceive that your honorable body might well desire to receive my vindication, and every corroboration which I can give to my testimony, on *your own account*, in order to enable you the more clearly to ascertain the truth of and the more satisfactorily and correctly to decide upon statements now before you and not yet acted on.

Notwithstanding all the canting about an "A. B. plot," the ingenious attempts that have been made, and the stratagems that have been adopted by certain newspaper editors and others to mislead and deceive the public mind into a belief that the committees, appointed at the last session on that subject, had thoroughly investigated all the statements made by a writer under the signature of A. B. in regard to certain suppressed documents; and that Mr. Crawford had been "triumphantly acquitted," in relation to the whole of them, I assert, without the fear of contradiction, that it is known to your honorable body that neither of those committees extended their investigations into those statements beyond about four paragraphs, which were mere bagatelles in comparison with other letters and matters that were expressly charged, and incontestably proved, *by the documents furnished by Mr. Crawford himself*, to have been withheld contrary to the resolutions of the House which required their production.

These important statements, and the matters and things contained in my testimony, have neither been investigated by any committee nor acted on by the House; and if my testimony had been, it is now revived by Mr. Crawford himself; and, surely, if it be competent to him to attack it, it cannot be fair or just to withhold from me the equal right of defending and supporting it.

By referring to the resolution of the House (note 1) under which the second committee of investigation was appointed, and to my examination by that committee, (2,) it will be seen that the latter fully merits the character I have given to it; that it was wholly unauthorized by any powers delegated to the committee, and that it evinced a far greater disposition to implicate me in some kind of censure, in regard to the public deposits in the Bank of Edwardsville, than to investigate the conduct of Mr. Crawford, or to inquire into those subjects for which the committee had been professedly appointed. Whatever may be thought by those who may be at the trouble to examine the list of interrogatories that were put to me, as to the source from whence they originated, none can read some of the following statements and documents without being convinced that a very small portion of candor would have rendered a part, at least, of those interrogatories unnecessary and useless, even in the opinion of the committee itself.(3)

Whatever may have been my agency in procuring the Bank of Edwardsville to be made a depository of public money, it had nothing to do in originating the great system adopted by Mr. Crawford, employing the local banks, and, in several instances, in direct violation of law, by allowing them a permanent deposit of nine hundred thousand dollars, equal to a salary of $54,000 per annum, for receiving and transmitting the public money, which the Bank of the United States was bound to do without compensation, and would have done without those immense losses to the public which must inevitably result from the adoption of a plan so contrary to the letter and spirit of the bank charter, and to the avowed intentions and objects of Congress in granting it.

The effect of my application to have the Bank of Edwardsville made a depository of public money, was merely to have deposits made there that otherwise would have been made in the Bank of Missouri, which previously had been authorized to receive the public moneys collected by the two Receivers in Illinois, who alone were directed to make their deposits in the Bank of Edwardsville. My agency in this transaction, therefore, did not prevent the depositing of a cent in the Bank of the United States; and your honorable body may well judge whether the public interest could have been much jeopardized by the change I recommended from the following statements, extracted from the documents presented to you by Mr. Crawford.

The Bank of Missouri had a capital of $210,000, of which the stockholders drew out of it, on pledges of stock, $186,335, leaving only $23,665 for the further accommodation of themselves and others. Upon this last sum, its real banking capital, it discounted and paid on over-drafts to the amount of $244,345 53. The whole amount of its discounts, including payments on over-drafts, was $430,680 43; of which sum its directors alone were responsible for $297,492 13, if, as is presumed to be the case, they were chargeable with over-drafts to the amount of $11,622 27.

To this bank Mr. Crawford allowed a permanent deposit of $150,000, equal to a salary of $9,000 per annum. He permitted the public money to accumulate in it to the amount of $726,031 90 in the course of nineteen successive months, ending with the 1st of September, 1819, without exacting those precautionary returns and statements which he himself considered essential to insure the fidelity of all the banks appointed to receive the public money; and, eventually, he received from it, in part payment of its debt, contrary to the positive injunctions of the resolution of Congress of 1816, a large amount of uncurrent notes, some of which were not worth 25 cents in the dollar.

Much as he has mystified this subject in several of his reports, and particularly in that one which is part of document 105, (in the 8th volume State Papers, 2d session 17th Congress,) in which he blends a deposit in the Bank of Missouri, of $64,613 58, with "*the* special deposits which passed through the Bank of the United States," it cannot excuse, or even successfully disguise, the flagrant impropriety of his having received at par the uncurrent notes above referred to; for, by the very document last mentioned, it appears that this deposit had been "re-transferred to the Bank of Missouri, and assumed *as cash*, in September, 1819," which was previous to the receipt of those notes. His own letter to the Cashier of the Bank of Missouri, dated March 23, 1819, and the Cashier's answer, dated June 25, 1819, (4 and 5) clearly show that no justification for receiving uncurrent paper can be derived from that circumstance. Besides, he received uncurrent notes that *were not* and *could not* have been included in that deposit; for, not to mention other cases, the notes which he received on the "Bank of Georgetown, Kentucky," were not at that time even receivable in the land offices. Nor was there ever any contract between the Bank of the United States, or the Treasury Department, with the Bank of Missouri, from which the latter could derive any right to tender or be any justification for receiving those uncurrent notes.

But, had it even been otherwise, it would not be less difficult to justify the placing of this bank upon a footing so different from that of all other similar depositories of public money.

Under all these circumstances, it would seem incredible that any injury to the public could have resulted from the change of deposit for which I applied; and the attempt to subject me to censure for the small participation which I have had in this business ought to be considered as a plain acknowledgment of the awful weight of responsibility that rests upon him whose especial duty it was *to take care of the public money.*

My responsibility, however, did not long continue; for, finding the Bank of Edwardsville, on my return from Congress, soon after it had been authorized to receive the public money, involved in some difficulties, I determined to sustain it against the dangers that then threatened it; and, after seeing it in a safe situation, to relieve myself from all kind of responsibility for that or any other bank. Accordingly, in the same year, I made a publication in several newspapers, and in two different States, of my determination to be held no longer responsible for that or any other bank. This publication can be established by a part, if not the whole, of the respective delegations now in Congress from the States of Illinois and Missouri. It was forwarded to Mr. Crawford, and I have no apprehension that he will ever deny having received it.

He had also been put upon inquiry, in regard to the Bank of Edwardsville, by a bitter philippic, in ample detail, against it, which he received from the Hon. Mr. Benton, of the Senate. This was shown to Colonel Johnson and myself, and a copy of it was transmitted to the bank, where, I suppose, it now remains.

He was fully apprised of those very difficulties of the bank which produced my determination to retire from it. They were communicated in letters from myself to Colonel Johnson, which were intended to be, and were, forwarded to Mr. Crawford. The receipt of two of them is acknowledged by his letter to

Colonel Johnson of 15th of July, 1819, in which he says: "Yours of the 28th ultimo came to hand this morning. The circumstances connected with the bank of Edwardsville, as *developed* in the two letters of Governor Edwards, submitted by you to my perusal, will receive due consideration." In the same letter he says: "With Governor Edwards I had no personal acquaintance before last winter. The opinion which I had formed of his talents and integrity, from the official correspondence which had been carried on between us, both in the War and Treasury Department, has been confirmed by personal acquaintance.

"The different subjects upon which he had occasion to ask my opinion or decision during the last session of Congress were fairly and candidly stated; his comments upon them were judicious, and it afforded me great pleasure to be able, after due examination and reflection, generally to coincide with him." The session here spoken of is the one in which I made the application in favor of the Bank of Edwardsville.

Had Mr. Crawford been as much disposed to profit by the impressive lessons of experience which he was constantly receiving as I was by those of a few months only, it might have prevented a vast accumulation of "*unavailable funds*," and have enabled him much earlier to have secured to the Bank of the United States, "in their just extent, the advantages intended to be secured to it by the charter," which he fairly promised to Congress in his report of the 10th of December, 1817, (6) and the necessity for which he seems to have been duly sensible of in another report, (vol. 8 State Papers, 2d session 17th Congress, p. 77,) in which he says: "In the winter and spring of 1819 the Bank of the United States was, in the opinion of the enlightened officer who presided over its direction, in a great degree indebted for the preservation of its credit to the forbearance of its creditors and to the support which it received from the Treasury Department. Such were my impressions of *its critical state* that I felt it my duty to accept propositions made by the Board of Directors which, under other circumstances, would have been declined. It is wonderful, therefore, that, with these impressions, he should have thought it consistent with his duty to have extended such favors as have been noticed to a single local bank, much less to the multitude that shared his patronage, and could not have existed without it.

It would be just as fair and candid to implicate me in the unjustifiable indulgence that has been extended to the Bank of Edwardsville since its failure as to endeavor to involve me in any kind of censure for its continuance as a depository of public money after the fall of 1819. At the time of its failure its resources were, I am well satisfied, more than amply sufficient to have secured its debt to the Government. But every man of common experience and observation knows that the resources of all banks in its situation must necessarily become more and more impaired, and are more liable to be misapplied. Yet, strange and incredible as it may appear, I have never heard, nor do I believe, (though I reside in the same village in which the bank is located,) that Mr. Crawford has collected one cent from it, or made any adjustment with it, or resorted to any measure to coerce the payment of its debt. He, who could find motives for an indulgence so extraordinary, and at the same time so inconsistent with and detrimental to the public interest, could not have required either my recommendation or sanction for continuing this bank a depository of public money after the fall of 1819.

I come now to the report that contains the dextrous insinuation against my credibility. So much of it as relates to this subject is in the following words, viz: "The Hon. Mr. Edwards, late a Senator from Illinois, having stated on his examination before a committee of the House, on the 13th of February, 1823, that the late Receiver of Public Moneys at Edwardsville had, on his advice, and in his presence, written a letter to the Secretary, enclosing a copy of the publication which Mr. Edwards represents himself to have made sometime in the year 1819, announcing his intention of retiring from the Directorship of the Bank at Edwardsville, and that he had advised the Receiver to withhold his deposits from the bank until he could receive further orders from the Secretary; and that the Receiver afterwards informed him that he had received A LETTER from the Secretary, directing him to continue the deposits: the Secretary deems it proper to state that no such letter from the Receiver *is to be found on the files* of the Department; that the officers employed in it have no recollection of the receipt of such a letter, and that, on an examination of the records of the Department, it appears that no ANSWER to any such letter, directing the Receiver to continue the deposits, was ever written to him by the Secretary of the Treasury."

This statement bears intrinsic evidence that it was intended to deprive me of the benefit of my justification, not voluntarily made, but drawn from me by the committee, in regard to the Bank of Edwardsville, and to subject me to the odious suspicion of having sworn falsely. Were there any doubt on this subject, it would be removed by the conduct of a distinguished individual, whom it might not be respectful to name in this communication, and who, since I left the city, has not thought it beneath his dignity to go about exhibiting the report, and expressing his opinion that it "placed me in a dilemma." He may yet find it more difficult for his patron to get rid of one of infinitely deeper interest.

Believing, as I call upon my God to witness I sincerely and confidently do, that Mr. Crawford did receive the letter mentioned in the above report, and that it is now in his possession, or has been purposely destroyed, I can but regard this attack upon my reputation as unparalleled by anything I have ever witnessed or heard of, as emanating from so respectable a source, except certain *manœuvres* and *stratagems* to fix upon a much more distinguished individual of this nation the disgraceful charges of a guilty participation in horse stealing and the passing of counterfeit money, which I have somewhere met with in the course of my reading. Malicious insinuation is the resort of a timid mind. Wilful misrepresentation denotes a wicked one.

In regard to the *time* which has been selected for making this attack upon me, it very much resembles the *management* which Mr. Crawford resorted to at the last session of Congress to defeat a certain applicant for a land office appointment. This gentleman had been before the President for many weeks; he was supported by gentlemen of the first respectability, and of different parties, in the States of Illinois, Missouri, and Tennessee. No objections to him were anticipated by himself or his friends, and none were made till the President was about to transmit his nomination to the Senate. *Then*, when a nomination could no longer be kept back by any *contrivance* whatever, and not till *then*, did Mr. Crawford exhibit his objections. The gentleman's residence was too remote, and the session of Congress too far spent, to admit of any defence or explanation from him; and thus he lost the appointment. As this case is strongly marked by certain characteristical traits, which tend to illustrate the *objects* and *design* of this *well-timed* attack upon me, I refer, for a further explanation of it, to my letter to Mr. Crawford on that subject. (7)

In the latter part of the week previous to my departure from the city, on calling to take my leave of the President, I met with Mr. Dickins, to whom, in a short conversation with him, I communicated my intention of leaving the city on the Sunday following, (one day before the date of Mr. Crawford's communication,) and but for an accidental engagement of the Secretary of State, which prevented his signing a

paper that it was necessary for me to carry to the Treasury Department till after the hours of business in that Department had elapsed, I should have departed from the city before Mr. Crawford's communication was made, and probably should not even have heard of it till after I had left the United States.

But, independently of what I stated to Mr. Dickins, my intended departure was strongly indicated by the business I was engaged in transacting in the public offices. It was generally known; and, if it had not been, it was very naturally to have been expected.

Deprived of all opportunity of defence, a victory over me might, indeed, have been easy; but surely the triumph would have been most ignoble.

By way of availing myself of further characteristical traits, I beg leave to state that an inspection of the public documents is sufficient to show that, in repeated instances, Mr. Crawford's replies to calls upon him by the House for information, &c., have been so tardy and protracted as to prevent the possibility of investigating them during the sessions in which the calls were made, and to require a great degree of charity—*possibly*, however, not more than is justly due—to resist the belief that he has been *as much* disposed to evade as to invite a scrutiny into his conduct.

Even the correspondence which accompanied the report in question, though required by a resolution of the 8th of May, 1822, to be laid before the House as early *as practicable* after the commencement of the then next succeeding session, has been delayed to so late a period of the present session as to render an investigation of it *before the first Monday in December next* impossible.

Notwithstanding all these circumstances, it may be that Mr. Crawford did not intend to take an undue advantage of my absence. He must well know with what indignant condemnation such an attempt would be denounced by every magnanimous and generous bosom. What surprises me most is, that a just apprehension of so degrading a suspicion had not induced him to have exhibited his insinuation *a little sooner*, or to have declined it altogether. But whatever may have been his intentions, I could not have been more disadvantageously affected by any *contrivance* or *stratagem* that he could have adopted to deprive me of a fair opportunity of defence.

Scarcely convalescent from a long indisposition, exhausted with the fatigue of travelling, and required to proceed on my journey with all convenient despatch, I must leave him unanswered or content myself with such a defence as, with all these disadvantages, a very short time of necessary delay on my journey may enable me hastily to present. But what I regard with the most concern is, that writing as I must do, without having it in my power to refer to and re-examine certain documents, I shall not be able to avail myself of some important circumstances which they would establish, and may be betrayed into some slight inaccuracies to which all men are liable who have to trust to memory alone. I promise, however, to be more accurate than Mr. Crawford has been in cases in which he had before him every means of being entirely so.

Having endeavored to establish my right to make my defence before your honorable body, and taking it for granted that a request so reasonable, under all the circumstances that have been mentioned, will not be denied me, I presume I shall be indulged in every legitimate right of defence that belongs to my case.

Among these it will scarcely be denied that I have a right,

1st. To corroborate my own testimony.

2d. To show, by any means in my power, that the statements made against me are inconclusive; and particularly, to avail myself of any circumstance that is presented by the documents in the case in which I was called on to testify, for the purpose of invalidating those statements. And

3d. Directly to impeach the credibility of those who have assailed mine.

The latter I shall probably waive; for though I have at all times felt myself at liberty to animadvert upon Mr. Crawford's official conduct, and to defend my own, both of which he has found me prompt to do in cases that never yet have met the public eye, yet, I never have, intentionally, treated him with the slightest indecorum or a want of that respect that is due to his station. (8) Respect for your honorable body would, of itself, be sufficient to induce me to abstain from the language of passion or abusive vituperation before you. Respect for myself would prevent me from using it anywhere else. I cheerfully leave that resource to bullies, political tools, mercenary hirelings, and those who, conscious of their inability to defend their own conduct, can find no better means of diverting public attention from themselves to others. I shall nevertheless freely urge and insist on such facts as I know to be true, disclaiming, however, any other construction of them than the most innocent of which they are susceptible. If I shall point out palpable omissions and violations of duty, or show that letters which ought to have been communicated to the House have been suppressed, and that various misstatements have been officially made, I shall attribute them to nothing more than forgetfulness, inattention, inadvertence, or some erroneous but innocent views of the subject.

This will be sufficient to show that the negative statements of Mr. Crawford and "the officers employed in the Treasury Department" ought not to prevail against my positive statement on oath. If others should suppose this forbearance on my part a little too fastidious, and that the cases which I shall exhibit are evincive of intentions less innocent, let it be remembered that their views of the subject would unquestionably render the case the stronger in my favor. With these preliminary remarks I proceed to my defence against this mal-apropos statement of Mr. Crawford.

It will be recollected that I was not a volunteer in giving my testimony before the committee, and I can conceive of no motive which could be supposed by any but a most depraved mind, misled by its own wicked operations, to have influenced me to make an uncandid statement. As to my responsibility, in consequence of having applied to Mr. Crawford to cause certain deposits to be made in the Bank of Edwardsville, in preference to that of Missouri, surely I have shown that enough was known about the latter bank at the time my testimony was given to have freed me from all apprehensions in regard to any responsibility that I had imposed upon myself, even if I had not withdrawn, as already stated, from the "Directorship" of the former. But Mr. Crawford does not deny that he received my publication; and even if he had not received it, it having been made in two different States, and he having been, as I have shown, put upon inquiry in regard to that bank, and informed of the difficulties it had had to encounter, I certainly might rely upon the notoriety of my acts in this respect with a much better grace than he relies upon a supposed notoriety of his repeated but unpublished omissions to comply with the most positive legal injunctions, as an excuse for those omissions, which he does in his letter of the 24th of February, 1823, to the chairman of the Committee of Investigation; and in which he also seems almost to insist that his violation of his duty was equivalent to a fulfilment of it.

It could have been no object with me to have established an additional suppression upon him; for, if

time do not fail me, it will be seen before I am done with this subject that I had in my possession proof, whose credibility could not be questioned, of his having suppressed, in a variety of other instances, letters enough, of a much more important character and delicate bearing, for any purpose that the utmost malignity could have contemplated *as possible* to be effected by such means. (9)

The amount of my statement before the committee, as well as I can now recollect it, (not having it in my power to refer to it for examination,) but which will be supplied at Washington, is—

1st. That, for the reasons therein mentioned, I made a publication of my intention to retire from the "Directorship" of the Bank of Edwardsville.

2d. That I advised the Receiver of Public Money at that place to withhold his deposits from the bank till he could receive further orders from the Secretary of the Treasury.

3d. That the Receiver did write to the Secretary on the subject, enclosing my publication, &c.

4th. That the former afterwards informed me that he had received A LETTER from the latter, directing him to continue the deposits.

Now, it is not denied, and dare not be, that I did make the publication alluded to; and this I could not have done, for the reasons that influenced me, consistently with the known friendship and intimacy that then subsisted between the Receiver and myself, without giving him the advice mentioned in the 2d part of the above statement. But that I did give that advice is much more strongly corroborated by the fact that the Receiver *did actually withhold the deposits*, and Mr. Crawford knows it. This might be established by the monthly returns of both the Receiver and the bank. But these are in the possession of Mr. Crawford. I, however, felicitate myself upon being able to satisfy your honorable body of the fact by documents that have been furnished by himself, but which, thank God, are now out of his power.

By his report of the 27th February, 1823, (8th volume State Papers, 2d session 17th Congress, pages 31, 33, and 35,) it will be seen that the amount of deposit stated to have been in the Bank of Edwardsville to the credit of the Treasurer, was—

At the end of the 2d quarter of 1819	$45,560 68
At the end of the 3d quarter of 1819	45,475 04
At the end of the 4th quarter of 1819	53,191 59

The two first of these statements are presumed to be correct, or nearly so. The latter is entirely otherwise, as I will prove to your satisfaction, if there is any kind of confidence to be reposed in previous statements exhibited to you by Mr. Crawford. Had it been *intended* to disguise the fact of the Receiver having withheld the deposits, as above stated, and to give some semblance of plausibility to the recent insinuation against myself, nothing could have been more ingeniously, or more disingenuously, *contrived* for these purposes than this last statement. If it had been truly stated that, instead of $53,191 59, the real amount in deposit at the end of the fourth quarter was $98,191 59½, the contrast between this sum and the amount of the previous deposits might have afforded some corroboration to my statement before the committee. But this, subsequent events have proved, it was intended to question. I will, however, make the case too plain for doubt.

By the report last referred to, it appears that the amount of deposit in the Bank of Edwardsville, to the credit of the Treasurer, on the last days of June and September, was a little upwards of $45,000.

By Mr. Crawford's previous report of the 27th April, 1822, (in which is an ingenious *contrivance* of placing December before November,) it is shown by the bank returns themselves that on the 30th November, 1819, the amount of deposit was $45,475 04½, and that, on the last day of the succeeding month, (the end of the 4th quarter of 1819,) it was $98,191 59½, (10,) and not $53,191 59, as subsequently reported from the Treasury Department.

From the correspondence between the several amounts of deposit in the bank on the last days of June, September, and November, and the difference between them and that of the last day of December in the same year, no one can doubt that the Receiver at Edwardsville *did actually withhold the deposits* as above suggested; unless it can be believed that he did, in one single month, distinguished by no particular circumstances, receive to the amount of $52,716 55, equal to the rate of $692,598 60 per annum.

Let us then inquire a little into the probability of his having written to Mr. Crawford, or, rather, into the great improbability of his not having done so.

This gentleman united in himself the office of Receiver and President of the Bank of Edwardsville. As Receiver, he had positive orders to make his deposits in that bank, and was bound to make monthly returns of his accounts to the Secretary of the Treasury. As President, it was his duty to have monthly returns of the state of the bank, and the amount of public deposits therein, regularly transmitted to the Secretary. Is it then to be believed that he should have withheld the deposits, contrary to his orders, without having given to Mr. Crawford some reason, either as Receiver or President, for his having done so? And if he had failed to perform this duty, is it credible that Mr. Crawford would have been so negligent and inattentive to *his* duty, and so regardless of the public interest, as not to have called him to an account for such conduct?

But if further confirmation of the letter's having been written, and received by Mr. Crawford too, were wanting, strong presumptions in favor of both may be derived from the very guarded and characteristic artifice by which he would seem equally to deny the receipt of the letter, and that any instructions had been given to the Receiver to continue to make the deposits. Let it be observed that my statement, as quoted by Mr. Crawford, is "that the Receiver informed me he had received a LETTER from the Secretary directing him to continue the deposits." Mr. Crawford does not deny that such directions were given; but he says "it appears that *no* ANSWER *to such letter*, directing the Receiver to continue the deposits, was ever written," &c. From this peculiar manner of denial, I can but infer that, not being willing from some cause or other to admit the receipt of the letter, Mr. Crawford *contrived* to give the directions under some other form or pretext than that of a direct ANSWER to it. But that such directions were given I cannot doubt, though I have nothing to rely upon for this opinion but the Receiver's word for the fact. If Mr. Crawford did not write to him specially on the subject of his having withheld the deposits, it can only be satisfactorily accounted for on the supposition that he (Mr. Crawford) did, in some form or other, give such directions as he supposed would produce the proper corrective.

Another fact in confirmation of my statement is, that one of the two Receivers who had been directed to make their deposits in the Bank of Edwardsville was ordered to make his elsewhere; but under what pretext I do not know, nor do I recollect ever to have heard; probably, however, under some one equally calculated to disguise the real motive, as the giving of directions without acknowledging the receipt of the letter that produced them.

It will not, I persuade myself, be considered a trifling corroboration of my statement that it was not made to the committee for the first time, but that, in a private correspondence between Mr. Crawford and myself, more than twelve months before my examination by the committee, I had asserted the same facts substantially to himself.

In my letter to him of the 9th February, 1822, (which I would not venture to refer to if I had not his answer to it,) I say "I beg leave most respectfully to suggest that it would be but an act of justice to me to present my publication of 1819, in which I declared I would be no longer responsible for the bank [of Edwardsville] in any way whatever. This publication was contained in the St. Louis Enquirer, which I believe you took at that time. It was also contained in a paper which I forwarded to you myself. *And it was enclosed and referred to in a letter from Colonel Stephenson (the President of the bank) [and the Receiver also] to you, which letter, he informed me, had been answered.* Since the fall of 1819 my connexion with that bank has entirely ceased, except that I am a stockholder in it, without, however, ever having borrowed one cent from it."

In my letter to Mr. Crawford of February 14, 1822, I say to him: "I must, however, say, sir, that, as the information in the Treasury Department relative to my original recommendation of the Bank of Edwardsville has, for some time past, been distinctly understood, and freely used at this place, [Washington,] I can but consider it somewhat unfortunate for me that *other communications in the Department*, which ought to have terminated all responsibility on my part, have not been equally known. That I was the cause of the deposits being made there, in the first instance, I freely acknowledge; but that I unequivocally declared I would not be held responsible for that, or any other bank, in any way whatever, after the fall of 1819; that *you were notified thereof in due time;* that the deposits had not been continued there, in consequence of my recommendation, since that period; and that the bank was then in a good situation I may, I think, according to my present impressions, fairly insist upon. And if so, the partial information now in circulation at this place is not calculated to do me that justice which, I hope, I have a right to expect from your magnanimity. It would, therefore, afford me great pleasure, I assure you, sir, that the whole of my conduct in relation to that business should be so fully known as to be no longer misunderstood."

The first of these letters was written five days before his report of the 14th February, 1822. The second bears the same date of the latter. They must both, therefore, have been written before any charge of suppression had been made or suggested.

Had the existence of the Receiver's letter been denied, or the slightest intimation of questioning it been given at the time it was thus asserted, I could, and would, have proved every fact contained in my statement in regard to it by that gentleman himself. But he is now dead. Mr. Crawford knew this before he made the report in question; and dead men cannot contradict living ones.

No one can read the interrogatories that were put to me by the committee and believe that Mr. Crawford was not well informed of my testimony before the date of his letter to the chairman of the same committee, which was eleven days later than my examination. From the nature of the inquiries which he was then called upon to answer, they afforded as suitable an occasion as the one he has selected for questioning my credibility. Why, then, has he so long postponed it? One thing is certain, it never could have been undertaken with greater hopes of success than when it was supposed I should have no opportunity of defending myself.

I will now submit to your honorable body a few remarks, to show that the negative statements of Mr. Crawford and his "officers of the Treasury Department," however confidently relied upon by him for my total overthrow, are too inconclusive for his purpose.

You have been informed by him that, previous to the calls for his correspondence with the local banks which were made the depositories of public money, it had been usual to refer all such calls to Mr. Jones, his chief clerk, but that in these cases *another clerk* had been selected to collect the letters, &c., which were called for. Why this change was made at that particular juncture (being wholly unaccounted for by Mr. Crawford,) is left to conjecture. Was Mr. Jones incompetent to the discharge of this duty? The very station he holds in the Department forbids such a supposition. Had he proved himself unworthy of confidence? If so he could not have retained his station, and such is acknowledged to be his stern, unyielding, inflexible integrity, that no one could have supposed him capable of a subserviency in any *unfair purpose.* I confess I regret the change was made, for, had it not been, I cannot resist the belief that I should have been spared much of the labor of this vindication. But, without yielding to unavailing regrets, I must be content to take things as I find them. I, therefore, proceed to examine the testimony that is offered against me.

This is, substantially, 1. That no such letter from the Receiver [as that mentioned in my examination] is to be found in the files of the Department. 2. That the officers employed in it have no recollection of the receipt of such a letter. And 3. That the records of the Department do not show that it was answered.

Supposing it to be true that this letter cannot be found "in the files of the Department," it by no means proves that it was not received by Mr. Crawford.

This is not the first occasion on which I have had to regret that a letter received by him could not be found when it became necessary for my defence.

Finding myself grossly misrepresented in relation to a letter I had written to him, and being determined to vindicate myself against the insinuations that were predicated upon it, I wrote to him on the 5th January, 1821, requesting a copy of it. In his reply, dated January 10, 1821, he says, "the letter which you have described in yours of the 5th instant has been sought for in vain. Mr. Jones states that, according to the best of his recollection, he considered it not of a description to go on the files, and that, consequently, it was not filed. If his recollection is correct, it accounts for the absence of the letter from the files, and for its being lost or mislaid." My letter being thus disposed of, Mr. Crawford, in his answer, impliedly repeated one of the insinuations above referred to. This was promptly repelled by me, and since then I have heard no more on that subject.

From this case alone it might not be unreasonable to presume that some similar disposition may have been made of the letter now in question. But, with every motive to make such an assertion, Mr. Crawford has not ventured to say he did not receive this letter. It will not be difficult to show that other letters of infinitely more importance have been received by him, about which it might be truly said "no such letters are to be found in the files of the Department." He has sometimes another depository for them, in which the letter mentioned in my examination may also have been placed. It may have been addressed to him "without the addition of Secretary of the Treasury;" which we have seen gravely

insisted on, as giving him a right to consider any letter as a "private paper," though exclusively relating to matters of official duty. Or he may have "considered it not of a description to go on the files;" and thus may "its absence from the files," or "its being lost or mislaid," be very naturally accounted for, according to the *practices* of the Department.

The probability of this supposition is greatly strengthened by the following case:

Between 1816 and the 31st of December, 1819, he received important communications on the subject of the illicit introduction of a large number of African slaves into the United States which strongly implicated one of his particular friends. By a resolution of the House of Representatives, of the last mentioned date, he was directed to lay before the House copies of such communications as he had received since 1816, and *such information as he possessed* in relation to the illicit introduction of slaves into the United States. But, notwithstanding this positive call upon him, I assert (and I challenge investigation) that he did withhold letters and information upon this subject, implicating his friend, which ought to have been communicated to the House, and some of which he did not even permit "to go on the files of the Department." Of course, it might be very truly said of them that "no such letters are to be found on the files of the Department, and that the officers employed in it have no recollection of the receipt of them;" for, having been deposited in his own private bureau, those officers could have no means of ascertaining the fact, and the very motives for withholding them from the files would render fruitless all attempts to find "*answers*" to them by an examination of the records of the Department." And yet there is no doubt of their having been received, and the strongest probability that they were answered also. If the authority of the House of Representatives was not sufficient to obtain their production, the non-production of the letter of the Receiver at Edwardsville ought not to excite a moment's surprise.

But it also appears that he and his "officers of the Treasury Department" have not been able to find a great number of other letters, and even some of his own official ones, when required by other calls of the House; or if they could have been found they were suppressed. Of this the documents furnished by himself afford both abundant and conclusive proof. Many instances might be stated. For the sake of brevity I will allude to a few of them only.

Several cases of this kind are presented by the correspondence with the Bank of Huntsville. I will refer to but one of them. This is too conclusive for any artifice to elude it, and it requires but a bare inspection of the documents themselves to be convinced of it.

In his letter, L No. 7, to the President of the Bank of Huntsville, dated July 30, 1819, he says: "You will perceive by the contents of MY LETTER OF THE 9TH INSTANT that the failure of the Nashville Bank and its offices was *at that time* known to this Department. It was *then* foreseen that the Bank of Huntsville could not fail to be injuriously affected by that event, and by others of a similar nature, which were *then* anticipated. * * * The reasons stated in MY LETTER OF THE 9TH INSTANT in favor of the prompt adoption by the bank of the measures necessary *to the transfer of the public money* in the possession of the bank, beyond the permanent deposit, remain unimpaired."

This *letter, of the 9th July*, 1819, is also referred to in letter L No. 8, from the President of the Bank of Huntsville, dated September, 1819. Yet this same LETTER OF THE 9TH INSTANT, whose "relevancy to the subject-matter of the call" admits of no question, "was not to be found on the files of the Department," or it was purposely suppressed, for it has not been communicated.

By an examination of the documents No. 66 and No. 119, it will be seen that more than half the correspondence with the Bank of Missouri, though called for by a resolution of the House, had been suppressed. The importance and very delicate import of a few of these letters will be noticed presently, in connexion with another subject.

But, though there were two calls in this case, either of which rendered it the duty of Mr. Crawford to have transmitted *all* the correspondence; and though, in answering the second call, he expressly stated that he *had* transmitted *all* the correspondence required by the resolution, except two letters from the Receiver at St. Louis, which were of a "confidential nature," yet your honorable body will find very strong reasons to doubt the correctness of this statement; and I shall be much surprised if the third call, with which he has so tardily complied, has been sufficient to draw from him *all* the correspondence, even with the Bank of Missouri. The omission of letters addressed to the Department might be accounted for on the supposition that they might have miscarried. But this is a casualty to which the letters, or copies of letters of the Secretary himself, which should always remain in the Department, are not liable. They may, however, sometimes disappear, as the letter of the Receiver at Edwardsville seems to have done. If not, it will be difficult to account for the absence of a letter of the 30th July, 1819, which is presumed to have been addressed by Mr. Crawford to the Bank of Missouri, upon the authority of a report of a committee of the Legislature of Missouri at its session in 1822.

This was a committee appointed to examine into the concerns of the Bank of Missouri. Mr. Crawford's letters to that bank were submitted to the inspection of the committee, and the report, which I have the honor herewith to transmit, (11,) contains extracts from several of them, among which is one from his letter of the 30th of July, 1819, of which enough appears to prove that it was embraced by the call, and ought to have been communicated, unless, indeed, it is a mere fabrication by the committee, for which no imaginable motive can be perceived.

I have no time to dwell upon several curious particulars that are disclosed by this report. I beg leave, however, to refer your honorable body to the contract with the Bank of Missouri as therein set forth. An inspection of it will enable you to decide at once whether it is correctly represented in Mr. Crawford's report of it; and whether he had a right to withdraw any part of the permanent deposit, under any pretence whatever, before the expiration of six months "after it ceased to be employed to receive the public moneys."

In regard to the letters that have been alluded to, I will barely remark that if so many of them, actually belonging to the Department, could not be found on "its files," it will not be strange if it shall hereafter appear that the letter of the Receiver at Edwardsville has been overlooked; or, if the former were purposely suppressed, there is nothing improbable in the belief that the latter has shared the same fate.

But this letter may have been received by Mr. Crawford and he may have forgotten it.

This, I presume, I may fairly demonstrate, by showing that his memory has been extremely treacherous in other instances, of far greater consequence. For this purpose I beg leave, in the first place, to call the attention of your honorable body to *his* oath before the committee.

Regardless of the salutary admonitions of the proverb "of the glass windows," he has treated my

oath somewhat freely, and he can have no reasonable cause to complain if *his own* shall undergo a slight investigation.

On *his* examination before the committee he says: "*I never sanctioned the omission of* ANY PART *of the correspondence.*"

Now let us hear Mr. Dickins, his *confidential* Clerk. On the examination of this gentleman before the same committee he says: "It is the general direction of the Secretary, when information is called for, to give *everything* that relates to the subject. When the call was made, I looked over *all* the papers, *filed* and *unfiled*, relating to the subject. The papers, after selected, are laid before the Secretary; and *in this case* he directed me to collect *everything* in the office relating to the subject. *They* were selected and *submitted to his inspection.* In this case, from the urgency of it, I took the *originals and rough drafts.* The papers remained some time before the Secretary, while he was making the report, after I gave them to him, and before *he* communicated to the House."

Let it be recollected that Mr. Dickins is one of Mr. Crawford's witnesses against me, and enjoys his highest confidence. Now, if this gentleman swears the truth, I would ask how it could have happened that so many letters of the correspondence with the Banks of Huntsville and Missouri alone were suppressed without Mr. Crawford's *sanction?*

The document No. 119, before referred to, most indisputably proves that upwards of twenty letters of the correspondence with the latter bank were suppressed on the first call for them, and that these very letters were "*in the office.*" If, then, Mr. Dickins did collect and lay before Mr. Crawford "*all* the papers, *filed and unfiled*, relating to the subject," which he was so strictly ordered to do, and swears he did, by whom could the suppression of so great a portion of the correspondence with the Bank of Missouri have been effected? If not by Mr. Crawford, his own statement shows that it *must have been done* by Mr. Dickins. To permit so flagrant a breach of trust and confidence to pass with impunity is *to sanction it.* If this suppression escaped Mr. Crawford's notice *when* he answered the first call for those letters, he *could not* have been ignorant of it *when* he shortly afterwards complied with the second call by transmitting *the very letters* that had been suppressed. Yet we have never heard that Mr. Dickins has been punished in any manner whatever; and from the relation in which these gentlemen stand to each other, it cannot be presumed that he has been even blamed.

Again: Mr. Crawford, in his testimony, says: "It is usual when resolutions require information which the records or files of the office afford to send copies; but when there is a press of business the ORIGINALS are sometimes sent, *as in the present case.*"

Thus it appears from the oaths of these two gentlemen that Mr. Dickins delivered *all* the "orginals and rough drafts" to Mr. Crawford, and that the latter sent *them all* to the House. No one, therefore, could reasonably expect to find COPIES among them. Yet, upon an examination of the correspondence with the Huntsville Bank alone, it will be found that about one-third of the pages it occupies, and more than that proportion of the letters, are given as EXTRACTS. These, surely, cannot be ORIGINALS, unless Mr. Crawford and the President of the Bank of Huntsville were in the habit of sending EXTRACTS of their own letters to each other—a novelty that can scarcely be believed to have occurred.

But, besides the striking variance between Mr. Crawford's statement of having sent the *originals* to the House, and the fact of this case, the transformation of those *originals* into *extracts* requires explanation, at least. It is difficult to conjecture any motive for sending these *extracts* instead of the *originals*, unless it was for the purpose of *omitting* and withholding something which the latter contained; and if Mr. Crawford "*never* sanctioned the *omission* of ANY PART of the correspondence," by whom, and with what motives, could these *extracts* have been made and foisted into the place of the *originals?*

It cannot be too much to say that there appears to have been considerable forgetfulness in some part of this affair.

Mr. Crawford must also have forgotten the resolution of 1816, when, in direct violation of its positive injunctions, he received from certain local banks, in discharge of their debts to the United States, and at par, the large amount of uncurrent notes, which, in his report, he admits he did receive from them.

But his memory must have been much more unfortunately treacherous to him in two other particulars relating to this business, for I shall show that he has made two palpable and important *misstatements* in regard to it.

Being called on by a resolution of the House of Representatives to state the amount of uncurrent paper which he received from the local banks that had been made depositories of public money received from the sale of public lands, he admits the receipt of a large amount from the Banks of Edwardsville, Missouri, and Tombeckbee. But as *an excuse* for his conduct, he represents those notes to have been deposited in these banks "before the date of their contracts," under which they agreed to account for the public deposits as specie.

This I do most unequivocally and positively aver to be *a misrepresentation* and an indefensible apology, and your honorable body cannot fail to be convinced of it by adverting to the contracts themselves. I will refer to only one of them at present. The very first article of the contract with the Bank of Edwardsville, under which it received the first cent of public deposits, is in the following words, viz: "1st. That the public moneys shall be entered to the credit of the Treasurer *as cash*," which may be seen in document No. 66, letter G Nos. 1 and 2.

But for his own opinion upon the subject, even in a case where there had been no express stipulation "to pay cash," I refer your honorable body to his letter, L No. 1, to the President of the Bank of Huntsville, dated January 11, 1818, where it will be found that he says: "In making the Planters and Merchants' Bank of Huntsville a place of deposit, at its particular solicitation, it was expected that the transfer of the funds which it undertook to make would be effected in funds that circulated at par at the place where the transfer was directed. As the Receiver had been directed to receive the bills on no banks which did not discharge them in specie upon demand, it was expected that the bank would be answerable for the amount deposited in specie, or in bills which would be received as specie, at the place to which the money should be directed to be transferred, unless it should state the contrary."

But this is not the worst case; he has, in the same report, misstated the amount of uncurrent notes which he did receive from those banks, *making it much less than it actually was;* and some of the *suppressed* letters in the correspondence with the Bank of Missouri will prove it.

This statement, no doubt, will surprise and astonish your honorable body; but you will not long regard it as a proof of temerity. I shall, however, content myself with barely stating enough to carry resistless conviction to your own minds of the truth of it. None shall doubt who will either read or hear the testimony exhibited to you by Mr. Crawford himself.

The suppressed letters B No. 13, from the President of the Bank of Missouri, dated October 11, 1819, and B No. 19, from Thomas Reddick, agent of that bank, dated February 18, 1820, taken in connexion with Mr. Crawford's settlement with the said agent, will prove that the sum of $1,175 which he (Mr. Crawford) received from that bank, though artfully stated so as to disguise the fact, was composed of $290 of notes on the Franklin Bank of Alexandria, and $885 on the Mechanics' Bank of Alexandria.

His own suppressed letter, B No. 7, dated May 29, 1819, contains a notification to the Bank of Missouri of the failure of the former of these banks. And a friend has furnished me with the following extract from the files of the National Intelligencer in regard to the latter, viz: "August 28, 1819. The Mechanics' Bank of Alexandria does not redeem its notes in specie, and its notes no longer pass here currently."

The suppressed letter, B No. 25, from himself to the President of the Bank of Missouri, dated November 14, 1820, and the President's answer, B No. 26, dated December 12, 1820, will show that he received from that bank $40,156 in notes on the Bank of Tennessee, and *its branches*, which were deposited in the Branch of the United States Bank at Louisville, on the 21st May, 1820, to meet the Treasurer's draft.

A report from Luke Lea, Pension Agent at Knoxville, to J. L. Edwards, of the Pension Office, dated January 27, 1823, shows that these notes were "*mostly on the branches of the Knoxville Bank.*"

I have in my possession proof that those branches stopped payment in the summer of 1819, but I deem it unnecessary to exhibit it, as every member of the delegation in Congress from Tennessee, as well as other members of Congress, must know that they had failed to redeem their notes in specie long before the notes in question were received by Mr. Crawford. It is only necessary to add that none of these notes are included in the amount of uncurrent notes reported by Mr. Crawford.

Now, though the probability that these misstatements were innocently made is somewhat weakened by the suppression of the letters that would have detected their inaccuracies, I do not deem it necessary to insist that they prove anything more than a greater degree of forgetfulness and inadvertence, than to have forgot or overlooked such a trifling affair as the letter mentioned in my examination. If they were intentional, it would prove the statement made against me so much the less entitled to credit.

In making deposits in the local banks of Louisville, Cincinnati, Chilicothe, and the District of Columbia, (in all of which places branches of the Bank of the United States were established,) and, in some instances, continuing those deposits for years in succession, without making any report thereof to Congress, Mr. Crawford must have forgot, *for a very long time* indeed, and on a great variety of occasions, both the letter and intention of the following section in the law establishing the Bank of the United States, viz:

"*Be it enacted, &c.*, That the deposits of the money of the United States in places in which the said bank or branches thereof may be established shall be made in said bank or branches thereof unless the Secretary of the Treasury shall, at any time, otherwise order and direct; in which case the Secretary of the Treasury *shall immediately* lay before Congress, if in session, and if not, *immediately after the commencement of the next session*, the reasons of such order or direction."

Indeed, I am under the impression that notwithstanding his compliance with the above requisition on the 10th December, 1817, which proved that it was then fresh in his recollection, and though his connexion with the Bank of the United States, its pressing wants, and the nature of the business he had to transact with it, were all calculated to recall his attention to that part of his duty almost every day, he himself has, in some one of his reports, admitted that he had overlooked it through "*mere inadvertence.*"

I regret to have to say to your honorable body that both the state of my health and the want of time absolutely compel me, most reluctantly, to close this investigation of Mr. Crawford's *well timed* statement against me. In this situation, I beg leave to refer you for further facts, of which I might, under more favorable circumstances, fairly and successfully avail myself, to a few of the publications under the signature of "A. B.," herewith transmitted.

Avowing myself the author of these publications, and (with the exception of a few unimportant typographical errors, and a mere verbal inaccuracy in regard to the time of a certain report being made) reasserting before your honorable body and the nation that the facts they allege are substantially true, I do most respectfully solicit that they may be taken as a part of, and be printed with, this communication.

In order to strengthen my claim to this indulgence, combining all the rights of defence, of accusation, and of asking for investigation which can entitle me, as a citizen of the United States, or an officer of their Government, to appear before your honorable body, I do expressly state:

1. That the Hon. William H. Crawford, Secretary of the Treasury, has mismanaged the national funds.
2. That he has received a large amount of uncurrent notes from certain banks, in part discharge of their debts to the United States, contrary to the resolution of Congress of 1816.
3. That, being called on by a resolution of the House of Representatives to state the amount of uncurrent notes which he received from these banks, he has misstated it, making it less than it really was.
4. That he has, in his report to the House, misrepresented the obligations of those banks, or some one of them at least, and predicated thereon an indefensible excuse for his conduct in receiving those uncurrent notes.
5. That he has acted illegally, in a variety of instances, by making and continuing deposits of public money in certain local banks, without making report thereof to Congress according to law; and
6. That he has, in several instances, withheld information and letters called for by the House, and which it was his duty to have communicated.

His oath.—Let it speak for itself.

For specifications of these statements, I offer the publications under the signature of A. B. above mentioned, and this communication; and, for proof, I offer that which they respectively refer to.

All this I do defensively; for, if the facts stated be true, no rational man can doubt that they must weaken, at least, the force of Mr. Crawford's statement against me.

I will not charge him with bad intentions in any of those acts. It is more properly the duty of others to inquire into and judge of that matter. I do not ask for an investigation of his conduct. Such a request ought more naturally to be looked for from himself. But I will say that if, being an officer of the same Government under which he holds his office, I have wilfully and maliciously misrepresented him in the six foregoing allegations, it is a misdemeanor that would prove me unworthy of the office I hold. I invite him, or any of his friends, to make this charge against me, pledging myself to waive all notice, and, with all the disadvantages of absence, to submit to an investigation thereof by either or both houses of Congress, and to abide by the decision thereupon. If this proposition is declined, I trust we shall have no more canting about an "A. B. plot." As to myself, I fear not the consequences of any fair investigation, for I know I shall be able, whatever may be the result, to justify myself to the nation.

And never having obtained any office by the slightest sacrifice of independence, I never will owe the holding of one to reluctant forbearance or the courtesy of my enemies.

I will only add, that if any attempt should hereafter be made *meanly* to take advantage of my absence, by those who have forborne to attack me when I could have had an opportunity of defending myself, I must beg of your honorable body and the nation to suspend your opinions, and to be assured that there shall be no avoidable delay in vindicating myself. I have in reserve much matter of defensive accusation, and should most certainly have invited your attention to the report concerning the Receiver of Public Moneys at Huntsville, and other matters of not less importance, had time permitted.

NINIAN EDWARDS.

WHEELING, VIRGINIA, *April* 6, 1824.

No. 1.

Resolved, That a committee be appointed to ascertain by whom the suppression of the paragraph in the letter of William R. Dickinson, Cashier of the Bank of Steubenville, to the Secretary of the Treasury, dated the —— day of ————, 1819, and by him communicated to this House at the last session, was caused, with leave to sit during the sessions of this House, and with power to send for persons and papers.

And that the said committee be instructed to prepare and report to this House a digest of the evidence contained in the printed documents, in which the said printed letter (A 5) is included, if any such there be, showing whether uncurrent or depreciated bank notes were taken, in lieu of cash, from any of the banks in which the public moneys were deposited; whether the public moneys have not been discontinued to be deposited in branches of the United States Bank, and placed in certain local banks situated in the same towns and neighborhood, without complying with the directions of the law on that subject, and whether such transfers have not resulted in loss to the Government; whether the public money has not been loaned to those banks, in which standing deposits were made under the name of deposits, and whether such loans or deposits have not resulted in loss to the Government; whether security was not neglected to be taken, in some one or more instances, for the punctuality of one or more banks, which proposed to give such security, and whether such failure has not resulted in loss to the Government.

No. 2.

Interrogatories proposed to the Hon. Ninian Edwards, a Senator from Illinois, which were answered under oath.

THURSDAY, *February* 13, 1823.

Interrogatory 1. Have you at any time, and if yea, at what time or times, seen the *Documents* now shown to you, of which (A 5) is a part, and which in printed documents is No. 66; where did you see them, and how often?

Answer. I am not here of my own suggestion, but by the *request* of the committee. The manuscript documents, which include (A 5) were brought to my room; at my request, by Mr. Cook, for my examination; and I did examine those parts which I was desirous to see, in the presence of Mr. Cook and the Hon. Thomas Van Swearingen, then a member of the House of Representatives; very soon after which examination Mr. Cook retired from my room and took the documents with him, and I never have seen them since until the present time. As well as I remember, the House of Representatives directed Mr. Crawford's report to be published without the documents, and Mr. Cook told me that he had been permitted to take the documents into his possession for examination; upon which I requested him to bring them to my room. This was some time during the last session of Congress, and before the documents were printed.

Interrogatory 2. What part of said documents did you examine particularly?

Answer. I examined those that related to the Bank of Edwardsville pretty minutely, partially those that related to the Bank of Missouri, and I think it probable that I examined a part of the documents that related to the Tombeckbe Bank; I am under the impression that I did. I have not the slightest recollection of having examined any other part of the documents.

Interrogatory 3. Look at the letter A 5, now shown to you, and the pencil marks and underscoring thereupon. Did you, when you made the examination of the documents, see and read this letter? If yea, did you discover upon its face the marks it now wears?

Answer. I did not examine the documents relating to the Bank of Steubenville. I had no motive to lead me to their examination, and I did not see the letter marked A 5, nor did I see or hear of any marks upon it, or upon any other letter at that time.

Interrogatory 4. Do you know by whom said marks or underscoring or any part of them were made?

Answer. I do not. They were not made by me, nor by any other person in my presence.

Interrogatory 5. When did you first hear the marks upon this letter (A 5) spoken of, and by whom?

Answer. I think I heard them first spoken of last winter, after the documents were printed, by Mr. Cook, but I cannot state precisely the time.

Interrogatory 6. Did Mr. Cook state to you when or how he first discovered the marks upon A 5?

Answer. All that I can recollect that throws any light upon that subject is this: Mr. Cook had stated to me that such expressions as are contained in the suppressed paragraph of the letter A 5 were in the documents, and afterwards, upon reading the printed documents, and not being able to find these expressions, I reminded him of his having told me that there were such expressions in some part of the documents. I have always supposed that that was his reason for examining the documents, for he afterwards stated that the paragraphs were marked.

Interrogatory 7. What led you to the examination of the documents brought to your room by Mr. Cook at your request?

Answer. There were two objects: the first of which was, that I heard of certain suggestions which I supposed were intended to criminate me in relation to the Bank of Edwardsville, and wished to see what the documents contained on that subject; and, particularly, one or more letters, which I believe had been written to Mr. Crawford in 1819. The other was a statement which I had seen, or understood to be in Mr. Crawford's report, and which I thought I knew to be erroneous, to wit: That the uncurrent paper which he received from the Bank of Edwardsville had been received by that bank before the date of the contract under which it agreed to pay specie. Because I, myself, had made the arrangement with him concerning the bank, and knew that the first article of the contract under which it became a depository of public money was, that the deposit should be entered to the credit of the Treasurer as cash. I did not examine the documents with reference to any other object.

Interrogatory 8. Were you at any time a Director of the Edwardsville Bank? Did you resign your seat as such Director? If yea, at what time? And was it, or was it not, because you believed that the circumstances of said bank were impaired, and that it would be compelled to stop? When did said bank stop?

Answer. I was a Director of the Bank of Edwardsville. It was organized about the time I left Edwardsville, in the fall of 1818, to take my seat in the Senate of the United States. Previous to that time, the public moneys received at Kaskaskias and Edwardsville were deposited in the Bank of Missouri at St. Louis, as I understood, by the directions of the Secretary of the Treasury; and believing that the money received by these offices would be equally as safe in the Bank of Edwardsville as in the Bank of Missouri, in which opinion subsequent events have proved that I was not mistaken, I applied to the Secretary of the Treasury to have the money received by these offices deposited in the Bank of Edwardsville, which he readily agree to do. On my return to Edwardsville from Congress, in 1819, I found that a great run was made upon the bank, resulting, as I then believed, and still believe, from a formidable combination against it; and fearing that it might, at some time or other, fail to fulfil its engagements to the Government, I determined to sustain it against the run that was then made upon it; to get, if possible, out of the reach of danger, and then to free myself from all responsibility with regard to it. Accordingly, some time in 1819, I made a publication in the St. Louis Enquirer, Edwardsville Spectator, and I think one other paper, the object of which was to give public notice and to apprise the Secretary of the Treasury of my intention to withdraw from the bank, and my determination to relieve myself from all responsibility in regard to it; leaving the Secretary to judge for himself, from the returns he required it to make, of the propriety of continuing it a depository of public money; and although I believed the St. Louis Enquirer was sent to him, I enclosed him a paper containing my publication; and that he might have as perfect control of the subject as possible, I prevailed upon Colonel Benjamin Stephenson, the Receiver and the President of the Bank of Edwardsville, who apprehended that ill consequences would result from my withdrawing from it, to write to the Secretary of the Treasury upon the subject, and enclose him one of my publications; and I advised him, in the meantime, to withhold all further deposits till he could receive the orders of the Secretary; and I believe he did so, though I do not positively know it. I saw him write the letter and enclose the publication, and I have no doubt the Secretary received it. Colonel Stephenson afterwards informed me that he had received a letter from the Secretary of the Treasury, directing him to continue the deposits in the bank, and I was much surprised at not seeing this correspondence in the report, as well as one or more letters which I confidently believe were written to the Secretary of the Treasury in 1819, for the purpose of apprising him of the situation of the bank at that time, and inducing him to forbear to draw upon it until it could relieve itself from the pressure it was then encountering. The bank continuing to pay specie notwithstanding the pressure, and in the fall of that year, I expect, was in as good situation as any bank in which the public money was then deposited.

According to the pledge which I gave in my publication, I resigned my seat as a Director, and though I was once elected to the same station since that time I refused to accept it, nor have I had anything to do with the management of the bank since the fall of the year 1819; and that I might not be liable even to the suspicion of having been influenced by interested motives, in consequence of a hundred shares which I held in the bank, I have never borrowed one cent from it, though I paid the instalments required of me upon my shares in good money. I presume the documents will show when the bank stopped; I think it was in 1821, in the latter part of the summer or the first of the fall; it continued after that to redeem its notes under ten dollars.

Interrogatory 9. Can you furnish to the committee a copy of the publication referred to in your answer to the last interrogatory? If not, state it as well as you can recollect it.

Answer. I cannot furnish such a copy, but think that Mr. Crawford could; and presume that Colonel Benton recollects it. I think it substantially contained what I have stated in pretty express terms.

TUESDAY MORNING, *February* 19, 1823.

Mr. DICKINS examined:

Interrogatory 1. Were you at the office of the Intelligencer at any time during the printing of the documents of which (A 5) is a part? If yea, for what purpose?

Answer. I do not know that I was at the office of the Intelligencer during that time, nor do I know how long the documents were in possession of the printers. I never saw the documents whilst in their possession, nor expressed to them any wish in relation to the documents.

Mr. BURCH examined:

Interogatory 1. Look at the underscoring upon the suppressed paragraph of A 5; is there anything in the ink with which said underscoring has been made which can lead you to pass any opinion upon the character of the mark?

Answer. The underscoring upon the said letter is, in my opinion, in a different ink from that with which the body of the letter is written. It is not the ink of the Clerk's office of the House of Representatives; it is not so black, but approaches nearer the color of that furnished members during the last session of Congress.

Interrogatory 2. Is there anything peculiar in the character of the ink furnished members of Congress which can enable you to identify it?

Answer. The ink, after being used for some time, assumed a rusty color, such as is exhibited by the underscoring upon the letter A 5; instead of growing black, as it grows older, it fades and rusts.

Mr. Cook re-examined on the 22d February.

Question 1. At what time did you first become acquainted with the practice, in the office of the Intelligencer, of omitting to print those parts of documents marked with crosses, and included in brackets?

Answer. I never heard of such a practice until I heard it stated to the other committee of investigation by the printers.

Question 2. How long after the documents were returned by you to the House was it before you moved that they should be printed?

Answer. I think it was not more than two or three days, but I cannot say exactly how long it was.

Question 3. Do you think it was not on the same day?

Answer. I think it was not. It appears to me the documents lay in my drawer in the House of Representatives at least one day before I made the motion, and probably longer.

Question 4. Were you in the habit of locking your drawer?

Answer No, I was not, except on some occasions, when the House adjourned from Friday or Saturday until Monday; and not always then.

Bank of Steubenville, *February* 10, 1823.

Dear Sir: I have just received yours of the 29th ultimo, calling my attention to a paragraph in my letter to the Secretary of the Treasury, of the 3d of April, 1819, which paragraph was omitted by the printer, on a call of the House of Representatives.

I have examined the book containing a copy of that letter, and have conversed with the Clerk of the bank on the subject. We are both satisfied that no part was underscored, or marked in any way, when it left the bank. How, or by whom it was thus marked, or for what purpose, I am totally ignorant.

Surely there was no just reason for suppressing that paragraph; the circumstance to which it referred being really trifling in itself, although, in the warmth of the moment, I gave an importance to it which this unfortunate suppression is calculated to magnify. The debt of eighteen thousand dollars, transferred from the Branch at Chilicothe to the Bank of Columbia, (where the whole amount of the special deposit was ordered to be placed,) and thence to this bank, was faithfully paid with interest.

If it had remained at either of those places it would have been as faithfully paid. It was the property of the Government, and its character was not changed by the transfer.

I am, very truly, dear sir, your obedient servant,

W. R. DICKINSON.

A. Dickins, Esq.

Letter from the Secretary of the Treasury to the Committee appointed on the above subject.

Treasury Department, *February* 24, 1823.

Sir: In reply to your letter of the 10th instant, enclosing a resolution of the House of Representatives of the 6th of the same month, and requesting the communication of any information not already communicated as may be in possession of the Department, I have the honor to observe that when the Bank of the United States went into operation an effort was made to simplify the operations of the Treasury through the instrumentality of that institution. To give to this effort the greatest efficiency, it was agreed that the bank should have the selection, not only of the State banks in which the public money should be deposited, in places where it had established no office, but of those whose notes should be received on account of the revenue; and that all money so deposited should be entered to the credit of the Bank of the United States, in trust for the Treasurer of the United States. It was further agreed that the Treasurer might draw upon the bank at any place where the public money was deposited, whether there were any public money at such place or not, with the understanding, however, that reasonable notice should be given to the bank when it was intended to draw for any considerable amount beyond the sum on deposit at such place.

This project was generally carried into effect in the course of 1817, after the State banks had resumed specie payments. The notes of all such banks, in the western States, were received by the land officers, and deposited as specie in the offices of the Bank of the United States, and in the State banks employed as offices of deposit.

This plan of simplifying the operations of the Treasury was, in the course of 1818, interrupted, on the one hand, by the complaints of the State banks employed as offices of deposit, that the Bank of the United States acted oppressively and capriciously towards them, by subjecting them to all the inconveniences incident to the relation they held, and depriving them of most of the advantages which they had a right to expect from that relation; and, on the other, by those of the Bank of the United States, alleging that the State banks were desirous of appropriating to themselves all the advantages of their situation, without bearing any part of the burdens imposed upon it by its charter, or by the arrangement made with the Treasury, one of the most onerous of which was the implied obligation it had incurred of guaranteeing not only the solvency of those banks, while they were employed as offices, but also of the other State banks whose notes were received on account of the revenue. This state of collision and irritation continued increasing until the autum of 1818, when the bank notified the Department that it could no longer execute its arrangement without sacrificing the essential interests of the institution. At the same time it declared its determination to receive from the land officers nothing but its own notes and the current coin of the Union, except as special deposit. Shortly after this determination many of the western banks stopped payment.

The experience of the bank had, about this period, led to the conviction that it was impracticable to keep its notes in circulation in the western States, and orders were, consequently, issued in the course of the autumn or in the early part of 1819, forbidding its western offices to issue their notes, even on a

deposit of specie. The determination which it had formed, in relation to payments on account of the public lands, was, therefore, practically, a determination to receive nothing but current gold and silver coin, which was nearly as difficult to be obtained, in the western States, as the notes of the Bank of the United States. At this time there was due the United States nearly twenty millions of dollars by the purchasers of the public lands, a great part of which debt had been contracted during the suspension of specie payments, and in the years 1817 and 1818, when the notes of nearly all the western banks were receivable in payment. It was manifest, upon the slightest reflection, that this determination of the bank would greatly reduce the receipts into the Treasury from that important branch of the public revenue, but that consideration would not alone have been sufficient to have induced the Executive Department to have assumed the responsibility of the measure, which was, with great deliberation, adopted upon the occasion.

To have permitted the distress and ruin in which the purchasers of the public lands would have been involved, by the refusal to receive from them any thing in payment but the current coin of the Union and notes of the Bank of the United States, under such circumstances, without an effort of the Executive Department to avert them, would have excited feelings in a large and meritorious body of citizens which no prudent Government, even if despotic, could have seen with indifference. It is confidently believed that, if no such effort had been made, the Executive Department of the Government would have been charged with the most shameful imbecility, and that the Treasury Department would have been loaded with the public execration. If an effort was to be made to afford relief, the alternative presented was to continue to receive the notes of the few banks in the west which still continue to pay specie, and enter them to the credit of the Treasurer, in the offices of the bank, as special deposit, or to deposit them in State banks, upon conditions which would make it to their interest to return them into circulation as soon as practicable, on account of the Government. In the first case they would have accumulated in those offices without the possibility of being put again into circulation on account of the Government, as those offices would have had no inducement to make exertions to convert them into specie, or transfer the amount by the purchase of bills of exchange upon New Orleans or upon the Atlantic cities. To effect either of these operations, it was manifest that the employment of the State banks was indispensable.

The arrangements proposed were maturely considered and adopted with the approbation of the President, who was fully sensible of the importance of the crisis which had arrived.

The inducements which were offered to those banks to resume and continue specie payments and to transfer the excess of the public revenue collected in the western States, beyond the expenditure, to places where it could be expended, were believed to be both justifiable and sufficient to insure success; and the result has proven that nothing was necessary to the most complete success but the want of integrity in those who had the direction of some of those institutions.* Against this contingency the Department availed itself of all the means within its reach, and confided in the representations of gentlemen who occupied high and responsible stations in the public councils, whose judgment and integrity were considered unquestionable, [and whose] means of information excluded almost the possibility of mistake. Notwithstanding the want of integrity which has been manifested by the Directors of several of those banks which have failed, it is still confidently believed that, after making a liberal allowance for any loss which possibly may occur by the Farmers and Mechanics' Bank of Cincinnati, the Banks of Vincennes, Edwardsville, and Missouri, the benefits which have resulted from those arrangements will greatly preponderate over such loss.

It is impossible to state whether any loss will eventually be sustained by the Government from either of those banks. No apprehension is entertained of loss from any other. The Farmers and Mechanics' Bank of Cincinnati is, therefore, the only one in which public money has been deposited, where the Bank of the United States had established an office, from which there is any danger of loss.

That bank, in a very short time after it resumed specie payments, in conformity with its agreement with the Treasury Department, stopped payment, and has never made any return or answered any of the demands which have been made upon it for information. The impression in relation to it has therefore been very unfavorable. A suit has been brought against it, in the federal court, for the amount of public money in its possession, which has not yet been decided.

The arrangements made with the Farmers and Mechanics' Bank of Cincinnati, the Bank of Chilicothe, and the branch of the Bank of Kentucky, at Louisville, where offices of the Bank of the United States had been established, by which the public moneys collected at the land offices in the vicinity of those banks were deposited in them, were not communicated to Congress at the next session after their date, from mere inadvertence to the provision of the charter to which the resolution refers. They were, however, matters of general notoriety, not only in the western States, but in the other parts of the Union. Omissions of this nature have frequently occurred in the Departments, and, it is presumed, will occur hereafter, with officers the most attentive. The notoriety, however, which attended these arrangements with the banks, it is presumed, will satisfy the committee that there was neither a wish nor intention to withhold from Congress the fact of such deposits, and the reason upon which the measure was founded.

The papers which are herewith transmitted support the views presented in this letter.

I remain, with respect, your obedient servant,

WM. H. CRAWFORD.

Hon. JOHN W. CAMPBELL, *Chairman of the Select Committee.*

No. 3.

[I wished to have prefaced my examination with the following remarks, and had written them out for that purpose, but I could not be indulged in doing so by the committee.]

I wish it to be distinctly understood that I am not now before this honorable committee as a volunteer to offer my testimony, nor has my attendance as a witness been produced, as far as I am informed, by the

* This is proven by the fact that the banks of Illinois, of Madison, and of Columbus, have fulfilled their engagements with fidelity, and still continue to fulfil them; and that the Bank of Chilicothe faithfully fulfilled its engagements as long as they existed.

request, solicitation, suggestion, or procurement of any one or more of my personal or political friends. On the contrary, I am not free from the suspicion that some persons, at least, who have been most anxious for my examination, have been influenced by the hope of extorting some circumstance from me, which might at the same time afford a pretext for implications against myself and a plausible means of lessening the weight of suspicion and censure upon others; I therefore trust that the most ample explanations which I may deem it necessary to give, either for a correct understanding, or for a confirmation of the facts I am about to relate, will not be considered by the committee as improper or irrelevant.

Before I proceed, however, I beg leave to protest against any proceeding, under whatever form or howsoever disguised, which assumes the authority, or has for its object, to compel any citizen of the Union to give evidence against himself in relation to an offence of which he may be suspected to be guilty, either as principal or *particeps criminis*, as being repugnant to and violative of those well established and sacred principles of our Government which are the guaranty of life, liberty, personal security, and property. And that no such right of coercion may be drawn into precedent through my instrumentality, or by passive acquiescence or tame submission on my part, I deem it proper to declare that I freely waive all such objections, and cheerfully submit to an examination, even if the object of it be my own crimination, from considerations of a very different nature.

No. 4 and 5.—B. No. 4.

TREASURY DEPARTMENT, *March* 23, 1819.

SIR: By a statement from the Bank of the United States it appears that certain deposits mentioned below, made in the Bank of Missouri to the credit of the Bank of the United States for the use of the Treasurer, have been credited by you as "special deposits."

I have to request that you will inform me of the circumstances under which those deposits were received, and of what moneys they consist.

I am, &c.,

W. H. CRAWFORD,
Secretary of the Treasury.

JOHN DALES, Esq., *Cashier of the Bank of Missouri, St. Louis.*

December 31, 1817, by S. Bond	$52,000 00
January 8, 1818, by B. Stephenson	12,477 58
January 9, 1818, by A. Hayes	136 00
	64,613 58

B. No. 5.

BANK OF MISSOURI, *June* 25, 1819.

SIR: Your favor of the 23d of March last did not come to hand until the 16th instant, by a private conveyance from the State of Illinois. The deposits alluded to, say Bond and Stephenson's, were received prior to this institution being informed of its appointment as an office of deposit, or had received its instructions. The receipts were given payable to the order of the Secretary of the Treasury, in such current bank notes as were then received by the Receivers of Public Moneys, and consisted of Cincinnati, Chilicothe, State Bank of Kentucky and branches, Tennessee, North and South Carolina, Vincennes, and Shawneetown notes.

The special deposits of John Hayes, Collector, were uncurrent, viz:

One Kentucky Insurance Company note of	$20 00
One Lebanon, Miami, Banking Company	50 00
One Bank of Marietta, Ohio	5 00
One Muskingum Bank, Ohio	5 00
One Exchange Bank of Indiana	5 00
One Pittsburg Manufacturing Company	5 00
Two Union Bank of Pennsylvania, each $5	10 00
One Westmoreland Bank of Pennsylvania	20 00
One Centre Bank of Pennsylvania	10 00
One Marietta, Lancaster County	5 00
One Banque de la Louisiane	1 00
	136 00

I am, with great respect, sir, your obedient servant,

JOHN DALES, *Cashier.*

Hon. W. H. CRAWFORD, *Secretary of the Treasury.*

No. 6.

Extract from Mr. Crawford's Report, December 10, 1817.

"In making the transfers from the State banks, the special deposits, of which they were, in some instances, principally composed, presented considerable embarrassment. The Bank of the United States

tendered its services for the purpose of exchanging for specie, or bills of the banks in commercial cities, those deposits which were principally confined to the interior of the middle and western States. This offer was accepted; and, although great exertions were made by the bank to effect that object, much remains to be done. Indeed, the amount of special deposits is now nearly as large as when the agency of the bank was accepted. This has arisen from the immense number of local banks scattered over the interior of the States of Pennsylvania and Ohio, most of which, ostensibly, pay their bills in specie. The paper, however, of these banks, is not received, in most cases, by each other, as specie; and the experience which the Bank of the United States, in the execution of its agency, has acquired of the character and standing of many of them, has induced it generally to refuse the bills of those banks. *In order to put an end to an evil which seems rather to increase than diminish, general instructions have been given to the Collectors of the internal revenue to receive bills of no bank which will not be credited as specie* in the Bank of the United States, its offices, and State banks, employed as places of deposit, where they are respectively required to make their deposits. *As soon as the offices established at Louisville, Chilicothe, and Pittsburg, have gone into operation, and shall have thrown into circulation a reasonable amount of their bills, they will be made the sole depositories of the public moneys arising from the sales of land in the States of Ohio and Indiana; and instructions, similar to those already given to the Collectors, will be given to the Receivers of public money in those States.*

It is only after this arrangement shall be effected that the Bank of the United States will enjoy, *in their just extent, the advantages intended to be secured to it by the charter*, Under the limited enjoyment of those advantages, which general circumstances seemed to impose, the conduct of the bank is entitled to high commendation. The Directors have in no instance urged *their claim* to an earlier transfer of the public money, *which remained* in the possession of the State or local banks. There is much reason, also, to believe that, in its intercourse with the State banks, and in the execution of the agency confided to it by this Department, a spirit of justice and liberality has been constantly manifested.

I have the honor to be, &c.,

W. H. CRAWFORD.

Hon. PRESIDENT *of the Senate and the Hon. Speaker of the House of Representatives.*

No. 7.

JANUARY 19, 1823.

SIR: I am informed that you have made objections to the appointment of Major Winchester to the office of Receiver of Public Moneys at Edwardsville, which a sense of justice both to him and myself renders it my duty to endeavor to obviate; and I flatter myself that if, on a review of the circumstances of his case, together with the explanations which I am constrained to give, you should not be fully satisfied that they are sufficient to warrant implications of the grossest dishonor and blackest turpitude, you have too much charity and justice to credit, much less to act upon them in such a manner as would inevitably fix upon his character a stain of the deepest dye.

Your objections, as I understand them, are predicated upon the supposition that he has confederated with others for the base and diabolical purpose of robbing the public Treasury, by taking, and applying to their own use, the public money which was in the hands of the late Receiver, his father-in-law.

The proof to justify presumptions of such outrageous depravity ought, in any case, to be very strong. In regard to an amiable but distressed family, whose honor and integrity even the utmost acerbity of party broils and contentions has never yet ventured to assail, the proof ought to be irresistible.

Major Winchester's character is neither a negative one nor has it been negatively supported. To say nothing of the favorable opinion of him which has been expressed by citizens of his own State, his standing and reputation are most honorably sustained by the recommendations of many disinterested gentlemen, who could have no possible motive to mislead and impose upon the administration in his case. Among them are Colonel Benton, Judge Barton, General Rector, Judge Peck, and others of great respectability in Missouri and Tennessee. If those gentlemen are to be believed, *is it credible* that such a man as they show Major Winchester to be should have entered into a *plot* which would forever blast his own fair fame and fix indelible disgrace upon the unstained reputation of the mother of his own wife? I cannot believe it. The very application which he makes for the appointment in question, it appears to me, completely negatives all such unfavorable inferences. He would not apply for the office without intending to hold it; and he could not expect to hold it if he meditated the dishonorable purposes that are imputed to him, and which it would be impossible to conceal.

Even his own direct interest in regard to the money alluded to, I should suppose, would be sufficient to prevent his participation in a scheme so criminal and disgraceful. Being, as he informed me he was, the security of Colonel Stephenson, he is now answerable for every cent of the money received and not paid into the public Treasury. To cause it to be misapplied would only render his loss the more certain. There could be no adequate inducements to appropriate it to his own use, under such circumstances, without a total abandonment of all prospects of future prosperity. To wish it appropriated, in part or the whole, to the use of others, would be nothing short of madness. He, therefore, must be both knave and fool if he has engaged in any such projects.

What, then, is the proof to fix upon him those injurious suspicions? Nothing more than that "he declined the administration of the estate, and that it has been given to two young men of Edwardsville, of little or no property," who are supposed to be mere instruments for consummating the intended fraud. Of these gentlemen I will speak first. I have known them both intimately, and one of them for many years; and I declare, upon my honor, that if I have ever heard the slightest suspicion of the integrity of either of them it has totally escaped my recollection. They are both men of business, who have been most extensively confided in; neither I think is less than about thirty years of age, one is older, and better characters than theirs I have never known. Mr. McKenney has property in Edwardsville that cannot be worth less, I should think, than $2,000; and they own, in partnership, a first rate tract of land, and a farm, in the American Bottom, about six miles from St. Louis; and with regard to Mr. Rockwell's property I know but little. He, however, married the daughter and only child of one of the most amiable and respectable families in the State, who, to use a common phrase, appear to be pretty "full handed." These gentlemen were the particular and intimate friends of Colonel Stephenson and his family, and this,

I suppose, was the cause of their being selected, and consenting to administer the estate; and I hazard nothing in saying a better selection could not have been made.

I infer that these gentlemen are intended to be implicated because the objection to Major Winchester seems to be founded, not only upon his declining the administration, but upon the character or description of those to whom it has been committed. Is it possible, sir, that either assertion has been made, or the least proof exhibited, to impeach their characters? I presume not. Without proof, the assumption that they would be base enough to lend themselves as willing instruments of fraud is wholly gratuitous, and ought not, I think, to be indulged for the purpose of eking out a most improbable suspicion of Major Winchester. What motive could tempt them to jeopardize, not only their characters, but their interest, by such a course? They must have given ample security, or they could not have obtained letters of administration, for the judge of probate is, and has long been, one of the most violent personal and political enemies of Colonel Stephenson, Major Winchester, and their friends. No presumption, therefore, can be indulged that he has failed to perform his duty in requiring adequate security. If the public money has been committed to their charge, it must be safe, and neither Mrs. Stephenson nor Major Winchester could have given a better proof of not intending to apply it to their own use than surrendering it into the hands of the administrators. On the other hand, if it has not been given up to them, their youth, want of property, and characters, whatever they may be, cannot, in regard to the money, have had any influence in their selection, and can be entitled to no weight in fixing the charge upon Major Winchester, of having procured their appointment with the views that are attributed to him.

That the money has not been surrendered to them, and that it would not have been given up to any administrator, I think extremely probable. Administration gives no control over any but the property of the intestate. The public money, locked up in the Government's own strong box, is not, nor ought it to be, considered Colonel Stephenson's any more than munitions of war, or any other public property in the hands of an agent, should be considered as his. I have supposed that it is more proper that the money should be delivered to your order, or the successor of the late Receiver. Considering the nature of the duties of administrators in paying debts, as prescribed by law, and that they are not suable for twelve months, I should think it a very dangerous principle on the part of the Government to contend that money, under such circumstances, should be given up to them for the purposes of administration, and I have no doubt that equity would enjoin any attempt to act upon it, as a part of the estate of an intestate, which is all that an administrator can have any control over, or is responsible for, by virtue of any of the engagements imposed upon him by law.

The money never was in the possession of Major Winchester. The day I left Edwardsville, which was nine days after the death of the late Receiver, Mrs. Stephenson informed me that the public money was in her possession, locked up in the strong box which had been purchased for the Government; that it had not been opened, and that she should keep it till it could be paid to the Government; adverting to a report that her husband was behindhand with the Government to the amount of about $3,000, which she had never heard of till after his death, she said every cent should be paid, if it took all the property they had in the world.

Owing to certain persevering and successful measures to produce a coolness between Colonel Stephenson's family and myself, our intercourse had been so suspended or altered that I knew less of his affairs during last year than at any former period of our acquaintance, and I was much surprised at the suggestion of his not being able to pay every cent he had received for the Government, and could only account for it upon the supposition that he had anticipated an allowance he expected for services under the relief law, and for certain other accounts which I knew he intended to exhibit. If, however, the amount of his defalcation does not exceed what has been stated, his property, independent of the debts due him, is worth more than double that amount, and it is free from embarrassment; all his other debts being very inconsiderable. I would myself give more than the amount supposed for his farm adjoining Edwardsville. He may have been imprudent in loaning money, and I have no doubt he was so, because I understood before I left home that a list of loaned money had been found among his papers, but I am persuaded, though you did not know as much of him as I did, you know enough to be satisfied that no man could have supported a more honest character than he did throughout the whole course of his life. His wife and family, I do believe, have too much pride to permit his memory to be stained with the reproach of having wronged the Government out of a cent. Even the injustice of prejudging them without proof, if it should happen, and the rejection of Major Winchester on such a supposition, though more likely than any other means my imagination can conceive of to produce such result, would not, I think, be sufficient, with all other motives combined, to induce them to withhold the money from the Government. This, however, can only be matter of opinion. It is honestly mine, though there is a possibility that I may be mistaken.

Upon this view of the subject, the character and description of the administrators may, I hope, be considered as fairly disposed of, so as not to warrant any inference to the prejudice of Major Winchester.

The only proof then remaining against him is, that he did not administer upon the estate; is this sufficient? Had he administered he would not have got the public money in virtue thereof, and a variety of other considerations might have rendered him unwilling to take upon himself the administration. But I owe it to him to state, and I do it without the least apprehension of not being able to justify myself, that he consulted me, and I advised him to have nothing to do either with the office or with the money, unless he should be previously authorized by yourself. I, however, exceedingly regret that in justifying my advice I am compelled, contrary to my inclinations and the settled determination with which I returned to Congress, to allude to circumstances of an unpleasant character, but as my advice was given upon a statement made to me by himself, I must briefly notice it.

He informed me that it was said and believed that Mr. Lowry, whom you appointed to examine the land offices, had disclosed the fact that there was unaccounted for, in the hands of Colonel Stephenson, a sum of money, the exact amount of which he did not know, but understood to be about $3,000; that this disclosure was made previous to our late election, and that it was used in a most extraordinary manner, which I now forbear to state, for the purpose of having an influence upon the election.

As, therefore, it was rendered probable there was a deficiency of money, the amount of which could not be precisely ascertained, and as it might possibly be greater than had been supposed, I advised him to have nothing to do with it, lest a part of the actual deficiency might be supposed to have been produced after it came into his hands, and as he had never had anything to do with the office, in any way whatever, his safest course was to keep clear of any kind of agency in relation to it, unless authorized by yourself. This course, I think, every prudent man must have felt the necessity of adopting under similar

circumstances, especially as there appeared to be no reason to doubt that the money would be equally safe in the hands of Mrs. Stephenson.

Whatever, therefore, may be the case in relation to Colonel Stephenson or any one else, Major Winchester is in nowise answerable for it. He rests his pretensions upon his own merit, and in that point of view I think they ought to be considered.

I appreciate your motives in wishing to save the public money; but, seeing that Major Winchester has been so long presented as a candidate, I can but regret that implications of so serious character should have been delayed so long that it is utterly out of his power to defend himself against them in time to prevent their ill effects. The extreme hardship of such a proceeding must be obvious to every reflecting man. He, I am persuaded, anticipated no such opposition or imputations, and I cannot readily imagine how he could have taken a better course for avoiding them. If I could believe that he justly merited them, be assured he should not have my support; and I am greatly mistaken in the man if he fails to vindicate himself as soon as he has an opportunity to do so.

I also regret that the office should have remained so long vacant, and if not, by that means, jeopardizing the money, at least producing great inconveniences and hardships, that will require legislative interposition. For it is probable that there has not been a day, Sundays excepted, on which instalments have not been falling due; and as those instalments bear interest from their commencement, which can only be avoided by punctual payment, the amount of interest that will accumulate must be very considerable.

I have the honor to be, very respectfully, sir, your most obedient servant,

NINIAN EDWARDS.

No. 8.

I have felt the consequences of this gentleman's unprovoked hostility, not only at Washington, but in Illinois also. To show to what he can descend, I will state a fact, which must be regarded with astonishment by every highminded gentleman who may be informed of it. It has heretofore been published, and never has been denied, at least, publicly.

A quondam friend of Mr. Crawford, in Illinois, applied to him for a statement of a certain gentleman's account in the Treasury Department, intending to use it against that gentleman in a county election for the State Legislature. The statement was transmitted, and freely used in the election, being referred to in handbills, &c., This cannot be denied, or if it should be, it can be proved.

No. 9.

It will also be seen, in the progress of this investigation, that I had made this same statement substantially to himself more than twelve months before my examination, before any of his suppressions had been discovered.

No. 11.

Report of the Select Committee to whom was referred the Report of the Bank of Missouri.

The committee to whom was referred the report of the Bank of Missouri have had that report under consideration. A copy of the resolutions, marked A, herewith reported, was forwarded to the President of the Bank of St. Louis, and also to the President of the Branch Bank at St. Genevieve. The report of the Branch Bank, marked B, is herewith reported; and the President and Clerk of the bank, in obedience to the request of your committee, have brought the books, notes, and such other papers of the bank as were necessary to give the information wanted, which have been carefully examined.

A list of the names of stockholders, showing the transfers made since the suspension of specie payments, and marked C, is also reported.

The bank has also furnished lists of debts due for which stock is pledged, debts due on personal security, and debts secured by mortgage, balances on books, all of which items were verified by a comparison with the notes and books of the bank, and a statement, marked D, herewith reported.

Your committee have examined, in part, the correspondence of the directory of the bank; and, for the information of the House, have made extracts from letters from the Hon. Wm. H. Crawford, Secretary of the Treasury Department of the United States.

"1. The bank will receive from the Receivers of Public Moneys, and others having moneys to deposit on account of the Treasurer, the paper of such banks as pay their notes in specie on demand, and are otherwise in good credit, and whose paper is in circulation in its vicinity, (a list of which will be furnished by it to the Secretary of the Treasury,) and will credit the same to the Treasurer of the United States as cash. The bank may, however, discontinue to receive the paper of any of the said banks, but in such case it will give immediate notice thereof to such Receivers, and others who usually deposit public moneys in it, and the notes of any such banks which may have been received by them before such notice shall, nevertheless, be taken and audited by the Bank of Missouri as cash.

"2. The bank shall pay at sight all drafts which the Treasurer of the United States may draw on it, and it shall, from time to time, transfer to the Bank of the United States, or its branches at New York, Philadelphia, Baltimore, Washington, or New Orleans, in such moneys as will be received by them as cash, the excess of public moneys remaining on deposit after such drafts are paid, over and above the sum of $150,000, which sum of $150,000 shall remain on deposit in the Bank of Missouri during the continuance of this arrangement, and shall be transferred, in like manner, by the bank, within six months after it shall cease to be employed to receive the public moneys. It is agreed, however, that if the amount received by the bank shall be so large as that the expense of remittance shall exceed the benefit of the deposit, the sum which is to remain on deposit in the bank shall be proportionably increased." Dated June, 1819.

Under date June 23, 1819, we find the following:

"As the current payments into the Bank of Missouri will, probably, be more than sufficient to meet any demands which may arise for the public service in that quarter, over and above the deposit proposed to remain in the bank, and as it is desirable that the large sum which is now in that bank may, as soon as practicable, be made available where the public service will require it, I have to request that measures may be taken for paying it over to the Bank of the United States as fast as may be convenient. * * *

It is presumed that the amount of the bills of the Bank of the United States and of its offices, now in the possession of the Bank of Missouri, can be conveniently, and without delay, transferred to the office at Louisville."

Under date of 30th of July, 1819, your committee find:

"Although it is not entirely regular to ask the bank to advance money under circumstances which do not admit of an immediate credit upon its accounts with the Treasurer, yet, considering the amount which has accumulated in the bank, the difficulty there is in transferring it to the Atlantic cities, where much of it must be eventually transmitted."

Under date of the 9th September, 1819, the Secretary says: "Considering, however, the precarious state of the State institutions, except in the principal cities, it would be an act of prudence not to retain their notes longer than what is absolutely necessary."

It is proper here to remark that, under date of the 23d June, 1819, the Secretary, in consequence of complaints from Kentucky, remarks: "It is at the same time extremely desirable that the most convenient and conciliatory course should be resorted to in obtaining payment of the bills which may happen to accumulate in the banks in which the public moneys are deposited."

The amount which was received in the Bank of Missouri from the 8th of August, 1818, to the 6th of September, 1819, will be seen by reference to a statement marked E. This statement is copied from a memorandum made in the handwriting of John Dales, the acting Cashier of the bank.

Your committee believe that at the time the Bank of Missouri was established the medium of exchange then circulating in this country was chiefly foreign notes of the banks of Kentucky, Ohio, Tennessee, Indiana, North Carolina, &c., in which the greater part of the capital stock was paid, and which was afterwards converted by the bank into specie.

That the bank has never, at any time, had under discount a larger amount than was allowed by the charter.

That the bank did make an arrangement with the Secretary of the Treasury for a permanent deposit of $150,000, which they had a right to loan or use as they thought proper.

That the bank, for nearly five years, did meet all demands against it in gold and silver, and did continue to do so as long as it had the means in its power.

That the debts due the bank on personal security, as well as those secured by mortgage, with the exception of five thousand dollars, are deemed safe and well secured.

The amount of notes in circulation are diminished $51,515 75, of which amount $7,356, as per statement, is sued on, and arrangement is further made, as your committee are informed, by which $8,125 are now suspended in the hands of General Clark, so that, making no allowance for the loss in five years' circulation, there is now only $36,052 75 in circulation.

Some of the Directors have borrowed more than $3,000; and a construction has been given to that part of the 8th section of the act of incorporation in the words following, to wit: "And no Director shall be entitled to loan at any time more than three thousand dollars from said bank, either in his own name or in the name of any other person," by which a Board of Directors have loaned sums, at their discretion, to any Director. By a rule of the by-laws of the bank (as your committee are informed) a Director has no right to loan any sum whatever, it requiring five Directors to authorize a loan. Of the propriety of this construction your committee leave the House to judge.

The books of the bank show the daily gradual, but rapid, drain of specie from the vaults of the bank, and your committee all concur in the opinion that there was no embezzlement of the specie funds of the bank at the time or since the suspension of specie payments.

From statement it will be seen that the United States is now the principal creditor of the bank. To coerce the payment of this debt would not only involve the bank in ruin, but by causing a correspondent pressure on the debtors of the bank, and other debtors, who, in their turn, must be sued, would produce scenes of distress which your committee hope will be spared to this community. For, however pressing the calls on the Treasury of the United States may be, when your committee remember the important services rendered by the Bank of Missouri, as well to the Treasury as to the Bank of the United States, in thus becoming the instrument of cashing for its benefit the large amount of notes received on account of the Treasurer of the United States, it is hoped that this additional calamity will not be visited on a community already stripped of the precious metals by the fatal policy of a Government whose true interest would have increased rather than diminish the circulating medium, more especially when your committee believe that, with a reasonable indulgence, the bank will be enabled to redeem its notes and pay all its debts, with little loss to the stockholders.

Your committee believe that the failure is not attributable to any act of dishonesty on the part of the directory of the bank, but to that cause only which has produced a general suspension in the western country, and to that policy which would submit the control of the currency, the wealth of this Union, and, unless soon counteracted, it is feared, its civil liberty, to the Bank of the United States.

Your committee would ask of the House to examine the item in statement E, from which it will appear that the amount of the notes of the Bank of the United States and its branches, received into the Bank of Missouri from the 8th of August, 1818, till the 6th of September, 1819, was $104,041 45. Why has this currency disappeared from among us? Why have the branches of the west refused to loan their notes? Why are the wealthiest debtors of the bank sued? The notes then were received at par with Kentucky notes; they are now worth more than specie!!! Property was then high—it is now low. Your committee conclude by hoping that no other question, however gotten up, however momentous, can again divert the eyes of the National Legislature from the truly alarming state of the country.

STATEMENT D.

Debts due by the Bank of Missouri.

To the Branch Bank of the United States at Louisville, Kentucky		$590 82
To the Branch Bank of New York		2 25
To the Branch Bank of Washington		470 84
Branch Bank of Kentucky at Louisville		1,528 00
Treasury of the United States		152,342 88
Suits commenced against the bank		7,356 00
To amount of notes in circulation, as follows:		
To whole amount issued	$197,800 00	
Post notes	7,138 29	
In all	204,938 29	
Deduct as follows:		
Notes now on hand, as appears from the books of the bank	$153,422 54	
Amount suspended in the hands of General Wm. Clark	8,097 00	
Notes on which suits are brought	7,356 00	
Making	168,875 54	
Which deducted leaves		36,062 75
Making the whole due by the bank		198,353 54

Funds of the Bank of Missouri.

Debts due and secured on a pledge of stock at 80 per cent.	$182,060 00
Debts due and secured by personal security and stock at 20 per cent.	32,700 00
Debts due and secured on pledge of stock at par	1,000 00
Debts due on personal security	75,693 10
Debts due on mortgage	110,577 69
Balance on books	6,696 07
Due by Bank of St. Louis, secured by mortgage with interest thereon, as verified by the President of the Bank of Missouri, and exhibits of sale, &c.	2,402 76
Judgments verified by President and Clerk, and considered good	12,961 43
Real estate	17,713 75
Utensils, as per report, valued at	200 00
Interest on judgments and notes suspended, as per report	2,000 00
Miami Exporting Company	446 00
Make	441,460 80
From which deduct the sum due by bank	198,353 54
	246,097 26

Leaving a balance in favor of the bank, but from which should be deducted the amount of $8,097, deposited with General Clark, deducted from the notes in circulation.

E.

Moneys on hand September 6, 1819, received of the several Receivers of Public Moneys, being such as they were authorized to receive by the Hon. W. H. Crawford, Secretary of the Treasury.

REMARK.—The notes called foreign notes were such as the Secretary of the Treasury authorized the several Receivers of Public Moneys to receive, but none such were at that time received on general deposit by the Bank of Missouri as cash, although the bank did afterwards, at its expense and risk, convert the same into specie.

The above, except the remark, is truly copied from a register kept by John Dales, late Cashier, from the 8th August, 1818, to the 6th September, 1819, and it is believed no register or memorandum of the kinds of paper received of the several Receivers was kept or made previous to the first mentioned period.

[From the Washington Republican.]

THE SUPPRESSED DOCUMENTS.

In the hurry of my last communication I omitted to notice another reason in addition to "their irrelevancy of the subject-matter of the call;" which, according to the report of the committee, is assigned by Mr. Dickins as a justification for his having marked two of the three suppressed paragraphs, which he admits he marked.

This is, that they were "improper, *in his opinion*, to be communicated to the public, on account of the *disclosures* they made, or *opinions* they expressed, which might be injurious to the affairs of *the banks* or *individuals* to whom they alluded." And thus it appears that, because *he* thought they ought not to be communicated *to the public*, he determined to withhold them *from the House*, notwithstanding its unqualified call for them. But who constituted him, *a mere clerk of the Department*, the judge of such matters? Was it not the province of the House to decide upon them? Or will he, or any one in his behalf, have the hardihood to place his justification upon the degrading and insulting assumption that the legitimate discretion of the House could not safely be confided in?

Public documents belong not to the head of the Department in which they are deposited, but to the sovereign people of the Union, whose representatives have the right to command their production whenever they may deem it necessary or useful. Vain, however, would be the power to command without a correspondent obligation to obey. Obedience, therefore, is a positive obligation imposed equally upon the highest functionary of the Government and every subordinate public agent. None, therefore, can disregard or violate it without offering insult and indignity to the people and contempt to their representatives. And if, upon a call for the whole of a correspondence on a particular subject, as in the present case, even the head of a Department, much less a mere clerk, should, usurping the powers of the House, by arrogating to himself the right to decide how much of such a correspondence should be communicated or withheld, it could not be submitted to without compromitting the honor and dignity of the House. If submitted to, it would, indeed, "involve the important question how far the House and the nation could repose confidence in the information on which they might be called upon to act." A pretension so monstrous, and a practice so dangerous, never can be tolerated or excused by a virtuous people who have the intelligence to appreciate and the firmness to assert and maintain their rights.

But let us see what are those appalling "*disclosures*" and "*opinions*" which alarmed the apprehensions, awakened the sensibilities, and excited the sympathies of Mr. Dickins so strongly as to induce him, with such temerity, to interpose his unwarrantable precautions to shield "*those banks and individuals*" from the terrible consequences that were otherwise to be expected.

One of the cases alluded to is destined to become a most fruitful topic. Some important bearings of the other will receive future illustration. At present, however, I intend to notice them in reference only to the motives by which Mr. Dickins professes to have been actuated.

In the first place, then, it is not a little remarkable that "*those banks and individuals*" that were to be so seriously affected are found, on examination of the documents, report, and evidence, to dwindle down to *simple units*. There was *but one* in either case.

In regard to the first, "*the disclosures*" which it was apprehended "might be injurious to the affairs of *the banks* alluded to," are to be found in the letter of John Sering, Cashier of the Farmers and Mechanics' Bank of Indiana, dated Madison, August 24, 1820, [F 6,] and consist only of a mere inquiry of the Secretary of the Treasury, whether the notes of the MECHANICS' BANK OF ALEXANDRIA ought to be received in payment for public lands by certain land offices in that State. Now, is it possible that an inquiry of this kind, by an individual residing at so remote a distance, could have been so materially "injurious to the affairs of a bank" in the District of Columbia, whose solvency, high character, and good standing, was such as to justify Mr. CRAWFORD'S CIRCULAR LETTER to the Receivers of Public Moneys, dated August 1, 1820, *in which he directed its notes to be received in payment for public lands?* How wonderful that it should have been so thought!!!

The second case, [letter I 6,] it is true, "implicated one who had been a public officer," but who had long before been removed, through the instrumentality of the Secretary of the Treasury himself, on charges of the grossest misconduct. Is it not, then, passing strange that, in the very Department by which he had been thus publicly disgraced before the whole nation, there should be found so strong a disposition, *on his account*, to prevent "the disclosure" of a solitary instance of his improprieties which happened a considerable time previous to his removal? Credulity itself must be severely taxed to believe it, but Mr. Dickins says so—and "Brutus is an honorable man."

It must be obvious to the most superficial observer that there is a mystery in the business which requires further explanation; but leaving its development to time, that effectual trier of all things, and supposing Mr. Dickins to have been actuated, in these two cases, by the motives he professes, let us inquire whether they could have been less powerful and operative for the suppression of the paragraph in the letter [A 5] which relates to the Bank of Steubenville.

It appears that on the 10th of January, 1818, this bank owed the Government a special deposit of $79,707 80, and a cash deposit of $27,570, making an aggregate of $107,227 80.

On the 18th of January the bank proposed to the Secretary of the Treasury to consider this sum as a cash debt, and to pay it to the branch at Pittsburg, in four equal payments of three, six, nine, and twelve months, with interest, to commence from the time of the receipt of his acceptance of the proposition.

On the 29th January, 1818, this proposition was acceded to by the Secretary. The whole of this debt, therefore, must have been due, and ought to have been paid, in February, 1819.—(See letters Aa Nos. 1 and 2.)

On the 13th February, 1819, the bank, having failed to comply with its contract, and still owing the Government a balance of $53,638 90, addressed a letter to the Secretary, stating that "in April, 1818, it had received a bundle of its notes from the branch at Pittsburg containing $30,000, the property of the United States, placed in that office on special deposit, and that, from the great pressure for specie, *it had been compelled*, in order to obtain time, to submit to a charge of retrospective interest from the January preceding, because the Cashier had written a letter on that subject in that month which, as he alleged, amounted to a demand of payment, and that, in consequence of the continuation of those pressures, &c., *it had only been enabled* to pay the interest, and reduce the debt to $24,568 50;" and soliciting the Secre-

tary, with great importunity, to order this sum to be transferred to it from the branch at Pittsburg, and to adopt certain arrangements for the purpose of increasing the value and circulation of its (the Bank of Steubenville) notes. These two balances, proposed to be united in one debt, amounted to $78,207 40, which was all that the bank asked in this respect.

On the 12th March, 1819, the Secretary of the Treasury not only ordered the transfer as above requested, but also directed a similar transfer of $18,650 44 from the branch of Chilicothe, which the Bank of Steubenville had not requested, but was then "taking measures to discharge;" and in the same letter which announced these further fruits of "his friendly disposition to this bank," and drew forth its adulatory acknowledgments, he adds: "I have this day addressed the Superintendent of the road west of the Monongahela, requesting him to ascertain whether the contractors for making the Cumberland road CANNOT BE INDUCED to receive the sums which may become due them in drafts *upon your institution*. I have also instructed the Superintendent of that part of the road which is yet to be contracted for *to make the contracts subject to be discharged in western funds, if it can be done without* CONSIDERABLE LOSS *to the Government*.*—(See letter A No. 2.)

Thus it appears that on the 12th March, 1819, the debt which the Bank of Steubenville owed to the Government, but was utterly unable to pay, amounted to $96,257 84. Who, then, could have imagined that this bank, having so recently failed to comply with its engagements with the Government, could have the presumption to ask further pecuniary favors of "one of the first officers of the Government," who was bound by the most sacred obligations to take every possible care of its money? And how infatuated must Mr. Crawford have been to have thought it consistent with his own duty or the public interest to continue a bank so evidently broken, and located in the vicinity of the branch of the Bank of the United States, at Pittsburg, as a depository of the public moneys?—a bank, too, which, in its letter Aa No. 1, had so unequivocally indicated to him its own consciousness of the impropriety, if not illegality, of his doing so! Strange, however, as it may appear, the Bank of Steubenville, still confiding in Mr. Crawford's "friendly disposition towards it," at this very time, and under these very circumstances, asked to be made the depository of public moneys received from the sales of public lands; and, with an ever-abiding, untiring generosity, Mr. Crawford granted its request, and contracted to allow it a permanent deposit of $50,000, "of which the debt it then owed was not to be considered as forming any part."—(See Aa No. 5.)

The condition of the bank, as might have been foreseen from a variety of other circumstances contained in the document No. 66, which time does not permit me to advert to, continued to grow worse; and in a letter which it addressed to Mr. Crawford on the 7th July, 1820, pleading "*its very low state*," and importuning his indulgence, it says: "It is evident from the statement enclosed (which, by the bye, is suppressed) that the reputation of this institution, for the present, *rests alone upon your forbearance* until collections can be made, or further deposits made by the Receivers of public money."—(See letter A No. 8.)

This was, in effect, asking Mr. Crawford to wait for the payment of a debt to the Government till the bank could collect enough of the Government's own money to discharge it. This appeal to Mr. Crawford's "friendly disposition," however, was not made in vain. The bank was indulged, continued to violate its engagements, owed the Government on the 14th February, 1822, (the date of Mr. Crawford's report,) the enormous sum of $167,297, received from the sale of public lands, (see Mr. Crawford's report, document 66, page 7,) and still is a depository of public moneys!—(See Mr. Dickins' first examination.)

Can any impartial man read this hasty review of the connexion of the Treasury Department with the Bank of Steubenville, and believe that Mr. Dickins, who so greatly deprecated the disclosures in relation to the Mechanics' Bank of Alexandria, and an individual who had been removed from office, might not have thought it equally serviceable to Mr. Crawford to suppress a paragraph which showed that, to a bank so highly favored and so ready to ask, "he had extended his friendly disposition beyond what *its Board would have dared to ask*." I confess I think the latter much the most probable, and therefore I think Mr. Dickins' memory must have failed him when he gave his testimony.

The "Richmond Enquirer," I find, thinks "it highly probable that Mr. Dickins, who marked all the other omitted paragraphs, marked this too, and that the circumstance has escaped his memory." And thus it appears that the editors of that respectable and patriotic journal are too highminded and honorable to descend so low as to unite in the project of rejecting all testimony in regard to others, and fixing the charge upon a member of the House, against whom there is not the slightest grounds of suspicion.

But they say, also, "that the arrow which was aimed at Mr. Crawford has spent its force in mid air, and that the committee have correctly acquitted him of all participation in this business." What an unfounded assertion! There is nothing like it in the report. As to three of the marked paragraphs, one of which is particularly important, the implifications which the report justifies are most strong that Mr. Crawford's attention was called to them, and, of course, that he must have approved of the object of those marks, since he did not erase them. Who could have had a better opportunity of knowing whether he did or did not see the marks than Mr. Dickins? The latter must have known, or believed at least, that he did see them, or he (Mr. Dickins) could not have sworn the truth when he said "I think that if the Secretary should have been of opinion that what I had marked *ought* to be printed, *he would have erased the marks*."

The editors might, with just the same propriety, contend that the committee have acquitted Mr. Dickins of all participation in marking the letter A No. 5, as that they have done so in regard to Mr. Crawford. The report, in this particular, asserts only the want of proof that either of those gentlemen was guilty. Had the fact been established, as it is admitted by the "Enquirer," "that Mr. Dickins marked this paragraph also," every implication against Mr. Crawford, in regard to the others, would have been equally warranted in relation to this one.

I am glad, however, to find that the language of the "Enquirer" so clearly admits that an offence has been committed by some one. The very term acquitted, which it introduces with some parade of triumph, has a direct reference to an offence. By whom, then, was it omitted? If by Mr. Dickins, is it not somewhat singular, if Mr Crawford had no participation in it, that it should not have received his most pointed reprehension? Let it be remembered that Mr. Dickins still continues one of his most confidential clerks. The inference from this single fact is irresistible, and an enlightened people will not fail to give it its due weight.

Those editors, however, are greatly mistaken in supposing that these suppressed paragraphs are all

* Who can doubt as to the effect of such instructions? and whence did Mr. Crawford derive authority to order any such contract to be made, at any loss whatever to the Government? This is monstrous!

the "discoveries" that were alluded to "in the whispers they heard three months ago." They are mere bagatelles in comparison with what is yet to be discovered. I have done with paragraphs for the present, and take my leave of them without venturing to decide who is guilty of their suppression. The decision of that question I cheerfully surrender to an impartial public. I shall not, however, be deterred by vulgar ribaldry and ungentlemanly abuse, nor *by attempts to establish an inquisition to abridge the freedom of the press*, from engaging in further investigations. Such attempts come with a very bad grace, indeed, from exclusive "Republicans of the Jefferson school." But the consciousness of a weak and indefensible cause naturally begets a desire to divert public attention from it. That desire has been most powerfully manifested already, and will be greatly increased. I shall, however, regard all such attempts with the indulgence that is due to the desperation of the cause and the considerations from which they may spring.

If certain members of Congress are as desirous as they appear to be to detect and punish me for anything that I have written, let them institute any proceeding by the House to act, not collaterally, but directly upon me, and I pledge my honor that I will avow myself, and waive any privilege that I have, if, indeed I have any, that would shelter me from merited punishment.

My only motive for concealment arises from a consciousness that I do not write well enough for the public eye. So far from thinking that I have done wrong, I persuade myself that I shall, before I have done with this business, entitle myself to the gratitude of my fellow-citizens. The official conduct of a public officer is a fair subject of investigation. Every freeman has a right to investigate it in decent language, and I neither have used, nor shall I intentionally use, any other kind. With this limitation, I shall pursue the course that I have marked out for myself, "though Tray, Blanche, and Sweetheart, should all bark at me."

A. B.

[From the Washington Republican.]

SUPPRESSED DOCUMENTS—Class No. 3.

Considering the great anxiety for "probing this business to the bottom," which was so conspicuously manifested on a recent occasion, and the confidence with which gentlemen asserted on the floor of the House that "*all* the original letters, marked and unmarked, had been communicated," it is a little singular that the strange metamorphosis of some of the most important of those *originals* into *extracts*, which has been subsequently discovered, should have completely extinguished the spirit of inquiry, and left nothing in its place but listless unconcern and apathy. How this is to be accounted for, is a problem which I may safely leave the public to solve. But why not investigate those extracts? It is just as probable that the originals were taken out, and those extracts foisted in, by a member of Congress, as that he marked the letter A 5. Besides, he might have done the latter innocently; but only let the former be fixed upon him, his motives can no longer be considered problematical. For what could more strongly evince a premeditated determination to suppress parts of a letter than deliberately copying long extracts from it and passing them off for the original itself?

Suspicion cannot be made to stick to the member alluded to, unless he can somehow or other be implicated in the legerdemain by which the transformation of those originals into extracts has been so dexterously effected. If all the implications in regard to this curious affair shall be permitted to rest exclusively where they now do, the unsophisticated logic of the great mass of the community, who have no interest in being themselves deceived or in deceiving others, may lead them to the conviction that those who have been guilty of a multiplicity of much more important suppressions, may have had some participation in the suppression of the poor little paragraph in the letter A 5 also.

It is a great error to be too easily discouraged. The investigation of those extracts may disclose some *possibility* that may afford, at the same time, an apology, at least, for the scepticism and the credulity of those whose peculiar organization of mind prevents the possibility of their being convinced against their wills, and renders it perfectly easy to believe whatever they please. Something, therefore, may possibly be gained in relation to the object alluded to by the investigation. Abstaining from it now, after all that is passed upon the subject, is like surrendering at discretion. The attempt to implicate the member alluded to has gone too far to stop at the present point. It must be openly abandoned (which would be very mortifying) or pushed further. Without the one or the other, an impartial people must infer that there has been a desire to screen the guilty by sacrificing the innocent; which is so abhorrent to every just and generous feeling that, if such an opinion should prevail, it will be infinitely worse in its consequences than all the suppressions that have been brought to light or are yet to be disclosed.

Let not gentlemen who were so keen "upon the scent, while they supposed it to lead to the hole of an imaginary fox," now be found "*at fault*" because it is discovered to "lead directly to the den of the lion." Justice, magnanimity, and regard for consistency so imperiously forbid it, that I trust such a spectacle will not be exhibited to the just, generous, and gallant citizens of this highminded Republic.

If gentlemen have been betrayed into error in asserting, before the whole nation, the important fact, that *all* the originals of the correspondence between the banks and the Treasury Department had been communicated, ought not the error to be corrected? And from whom have the public a greater right to expect that correction than from those who have rendered it necessary? One honorable gentleman, assuming the fact, as well he might, from all that then appeared, remarked, "that it spoke conviction to his mind from the first agitation of this matter, and was conclusive, that, so far from any intention to suppress *any part* of the documents, there was evinced, *in sending the original letters*, a disposition to open the whole flood of information to the House." The great importance of this alleged fact is thus rendered manifest by the incontrovertible argument that has been deduced from it. Would it, then, be right that the people should be misled and deceived in regard to this matter? The argument of the honorable gentleman, without the fact to support it, is worth nothing, and I repeat, that the statement cannot be correct, unless Mr. Crawford and the President of the Bank of Huntsville actually sent extracts of their own letters to each other. And this the documents themselves will prove.

The very mystery in which this affair is involved seems to me to furnish the strongest inducements and the best possible reasons for instituting a particular and strict inquiry into it. If there has been nothing wrongfully suppressed, the production of the real original letters themselves will show it. This, therefore, upon that supposition, would be the very best course that could be adopted for those who may

be supposed to be implicated. After the vigorous struggles that have been made for exculpation, in relation to the suppression of one little paragraph, it would be too late to affect a dignified indifference in regard to those curious extracts. If, with such powerful motives to produce the originals, they should still be withheld, it will not be extraordinary if it should be believed that their production would readily account for the labor and pains that must have been employed in preparing the extracts which have been so unaccountably substituted in their place among the documents.

But waiving for the present all further remarks on suppressions, by means of extracts of letters passed off for originals, I proceed to notice a new class of suppressions, by the withholding of both originals and copies.

It is most obvious, from the general scope and tenor of the very first one of the extracts that I have referred to, (which is designated as the letter L No. 2, from Mr. Crawford to the President of the Bank of Huntsville,) that it is a reply to a letter which has not been communicated. Of this fact, however, the following sentence contained in it is conclusive: "I observe that a part of the deposit made at Savannah, to which you refer, [when, where, or how, does not appear,] was made in your own notes and in the notes of the Bank of Tennessee." Here, then, it is evident that a letter from the President of the Bank of Huntsville, relating directly to the deposits, and strictly embraced by the call upon Mr. Crawford, has been withheld, unless, perchance, it may have been purloined from the documents by some one "who wished to injure him." This being possible, and possibilities being deemed entirely sufficient to warrant implications against one individual by gentlemen who reject proof as strong as Holy Writ against others, I pass on to a case that cannot be so easily eluded by this most charitable subtlety.

The suppressed paragraph in the letter L 5, from Le Roy Pope, President of the Bank of Huntsville, to the Secretary of the Treasury, dated May 4, 1819, is acknowledged to have been marked at the Treasury Department for the purpose of suppression. This paragraph clearly related to instructions of the Secretary of the Treasury, in regard to the very deposits which were "the subject-matter of the call;" contains no "disclosures which might have been injurious to the affairs of banks and individuals;" and is, in itself, perfectly harmless.

What possible motive, then, could there have been for its suppression, but for the purpose of CONCEALING THE LETTER TO WHICH IT REFERS? This letter has been withheld, and the paragraph that refers to it is in the following words: "*Your conjecture* in relation to your circular of the 11th of July last is correct; [where is the conjecture to be found?] the important words subsequent to the 30th June last are not contained in the copy received by us, and this circumstance satisfactorily accounts for the construction it received from the Board of Directors. We regret that any mistake should have occurred, but we rejoice that our decision is *thus acknowledged* [but how is it acknowledged?] to have been proper. Agreeably to *your request*, [when, or how was this made?] I return the copy heretofore received, and under which we have necessarily acted, and retain the copy accompanying your last letter." This last letter, however, is nowhere to be found among the documents. Now, can any one read even this paragraph, with a view to ascertain the truth, without being strongly impressed with the belief that the motive for those suppressions, by such cautious arrangement, may have been somewhat different from what has been alleged?

Mr. Dickins, in his testimony, says that "the letter of the 1st of May is not communicated, as will be seen by the printed documents."—(See his second examination.) But, as there is no clue to lead us to all the reasons which may have produced its suppression, I will content myself at present with adverting to one more of the many letters that have been withheld, concerning which Mr. Crawford himself leaves us no room for doubt.

This is referred to, and partly described, in his letter, L No. 7, to the President of the Bank of Huntsville, dated 30th of July, 1819, in which he says: "You will perceive by the contents of *my letter of the 9th instant* that the failure of the Nashville Bank and its offices was at that time known to this Department. It was *then* foreseen that the Bank of Huntsville could not *fail* to be injuriously affected by that event, and by others of a similar nature which were then anticipated. I cannot, however, admit that these are the only causes which have produced the embarrassment described in your letter, nor concur in the opinion which you express—that the difficulties of your situation have been wholly produced by the Government deposits. The real cause of them is that you have discounted *excessively* upon your capital. If the public money had not been deposited with you, and you had discounted to the same extent as you have done, the amount of your notes in circulation would bear *a most unreasonable* proportion to the specie in your vaults; a proportion which, in times *most favorable* to banks, would be considered *wholly unsafe*. The public deposits, indeed, may be chargeable with your difficulties so far as they have *tempted* you to discount beyond what you would have done had they not been in your possession.

"The reasons stated in *my letter of the 9th instant* in favor of the prompt adoption by the bank of the measures necessary to the *transfer of the public money* in the possession of the bank beyond the permanent deposit remain unimpaired," &c.

The letter of the 9th July, 1819, is again referred to in the letter, L No. 8, from the President of the Bank of Huntsville to the Secretary of the Treasury, dated September, 1819, yet that letter has been withheld. Let me then ask whether there can be a doubt that it was included in "the call," or that it was relevant to the subject-matter thereof? If this letter could be rightfully withheld, what one, in the whole correspondence, was Mr. Crawford bound to communicate? Had it been produced, is it not probable that it would have left him without the least excuse for having continued the Bank of Huntsville a depository of the public money for about twelve months thereafter? I infer this from the description he himself gives of the letter, and from another one written cotemporaneously to another southern bank, which he agreed to make a depository of the public money on the production of a return of the state of its affairs, that "exhibited discounts to double the amount of the capital paid in," which he himself "conceived at the time to be imprudent," and notwithstanding he thought it "difficult to conceive that any bank could be managed with prudence which extended its discounts more than fifty per cent. beyond its capital actually paid in."—(See his letter, M No. 4, to Israel Pickens, President of the Tombigbee Bank, dated July 9, 1819.)

The Bank of Huntsville, previous to the date of the suppressed letter of the 9th of July, 1819, had failed to fulfil its engagements; and, on the 30th June preceding, professing to repose "an animating confidence in the liberality of the Secretary of the Treasury," its President frankly declared to him that "heavy drafts from you would place us in a most disagreeable dilemma. In this case we must either empty our vaults or refuse payment. If you take away from us our specie we shall no longer have it to pay with here, and if you draw largely we shall be compelled to stop. Whichsoever of these courses we take, we trust, however, that you will not reduce us to a necessity so hateful." And it is a most astonishing

fact that they did not trust in vain. After such an exposé of the situation of this bank, what possible justification can be presented for continuing to make further deposits in it? But let us see what was its real situation at the date of this communication to the Secretary.

On that very day its capital was $164,175, on which it had discounted to the amount of $417,834 40, and then owed to the Government $244,519 51, and to individuals $34,031 77, and had in specie only $97,679 62.—(See LL, in document 66.)

In June, 1820, its capital remained $164,175; its discounts amounted to $414,480 24; its debt to the Government, $218,352 08; to individuals, $37,268 39; and its specie was then reduced to $37,261 36, (see same document;) and yet, during all this time, it continued to be a depository of public money; and notwithstanding all these circumstances, so well calculated to excite the greatest anxiety for the safety and prompt transfer of the public deposits, it does not appear that Mr. Crawford ever wrote one line on the subject from July, 1819, to July, 1820. There is, therefore, little to choose between an admission that the correspondence has been suppressed and the acknowledgment of a negligence so culpable.

It is also a remarkable circumstance that the offer of this bank to pay interest, when earnestly imploring forbearance, does not appear to have been accepted.

And now, I would ask, what justification can be offered for thus jeopardizing the public money, and bestowing the use of it upon the stockholders of a bank in Alabama, while the Government has been compelled to resort to loans and the payment of interest? All this, however, is but a trifle to what is yet to be disclosed; and though some people may now have their myrmidons, as Achilles had in days of yore, their vaunting and menaces shall neither divert nor deter me from the purpose I have heretofore avowed. Indeed, I should think myself something like "the traveller who stopped on an important journey to chastise an impertinent cur that had bit at his horse's heels," were I to pay the slightest attention to their foolish denunciations and vile vituperations of myself for exercising in a decent manner a right wisely guarantied to every freeman of this Union.

A. B.

[From the Washington Republican.]

I now proceed to fulfil, in part, my promise of giving further explanations relative to the correspondence between the Treasury Department and the Bank of Missouri, and of the relation that subsisted between them.

It will be recollected that the first call of the House for the correspondence with those banks which had been made the depositories of public money received from the sale of public lands, and for the monthly returns they were required by their engagements regularly to make to the Department, was answered by Mr. Crawford on February 14, 1822.

Upon a critical examination of so much of his report as related to the Bank of Missouri, and of the documents therewith transmitted, they were found to afford intrinsic evidence that a part of the correspondence had been suppressed; that the returns of the bank required by the call had not been communicated; that another general return had been substituted in their place, which kept out of view the amount of its discounts and other important exhibits that were produced in all the other cases; and that a part of the information communicated was not only unsupported by any of the documents, but palpably inconsistent with some of them.

Under such circumstances it was due to the dignity of the House that a second call should be made, and enforced also. And notwithstanding all the canting about harassing and persecuting Mr. Crawford with *calls*, it will be seen that he himself has rendered them necessary by withholding information which it was his duty to have communicated, and the withholding of which nothing can excuse, unless, indeed, his friends be so numerous and powerful, and their partiality for him so great, as to render them both able and willing to invest him *de facto* with immunities and privileges which would exempt him from all responsibility to Congress, and render him superior to the laws and Constitution of the country.

Let the good people of this Union have patience; in due time they will be convinced that this language is not too strong. They are interested in knowing the truth, and nothing shall prevent me from communicating so much of it as may suit my own convenience. While, however, I continue to write under my present signature, I earnestly hope it will be constantly kept in mind that, for proof of the statements I have heretofore made or shall hereafter make, I rely exclusively upon Mr. Crawford's own documents. If, therefore, I should make any misrepresentation, I repeat that nothing can be more easy than to detect and correct it.

Intending merely to exercise the right, wisely guarantied to every freeman of the Union, of investigating the official conduct of a public functionary, and in doing so to confine myself to the truth, and studiously to abstain from all offensive language, I shall utterly disregard all the abuse, vituperation, and denunciations of those who, for their own selfish purposes, would overawe and repress the spirit of inquiry, without which the freedom of the press would lose much of its boasted advantages.

It may, I am confident, be safely left to public sentiment to decide upon the pretensions to impartiality, disinterestedness, and patriotism of those who would excite odium against me for exposing conduct in Mr. Crawford which they themselves will not venture to defend and justify. Gentlemen should recollect that this case is now before a just and intelligent tribunal, where it will be decided according to its own intrinsic merits or demerits; and that, while they would impute to me motives of personal hostility, they themselves may not escape the reproach of endeavoring to screen from fair investigation conduct in Mr. Crawford which they would be the most prompt to condemn and denounce in others.

It has recently been seen that when, in a short article, I first took the liberty of calling the public attention to a part of those suppressions, an immediate search was made into the documents. The facts I alleged were found to be strictly true; and thereupon the House of Representatives, *of its own accord*, unanimously determined to investigate the matter. Additional facts of superior interest continued to be developed, with the same means of testing their accuracy; but finally "the scent was ascertained to lead directly to the den of the lion" And lo! then the great object of some gentlemen was to stop short, wheel about and turn back to inquire *who A. B. was*, with the hope of finding him a member of Congress, and the avowed determination "of expelling him as a *dirty dog*" for the very *unparliamentary* conduct of

writing a short article in decorous language, and the truth of which was attested by every member of the House. This ludicrous scene, however, at which I confess I, as well as others, laughed most heartily, was permitted to close with an abandonment of that darling project; and thus I escaped, what indeed I was very willing to meet, the formidable array of terrors with which I was threatened. Such daring attempts, however, upon the freedom of the press and the rights of a fellow-citizen will not soon be forgotten. Like all the vaporings and abuse with which they were accompanied, they would have been worse than useless in a good cause, and could only render a bad one still more desperate.

In an early stage of this investigation I ventured to advance the opinion that this business was not to be *whitewashed*, compromised, and finally settled at Washington. It is a subject which is legitimately within the jurisdiction of the tribunal of the people, and believing that they will take proper cognizance of it, I proceed to notice the second call that was made upon Mr. Crawford in regard to the Bank of Missouri.

This call remained unanswered until the 27th of April, 1822, and the documents accompanying it were not printed until after the rising of Congress. Of course, like the report of the second committee of investigation, and the replies to Mr. Eaton's and J. Jenning's resolutions, it was delayed to so late a period of the session that it could not then be acted on. It, however, was a little more fortunate than the resolution adopted by the House, on the motion of Mr. Moore, of Alabama, calling upon Mr. Crawford for an exhibition of certain allowances made to a few land officers, for clerk hire, &c., in positive violation of the law of Congress on that subject; for this call, like the one made upon him in 1818 on the subject of internal improvements, he has not deigned to answer at all. And doubtless this flagrant contempt of the lawful authority of the House, and insult to its dignity, will be held perfectly blameless by all those who recently rendered themselves so conspicuous by their bold and unconstitutional attempts to muzzle the press and violate the most unquestionable rights of a fellow-citizen. The people, however, who yet, thank God, have the right to judge for themselves, may think very differently of such conduct, and with them I am content to leave it.

Long as the answer to the second call above referred to was delayed, it would not have been without some use before this time if Mr. Crawford could have been induced to have paid a proper respect to the legitimate authority of the House. This second report disclosed the important fact that while only seventeen letters of the correspondence with the Bank of Missouri had been transmitted to the House, upwards of twenty other letters of the same correspondence, which ought to have been communicated, had actually been withheld. This far exceeded all the suspicions that had been excited by the causes already stated, and created a very strong presumption that, as so much of the correspondence with that bank had been suppressed, parts of the correspondence with other banks might not have been communicated. And hence a third call was made, requiring him to communicate to the House, as early as practicable in the succeeding session, all the correspondence between the Treasury Department and the banks in which public money had been deposited within a stated period, together with other information in regard to the relation which had subsisted between those banks and the Department. Yet, though he had from the adjournment of the first to the commencement of the second session of the 17th Congress to comply with this call, he actually failed to make his report till within about two or three days before the late adjournment of Congress, and, as in the case of the documents transmitted with his second report, this third one is not even yet printed. I hope, however, we shall have the pleasure of seeing it before long. And now I would ask of every disinterested and candid man, *What does all this look like?*

A. B.

[From the Washington Republican.]

In regard to the suppressed letters in the correspondence with the Bank of Missouri, let it be recollected that Mr. Dickins stated in his testimony before the first committee of investigation that "in this case he [Mr. Crawford] directed me to collect *everything* in the office relating to the subject. They were selected and submitted to his inspection." Now, if these letters were included among those which were thus collected and submitted to Mr. Crawford's inspection, why were they not communicated agreeably to the first call? Seeing that Mr. Dickins was so particularly directed to collect "*everything*" upon the subject, and "that Mr. Crawford and himself had no particular consultation on the subject of these papers," it is difficult to imagine any motive that could have influenced him to have concealed from Mr. Crawford such a large portion of this correspondence when he presented to him the seventeen communicated letters. But supposing these suppressed letters, of which, with all the others, it is proven that Mr. Dickins had the custody, were kept out of view by him when the first call was answered, how is it possible that the fact could have been concealed from Mr. Crawford at the time he made his second report, and transmitted them with those very letters themselves. And what should have been his course had Mr. Dickins disobeyed his orders and acted so unwarrantably?

The relevancy of these suppressed letters "to the subject-matter of the first call," and the extremely delicate import of some of them, shall hereafter be most satisfactorily demonstrated. At present I can only briefly refer to a very few of them; and first I must premise that, by the call, Mr. Crawford was not only required to communicate the correspondence, contracts, &c., with those banks, but also to state the amount of uncurrent notes he had received from them in discharge of their debts to the Government. In his reply he states the several sums of such money which he admits he received, and adds that "in no other case have uncurrent bank notes been received from any bank in which the public money has been deposited." Now, one or more of these suppressed letters will show that he received *more* of such notes *than he reported*. For proof of this I will, *at this time*, only refer to the 5th page of his report, the 8th specification, and the paragraph immediately succeeding the 9th in the letter I No. 9, in the documents No. 66, and to the suppressed letters B No. 18, No. 19, and No. 13, and particularly to the latter part of the last one, all in documents No. 119.

In another part of his report, referring to the permanent deposits stipulated to be left in those banks, Mr. Crawford states that "the whole amount deposited in them was, *at all times*, at the disposition of the Government, whenever the public service should require it, and the opportunity of expenditure at the bank of deposit *shall* occur." He has not, however, communicated the contract with the Bank of Missouri,

but annexed to his letter of the 23d June, 1819, which refers to that contract, is a note in the following words, viz: "The conditions referred to in the preceding letter are the same as those offered to the other banks in the western States; the sum to remain in deposit is $150,000."—(See A No. 10.) But upon examining A No. 10, it is found to relate exclusively to instructions given to Receivers of Public Money more than twelve months *after the date of that contract*. Let us, however, hear the Cashier of the Bank of Missouri on the subject. In the suppressed letter B No. 21, documents No. 119, he says to Mr. Crawford, among other things, "we cannot believe that you intend to draw on the standing deposit at this time, &c., when your COVENANT, so recently made, assured us of the contrary, &c. The opinion is DECIDEDLY formed that the standing deposit MUST NOT BE ENCROACHED UPON." There are other important matters in this letter, but I beg to ask whether what is already stated is not sufficient to show its "relevancy to the subject-matter of the call?"

Mr. Crawford was also most explicitly required to communicate "the statements made by each [of the banks] for the last twelve months preceding its failure." But neither of the calls have been sufficient to draw from him the monthly or quarterly returns of the Bank of Missouri of a later date than the 1st of February, 1820, although its failure did not occur until the 17th of August, 1821.—(See letter I No. 17, documents 66.)

The contract with the bank not having been communicated, except in the manner above mentioned, I cannot positively assert that the bank was bound to make these returns. This, however, seems fairly inferrible from those which it did make up to the 1st of February, 1820, and from the suppressed letter of its Cashier of the 18th of February of the same year, wherein, in referring to "his reports," he seems to recognize his obligation to make them.

Mr. Crawford also in his letter to the Bank of Missouri of the 23d of June, 1819, before referred to, says: "In lieu of the arrangement now existing between the Treasury and the Bank of Missouri in relation to the public money deposited therein, I now transmit for the consideration of that institution conditions similar to those which have been agreed upon with *all* the other banks of deposit in the western country." To ascertain what those conditions were, reference must therefore be had to the contracts that had been made with the banks alluded to. The first of these that appears in the documents No. 66 is referred to in his letter, A No. 2, of the 12th of March, 1819, and the contract itself is designated as A No. 3. By this the bank was bound "to render to the Secretary of the Treasury and to the Treasurer of the United States duplicate monthly returns of its accounts with the Treasurer, and also to render to the Secretary of the Treasury monthly returns of the state of its affairs, and, as soon as practicable, a *list of its debtors, showing the amount due by each*, and that it should also render a similar list quarter yearly."

These are presumed to be the precautions to secure the honest fulfilment of their contracts by those banks to which Mr. Crawford alludes in his late letter to the second committee of investigation, in which he says that, to guard "against the contingency of a want of integrity in those who had the direction of some of those institutions, the Department availed itself of all the means within its reach." But how idle must it have been to have entered into such stipulations without enforcing them? And what could more forcibly demonstrate the most inexcusable mismanagement and neglect of duty on his part than to suffer stipulations which he himself deemed so necessary and essential to the public interest to be violated and utterly disregarded? Could there be a plainer case of a public officer's failing to perform, and that, too, without the slightest excuse, that which he himself had recognized as a solemn and important duty imposed upon him? Nothing, indeed, could be more like "sinning against light and knowledge."

He therefore cannot avoid the dilemma of having thus acted, or of having suppressed the returns of this bank for the twelve months preceding its failure, which he was required to communicate. Whether those returns and lists have been brought out by the third call can only be known when the third report and documents shall be printed, which I trust will not be one moment unnecessarily delayed. The people have been already so disgusted with the delays that have been practiced in the cases referred to that they most sincerely deprecate anything like a further repetition of them. Whenever this report can be obtained it will receive due attention. One of two things, however, is certain enough without it—either that if the bank did make those monthly and quarterly returns Mr. Crawford had it in his power, and ought to have communicated them, or that if it did not make them, he can have no adequate justification for having exempted it from the conditions imposed upon the others, as I will now attempt to prove.

The capital stock of this bank was $210,000; on which it discounted and paid on overdrafts to the amount of $430,680 43, of which the sum of $186,335 was on pledges of stock, whereby the stockholders must have drawn out all but $23,665 of the capital stock paid in.

The Directors themselves borrowed $108,795, for which they pledged their stock to the bank as security; $79,689 on mortgages; $60,075 86 on personal security; and were liable, as endorsers, for $37,510; to which, if overdrafts, probably chargeable to them, amounting to $11,622 27, be added, will show them alone liable for $297,492 13, which is $87,492 13 more than the whole amount of the capital. (See letter and enclosure, I No. 17, documents No. 66.) What a practical commentary upon the utility of monthly returns and list of debtors, *showing the amount due by each!!!* But how deplorable was that imbecility, at least, which failed to enforce a compliance with these conditions.

It will also appear, unless those returns and lists have actually been suppressed, that in proportion to the amount and risk of public money, Mr. Crawford diminished his precautions.

This bank, to which he allowed a permanent deposit of $150,000, equal to $9,000, at least, per annum, for taking care of the public money, &c., owed to the Government, on the 3d of February, 1818, $102,140 26; on the 30th of May, $144,248 64; on the 1st of July, $156,124 64; on the 1st of October, $188,097 54; on the 1st of December, $261,307 39; on the 2d of January, 1819, $349,662 14; on the 1st of March, $482,551 65; on the 1st of June, $691,534 83; and on the 1st of September, $726,031 30. How wonderfully Mr. Crawford must have forgotten the danger of leading people into temptation!! Can any one, seeing how the public money was permitted to accumulate in this single bank for nineteen months in succession, any longer wonder at the long Treasury list of unavailable funds? But all this must be considered still more extraordinary, in consequence of the facilities that were offered of transferring the money from St. Louis to the Bank of the United States at Louisville, by the steamboats which so constantly plyed between those places, and by which very means the Bank of Missouri itself, in the year 1819, transferred from the latter to the former place $163,690 in specie, of which it had been permitted to draw $35,000 from the branch and the balance from the banks of Kentucky; and this, too, while it owed such a prodigious amount, which ought to have been transferred to, instead of taken from, the branch.—(See letters I Nos. 4 and 6, documents 66.)

Is it possible that Mr. Crawford could have intended to comprehend such mismanagement as has been here disclosed in that part of his letter to the second committee of investigation, in which he says: "It is

confidently believed. that if no such effort had been made, [that of using the local banks as the depository of the public money,] the *Executive Department* of the Government would have been charged with the most shameful imbecility, and that the *Treasury Department* would have been loaded with the public execration;" thus giving his conduct, with regard to his transactions with those banks, the aspect of a *Cabinet* measure, by an ingenious contradistinction between the "Executive Department" and the "Treasury Department." The most objectionable parts of his conduct, in regard to these matters, are his mismanagement of those banks, and his continuing to employ them after he himself had become sensible of the danger of doing so; of which no one can entertain the least doubt who will read his correspondence with the Banks of Steubenville, Vincennes, Huntsville, Tombeckbee, &c. If all the circumstances of these cases, as they developed themselves, were not communicated in detail to the "Executive Department" of the Government, but were known only to the "Treasury Department," which was doubtless the fact, how unjust, as well as indelicate, was it for Mr. Crawford to introduce the President into his letter, in a manner so liable to be misunderstood, and for the purpose of shifting off upon his shoulders a portion of responsibility, for consequences which probably never would have occurred had Mr. Crawford himself adhered to and enforced the very arrangements which he says "were maturely considered and adopted." Supposing the President, being "fully sensible of the importance of the crisis which had arrived," did actually agree to the arrangements proposed at the time alluded to, it is not presumable that he could have had any knowledge of the minute details of the execution of them, and surely he ought not to be considered responsible for their continuance, after experience (of which he must have been kept entirely ignorant) had demonstrated the impolicy and danger of confiding in them. Nor can any approbation he may have given to the measure alluded to by Mr. Crawford excuse the latter for dispensing with conditions agreed upon, and deemed so essential to its success; nor justify him for failing to report to Congress those deposits in the local banks, agreeably to the positive injunctions of the act of Congress for the incorporation of the Bank of the United States; nor for many other parts of his conduct in regard to those matters, which will be noticed hereafter.

In this same letter to the committee, he expresses the opinion, *very confidently*, that notwithstanding any loss "which may possibly occur" from those arrangements and his execution of them, "the benefits which have resulted from them will greatly preponderate over such loss." *Sed quære de hoc.* He gave to those banks permanent deposits to the amount of $900,000, (see his report in document No. 66,) which was equivalent to paying them $54,000 per annum for taking care of the public money, when the Government had so little of it that it was soon compelled to resort to loans of millions at a time, upon interest; and unavailable funds have accumulated to the amount of about $1,000,000, the interest on which would be $60,000 per annum, which ought to be included in the estimate; because, had those funds been appropriated in due time to the public expenditures, they would have saved the necessity of borrowing and paying interest upon that amount, at least. But is it not most palpably unjust in regard to the people, that while this additional burden of $60,000 per annum is thus imposed upon them on account of those banks, the latter should be permitted to retain and apply to their own use such an amount of the people's money, without paying any interest whatever for it. And how much longer has it to remain in the possession of those banks to render it, according to banking calculations, equivalent to a gratuity to them? I will not stop to make the calculation, but it is certain that, if it remain long enough for the interest upon it to discharge, it can be nothing less than a free gift; and that the people, by having, in the meantime, to pay interest equal to that amount, will have lost precisely as much as they will gain by its repayment; and so, just in proportion to the time which they shall have been thus burdened, will be their real loss. What will those who have vociferated so much about "retrenchment" and "economy," and who have declaimed so eloquently about mismanagement, profusion, and extravagance, say to all this? What would they say if such conduct had been practiced in any other Department?

A. B.

[From the Washington Republican]

I have already shown that the highly favored Bank of Missouri had a capital of $210,000; that the stockholders drew out of it, on pledges of stock, $186,335, leaving only $23,665 for the further accommodation of themselves or others; that upon this last sum, its real banking capital, it discounted and paid on overdrafts to the amount of $244,345 43; that the whole amount of its discounts, including payments on overdrafts, was $430,680 43; that of this sum the Directors alone were responsible for $297,492 13, if, as is presumed to be the case, they were chargeable with overdrafts to the amount of $11,622 27; that Mr. Crawford had permitted the public money to accumulate in it from $102,140 26 to $726,031 90 in the course of nineteen successive months, ending with the 1st of September, 1819; and that it was allowed a permanent deposit of $150,000, equal to $9,000 per annum, for taking care of the public money.

Let us now look a little into its payments, for the purpose of ascertaining whether additional indulgences and favors, inconsistent with a due regard to public interest, were not extended to it. In that examination it may be useful to keep in mind the fact that certain funds "commanded a premium of four per cent.," as mentioned in the suppressed letter, B No. 21, from the Cashier of that bank.

The first intimation given by Mr. Crawford concerning the payment of the very large sum of money in that bank, beyond the amount of the permanent deposit, is in his letter, I No. 5, of June 23, 1819.

In the suppressed letter, B No. 10, to the President of the Bank of Missouri, of August 10, 1819, he becomes more specific, and, referring to his desire that those funds might be made available for the public service, he says: "I presume that, by this time, such preparatory measures as were deemed necessary for that purpose have been made. The whole of the sum will not be immediately required, however. I shall therefore instruct the Treasurer of the United States to draw on the Cashier of the Bank of Missouri in favor of the Bank of the United States, at the expiration of sixty days, for $210,000, and at the expiration of ninety days for $210,000. As soon as I am informed at what branches of the Bank of the United States it will be desirable to the Bank of Missouri that these drafts shall be made payable, instructions shall be given accordingly."

In the suppressed letter, B No. 14, of October 9, 1819, he says to the Cashier of the Bank of Missouri, "that the Treasurer of, &c., will be instructed to draw on you in favor of the Bank of the United States, at the expiration of sixty days, for $60,000, &c. You may therefore proceed at your convenience to place funds at Louisville to meet it on its presentation there."

Thus have we an account of three drafts, amounting to $480,000.

In letter I No. 6, of August 9, 1819, the Bank of Missouri proposes to "cause to be deposited in the Branch Bank of the United States at Fayetteville, or in any other bank in the State of North Carolina," $50,000 of southern notes; and in the Branch Bank of the United States at Washington city, $50,000 in the notes of the Bank of Virginia and the District of Columbia, and specie—say $10,000 in specie and $40,000 in notes; and within thirty days after receiving an order to that effect, in the Branch Bank of the United States at Louisville, or any other bank in the State of Kentucky, $275,000—viz: $87,000 in notes of the Bank of the United States and its branches; $103,000 in notes of the State Bank of Kentucky and branches; $15,000 in the notes of the Bank of Vincennes, and $70,000 in notes of the Bank of Tennessee; and in the Branch Bank of the United States in Cincinnati, or any other bank in Cincinnati, $25,000 in Ohio notes."

These payments, thus proposed to be made, amounting to $375,000, included all but $34,561 of the notes of the local banks, exclusive of its own, which were in the possession of the Bank of Missouri only seven days before. It is therefore fairly presumable that those $34,561 had been disposed of in the meantime, or that they were of the best kind, and that all those of the least value were included in the offer.

At the time these offers were made the bank had in its possession $109,645 in the notes of the Bank of the United States and its branches, $261,811 59 in specie; and in the Bank of Washington and branches of the Bank of the United States, $26,671 61—amounting in all to $398,128 20, being $23,128 20 more than the whole sum proposed to be transferred.—(See bank return of August, 1819, No. 119.) *Whose money was this?*

It may be proper here to remark that, in his late letter to the second committee of investigation, speaking of the "collision and irritation" between the Bank of the United States and the State banks, in the autumn of 1818, Mr. Crawford says: "At the same time it [the Bank of the United States] declared its determination to receive from the land offices nothing but its own notes and current coin of the Union, except as *special deposit*. The experience of the bank had about this period led to the conviction that it was impracticable to keep its own notes in circulation in the western States, and orders were consequently issued in the course of the autumn, or in the early part of 1819, forbidding its western offices to issue their notes, *even on a deposit of specie*." And hence it may have been, that, being so desirous "that the large sum then in the Bank of Missouri might, as soon as possible, be made available where the public service should require it," he appears to have hesitated about receiving such a large amount of unavailable funds from that bank while it had in its vaults so much good money that belonged to the Government.

In the suppressed letter, B No. 12, of the 9th of September, 1819, after remarking to the Bank of Missouri that, "*considering the precarious state of the State institutions, except in the principal cities, it would be an act of prudence not to retain their notes longer than what is absolutely necessary*," he says: "I will thank you to inform me if the amount of the notes of the State Bank of North Carolina is comprehended in the sum of $50,000 which you proposed to deposit in the Office of Discount and Deposit at Fayetteville; also the amount of the notes of the State Bank of Tennessee which is comprehended in the sum of $70,000 in Tennessee notes which you proposed to deposit in Kentucky. The same information is requested as to the other Tennessee banks." The propositions of the bank were not then acceded to, but were held "*sub judice*"—none of the money paid, and eight days before the date of this letter the whole of the notes of the local banks, exclusive of its own, in the possession of the Bank of Missouri were reduced to $281,445, leaving only $3,445 besides those which were proposed to be paid to the Government.—(See bank return of September 1, 1819.)

In letter I No. 7, of the 27th of September, 1819, to the Bank of Missouri, Mr. Crawford says: "The Bank of the United States having declined to receive as cash the Vincennes and Ohio notes mentioned in your letter, I have to request that you will deposit the former in the Bank of Vincennes, and the latter in the Bank of Chillicothe, &c. In consequence of the suspension of specie payments by the State Bank of North Carolina the Bank of the United States will not receive its notes as cash." He, however, agreed to receive them, and requested that all of them included in the $50,000 of southern notes should be deposited in the State Bank at Raleigh. Respecting the Tennessee notes, he says, "instructions will be given as soon as I receive your reply to my letter of the 9th instant."—(A suppressed letter.)—None of the money yet paid; and nine days after the date of this letter the whole amount of the notes of the local banks in the possession of the Bank of Missouri was $264,294, which was $13,706 less than the amount of those notes proposed to be paid to the Governmen .—(See bank return of October 1, 1819.) This deficiency, however, could easily be supplied, since nothing could be more practicable than to make the Government's good money available for the purchase of bad.

Various others of the suppressed letters relate to this subject. In one of them, B No. 13, of the 11th of October, 1819, from the President of the Bank of Missouri, he says to Mr. Crawford, in relation to the notes proposed to be paid to the Government, "your compliance with the request of this Board has been thankfully noticed by them, and they will, as far as practicable, follow your indications," &c.

The determination, however, to draw the first draft of $210,000 was changed, and a draft of $50,000, payable at the Branch of Washington, and $160,000, payable at the Branch Bank of Louisville, were substituted in the place. Funds to discharge the first of these drafts were transmitted from St. Louis on the 14th of November, 1819.—(See suppressed letter B No. 15.) The other draft having been protested at Louisville on the 8th of the same month was subsequently settled at this place.—(See suppressed letter B No. 16.) And thus the first portion of the public money required by Mr. Crawford's letter of the 23d of June, 1819, to be transferred was paid in about five months thereafter.

The second draft for $210,000 was transmitted to Louisville, but the branch at that place would not receive such notes as the Bank of Missouri insisted upon paying, as appears by the suppressed letter B No. 21, in which its Cashier says to Mr. Crawford, "I have answered the demand of that bank, (the Branch of Louisville) by saying that upwards of $70,000, (principally Tennessee notes) now and at all times heretofore assigned to the Treasury, *must go towards the payment of the debt called for by that draft.*"

It being, therefore, found impracticable to adjust this affair at Louisville agreeably to the wishes of the Bank of Missouri, it determined upon the expedient of sending an agent to Washington to negotiate with Mr. Crawford himself upon the subject.

In the suppressed letter, B No. 17, the President of the Bank of Missouri, referring to funds sent to Louisville (which are not described)* to $25,000

* A line left out.

of uncurrent notes sent to Raleigh, says to Mr. Crawford: "To perform this business our intelligent Director, Colonel Reddick, has given his services," and after expressing a hope that Mr. Crawford "would not again require of it [the bank] a transmission of its funds," he adds, "a disposition to aid the public service and a respect for your indications as a politician and *financier* will induce the directory to make any exertion which you may require, *provided it does not endanger the property and interests of their stockholders* and the safety of the institution. That danger is too imminent not to be dreaded, and the apprehension of it has effected *a determination not to encounter it.*" The bank being on the safe side, by having the public money in its possession, it would seem, was not altogether insensible of its power, in some measure, to dictate its own terms. That it did so with entire impunity and great advantage to itself will soon be shown.

In the suppressed letter, B No. 18, of January 31, 1820, its Cashier says to Mr. Crawford: "Colonel Reddick, a Director and agent of the bank, in making the public deposits, will claim your attention to the subject of the draft of $210,000. I beg that you will yield him that attention, as your *interference* will be no less an act of justice than of *necessary friendship to this institution.*"

In the suppressed letter, B No. 19, of February 18, 1820, the agent, Colonel Reddick, submits the following propositions to Mr. Crawford, viz: "That the draft drawn by the Treasurer for $210,000, payable at Louisville, *be withdrawn*, and that the following draft be substituted, to wit: payable at Louisville, $14,000 *in such money as is received by the Branch Bank as cash;* $2,150 in notes, Bank of Georgetown, Kentucky; $3,850 in State Bank of Kentucky notes; $70,000 in Tennessee notes, viz: State Bank of Tennessee, and Nashville Bank and branches, payable at Chillicothe, $25,000, special deposit to the credit of the Treasurer, payable at Washington city; $20,000 *in cash, or such notes as are received by the Branch Bank as such;* $1,175 special deposits to the credit of the Treasurer; $42,000 in North Carolina State Bank and branches." Or that if you (Mr. Crawford) "think proper to authorize the Bank of Missouri to collect or dispose of the Tennessee and Kentucky paper at St. Louis, *for the use of the Treasury*, the bank will cause it to be used to the best advantage, *in any way that may be directed.*"

These sums thus proposed to be paid amount to $178,175, of which $34,000 only appears to have been in such money as either of the branch banks referred to would receive as *cash*, and the whole amount was $31,825 less than that of the draft which was proposed to be withdrawn.

These propositions, however, were all acceded to by Mr. Crawford, on the 2d of March, 1820, as appears by his letter, I No. 9, to the Bank of Missouri, in which he says: "In consequence of a proposition made by Colonel Reddick, as agent for the Bank of Missouri, I have agreed that the Treasury draft for $210,000, drawn on that bank on the 18th of November last, payable at Louisville, shall be recalled." He also says that "the draft for $60,000, mentioned in my letter of the 19th of October last, [which was suppressed] has not been, and will not be drawn." And this, too, notwithstanding the President of the Bank of Missouri had expressly stated to Mr. Crawford, in the suppressed letter, B No. 17, of the 18th of December, 1819, that funds had been transmitted to Louisville "to meet the Treasurer's draft for $60,000, directed by your letter of the 19th of October." And, in conclusion, he, Mr. Crawford, adds, for the comfort and encouragement of the bank, "it is not probable that any other transfers will be required during the present year," of which only sixty days had then elapsed. And thus have we the winding up of the affair of these three proposed drafts, after the lapse of about nine months from the date of Mr. Crawford's letter of June, 1819, to the Bank of Missouri, stating "it was desirable that the large sum which was then in that bank, over and above the deposit proposed to remain in it, might, as soon as practicable, be made available where the public service would require it, and requesting that measures might be taken for paying it over to the Bank of the United States as fast as might be convenient," and for which purpose those very drafts were intended.

No return of the bank having been communicated of a later date than the 1st of February, 1820, I cannot precisely ascertain what was its real situation at the time those extraordinary propositions were acceded to, with the intimation so kindly given of ten months' additional forbearance. One month only, however, before the bank was permitted to discharge so much of its debt in uncurrent paper, it had in its vaults, besides its other good funds, $221,599 40 in specie of the Government's money, which it was permitted to retain and use. This alone was $43,424 40 more than the whole amount of the payments stipulated for by Colonel Reddick. At this very time the bank had in its possession no more than $75,106 of the notes of local banks, (with the exception of its own) nor had it as much the preceding month.—(See bank returns of January and February, 1820.)

What a system of brokerage and speculation might not this bank, under such circumstances *(had it been so inclined)* have adopted, exclusively at the risk of the United States? The use of such an immense amount of public money would have enabled it to appropriate to its own advantage a very large amount of those "funds which commanded a premium of four per cent." It had the opportunity of banking upon every description of money deposited in it. Whenever any bank whose notes it was authorized to receive failed, those notes immediately depreciated greatly, and though it might not at the time have a dollar of them in its possession, it could soon obtain them, either by purchase, or by receiving them from its debtors. The Directors themselves, *if they had chosen to do so*, might have borrowed and used those notes while they were current, and replaced them when they could be obtained for less than one-half of their nominal value.

It is evident that Mr. Crawford agreed to receive all the uncurrent notes that are shown to have been in its possession at the time of that agreement. And thus this bank, all of whose capital, except $23,665, was drawn out by the stockholders on pledges of stock, had not only enjoyed the benefits of loaning those vast sums of public money, and the opportunity of speculating upon depreciated paper, but it was indemnified and secured against all the losses and risk of those operations.

Now, can it be doubted that some of these uncurrent notes of the Banks of Ohio, Kentucky, Tennessee, and North Carolina, had been received by the Bank of Missouri, on its own account, in its regular course of business? Mr. Crawford himself suggests the probability that such had been the case in regard to the uncurrent notes received from the Bank of Tombeckbee. Was it less probable in this case? Upon what funds could this bank otherwise have done business to such an extent? And what could justify Mr. Crawford for receiving, in discharge of a debt to the Government, even of not more than a thousand dollars, paper that was not worth more than two hundred and fifty dollars?

Let the "economy and retrenchment" gentlemen look to these things. No one, I am sure, after reading all the foregoing statements, and comparing them with the documents furnished by Mr. Crawford, will be silly enough to insinuate that the letter A 5 was marked by a member of Congress, without expecting to be laughed at and contemned by every man of sense and virtue in the community.

A. B.

18TH CONGRESS.] No. 707. [1ST SESSION.

NINIAN EDWARDS DETAINED FROM MISSION TO MEXICO BY HOUSE OF REPRESENTATIVES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 23, 1824.

To the House of Representatives:

In conformity with a resolution of the House of Representatives of yesterday, I have received a copy of the proceedings of the committee to whom was referred a communication from Ninian Edwards, lately appointed Minister Plenipotentiary to Mexico, in which it is decided that his attendance in this city, for the purpose of being examined by the committee on matters contained in the said communication, was requisite. As soon as I was apprised that such a communication had been made to the House, anticipating that the attendance of Mr. Edwards might be desired for the purpose stated, I thought it proper that he should be informed thereof, and instructed not to proceed in his mission, but to await such call as might be made on him, either by the House or its committee; and, in consequence, a letter was addressed to him to that effect by the Secretary of State.

JAMES MONROE.

APRIL 23, 1824.

18TH CONGRESS.] No. 708. [1ST SESSION.

LOANS MADE TO GOVERNMENT DURING THE WAR OF 1812–'15.

COMMUNICATED TO THE SENATE APRIL 28, 1824.

To the Senate of the United States:

In conformity with a resolution of the Senate of the 19th instant, requesting information whether the Executive, through the agency of the War Department, borrowed any money during the last war, under the condition of applying the same to the defence of the State wherein the said loans were made, to what amount, and whether interest was paid by the United States for such loans, &c., I herewith transmit a report from the Secretary of War, containing all the information in that Department in relation to the resolution.

JAMES MONROE.

APRIL 27, 1824.

DEPARTMENT OF WAR, *April* 27, 1824.

The Secretary of War, to whom was referred the resolution of the Senate of the United States, of the 19th instant, requesting the President of the United States "to inform the Senate whether the Executive, through the agency of the War Department, borrowed any money during the last war, under the condition of applying the same to the defence of the State wherein the said loans were made, to what amount, and whether interest was paid by the United States for such loans, or if they sustained any loss by giving stock or Treasury notes for them, including any other information in relation to the subject which he may think proper to communicate," has the honor to transmit herewith copies and extracts of letters from this Department to Executives of certain States, to corporations of certain cities, banks, and commanding generals of military districts, marked A; and of a report of the Third Auditor of the Treasury, marked B, which contain all the information in this Department in relation to the resolution.

But it is probable additional information in relation to the "amount of the loans, and whether interest was paid by the United States for such loans, or if they sustained any loss by giving stock and Treasury notes for them," can be obtained at the Treasury Department.

All which is respectfully submitted.

J. C. CALHOUN.

The PRESIDENT *of the United States.*

Extract of a letter from the Secretary of War to Brigadier General Joseph Bloomfield, dated September 5, 1814.

"In the present state of affairs here, it is impossible to remit to you the money which may be absolutely necessary for these purposes. I have, however, already accepted a draft in favor of Mr. McCoy, which has satisfied that demand; and, to put you at ease for the future, I transmit to you a letter of credit on the Bank of Pennsylvania for the sum of two hundred thousand dollars, which I think the Directors will not hesitate to advance as you may require it, especially as the whole sum will be expended in the payment of the troops and erecting works necessary for the defence of the city. In carrying their objects into effect, a free communication will be proper and eminently useful with the Government of Pennsylvania and the Committee of Safety in Philadelphia. On their support full confidence is reposed; on it, and on the virtue and patriotism of the citizens of Pennsylvania, the safety of the city may depend."

WAR DEPARTMENT, *September* 6, 1814.

SIR: The Government being anxious to put into operation, with celerity and effect, all practicable measures for the security of Philadelphia against the attacks of the enemy, I have to propose to you that the Bank of Pennsylvania loan to it, to be immediately and exclusively applied to that object, the sum of $200,000. I am authorized by the Secretary of the Treasury to state that Treasury notes or stock of the United States will be issued to give effect to such loan, as to which I should be glad to receive an answer from you with as much despatch as may be; the money to be deposited in bank until used by the Government, and interest at the common rate to go on. Every delay in having command of the funds is to be avoided, as it will be productive of correspondent delay in the defensive measures contemplated.

If the Bank of Pennsylvania cannot make the loan at the present moment, I will take the liberty of requesting—as the object in view is commom to the city and, of course, all the banks—that you make known, on behalf of the Government, to the other banks in Philadelphia the wishes and proposal stated in this letter. If their disposition and means could supply a greater sum than that herein mentioned, I should be happy to be so informed, as, in that case, it would leave a latitude for larger appropriations towards the object in question.

I have the honor, &c.,

JAMES MONROE.

JOSEPH P. NORRIS, Esq., *President of the Bank of Pennsylvania.*

WAR DEPARTMENT, *September* 13, 1814.

GENTLEMEN: I have submitted to the President the proposition of the corporation of the city of New York for advancing to the United States, by loan, the sum of one million of dollars, to be applied exclusively to the defence of that city, in all the necessary measures authorized by law which the present crisis of public affairs may require, under the direction of the Government.

I am instructed by the President to state that he considers this as a proof of the patriotism of the corporation of New York, and of the zeal of the inhabitants in defence of the city and of the common rights of the nation.

The proposition is accepted, with an understanding that the money must be deposited in some bank, according to the rules of the Treasury Department, and disbursed in the mode and according to the forms of that Department and the Department of War. On the strict application of the money to the objects for which it was intended you may confidently rely.

No objection is seen to any arrangement which may promote this object which is common to this Department and to the corporation.

I enclose a note, received from the Treasury Department, of the forms which it will be necessary to observe in the case.

Any expenditures incurred since the loan of this money was decided on, coming within its objects, will be considered as comprised within its acceptance.

I have the honor to be your obedient servant,

JAMES MONROE.

J. W. BRACHET and E. W. KING, Esqs.

[Extract.]

WAR DEPARTMENT, *October* 2, 1814.

"SIR: Your letters of the 7th, 17th, 19th, and 24th of September have been received.

"The force called out by you on the 7th of September is approved of, and thought not disproportioned to the object or crisis. The patriotic efforts of the citizens of Charleston, in contribution of labor and money towards the completion of the field work projected by you, are received with pleasure and approbation. The money loaned by the corporation for the defence of the town will, most assuredly, be reimbursed. Some delay in this must necessarily take place, and it was prudent in you to give no assurances of reimbursement until the termination of the war.

"As to money, you must be well aware that there is a great pressure on the Government from every quarter, and you will rest assured that every possible exertion will be made to meet the demands from yours as well as every other district. The stoppage of the banks to pay their notes in specie, and which can only be continued by the countenance given to it by the Government, and the general spirit of patriotism now prevalent, have given considerable facilities to our money operations; and it is to be hoped that they will be extended to your district, and that you will be enabled to obtain from the banks and corporations of Savannah and Charleston, for Treasury notes at par, or by subscriptions, the loan of such sums as may be necessary to carry on for the present the necessary fortifications, and to pay and subsist the militia that may be called out for their defence. The Treasury notes, if preferred, and they can be immediately negotiated, will be forwarded to you. If an additional subscription to the loan is more desirable to the banks, an arrangement will be made with the Treasury by which the expenditure of the money will be made in conformity to the objects of the lenders."

I have the honor, &c.,

JAMES MONROE.

General THOS. PINCKNEY.

WAR DEPARTMENT, *October* 3, 1814.

SIR: Your letter of the 17th ultimo, making known the resolves of the banks of your city to loan to the Government the sum of $200,000 for the defence of Philadelphia, on the terms and conditions at which a part of the loan for six millions of dollars has been negotiated, in consequence of proposals made by the Secretary of the Treasury, dated July 25, 1814, has been received.

The acting Secretary of the Treasury, to whom your letter and the resolves of the banks have been communicated, will transmit to you by this day's mail a letter agreeing to the terms proposed by the banks, and pointing out the mode that will be necessary to be observed in order to obtain evidences of stock, as well as the proper disposition of the money loaned, agreeably to the established rule of the Treasury. When that Department shall have acknowledged the receipt of the loan referred to, a warrant will be made in your favor for all such sums as you may have advanced, and the balance will be drawn through the Treasury in the usual way, to meet the necessary expenditures for the protection of Philadelphia.

I have the honor, &c.,

JAMES MONROE.

JOSEPH P. NORRIS, Esq., *President of the Pennsylvania Bank.*

WAR DEPARTMENT, *October* 3, 1814.

GENTLEMEN: In addition to the several sums heretofore advanced to M. L. Davis, Esq., contractor for supplying rations to the militia in actual service for the defence of New York, I have to request that you will take up his draft on this Department for one hundred thousand dollars on that account.

I have also to request that you will forward to this department, as soon as practicable, the accounts and vouchers for all sums which you may have advanced to the several agents of this Department on account of supplies for local defence; and I have further to request that you will obtain from the Treasury

Department an acknowledgment of your loan of one million of dollars. When that Department shall have acknowledged the receipt of the loan referred to, a warrant will be made in your favor for all such sums as you may have advanced, and the balance will be drawn through the Treasury in the usual way, to meet the necessary expenditures for your future defence.

I have the honor, &c.,

JAMES MONROE.

The Corporation of New York.

War Department, *October* 3, 1314.

Sir: Yours of the 2d of October has been received and generally anticipated by a letter from this Department, which you will have received.

You will take such measures as will compel the contractor to furnish good and sufficient supplies to the troops. As to their pay, should the Paymaster not have funds in his hands to meet the demands, it is presumed that you will be able to negotiate with the banks of Baltimore, for Treasury notes at par, such sums as will be necessary to pay off the militia, as well also as the amount that may be required for erecting works, mounting cannon, &c. As the banks do not pay in specie, they certainly cannot issue their notes on any better security than the Treasury notes of the United States.

I have the honor, &c.,

JAMES MONROE.

General Samuel Smith, *Baltimore.*

Extract of a letter from the Secretary of War to the Governor of Rhode Island, dated October 4, 1814.

"From the present state of the Treasury much dependence must be placed on the local authorities and the banks of your State to furnish temporarily those funds which it will be necessary for the United States to expend for their own immediate protection."

J. M.

Extract of a letter from the Secretary of War to Major General Henry Dearborn, dated October 4, 1814.

"It is supposed that, for the present, a sufficient sum of money for the pay and subsistence of the troops called out in your military district for its defence could be obtained from the State authorities, the town of Boston, and the banks, either by taking Treasury notes at par, or by a loan to the General Government, at legal interest, to be reimbursed at the end of the war, it being understood that the money thus loaned should be expended in the defence of the district, either in the erection of works and fortifications (under the superintendence of an officer of the United States) or to pay and subsist the Army; either of which arrangements will be sanctioned by the Government. You will advise this Department to what extent you will be able to put yourself in funds by those means, and what is your probable monthly expenditure."

J. M.

War Department, *October* 5, 1814.

Gentlemen: In addition to the sums heretofore advanced to the several officers and agents of this Department for the defence of Philadelphia, I have to request that you will pay the drafts of Mr. Robert McCoy, contractor, to the amount of fifty thousand dollars, for the supply of provisions for the militia in service near your city. Until the loans offered by your banks are arranged between them and the Treasury, the funds cannot be drawn by warrants through that Department. I have, therefore, to suggest the expediency of an arrangement with the Treasury, by which they may be enabled to recognize the loans, including the advances made at the request of General Broomfield, as well as the sum referred to in this letter. When this arrangement shall have been acknowledged by the Treasury, a warrant will be given to cover all advances, and the balance will be drawn through that Department in the usual way, to meet the necessary expenditures for your future defence.

I have the honor, &c.,

JAMES MONROE.

The Committee of Defence, *Philadelphia.*

Extract of a letter from the Secretary of War to General Samuel Smith, commanding at Baltimore, dated October 6, 1814.

"The Treasury notes are signed in Philadelphia, and can be remitted thence directly to you if they can be negotiated, and that they might have been negotiated in the wealthy city of Baltimore was the more to

have been expected, as the Paymaster here has put himself in funds to pay so far the militia of the District of Columbia by a similar negotiation with the banks in it, and with some of them, too, that have been most inimical to the operations of the Government. The money, whether obtained by a negotiation for Treasury notes or a loan, will be placed to the credit of the United States, and drawn out in the usual forms, and placed to the credit of the Commanding General and the head of the staff department in such portions as circumstances may make necessary to be applied to the expenses incurred for the necessary fortifications, &c., and the pay and subsistence of the troops stationed in Baltimore and its vicinity."

J. M.

Extract of a letter from the Secretary of War to Messrs. James A. Buchanan, William Lorman, and Henry Payson, sub-committee of Baltimore, dated October 7, 1814.

"I am instructed by the President to state that he considers the loan offered by the sub-committee, on the part of the town of Baltimore, as a proof of the patriotism and zeal of the inhabitants in defence of the city and the common rights of the nation. It will be accepted, with an understanding that the money must be deposited in some bank, according to the rules of the Treasury Department, and disbursed in the mode, and according to the forms of that Department and the Department of War. On the strict application of the money, under the superintendence of the General commanding the District, according to the laws of the United States, to the defence of Baltimore, and to the pay and subsistence, &c., of the troops stationed in that town and its vicinity, you may confidently rely.

"With respect to the past expenditures, the President is aware that, in the preparations to receive and repel the enemy, as well as during his presence in the neighborhood, many arrangements might be necessary and expenses incurred, which could not fail to have a salutary effect, for all the purposes for which they were intended. In sanctioning these, or any of them, reference must be made to existing laws, under which this Department acts. The same liberal construction of these laws, and the rule of expounding them, will be adopted, as well in regard to past expenditures, as to the future."

J. M.

Extract of a letter from the Secretary of War to General Samuel Smith, commanding at Baltimore, dated Baltimore, October 8, 1814.

"The District Paymaster has orders to repair immediately to Baltimore. He takes with him fifty thousand dollars in Treasury notes. It would be advisable to get the Committee of Vigilance to extend their loan to an amount that would probably cover your expenditures to the 1st December—a rough estimate of which you might be able to give them."

J. M.

War Department, *October* 12, 1814.

"Sir: It is desirable that the troops in service for the defence of Baltimore should be paid. It is not in the power of this Department to command the funds at this time. There can be little doubt that measures will be adopted by Congress to bring Treasury notes to par, and I hope, with the aid of the patriotic citizens of Baltimore, you will be able to procure a loan from the banks for this object, with the assurance of this Department that measures shall be immediately adopted to refund such sums as they may advance on this account, with interest."

J. M.

General Samuel Smith, *Commanding at Baltimore.*

War Department, *October* 18, 1814.

Gentlemen: By a communication received from the Treasury Department I find that no money has been paid into the Treasury on account of the loan made by the corporation of the city of New York to be expended for the defence of that city.

In my letter of the 3d instant I had the honor to point out to you the mode that would be necessary in the application of the loan for the purpose intended by the corporation and the Government.

As frequent drafts are made on this Department for the payment of expenses incurred in the defence of the city of New York, which cannot be paid until the arrangement pointed out in my letter of the 3d instant is completed, I have to request that the corporation will be good enough to expedite the arrangement, if not already made, and that the Treasury shall have the amount of the loan deposited in some bank in New York. On its sole application to the defence of the city of New York, according to the laws of the United States, for the payment, subsistence, &c., of the troops, you may confidently rely.

I have, &c.,

JAMES MONROE.

The Corporation of New York.

WAR DEPARTMENT, *October* 19, 1814.

SIR: The Secretary of the Treasury is busily engaged in the adoption of measures which, it is confidently presumed, will enable this Department to meet all its engagements in a short time; and you may rest assured that so soon as the means are within my control, one of the first objects which will engage my attention shall be the payment to your bank of all advances which it has been kind enough to make to this Department, as well as the payment of any advances which may henceforth be made.

For the advances heretofore made by the bank in payment of drafts on this Department, which have been accepted or authorized by it to be paid, the bank will be allowed the legal interest from the period of their falling due until their payment by the Department, and the same course will be pursued in regard to any other advances which may be made by the bank.

I have the honor to be, &c.,

JAMES MONROE.

CLEMENT SMITH, Esq., *Cashier of the Farmers and Mechanics' Bank, Georgetown.*

WAR DEPARTMENT, *November* 15, 1814.

SIR: I have not yet had the pleasure to receive the statement of expenditures made by the Committee of Defence of New York out of the loan of $1,000,000 made by the corporation of that city, promised in your letter of the 25th October.

It is indispensably necessary, on many accounts, that this Department should be in possession of that document, and more especially for the purpose of ascertaining what amount it may be proper to draw for in favor of the contractor at New York, who is extremely pressing for funds.

No other resource to provide for his supplies at this time is at the command of this Department. I have this day authorized him to draw on the Committee of Defence for————, which draft you will be pleased to pay.

JAMES MONROE.

N. FISKE, Esq., *Chairman of Committee of Defence, New York.*

WAR DEPARTMENT, *November* 18, 1814.

SIR: Yours of the 16th instant, enclosing a letter to you from the President of the Commercial and Farmers' Bank of Baltimore, is received. It is desirable that your accounts with that bank should be settled and paid up as far as possible. The amount of the loan from the banks of Baltimore was to be applied to the discharge of the expenses incurred in the defence of that place, under the superintendence of the Commanding General of the military district. You will, therefore, make the necessary arrangements with General Scott and the sub-committee of Baltimore as to the sum which can be applied out of that loan to defray the expenses of your department. In addition to that amount, I can direct fifty thousand dollars in Treasury notes to be remitted to you, which is all that the existing state of things will at present admit.

JAMES MONROE.

PAUL BENTALOU, *Quartermaster General.*

WAR DEPARTMENT, *November* 25, 1814.

SIR: Hearing that an increased demand for Treasury notes had raised their value in New York, and having urgent calls for money in the eastern States, I have taken the liberty to remit to you a very considerable sum, $600,000, in addition to the sum of $100,000 lately forwarded. In confidence, I have to state that it is contemplated to make an attempt to expel the British force, who have intruded within our limits, from Maine, and that there is great hope of success, if we shall be able to place a part of this money in a bank at Boston. The object of the remittance of these notes is to sell the whole sum, provided they can be sold at par: $200,000 of which to be deposited in a bank at Boston, and the balance in a bank at New York.

JAMES MONROE.

Governor TOMPKINS, *of New York.*

WAR DEPARTMENT, *December* 23, 1814.

This Department having been informed that, if assurances were given to the corporation of Wilmington that all moneys advanced by it to the United States should be confined in their expenditure to completing the works erecting on the Pea Patch it would advance willingly and liberally, I have now the honor of assuring you that whatever advances are thus made shall be exclusively confined to that object, and that an interest of six per centum per annum will be allowed until the sums so advanced are repaid.

JAMES MONROE.

The CORPORATION OF WILMINGTON, *Delaware.*

WAR DEPARTMENT, *December* 23, 1814.

SIR: Understanding that it is your wish to aid the views of the General Government by loans of money, on the condition that such loans will be confined exclusively to the completing the works erecting on the Pea Patch, I now make you the assurance that this condition will be respected to the extent of the sums loaned, and that an interest of six per centum per annum will be allowed on them till paid.

JAMES MONROE.

MESSRS. JOSEPH RIDDLE, *and others, Newcastle, Delaware.*

Extract of a letter from the Secretary of War to his Excellency Wilson C. Nicholas, Governor of Virginia, dated War Department, January 4, 1815.

"It is much to be desired that those of the militia who may be discharged should be previously paid, and that they should be supplied with provisions on their return home, especially the sick. All possible attention will be paid to these most important objects; but here new difficulties occur, of a nature not unknown to you. The resources of the country are abundant; the virtue and patriotism of our fellow-citizens unequalled; but, until a system of finance, inspiring general confidence, is adopted, the want of money will be experienced. From the banks of most of the States much aid has been derived in this trying emergency. If the banks of Virginia, who have been friendly, will assist us with funds, we shall be happy to take advantage of, and apply them to the payment of the troops employed in the defence of the State. I would thank you to have the goodness to communicate with them, and inform me of the result. Legal interest will be paid, and Treasury notes deposited, as in other cases, as a security for reimbursement."

J. M.

WAR DEPARTMENT, *January* 30, 1815.

SIR: I have had the honor to receive your letter of yesterday, requesting me to state whether there was not an understanding or agreement between the committee of the corporation of New York that the loan of one million of dollars, which was advanced to the United States to be applied to the defence of that city, should be accepted at the rate of eighty dollars in the hundred.

I do not recollect that any precise agreement was entered into or insisted on by the committee respecting that particular condition of the loan. I remember that I considered the loan as a strong proof of the public spirit and patriotism of the corporation of the city of New York; that eighty was the sum at which stock had just before been disposed of by the Secretary of the Treasury; and that, had a positive agreement been then entered into, I could not have expected to have obtained it on more favorable conditions. So far as I have any recollection of what passed between the committee and me on this point, I am inclined to think that the failure to enter into an agreement proceeded from an aversion on my part to fix the loan at that sum, or rate, preferring to leave it to subsequent and amicable adjustment, in the hope that if the public credit should rise the corporation would be satisfied with the sum at which future loans might he obtained.

On a review of the subject, as the money has been received and disbursed, I am of opinion that it ought to be left to the corporation to decide on what condition the loan has been made; and if it should insist that it was made at eighty in the hundred, or ought to be accepted at that rate, it should be done.

It is presumed that the corporation will not insist on more favorable terms than other corporations have done for loans made to the United States for similar purposes and under similar circumstances.

JAMES MONROE.

THOMAS R. MERCIEN, Esq., *New York.*

ALBANY, *March* 22, 1815.

SIR: The Legislature of this State have passed a law authorizing a loan to the General Government of three hundred and fifty thousand dollars, to enable the Government to pay off the volunteers and militia of this State who served on the northern and western frontier during the last campaign. I enclose a copy of the law, and would beg to learn whether the proposed loan will meet your acceptance.

I have the honor to be, sir, respecfully, your obedient servant,

DANIEL D. TOMPKINS.

Hon. A. J. DALLAS.

AN ACT authorizing the Comptroller to loan to the General Government a sum of money sufficient to pay off the militia of this State who have been ordered into the service of the United States, and for other purposes, passed March 17, 1815.

Be it enacted by the people of the State of New York, represented in the Senate and Assembly, That the Comptroller of this State be, and he is hereby, authorized and required to loan to the Government of the United States a sum of money, not exceeding three hundred and fifty thousand dollars, for the purpose of paying off the militia of this State who have been ordered into the service of the United States, and who

may yet remain unpaid for their services: *Provided*, The said Government of the United States shall stipulate to repay the sum so to be loaned within two years after the making of the loan, with an interest at and after the rate of six per centum per annum, to be paid annually, or issue certificates of stock to the people of this State, equal in amount to the sum which may be purchased of such stock in market at the time of making said loan with the money hereby authorized to be loaned.

And be it further enacted, That if there shall be an insufficiency of money in the treasury to make said loan, it shall be the duty of the Comptroller to borrow the same from any bank or banks within this State, or from any company or companies, or from individuals, on the most advantageous terms within his power, and to draw his warrant on the Treasurer for the payment of the same to the said Government of the United States so soon as the necessary arrangements to secure the repayment thereof shall be made as aforesaid.

And be it further enacted, That it shall be the duty of the person administering the government of this State to use all proper endeavors, without delay, to obtain from the said Government of the United States payment, in money, or in any stock created or authorized by the United States, for all such expenditures by this State, during the war just terminated, as may, in his opinion, be justly chargeable to the United States, and to report his proceedings, under this act, to the Legislature at their next session.

And be it further enacted, That the person administering the government of this State be, and he is hereby, authorized to adjust, with the proper officer or Department of the United States, the account between them and this State, for arms, equipments, and all other munitions belonging to said State, embezzled, worn out, captured, or otherwise lost or destroyed, during the late war, in the service of the United States, and of the munitions of the United States destroyed or lost by troops in the service of the said State, and that the Comptroller draw his warrants on the Treasurer for such expenses as may be incurred in travelling and procuring evidence and vouchers for such losses, or otherwise, in carrying this act into effect: *Provided, however*, That nothing in this or the preceding section contained shall in any manner prejudice any claims which the State may think proper to make upon the General Government for expenditures made for the defence of this State prior to the late war.

SECRETARY'S OFFICE, *March* 22, 1815.

I certify the preceding to be a true copy of an original act of the Legislature of this State on file in this office.

PETER B. PORTER, *Secretary.*

DEPARTMENT OF WAR, *March* 24, 1815.

SIR: I have the honor to acknowledge the receipt of your letter, enclosing a copy of the act of the General Assembly of Pennsylvania entitled "An act authorizing the Governor to negotiate a loan for paying the militia and volunteers of this State late in the service of the United States," passed the 11th of March, 1815. This communication has been submitted to the President, who authorizes me to express his high sense of the uniform patriotism and public spirit of the Legislature of Pennsylvania, and to accept the loan of $300,000, or such part of that sum as may be necessary for the contemplated object, at an interest of six per centum per annum, to be reimbursed at any time within three years, upon the condition prescribed in the act, and to give you an assurance that the sum so loaned shall be applied to the payment of the militia and volunteers of Pennsylvania late in the service of the United States.

I cannot allow this opportunity to pass without an expression of the personal gratification which, as a grateful citizen of Pennsylvania, I have derived from contemplating the exemplary conduct of the State, in its relation to the internal Government, during your administration.

I have, &c.,

A. J. DALLAS

Governor SNYDER.

DEPARTMENT OF WAR, *March* 26, 1815.

SIR: I have the honor to acknowledge the receipt of your letter of the 22d instant, enclosing a copy of the act of the Legislature of New York, "authorizing the Comptroller to loan to the General Government a sum of money sufficient to pay off the militia of this State who have been ordered into the service of the United States," passed March 17, 1815.

The offer of a loan of $350,000 under this act is accepted, upon the conditions which the act prescribes. The amount will be applied to the payment of the militia of the State of New York who have been ordered into the service of the United States, and who may yet remain unpaid for their services. And it is agreed that the loan shall be repaid within two years after the money is placed to the credit of the Treasurer of the United States in the Bank of America and the City Bank, or either of them, with an interest at the rate of six per centum per annum, to be paid annually.

I have the honor, &c.,

A. J. DALLAS.

Governor DANIEL D. TOMPKINS, *New York.*

DEPARTMENT OF WAR, *May* 31, 1815.

SIR: I have the honor to acknowledge the receipt of your letter dated the 22d instant.

It will be an accommodation to this Department that the militia of New Jersey called into the service of the United States should be paid out of the fund which the Legislature has authorized you to procure.

If, therefore, you will be so good as to inform me when the money is ready to be distributed, the Paymaster of the Army will give the necessary directions for making the payment in a form to be recognized here upon the regular pay-rolls.

The amount thus advanced by the State will be considered as a loan to the United States, bearing six per cent. per annum interest, and reimbursable in one year.

The necessity of ascertaining the state of our appropriations for the payment of the troops before your offer was accepted will be deemed, I hope, a sufficient apology for not answering your letter sooner.

I have, &c.,

A. J. DALLAS.

Gov. Wm. Pennington, *New Jersey.*

Extract of a letter from the Secretary of War to his Excellency William Jones, Governor of the State of Rhode Island, dated

War Department, *May* 5, 1815.

"I have the honor to acknowledge the receipt of your excellency's letter of the 24th ultimo, and to repeat the assurances which you have received from my predecessors, that any sum of money advanced by the State of Rhode Island to pay its militia or volunteers who were entered into the service of the United States will be cheerfully reimbursed."

War Department, *June* 20, 1815.

Sir: You will be so good as to place the money loaned by the State of New Jersey, for the purpose of paying her militia called into the service of the United States, at the disposal of Robert Brent, Esq., the Paymaster of the Army, who will take immediate measures for the application of the loan to its object.

The advance which you propose to make for the Quartermaster's Department is likewise very acceptable; but you will observe that the reimbursement must await an act of Congress making additional appropriations for the military service, as the existing appropriation is insufficient.

I have, &c.,

A. J. DALLAS.

His Excellency William Pennington, *Governor of New Jersey.*

Treasury Department, *Third Auditor's Office, April* 22, 1824.

Sir: In conformity with the note from the War Department, dated on the 21st instant, directing me to furnish the information required by a certain resolution therewith referred, passed by the Senate of the United States on the 19th instant, to the following effect, viz: "That the President of the United States be requested to inform the Senate whether the Executive, through the agency of the War Department, borrowed any money during the last war, under the condition of applying the same to the defence of the State wherein the said loans were made, to what amount, and whether interest was paid by the United States for such loans, or if they sustained any loss by giving stock or Treasury notes for them, including any other information in relation to the subject which he may think proper to communicate," I have the honor to state that payments have been found to have been made for interest on loans to the United States, as follows:

To the State of Pennsylvania, on a loan of $300,000, from May and June, 1815, to March 31, 1817	$33,670 97
To the State of New Jersey, on a loan of $50,000, from June 24, 1815, to April 30, 1816	2,558 33
To the city corporation of Charleston, South Carolina, on advances made in October, November, and December, 1814, and January, February, April, and May, 1815, amounting to $145,000, from the dates thereof to the 4th January, 1816	8,531 36

With the interest account of the City Council of Charleston there is a letter dated in January, 1816, from the Intendant to the Hon. Henry Middleton, a copy whereof is herewith transmitted, whereby it appears that the advances were made on account of the fortifications erected for the defence of that city; that $163,911 39 had been expended; and that United States 6 per cent. stock to the amount of $204,889 23 had been received in discharge thereof. The terms on which the before mentioned loans by the States of Pennsylvania and New Jersey were obtained, or the kind of funds wherewith they were reimbursed, cannot be ascertained in this office.

It has also been found that the Committee of Defence of Philadelphia made advances to officers of the United States, amounting to $206,602 50, and disbursements in repairing Fort Mifflin and its dependencies, in purchasing and sinking vessels in the Delaware, and in erecting fortifications in and near Philadelphia, &c., &c., amounting to $64,251 83. In the account for the advances the sums are credited as having been repaid, ($145,000 thereof by warrants of the Treasurer, and the remaining sums by the officers to whom the same were advanced,) and in an interest account therewith, interest is charged on the advances and credited on the refundments from the dates thereof, respectively, to the 20th January, 1815, resulting in a balance of between eight and nine hundred dollars in favor of the committee, and which appears to have been claimed but not allowed, the Secretary of War having refused his sanction thereto. The

balance due on the account for disbursements, after deducting the proceeds of the sales of the vessels, &c., appears to have been paid by a warrant of the Treasurer in July, 1815. The nature of the funds in which either the advances or disbursements were repaid is not ascertainable in this office. By the copy of a letter from the War Department to the committee, dated October 5, 1814, and filed with the account, it would seem that the advances were made exclusively for the defence of Philadelphia.

The corporation of the city of New York, it has also been found, rendered accounts for expenditures amounting to nearly $950,000, and the principal part whereof appears to have been reimbursed by a warrant of the Treasurer in January, 1815, but in what funds this office affords no evidence. Amongst the papers filed with the account is the copy of a letter taken from the War Department, dated September 13, 1814, to Messrs. E. W. King and J. W. Brachet, a committee of the corporation, whereby it appears that a proposition had been made by the city for advancing to the United States, by loan, one million of dollars, to be applied exclusively to the defence of that city, and that on certain conditions the proposition had been accepted by the General Government.

There may possibly be other accounts within the scope of the resolution, but which cannot be ascertained without a very minute investigation, unless they were designated. The resolution is returned.

With great respect, your most obedient servant,

PETER HAGNER, *Auditor.*

Hon. J. C. CALHOUN, *Secretary of War.*

CHARLESTON, SOUTH CAROLINA, *January* 26, 1816.

SIR: I have received your favor of the 6th instant, by Mr. Giles, and I have the pleasure to inform you that I have received from the Commissioner of Loans, at this city, United States six per cent. stock to the amount of $204,889 23, issued for the sum of $163,911 39, advanced by the City Council to the United States, on account of the fortifications erected for the defence of this city. The claim for interest remains, however, to be settled; and I am much obliged to you for your information on the subject. I have received a letter of the 10th instant from the Secretary of the Treasury, wherein he says: "That if any further allowance of interest" (other than that on the stock from the 4th instant) "be deemed equitable, it must be arranged at the War Department."

I enclose you a copy of my letter to the Secretary of War and the Secretary of the Treasury, respecting this claim for interest, and I do hereby request and authorize you to receive any further certificate or warrant that shall be issued from the War Department in favor of the City Council of Charleston, and to act thereon as you shall judge most proper and advisable.

I am, with great respect, your most obedient servant,

ELIAS HORREY, *Intendant.*

Hon. HENRY MIDDLETON.

B.

TREASURY DEPARTMENT, THIRD AUDITOR'S OFFICE, *April* 26, 1824.

SIR: I have the honor to state that the documents referred to this office from the War Department, since the transmission of my letter to you of the 22d instant, respecting loans made to the United States, have enabled me to ascertain that further payments for interest have been made, as follows, viz:

To the Bank of the State of South Carolina, on a loan of $40,000 to General Pinckney, from February 25, 1815, to October 3, 1816	$3,853 33
To the Planters and Mechanics' Bank, Charleston, South Carolina, on a loan of $40,000 to General Pinckney, from March 3, 1815, to June 17, 1816	3,091 79
To the Bank of South Carolina, on a loan of $40,000 to General Pinckney, from March 2, 1815, to June 19, 1816	3,118 03
To the Union Bank, Charleston, South Carolina, on a loan of $40,000 to General Pinckney, from March 3, 1815, to May 3, 1816	2,800 00
To the State Bank of South Carolina, on a loan of $40,000 to General Pinckney, from March 4, 1815, to July 2, 1816	3,190 16
To the Planters' Bank of the State of Georgia, on a loan of $100,000, from March 1, 1815, to December 9, 1816	12,402 17
To D. D. Tompkins, Governor of the State of New York, on a loan of $400,000 obtained by him from the corporation of New York, from December 24, 1814, to February 6, 1816.	28,552 28

An allowance was also made to Governor Tompkins for excess of interest paid to banks in the State of New York, which accrued on Treasury notes, pledged as security for moneys borrowed by him from those banks, and for loss on the sale of a portion of such notes, of $11,463 36.

With the account of the Bank of South Carolina, there is a letter from Thomas W. Bacot, the Cashier, mentioning that six per cent. stock, at 91 for 100, was to be received for principal and interest in that case. There is nothing, with the other accounts, showing in what funds the loans were to be reimbursed, or on what conditions they were obtained.

A payment of $10,000 appears to have been made to the Mechanics' Bank of New York, for interest on a loan of $400,000 to Washington Lee, D. P. M. G., from July 25, 1814, to January 1, 1815. Whether this loan was of the description mentioned in the resolution of the Senate I am unable to say, the papers expressing nothing on that point.

With great respect, your most obedient servant,

PETER HAGNER, *Auditor.*

Hon. JOHN C. CALHOUN, *Secretary of War.*

18TH CONGRESS.] No. 709. [1ST SESSION.

ANSWER OF THE SECRETARY OF THE TREASURY TO NINIAN EDWARDS' CHARGES OF FINANCIAL MISMANAGEMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 11, 1824.

TREASURY DEPARTMENT, *May* 8, 1824.

The Secretary of the Treasury has had the honor to receive the letter of the Hon. Mr. Floyd, chairman of a select committee of the House of Representatives, dated on the 28th ultimo, transmitting the "Address of Ninian Edwards," and expressing the readiness of the committee to receive any communication which the Secretary may think proper to make in reference to the same, and he now submits the following remarks in answer to the accusations contained in that address.

But before he enters upon an examination of the subject of the "address" he thinks it due to himself to disclaim the imputation of having taken advantage of the moment of Mr. Edwards' departure to arraign the testimony which had been given by him before a former select committee of the House. As the Secretary had no recollection of the communications to which that testimony referred, and as they were not on record in the Treasury Department, he considered himself bound to state the fact; and the occasion which was presented by the transmission to the House of other papers relating to the same subject appeared a suitable one for making the statement. The terms in which it was made will show that no disrespect towards Mr. Edwards was intended. And if the occasion was not earlier presented, the delay, so far from being caused or sought by the Secretary, was produced by circumstances beyond his control. For reasons stated to the House at the last session, the papers could not then be transmitted; and although considerable exertion was used, it was not until the day on which they were sent to the House that the preparation of them was completed.

It is not deemed necessary, in this communication, to recapitulate the injurious allegations contained in the "address." The lateness of the session requires despatch, and this answer shall be brief and explicit.

The first charge to be noticed relates to two letters which Mr. Edwards, in his testimony before the committee, on the 13th of February, 1823, had stated to have passed between the Receiver of Public Moneys at Edwardsville and the Secretary of the Treasury, and which, not having been communicated to the House under the resolutions of January 9, 1822, and March 12, 1822, agreeably to Mr. Edwards' alleged expectation, and which the Secretary having stated to be neither on file nor on record in the Department, nor to be recollected by himself or his officers, he is accused of having suppressed or denied.

As the resolutions under which it is alleged that these letters should have been communicated call only for the correspondence between certain "banks" and the Secretary, it is unnecessary to explain why, among the letters which were communicated, any correspondence between a "Receiver" and the Secretary was not to be found. Nor is it easy to imagine how any one, informed of the tenor of those resolutions, should have entertained the expectation of seeing the letters in question among the papers which were transmitted.

The blame of not having communicated these supposed letters having been thus easily removed, by referring to the terms of the resolutions themselves, which show that no such letters were called for, the next question is, whether such letters ever passed between the parties.*

In the absence of all direct testimony in support of his assertion, Mr. Edwards has resorted to probabilities, and has endeavored to infer a confirmation or corroboration in its favor from circumstances that are susceptible of no such interpretation. That which he chiefly relies upon is the omission of the Receiver at Edwardsville to make his deposits in the Edwardsville Bank, in the 4th quarter of 1819, which he states was in consequence of his publication and advice; and he asks whether it is to be believed that the Receiver would have withheld the deposits contrary to the Secretary's orders without giving him a reason, and whether, if he had done so, the Secretary would not have called him to account.

The means exist in the monthly returns of the Receiver, and the correspondence between him and the Secretary, on record in the Department, by the aid of which this may be investigated. Copies of these papers are herewith transmitted.†

By these it will be seen that the first instructions given to the Receiver to make his deposits in the Bank of Edwardsville were of the 21st of December, 1818; that in pursuance of these instructions he made his first deposit in that bank on the 28th of February, 1819, of $12,000, at which time he retained in his possession a balance of $20,092. On the 31st of March he deposited $4,500, and retained a balance of $18,600. On the 30th of April he deposited $5,861, and retained $19,158. In May, he made no deposit, and in June, only $8,179, retaining $19,143; and from that time to the 30th of December he made no deposit. Whence it appears that, with the exception of a small sum in June, amounting to less than one-third of the money then on hand, he made no deposit between the last of April and the last of December, a period of eight months, during which he retained an increasing balance of from $20,000 to $56,000! and that even on the last of December he did not pay over, by about $10,000, all the money then in his possession.

Instead of a withholding of the deposits in the fourth quarter of the year, here is a retention of them, with the exception before noticed, for eight months. It was scarcely contended that all these omissions of duty were the result of the advice given by Mr. Edwards to the Receiver, to withhold the deposits until he could receive the Secretary's instructions. On the contrary, it will be shown, by the correspondence, as far as it is susceptible of being shown, negatively, that no part of these moneys was withheld from deposit upon that pretext.

On the 6th of August, at about which time the Receiver's monthly return for June was received, the Secretary wrote to the Receiver to know why he retained the public moneys in his hands, contrary to

* Two facts must have occurred, if these communications were made, to account for the letter of the Receiver not being on file, and for the Secretary's answer not being on record or among the rough drafts: 1st. That the letter itself has been lost; 2d. That the answer was not copied. Though the concurrence of these two facts is possible, it is highly improbable.

† See accompanying papers from No. 1 to 29, inclusive.

his instructions, and informing him that as there was a bank at his place of residence there could be no excuse for his doing so.

On the 18th of September (see No. 20) Mrs. Stephenson, the wife of the Receiver, answered this letter, in consequence of the absence of her husband, and informed the Secretary that, from what she had heard in conversation between the Receiver and others, she believed he had retained the money to meet the drafts of certain public agents in that country, which the Secretary had authorized him to purchase. And it is to be observed that, though this was "the fall of 1819," Mrs. Stephenson said nothing of Mr. Edwards' publication or advice.

On the first of November (see No. 23) the Secretary wrote again to the Receiver, complaining of the continued detention of the public money in his hands, which he presumed had been the result of his letter of the 9th of April, (see No. 17,) and directed that, immediately on receipt of this letter, he will pay into bank the whole of the public money in his possession on the 30th instant, and further instructing him not to consider the letter of the 9th of April as authorizing him to retain the public money in his hands at the end of each month. Here it appears that, so far from attributing the withholding of the deposits to the cause alleged by Mr. Edwards, the Secretary attributes it to the cause assigned by Mrs. Stephenson in her letter of the 18th of September. And it is worthy of remark that this is the last letter on record, from the Secretary to the Receiver, in relation to the deposits in the year 1819; and that this was the last letter written to him on that subject in that year will appear by a reference made to it in a letter from the Secretary to the Receiver of the 20th of April, 1820, (see No. 26,) which is more particularly noticed hereafter.

On the 28th October (see No. 22) the Receiver, who had then returned home, wrote to the Secretary, acknowledging the receipt of a letter of the 21st of September, (see No. 21,) with a new form of an account current.

On the 5th of November (see No. 24) the Receiver wrote to the Secretary, enclosing a draft which he had purchased, transmitted his monthly return for October, and noticing a small error in his account for August.

On the 16th of November (see No. 25) he again wrote to the Secretary, enclosing the second of the draft which he had transmitted on the 5th. But in all this time there was no allusion to Mr. Edwards' publication and advice, although the "fall of 1819" was now nearly gone.

At last, on the 31st of December, (see No. 12,) the Receiver made a deposit in bank, in consequence, it is fairly to be inferred, of the peremptory order of the Secretary of the 1st of November, and in consequence of that only.

That Mr. Edwards' publication and advice were not the cause of the retention of the money by the Receiver, before the 18th of September, is manifest from Mrs. Stephenson's letter of that date.

That no such cause of retention existed, within the knowledge of the Secretary, before the 1st of November is manifest from his letter of that date. If the Receiver had at any time between the date of his wife's letter and of his own letter of the 16th of November made the communication alleged by Mr. Edwards', it is to be presumed that he would, in some manner or other, have alluded to it in that letter, or in the previous one of the 5th of November. He must have discovered, on his return from Kentucky, that the Secretary was dissatisfied with him for retaining the public money in his hands. He must have been aware that every subsequent return which he transmitted to the Treasury, as it exhibited an increasing balance, and as it showed that he made no deposits in bank, would aggravate the Secretary's dissatisfaction. Under such circumstances, what would be so natural for him, when he had occasion to write to the Secretary, as to make some allusion to the communication which explained the reason of his apparent disobedience, and to the instructions which he expected in answer for the government of his conduct in that important particular? The presumption is, that if such a justification of his conduct as is now pretended had existed he would, without doubt, have assigned it; but instead of doing so he contented himself with the excuse made by Mrs. Stephenson. Therefore he was silent on the subject. He waited the result of her letter. That he received in December; and accordingly, in December, it is found that, in partial compliance with the peremptory order contained in the Secretary's answer to his wife's letter, he made a deposit in bank.

That no other letter was written to him on the subject of his deposits, after that of the 1st of November, is to be inferred from the tenor of the Secretary's letter of the 20th of April, 1820, which was produced by his renewed remissness. This letter begins thus:

"On the 1st of November last you were instructed to pay into bank the whole of the money in your hands on the 30th of that month, and not to retain the public money in your hands at the end of each month. By referring to your monthly returns for the months of December, January, and February, it appears that the instruction has not been complied with—a sum exceeding $10,000, upon an average, having been retained by you during those months. As the bank in which your deposits have been directed to be made is established in the place in which your office is kept, the retention of the money, or any part of it, one day beyond the expiration of the month, is without any apparent excuse." After again repeating the directions for him to deposit, and remarking upon some irregularity in his returns, the Secretary concludes thus: "It is expected that all regulations addressed to public officers will be promptly complied with, and that when, from any circumstance, this should be found impracticable, the cause of non-compliance shall be communicated without delay."

If any instruction in relation to his deposits had been given to the Receiver, since the order of the 1st of November, that order would scarcely have been referred to alone. And if any excuse or explanation had been received by the Secretary, subsequent to the 1st of November, such as would have been afforded by Mr. Edwards' publication and advice, the order of the 1st of November would not have been repeated and renewed as an order unsatisfied and unanswered. The style and manner of this letter of April 20 indicate not only that neglect had occurred, but that no explanation had been offered for the neglect. The Receiver's answer confirms this conclusion. The Receiver had found, by the letter of the 1st of November, that, so far the excuse offered by Mrs. Stephenson of retaining money to meet the Indian payments had been admitted. But when in the April following he was called upon to account for his subsequent omissions of duty, omissions for which that excuse would no longer avail, would he not, in justification of himself, have naturally referred to any and every letter that he had written on the subject? and if, in any such letter, he had made a communication of the kind alleged by Mr. Edwards, would he not, on this occasion, have made some allusion to it?

All these circumstances, corroborating each other so fully, are not only irreconcilable with the inference which Mr. Edwards draws from the withholding of the deposits by the Receiver, but they lead

inevitably to the conclusion that the alleged communication of his publication and advice, as a reason for withholding the deposits, was never made to or received by the Secretary, and that no such letter, as he alleges to have been written by the Secretary, was ever written in consequence of any such communication.

There is, however, other testimony furnished by the Receiver and Mr. Edwards themselves which confirms this conclusion.

Mr. Edwards has stated on oath that he made the publication, and had it specially communicated to the Secretary by the Receiver, for the purpose of apprising the Secretary of his intention to withdraw from the bank, and his determination to relieve himself from all responsibility in regard to it, leaving the Secretary to judge for himself, from the returns which he required it to make, of the propriety of continuing it a depository of public money. That, "according to the pledge which he had given in his publication, he resigned his seat as a Director. And though he was once elected to the same station since that time he refused to accept it, nor has he had anything to do with the management of the bank since the fall of the year 1819."

Yet, in the following winter, Mr. Edwards is found presenting himself to the Secretary, not only in the character of a Director of the bank but of a Director specially delegated and authorized by the bank to conclude an important arrangement with the Secretary, in respect to the terms on which the bank was to continue a depository of public money. By the printed papers accompanying the Secretary's report to the House of the 27th of April, 1822,* it appears that on the 16th of February, 1820, Mr. Edwards, being then in Washington, transmitted to the Secretary a letter from the bank to the Secretary, signed by this very Receiver as President of the bank, containing a list of the Directors for the year 1820, in which Mr. Edwards' name is included; that at the same time he also transmitted to the Secretary a letter from the bank, signed by the same Mr. Stephenson, informing the Secretary that Mr. Edwards, "one of the Directors of the institution," is authorized to suggest certain modifications of the contract between the Secretary and the bank, and to conclude such arrangements as he may deem acceptable, "which will be considered obligatory," and he likewise transmitted, at the same time, a letter from the bank, addressed to himself, signed also by Mr. Stephenson, stating to him at large the changes desired by the bank and the reasons therefor.

Is this compatible with the impressions which the statement contained in his testimony is calculated to produce? If he had ceased to be a Director, and publicly withdrawn from all concern in the management of the bank in "the fall of 1819," how was it that Mr. Stephenson, the Receiver, the President of the bank, who, as well from his official situation as from "the known friendship and intimacy" (address, page 14) which Mr. Edwards has stated to have subsisted between them, may be supposed to have known something of his conduct and views in regard to the bank, should so soon after Mr. Edwards' public withdrawal have written to him and constituted him, in his character of Director, the representative of the bank in a negotiation with the Secretary—that Secretary whom Mr. Edwards was so anxious to satisfy of his having no connexion with the bank? And, finally, how could he, if such had been the fact, communicate to the Secretary, without explanation, all these papers, which were totally at variance with it? If he had supposed the Secretary to have been informed at the time of his having withdrawn from the bank, in 1819, would he not also have supposed that the Secretary would be at some loss, on receiving these papers, to understand what was Mr. Edwards' actual relationship to the bank? If he had not wished to be considered by the Secretary as a Director and agent of the bank, which the papers purported, would he not in some way have given him to understand that he was not so? Instead of doing this, in his letter to the Secretary accompanying the papers, he referred to them as fully explanatory of their object, and thereby gave his assent to their contents.

Evidence might, indeed, be more positive, but taking all these circumstances in connexion with each other, it is doubtful whether any negative evidence could more satisfactorily establish the conviction, in any candid mind, that no such communications as Mr. Edwards has alleged ever passed between the Secretary and the Receiver.

Mr. Edwards claims to have found a further confirmation of the Receiver's letter having been written and received by the Secretary in the expressions used by the Secretary in speaking of the letter alleged to have been written by him to the Receiver. The idea, however, is groundless. There is no real difference in the meaning of the words employed by the Secretary and those of Mr. Edwards in relation to the letter. If the Receiver had discontinued the deposits for the reasons stated by him to the Secretary, (as Mr. E. alleges,) and if he had, in consequence, received a letter from the Secretary directing him to continue the deposits, (as Mr. E. also alleges,) such a letter, whatever might have been its form, was, in fact, an answer to the letter of the Receiver. The denial of the Secretary that any such answer was recollected, or was on record, so far from being evasive, was direct and explicit, and covers, as was intended, the whole ground presented in the charge.

But this charge, contradicted as it is by all the facts which have been adduced in the case, is also rendered more improbable by the want of any assignable motive for the Secretary's alleged conduct on the subject. What object had he to serve by continuing the deposits in the Bank of Edwardsville, if he had received any communications which authorized the opinion that they were insecure in that bank? Mr. Edwards has charged him with an improper partiality for the Bank of Missouri, yet it was that bank from which the deposits were taken to be placed in the Bank of Edwardsville; and it was to that bank that they must have been restored, if they were withdrawn from the Bank of Edwardsville. There was no other bank within reach. If the charge of favoritism towards the Bank of Missouri was well founded, the Secretary would have readily availed himself of the pretext furnished by the alleged communication of the Receiver for restoring the deposit to that bank.

The instructions given to the Receiver at Kaskaskia to deposit in the Bank of Missouri, so far from confirming the allegation that a letter from the Receiver at Edwardsville, enclosing the publication of Mr. Edwards, had been received by the Secretary, lead to a contrary conclusion. The correspondence with that Receiver, at the period in question, is herewith transmitted.† It appears that on the 18th of September, 1819, this Receiver wrote to the Secretary, enclosing his account current for the month of August preceding, and as there appeared by that account a large balance of public money in his hands, amounting to about $30,000, he seems to have considered it necessary to explain the cause. His explanation was the same as that offered by Mrs. Stephenson for a like retention of money, to meet the Indian payments; and in this case, as in the other, not any publication of Mr. Edwards, or any other

* Documents Nos. 1, 3, and 4, of (No. 119.) † See Nos. 30, 31, 32.

circumstance affecting the character of the Bank of Edwardsville, which, if such had existed, he was bound by the Secretary's instructions to communicate. It was known to the Secretary that it was not so convenient for this Receiver to deposit at Edwardsville, between which place and Kaskaskia there was very little communication, as at St. Louis, with which there was frequent intercourse. In the next letter written to this Receiver by the Secretary, which was on the 1st of November, 1819, the Secretary, without alluding to any publication of Mr. Edwards, or any letter from the Receiver at Edwardsville, which, if any had been known to him, would naturally have been alluded to on such an occasion, directed the Receiver at Kaskaskia to deposit in the Bank of Edwardsville all the money in his possession at the close of the month, and afterwards to deposit in the Bank of Missouri. The Receiver did not make this deposit, for reasons stated by him in his letter of the 10th of January, 1820, until the 3d of that month, as will be seen by the list of moneys deposited by him on that day.* From his silence on the subject it is evident that there was nothing in the circumstances of the bank to render the deposit improper.

The accusation of having presented contradictory statements of the amount of public money in the Bank of Edwardsville, and of having transposed other statements from that bank, in the communications made by the Secretary to the House, and of having done so for the purpose of disguising the truth in relation to the deposits in that bank, with a view to their bearing on the charge connected with these supposed letters, is altogether without foundation. The bank statements of December and November, which are referred to, either formed part of or accompanied the letters which they immediately follow in the printed papers; the first having been written on part of the same paper as the letter of the 7th of January, 1820, to Mr. Edwards, and the latter having been enclosed in the letter of the 6th of January, and both the letters and the statements having, when transmitted by Mr. Edwards, in his letter of the 16th February, been, it is believed, in the same order as that in which they appear in the documents. The Treasury statements, from which the balances in the Bank of Edwardsville at the end of the 2d, 3d, and 4th quarters of 1819 are quoted by Mr. Edwards, were prepared by the Treasurer from materials in his own possession; and the Secretary had no more to do with the preparation of them than Mr. Edwards himself. They were communicated as the statements of that officer. The cause why the statement for the 4th quarter of 1819 differs in amount from that rendered by the bank for the same period is, that in the former the Treasurer has deducted from the sum standing to his credit in that bank the amount of two drafts which he had drawn on the bank, and which had not been paid at the time when the bank statement was prepared. The sum stated by the bank is, therefore, more than that stated by the Treasurer by the amount of these drafts. This is more particularly shown in the accompanying note from the Treasurer,† all of whose statements are prepared on the same principle and have always been so prepared. It is considered unnecessary to dwell longer on this branch of the subject. That no such communications as Mr. Edwards alleges were made is believed to be conclusively demonstrated; and if so, no arts could have been resorted to for the purpose of concealing them. But at every stage of this investigation this remark naturally suggests itself: that even if both the communications alleged had actually been made, there was nothing in that fact for the Secretary to conceal. Mr. Edwards has stated, on oath, his opinion that in the fall of 1819 the Bank of Edwardsville was in as good a condition as any bank in which the public moneys were deposited; and if so, what necessity was there for the Secretary to discontinue the deposits? Whether Mr. Edwards was or was not a Director, and whether he did or did not choose to be responsible for a bank, if the bank were in a good condition, was a matter that ought to have had very little influence upon the conduct of the Secretary of the Treasury. In connexion with this charge it is to be remarked that it is true that communications were made to the Secretary against the Edwardsville Bank, and particularly in a letter from the President of the Bank of Missouri, of the 9th of August, 1819. But as the Receivers, both at Edwardsville and Kaskaskia, were instructed by the Secretary's letter of the 31st of December, 1818, that if any circumstance affecting the character of the Edwardsville Bank should come to their knowledge they should communicate the same to the Department, and as no such information was received from them, and as the bank continued to fulfil its engagements, there was no sufficient reason for discontinuing the arrangement which had been made with it. The fact is, that it was not until two years after the letter of the President of the Bank of Missouri referred to that the Edwardsville Bank stopped payment. But although this charge is considered as sufficiently answered, the only remaining circumstance presented by Mr. Edwards in its support shall also be noticed. He represents himself to have stated in two letters written by him to the Secretary, in February, 1822, that he had made such a publication, that the Receiver had transmitted it, that the Receiver's letter containing it had been answered, and infers from the Secretary's silence on the subject an admission of the fact.

That the Secretary did not reply to this, or to any of the other matters contained in those letters, resulted from his having declined any correspondence with Mr. Edwards on the subjects to which they referred, in consequence of a menace which the first of them contained. This will be seen by the Secretary's answer, which, together with Mr. Edwards' letters, are herewith transmitted.—(See Nos. 30, 31, 32.)

The next principal accusation to be examined relates to the Secretary's transactions with the Bank of Missouri, and charges him with having, in the arrangements made with that bank in regard to the public deposits, allowed it advantages for which it rendered no equivalent, and with having received from it uncurrent bank notes, which he was neither bound nor authorized to receive. The direct connexion between the Treasury and the Bank of Missouri began on the 1st of August, 1818.‡ Before that time the bank had acted as the agent of the Bank of the United States. It had fulfilled its engagements with that institution with good faith; its condition was considered sound and prosperous; and its reputation stood high, as well in the Atlantic as in the western States. The large amount of money to be received from the sale of public land in that quarter rendered a connexion with such a bank not only convenient but necessary.

In the first arrangement with the bank there was no stipulation as to what kinds of money it should receive or pay for the Treasury. The Receivers were instructed to receive the notes of such banks as paid specie on demand for their notes, and no others, and to deposit them in bank to the credit of the Treasurer. When public disbursements were to be made the Treasurer issued his drafts, and the bank discharged them in such funds as it had received.

On the 23d of June, 1819, the Secretary, in the execution of a general system, which had been adopted with the approbation of the President, for the reasons stated in his report to the House of Representatives, of February 14, 1822, and in his letter to the chairman of a select committee of the House, of February 24, 1823, proposed a new arrangement to the bank.§ By this arrangement the bank was to

* See No. 7 of (No. 119.) † See No. 29. ‡ See document I Nos. 1, 2, and 3, [66] § See I No. 5, [66.]

receive the notes of such specie paying banks as were in good credit and in general circulation, and to account for them as cash; to transfer to the Bank of the United States, or its branches, the surplus of the money which it might receive that could not be disbursed at the bank; and for the expense and risk of making those transfers, which were expected to amount to a very considerable sum, it was to have a standing deposit of $150,000, which standing deposit was always subject to be reduced by any disbursements that could be made at the bank. This arrangement was accepted by the bank on the 9th of August, 1819.* It was modified in August, 1820, by limiting the local bank notes to be received to those of the Atlantic cities and of the State of Missouri,† and thus it continued until the bank stopped payment, on the 14th of August, 1821. To estimate justly the advantages offered to the bank by this arrangement, it is necessary to examine what were the probable services to be rendered by the bank under it: About the time when the Secretary's proposition for allowing a standing deposit was made to this bank there was a balance remaining in bank, over and above what could be expended there, of upwards of $640,000,‡ and this, too, after the bank had transferred upwards of $100,000. This large balance had accumulated in rather less than a year. Taking into consideration the revival of credit among the western banks which had then taken place, it was reasonable to suppose that the payments into that bank would not decrease more than one-half during the next year; upon this supposition, the amount to be transferred under the arrangement would be about $320,000 a year. The risk and cost of transferring money from St. Louis to Louisville, which was the nearest point to which it could be transferred, has been stated by the President of the bank, in his letter of November 29, 1819,§ to be at least three per cent., which, upon that sum, would be $9,600; and that was reasonably to be looked to, at the time the arrangement was made, as the value of the service, probably, to be rendered under it, in this respect, by the bank to the Treasury.

It is true that, from causes not then to be foreseen, the subsequent payments into the bank fell short of what had been anticipated. But it is also true that the whole of the stipulated standing deposit was not always on hand. It has already been stated that this standing deposit was, at all times, liable to be drawn upon by the Treasury. By the Treasurer's statement of quarterly balances, accompanying the Secretary's report to the House, of February 27, 1823, it appears that it had been so drawn upon, and that, at the close of six different quarters, the whole amount in bank, for which drafts had not actually been issued, was less than the stipulated amount of standing deposit by an average of $20,000. By a statement accompanying the letter from the President of the bank of the 30th June, 1821,‖ it appears that, at the close of ten successive months, "the whole sum in bank was actually less than the amount of the stipulated deposit by an average of $20,000; and if, at all other times during the two years' continuance of the arrangement, the full amount were in bank, the average of the sum actually in bank during the whole period would have been but $140,000. But it is to be observed that, in estimating the value of such a deposit to a bank, the certainty of its continuance, for a given time at least, is to be taken into consideration. In respect to this standing deposit there was no such certainty; it depended wholly on the convenience of the Treasury. It was constantly subject to drafts for any part, or even the whole, and it was frequently drawn upon. The idea, therefore, that this stipulation in regard to the standing deposit was equal to an allowance to the bank of $9,000 a year is wholly fallacious.

It is proper to look, on the other hand, to the services rendered by the bank. During the continuance of the arrangement, the bank transferred, at its own risk and cost, $454,000 in cash, and about $138,000 in notes, in kind. Calculating, then, the value of the transfers at the rate stated for transferring to Louisville, which was the nearest point, at three per cent., and the value of the standing deposit, actually on hand, at six per cent. a year, the rate of interest, it appears that the services actually rendered by the bank, in transferring the public money, may be estimated to amount to $17,800; and that the benefit enjoyed by the bank from the standing deposit, without making any deduction on account of its uncertainty, may be estimated at $16,000; thus leaving a balance in favor of the bank. But, allowing the advantage and the service to be equal in this respect, nothing then remains but the advantage derived by the bank from the temporary and uncertain possession of the surplus which sometimes remained over and above this deposit, as a compensation for all its other services, in becoming responsible for the notes received by it, in converting them, as far as was requisite, into such funds as might be transferred to the United States Bank, or as might be required in payment of Treasury drafts, which are always demandable in specie or its equivalent, and which, as appears by the letter from the President of the bank¶ of the 30th June, 1821, were always so paid. Hence, it appears that not only were no undue advantages intended to be granted to the bank by the arrangement, but that, supposing the payment of the debts now due by it to be secured with interest, as is believed to be the case, the bank has actually enjoyed no advantages under the arrangement for which it will not have rendered an equivalent.

It is true this bank has failed. But it appears, by a document produced and relied upon by Mr. Edwards, that after a thorough examination by order of the Missouri Legislature, that its failure is not attributable to any act of dishonesty on the part of the Directors, but to that cause only which has produced a general suspension in the western country;** and that, "with a reasonable indulgence, it will be enabled to redeem its notes and pay all its debts." The sum due by it to the Treasury is already in a course of payment, and its ultimate discharge, with interest, is deemed by persons who are well acquainted with the security to be well secured.

The correspondence which led to the reception of the uncurrent notes which Mr. Edwards has charged the Secretary with having improperly received from the Bank of Missouri, commenced with the letter of the President of the bank of the 9th August, 1819. He there proposed, among other transfers, to transfer $50,000 in such paper of North and South Carolina and Georgia as was authorized to be received; $40,000 in notes of the Bank of Virginia; $103,000 in notes of the Bank of Kentucky and its branches; $15,000 in notes of the Bank of Vincennes; and $70,000 in notes of the banks of Tennessee, such as were authorized to be received, and $25,000 in such Ohio notes as were authorized to be received; all of which were then in bank.

It is to be observed that the letter in which this proposition was made is the same letter which contains the acceptance by the bank of the arrangement, under which it was, for the first time, to be responsible in cash for all the public money which it might receive. If, then, it can be shown that these notes had been previously received on account of the Treasury, and were at that time on hand, the agreement of the Secretary to receive the whole or any portion of them, so far from being a subject of blame, was an obligation of duty.

** Address, page 19.

It is also to be observed that all the notes which the bank here proposed to transfer were not actually transferred. Before the Secretary's answer was received the bank had, on its own account, otherwise disposed of a great portion of them, and there were finally transferred the following:

Of the Bank of Tennessee and branches	$40,156
Nashville Bank and branches	29,844
State Bank of North Carolina	42,000
Certain District notes, viz:	
Mechanics' Bank of Alexandria	890
Franklin Bank	285
Certain Ohio notes, viz:	
Farmers and Mechanics' Bank of Cincinnati	11,845
Miami Exporting Company	8,661
Bank of Cincinnati	3,846
Bank of Muskingum	291
Farmers, Mechanics, and Manufacturers' Bank of Chilicothe	350
Bank of Marietta	4
Bank of Steubenville	7
Making together	138,179

The Kentucky bank notes mentioned in the Secretary's letter of March 2, 1820,* were not transferred, having been otherwise disposed of by the bank. Nor were the Georgetown bank notes, mentioned in the same letter, then transferred; and it is only within a few days that the Treasurer has received from the agent of the Missouri Bank an order for transferring them.

That the notes thus received from the bank had been properly taken by the Receivers will appear from the instructions given to those officers by the Secretary, copies of which are herewith transmitted;† and that, at the time those instructions were given, they were considered by the Secretary as the notes of banks which discharged their notes in specie, on demand, and, consequently, notes which, by the resolution of Congress of April 30, 1816, were authorized to be received in payments to the United States, is manifest from the terms of the same instructions, in which the Receivers are positively interdicted from taking the notes of any bank which does not discharge its notes on demand in specie.

That these notes were received by the bank from the Receivers during its first arrangement with the Treasury, and, consequently, previous to its engagement to account as cash, and that, at the time they were offered to the Secretary, they were actually in possession of the bank, is established by evidence adduced by Mr. Edwards himself. This evidence is statement E,‡ prepared at the Bank of Missouri, and laid before the Missouri Legislature by a committee which was appointed to examine the report of the bank, and which committee represents itself to have had before it and carefully examined the books, notes, and such other papers of the bank as were necessary. The statement is, "Of moneys on hand, September 6, 1819, received of the several Receivers of Public Moneys, being such as they were authorized to receive by the Hon. William H. Crawford, Secretary of the Treasury." It purports to have been taken from a register kept by the Cashier of the bank from August 8, 1818, to September 6, 1819, which period includes only twenty-seven days not embraced by the first arrangement, under which the bank was accountable only in kind. By this statement it appears that the bank had then on hand notes taken from Receivers, of a description not receivable by it on general deposit as cash, amounting to $569,064, of which $283,757 were of the kinds transferred by it to the Treasury. Hence it appears that, instead of the Secretary's having received of the bank uncurrent notes, which he was not bound to receive, the bank not only took upon itself the conversion into cash of other notes to a large amount, which it had a right to pay over to the Treasury in kind, but that, of the very description of notes which Mr. Edwards had censured the Secretary for having received, the bank had actually a right to require that he should receive more than double the amount of what he did receive.

It would be a great mistake, however, to suppose that the notes which were received of the Bank of Missouri were the notes of insolvent banks. Those of the Bank of Tennessee and its branches were immediately placed to the credit of the Treasurer as cash; those of the Nashville Bank and its branches, and of the North Carolina Bank, have long since been paid; those of the Mechanics' Bank of Alexandria, Bank of Marietta, and Bank of Steubenville, were cashed by the banks to which they were transferred; of those of the Miami Exporting Company, $5,220 76 have recently been collected. Thus, of the whole amount transferred, there remains unpaid only about $22,000, and of this sum it is believed the greater part will be ultimately paid.

Considering the state of the currency in the west during the time, and the large amount received by this bank, which was about $1,164,000, it is doubtful whether any individual transactions of equal extent, though attended to with great care, would have been followed by less ultimate loss.

That the charge of having favored this bank at the sacrifice of the public interest is without foundation must be evident from the facts which have been here exhibited. That the bank does not consider itself as having been favored by the Treasury is proved by the fact that a claim has been preferred by the bank for an allowance, upon the ground that the services which it has rendered to the Treasury have not been sufficiently compensated. And it is a remarkable coincidence of circumstances that at the very time that a charge is preferred by Mr. Edwards against the Secretary, for having done too much for that bank, the agent of the bank is at Washington, petitioning Congress because the Secretary has done too little.

The transactions with the Bank of Missouri being thus explained, the only other acts included in the charge against the Secretary, of having received uncurrent funds in payment from banks, are the receipt of $15,000 in notes of the State Bank of North Carolina, and $18,562 in notes of the Bank of Kentucky; the former from the Tombeckbe Bank and the latter from the Bank of Edwardsville.

Although, by a rigid construction of the arrangement by which these banks agreed to account for the public deposits received by them as cash, the whole amount might, perhaps, have been demanded of them in specie or United States Bank notes, yet such was never the intention of the parties. The term "cash" was used in opposition to that of special deposit, and was not meant to render the banks liable for the payment of specie for notes which they might receive on behalf of the Treasury and which might

* See I No. 9, [66.] † See annexed Nos. 33 to 40, inclusive. ‡ See Address, page 20.

cease to be convertible into specie. Such a construction is opposed by the Tombeckbe Bank in its letter of the 13th of August, 1819, (see M No. 5, (66,) although the President of that institution expresses its willingness to leave the construction to the "justice and liberal policy" of the department. It is more emphatically disclaimed, however, by the Bank of Edwardsville, in its letter to the Secretary, of the 18th of April, 1820, (see G No. 3, (66,) and in its letter to Mr. Edwards, of the 6th of January, 1820, (see A No. 2, (119,) heretofore referred to. In that letter the bank maintains that "It is not supposed that any construction of the conditions upon which the deposits were received can render the bank the guaranty of those banks, because it would be contrary to every principle of reason to suppose that the paper of other banks, who have, or may, suspend specie payment, shall, by the mere act of deposit in this institution by the Receivers, be converted into specie, or its equivalent, and this bank held accountable for it as such. We are persuaded this never was the intention of the Secretary of the Treasury, nor can be inferred from the conditions upon which the deposits are made." This letter, as it was written by the President of the bank to one of its Directors whom it had constituted an agent for negotiating a modification of its arrangement with the Treasury, may be naturally supposed to contain its real views. And although Mr. Edwards now denies the construction then contended for by the bank, yet, from the terms in which he communicated the letter to the Secretary, it is presumed that he then gave it his assent.

But although this construction could not be formally acknowledged by the Secretary without leading to the evil which the terms of these arrangements were partly intended to prevent, that of "special deposits," yet it was always his intention, whenever the case presented itself, to admit such an interpretation of the contract as might be equitable and not injurious to the public interest. The letter of the Tombeckbe Bank, of the 3d of August, 1819, stating that there were then on hand in that institution $15,000 in North Carolina notes which had been received on deposit for the Treasurer, and which it had not yet been able to exchange, although no care had been spared in effecting that object, "since some difficulties were understood to affect the bank," presented a case of this kind. At that time the State Bank of North Carolina had not stopped payment, although it did so before the Secretary's answer was communicated to the Tombeckbe Bank. The Secretary having called upon the State Bank to disclose the means of paying such of its notes as had been received on account of the Treasury, and having been informed by the bank that it did possess the means and would speedily apply them to that object, consented that these notes should be transferred from the credit of the Treasurer in the Tombeckbe Bank to the credit of the Treasurer in the State Bank of North Carolina, and by that bank they were afterwards paid, as were all the other claims of every kind which the Treasury had upon it.

The case of the Edwardsville Bank, added to the equitable considerations which were presented in that of the Tombeckbe Bank, were considerations of policy. The communication of the Hon. R. M. Johnson, made on behalf of the bank and referred to in the Secretary's letter of the 2d of February, 1821, (see G No. 8, (66,) which communication was made with the concurrence of Mr. Edwards, stated that the bank had on hand upwards of $20,000 in notes of the Bank of Kentucky which had been received on account of the Treasurer before the suspension of specie payments by the bank. This representation being corroborated by an examination of the bank statements and certificates, as appears by the Secretary's report to the House of the 27th of April, 1822, and there being then some reason to apprehend a want of punctuality or of good faith on the part of the Bank of Edwardsville, the Secretary consented that these notes should be transferred at the risk of the bank, from the credit of the Treasurer in that bank to the credit of the Treasurer in the Bank of Kentucky. In doing so the Secretary considered himself not only satisfying the demands of equity but promoting public interest, inasmuch as the Bank of Kentucky, though it had suspended the payment of specie, was known to be solvent. Although the notes thus transferred have not yet been paid, the most positive and formal assurance has been given that the debt is perfectly safe and will most certainly be repaid at no very remote period.

Mr. Edwards has offered an extract from the Secretary's letter of the 11th of December, 1818, to the President of the Planters and Merchants' Bank of Huntsville, as proving that the Secretary's conduct in receiving these notes is at variance with his own interpretation of the obligations of the banks in that respect. But by referring to the letter itself, it will be found that in presenting the extract an important omission has been made by which the Secretary's opinion on the point is wholly misrepresented. As quoted by Mr. Edwards, the passage is in these words: "In making the Planters and Merchants' Bank of Huntsville a place of deposit at its particular solicitation, it was expected that the transfer of funds which it undertook to make would be effected in funds that circulated at par at the place where the transfer was directed. As the Receiver had been directed to receive the bills of no banks which did not discharge them in specie on demand, it was expected that the bank would be answerable for the amount deposited in specie, or in bills which would be received as specie at the place to which the money should be directed to be transferred, unless it should state the contrary. But," as continues the Secretary, (and this is the part omitted by Mr. Edwards,) "as no explanation of this nature has been made or sought on either side, this requisition will not be rigorously required." There is, however, no question concerning this bank, as no uncurrent notes were ever received from it.

The charge of having received uncurrent notes from the banks of Missouri, Edwardsville, and Tombeckbe, contrary to the agreement with those banks and contrary to law, being thus answered, there remains, in connexion with this branch of Mr. Edwards' accusation against the Secretary, only that of having, in his report to Congress, misstated the amount so received. Upon a thorough examination, however, it is asserted that all the notes received from those banks, for which the Treasurer did not receive a cash credit in the banks to which they were transferred, were specified in the report made by the Secretary on the subject, with the exception of $285 in notes of the Franklin Bank of Alexandria, which formed part of the funds received from the Bank of Missouri, agreeably to his letter of March 20, 1820, but which, in his report of February 14, 1822, were accidentally omitted to be mentioned. That there was no intentional concealment on this subject is evident from the manner in which the Secretary complied with that part of the resolution which referred to it. By the resolution, he was required to state whether any uncurrent or depreciated paper had been received from certain banks, which the Government was not bound to receive. As the Secretary was of opinion that all the paper of that description which he had received from those banks was paper that he was bound to receive, he might without blame have answered that none such as were alluded to in the resolution had been received. Desirous, however, to put the House in possession of all the facts, he stated what uncurrent paper had been received, and why it had been received; and he included in the statement paper to the amount of several thousand dollars, which at the time he made his deposit had actually been paid in cash. Under these circumstances, it

might have been reasonably supposed that this trivial omission was, as was truly the case, wholly accidental and unintentional.

The charge of withholding letters and information called for by the House rests on no better foundation. This, however, may have originated, in part, in the want of attention to the true import of the resolution under which these letters and information were called for. The resolution of the House of January 9, 1822, as printed, required "a statement showing in what banks the moneys received from the sale of the public lands have been deposited since January 1, 1818; the contracts under which the said deposits have been made; the correspondence between them and the Treasury Department relative thereto," &c., &c. It has been doubted whether, according to the proper rules of construction, the correspondence here called for related to anything more than the contracts. It is believed, however, that this doubt gives place to certainty upon an inspection of the resolution, as transmitted to the Secretary by the Clerk of the House, between which and the resolution as printed there is a remarkable difference in the punctuation. That which appears in the latter as the first member of a sentence terminating with a semicolon, is in the original, (see annexed No. 41,) which is herewith transmitted, a complete sentence ending with a period. By this difference, the words "relative thereto" are made applicable exclusively to the contracts; and of course the correspondence required by the resolution is the correspondence between those banks and the Treasury, relative to the contracts under which the moneys received from the sales of public lands since January 1, 1818, have been deposited.

It will be seen, however, that in the collection of the correspondence it was not confined to that object; but that, in addition to everything which related thereto, there was communicated so much of the other correspondence with the banks referred to as would enable the House to form a just opinion of the whole subject, not only of the arrangements with these banks in this particular, but of the relationship subsisting between them and the Treasury.

The resolution of the House of March 12, 1822, had reference only to three banks, those of Edwardsville, Tombeckbe, and Missouri; it called for no correspondence except in relation to the Bank of Missouri, and as it required all the correspondence in relation to that bank not before communicated, all such correspondence that could be found was transmitted. Yet, although these two resolutions are distinct from each other in their requirements, Mr. Edwards affects to consider every letter which was communicated under the latter as having been improperly withheld under the former.

That some of the papers transmitted under this resolution might not with propriety, and perhaps with advantage, have been sent under the first resolution is not asserted. Whether any such, if such there be, were accidentally omitted, or whether they were not deemed necessary to an understanding of the subject, is not now recollected. As there was no consciousness on the part of the Secretary that any of his transactions required concealment or merited censure, and as it was supposed that the object of the resolution was exclusively to obtain information, the whole aim in selecting the papers and making the communication was to put the House in possession of such information, and such only, as would best serve to elucidate the subject to which it related.

But to whatever cause the omission of any of these papers is attributable, the omission itself is unimportant. It is believed that the papers communicated under the second resolution, or the great mass which has been communicated under the third resolution, disclose no new fact which it was important, in relation to the subject of the resolution, either to communicate or to withhold. The idea of concealment was wholly out of the question. The delicate nature of many of the letters communicated under the first resolution shows, perhaps, a leaning the other way. But there was really nothing of moment to be concealed. The general outline of the arrangements with the western banks was well known. They had been published in most of the newspapers in the country interested in them, and they were familiar to many gentlemen in Congress, some of whom had been among the first to press upon the Secretary the necessity and advantage of such arrangements.

Disclaiming, then, in the most unqualified manner, any wish or intention in the Secretary of concealing any part of his conduct in relation to those banks, the opinion is confidently repeated that, after an examination of all the correspondence that has been at various times communicated to the House, it will be found that, although more ample details are exhibited, because the papers subsequently presented are more numerous, as clear and faithful a view of the connexion between the western banks and the Treasury was presented under the first resolution as is exhibited in the whole mass of the correspondence. But if the fact were otherwise, nothing could be more unjust than to consider the omission of every letter not communicated under that resolution as a suppression with an improper design.

Although these explanations may be deemed a sufficient answer to Mr. Edwards' charge of suppression generally, yet there are some particular instances which he has specially dwelt upon, and to which he attaches particular importance, that it may be well specially to notice. The first of these is the circumstance that "extracts" were communicated instead of entire letters in parts of the correspondence with the Planters and Merchants' Bank of Huntsville.

By referring to the letters alluded to, and which have been transmitted entire under the last resolution of the House, it will be seen that the parts omitted to be communicated relate to an occurrence wholly of a temporary nature, entirely unimportant in itself, and having no bearing whatever on the subject of the call. It seems that after the termination of the arrangement between the Bank of the United States and the bank at Huntsville, the Cashier of the former drew certain drafts upon the amount standing at his credit in the latter bank. These the bank at Huntsville declined to pay, under an erroneous idea that it was accountable to the Treasury for the money.

As soon as this was made known to the Secretary he wrote to the Huntsville Bank to remove the misunderstanding. The bank justified itself by quoting certain expressions of the Secretary's circular of July, 1819. The Secretary replied that if the bank had quoted correctly the circular must have been imperfect, and desired to have it sent back for examination. It was sent back; was found to be inaccurately copied; the misunderstanding was removed; the drafts were paid; and there the whole matter ended. In the passages relating to this subject notice was also taken of the accidental omission of the bank to render some returns. These are the parts of the letters in the correspondence which were not communicated, and this explanation will show with what little reason it has been inferred that every omission in the correspondence contains something which the Secretary must have an improper motive to conceal.

These observations apply to all the extracts transmitted in that correspondence, except the letter of the President of the Huntsville Bank of the 30th September, 1819. As this letter does not appear to have been transmitted under the last resolution, it is presumed to have been mislaid. The purport of the pre-

ceding part of it is not recollected, but search is now making for it, and as soon as it is found it will be communicated.

An additional importance is attached by Mr. Edwards to the circumstance of "extracts" being sent in this case, as contradicting that part of the Secretary's testimony before a former select committee of the House, which, speaking of the correspondence generally, states that, in consequence of the pressure of business, the original letters and rough draughts had been communicated under the resolution of the 14th February, 1822. No such contradiction, however, can be imagined without misinterpreting the obvious import of the Secretary's words. He spoke of the correspondence generally, and it is a fact well known that it consisted almost entirely of originals and rough draughts. But it is irreconcilable with common sense to suppose that he meant to convey the idea that papers which bore on their face the title of "extracts," which he had himself communicated and described as "extracts," were either originals or rough draughts.

Neither the Secretary nor Mr. Dickins has anywhere said in their testimony, as Mr. Edwards supposes, that the latter delivered all the originals and rough draughts to the Secretary, and that the Secretary sent them all to the House. The fact is otherwise. All the correspondence with the banks referred to was not called for, as has been already shown; nor was it ever asserted that all was sent. Mr. Dickins collected, as he has stated, all the correspondence that he could find, filed and unfiled, that was likely to have any bearing on the subject; from this he selected such as, in his judgment, was required by the resolution; and such "extracts" as were made, were made under the exercise of this judgment. After the papers had been thus selected and arranged, he laid them before the Secretary, together with such statements in relation to other parts of the resolution as the Secretary might require for his report. These papers were in the possession of the Secretary while he prepared his report, but were referred to no further than was necessary for that object; and the correspondence thus prepared by Mr. Dickins was transmitted, in the same state, to the House. This circumstance will explain the appearance of the marks on the passages which Mr. Dickins has stated to have been marked by him for the purpose of calling the Secretary's attention to them, and which, if they had been observed by the Secretary, would have been acted on by him, either by directing the marks to be removed or extracts, excluding those passages, to be prepared.

To remove all pretext for the insinuation which Mr. Edwards has founded upon the circumstance of Mr. Dickins having been employed to select the papers in this case instead of Mr. Jones, the chief clerk, to whom it had been usual to commit the selection of papers required by Congress, it is proper to state that the resolution of the House did, in this instance, take the usual course of reference to Mr. Jones; and that it was at his request and upon his suggestion of the propriety of referring it to Mr. Dickins, because of his better knowledge of the subject, that the duty was transferred to him.

There is one other omission in the correspondence which has been emphatically alluded to by Mr. Edwards, and which shall, therefore, be particularly noticed. It is a letter from the Secretary to the President of the Bank at Huntsville of July 9, 1819, and is more than once referred to in other parts of the correspondence; whether it had been communicated or not was never a subject of investigation with the Secretary until the notice taken of it in Mr. Edwards' address rendered the inquiry necessary. After a thorough examination, however, it could not be found, either among the records or rough draughts; but on referring, as a last resort, to a file of confidential correspondence which is kept by Mr. Jones, the rough draught of the letter was there discovered. A copy of it is herewith transmitted.* According to the views with which the correspondence was selected under the first resolution of the House, this letter was one which would have been then communicated. It is believed, however, that the sentiments and opinions disclosed in it are far from furnishing a subject of blame to the Secretary; and as he had communicated a letter of similar import, written on the same day to the Tombeckbe Bank, it may be inferred that he was not withheld, by any improper considerations of delicacy in respect to the matters to which they both relate, from communicating this letter also. It is believed that the letter to the Tombeckbe Bank of July 9, 1819, was also marked "confidential;" and the opinion is strengthened by the reference made to it as "confidential" by the President of the bank in his letter of August 13, 1819.† The word "confidential" was probably omitted through inadvertence in the copy that was retained in the Department, and thus it went upon the ordinary record. If this opinion is correct, the communication of this letter corroborates the fact that the omission to communicate the letter to the Huntsville Bank was not owing to the matters it contained, but to the circumstance of its being on a file not before the person by whom the correspondence was selected.

The Secretary is not aware that any other letters on the confidential file appertain to the objects of the present inquiry. He submits, however, such of them as are addressed to banks to the examination of the committee. He takes the occasion also to tender to the committee, as he did to the committee appointed under the resolution of February 6, 1823, the inspection of any of the records or correspondence in the Department that may be deemed necessary to elucidate any of the matters connected with the inquiry.

Having disposed of all the minor topics of accusation brought against the Secretary in Mr. Edwards' address, it now remains to notice the grave charges which he has preferred, of having mismanaged the national funds. As far as this charge is founded upon the particular transactions which have formed the subject of the foregoing observations, it is presumed to be sufficiently refuted. The only remaining ground of charge then is, the measure of employing the State banks as depositories of the public moneys in the western country.

The circumstances by which this measure was rendered necessary, and the views with which it was adopted under the sanction of the President of the United States, have already been explained in the Secretary's report of February 14, 1822, and in his letter to the select committee of February 24, 1823, to which a reference is now requested. It may be proper, however, to remark here, that throughout the western country a general and severe distress had followed the resumption of specie payments. On the part of the Treasury, every disposition had been entertained to make the demands of the Government press lightly on a suffering people. With this view, the Receivers and Collectors had been authorized generally to receive in payments to the United States all the specie-paying bank notes in circulation; and the Bank of the United States had liberally seconded the views of the Treasury, by authorizing the reception of these funds from the Receivers and Collectors. This experiment, though it gave relief to the public debtors, had been found injurious to the *welfare* of the bank; and by a proper regard for its own safety, that institution considered itself constrained to decline the reception of almost all of those

* See annexed, No. 42.

† See M No. 5, [66.]

funds which form the currency of that portion of the country, and of those which alone it could prudently take, scarcely any were in circulation. What effect this change had upon the state of things may be inferred from a few extracts from some of the communications which were about that time made to the Secretary in relation to the subject:

"The debtors of the United States," say the Directors of the Bank of Vincennes in their memorial of the 9th January, 1819,* "in the western country, labor under distressing and almost insuperable difficulties in meeting their engagements; not so much from the want of means as from the scarcity of such funds as are receivable in payment of public lands. Should the country continue in its present situation with respect to these funds, many an honest citizen, many an industrious farmer, who has migrated to this country, and has paid his last eighty dollars as a first instalment on his quarter section of land, will be compelled, at the end of five years, to leave his favorite spot, his cabin, and all the comfortable improvements which the labor of his own hands has acquired, and, with his wife and children, seek a new home, without money to procure it. And why? Because the produce of his farm, although he may have an abundance to spare, will not command such funds as Government demands for the completion of his payments." Other representations, which are herewith transmitted, from senators and representatives whose character is a sufficient guarantee for the truth of their statements, corroborate these views. The Hon. Mr. Herrick, in a letter of the 11th of March, 1818,† considers the adoption of some measures on the subject as desirable, as well with a view to relieve the people as to preserve their affections for the present administration of the General Government. The Hon. Waller Taylor, in a letter of the 31st March, 1818, encloses a letter from a respectable source, stating that twenty per cent. had been given by those who had payments to make in the Land Offices to obtain such money as would be received; that few entries of land were made; and that many who had come from a distance to enter land had gone away without doing so, because the money they had brought, though consisting of the notes of banks of established character, could not be received; and Mr. Taylor concurs in opinion that the operation of the existing system was prejudicial to the purchasers of public lands, as well as the citizens of the State. In a joint letter addressed to the Secretary, on the 18th April, 1818, by fourteen western members of Congress, viz, the Hons. Joseph Desha, William H. Harrison, Robert Moore, Henry Baldwin, William Hendricks, James Noble, Waller Taylor, Richard C. Anderson, Levi Barber, Thomas Speed, John W. Campbell, Samuel Herrick, Peter Hitchcock, and Philemon Beecher, these gentlemen all concur in stating that "every mail from the west brings us the complaints and requests of the people on the subject of the pecuniary state of our country;" and they conclude by recommending, as a measure of vital importance, the reception of such western paper of specie-paying banks as were in good credit. The Hon. J. McLean, of Illinois, in a letter of the 5th June, 1819, speaking of one of the districts in that State, makes the following representation: "I am well assured, from my own knowledge, and letters of respectable gentlemen in that part of the country, that if every note that will be received in payment of land and every dollar of specie that is in the country were in the hands of those indebted to the Government for land, it would be insufficient to enable more than one-tenth man of our settlers to comply with his engagement. I almost daily receive letters from the people of Shawneetown land district and of that part of Illinois included in the Vincennes district, stating that they are in a situation truly distressing, and that, unless there be some amelioration in the directions to the Receivers, the time is but very short until they expect to see the little farm and dwelling they have provided for the support and shelter of themselves and family torn from them by the merciless, avaricious speculator. I am sorry to be constrained to say that their apprehensions are but too justly predicated, and that they represent facts."

These are letters which have presented themselves on a hasty reference to the files of the Department. It is well remembered, however, that numerous and earnest personal representations were made by other gentlemen in Congress, both as to the pecuniary distresses of the western country and the necessity of a change in the existing regulations. Representations like these could not be received with indifference. It is to be recollected, also, that at the time when this state of things existed the debt due for public lands amounted to about twenty millions of dollars, the greatest part of which had been contracted during the suspension of specie payments. Upon mature reflection, therefore, and with the approbation of the President, it was deemed advisable to make the arrangements with the western banks which are the subject of Mr. Edwards' condemnation.

The details of these arrangements are so fully exhibited in the Secretary's former communications on the subject that it is not thought necessary here to explain them.

As far as the interests of the people and of the Treasury were concerned, it is believed that those arrangements were not merely defensible, but commendable. As far as the measure affected the interests of the Bank of the United States, it is believed to be equally deserving of approbation. In a letter written by the Secretary to the President of that institution, on the 14th September, 1819, he thus explained the motives which, as far as the bank was concerned, influenced his course on the subject.

"It has been my constant endeavor for more than twelve months past to prevent, as far as practicable, all collision between the Bank of the United States and the State banks, as far, at least, as that collision might be connected with the transactions of this Department. It is not my intention, therefore, to give drafts upon the State banks for public money, without previously arranging with them the mode of payment.

"Acting upon the same principle, I have endeavored in the course of the present year to make arrangements with the State banks in the western States, by which they should become the depositories of the public money collected in that section of the Union. I considered the depositories there positively injurious to the bank, for the following reasons, viz:

"1st. That the offices had already extended their discounts in Ohio and Kentucky further than was consistent with the interest of the bank.

"2d. That every dollar deposited in them on account of the Government that could not be disbursed there, would have to be employed in discounts, or transferred to the bank in Philadelphia, or its eastern offices.

"3d. That owing to the state of exchange, transfers could only be made by the transportation of specie across the mountains.

"4th. That owing to the geographical position of Kentucky and Ohio, the public expenditure would be extremely limited.

"5th. That the transportation of specie from the western to the eastern States by the bank invariably had produced, and would continue to produce, irritation in the public mind against the bank.

* Page 48 of Document [No. 66.]

† See annexed Nos. 43, 44, 45, 46.

"An additional reason for endeavoring to make State banks in that section of the Union the depositories of the public money was to increase the receipts, by enabling the public debtors to pay in the notes of specie paying banks, which would not be received by the officers of the bank, and which could not be received by them, without increasing that collision which it was my desire to diminish."

These views, it is believed, were too just not to meet the approbation of the distinguished individual who presided over, and of the enlightened board which then directed, the affairs of that institution. Accordingly, Mr. Cheves, in his answer of October 5, 1819, thus expresses himself: "The board entirely concur with you in the views you take as to the Government collections and deposits in the western States, which they believe to be calculated to ease the moneyed pressure on that portion of the country, as well as to meet the interests of the Government, and relieve the bank from embarrassing collisions with local banking institutions."

It happened, however, that in three of the places where the banks were situated, with which the Secretary had made these arrangements, branches of the Bank of the United States were also established. By the charter of that bank, it was the duty of the Secretary to have stated to Congress, at its next session, the reasons why he had directed deposits of the public money to be made in these three banks. This statement, through inadvertence, was not made, as the Secretary has stated in his letter of February 24, 1823, to the select committee of the House. But as a full explanation of the motives of these arrangements had been made to the Bank of the United States, whose interests it was the object of that provision in the charter to guard, and as that institution had approved of the arrangements, and as the arrangements themselves had been published in various newspapers; and as the facts which were to be reported to Congress were of general notoriety, it is submitted, whether the Secretary could have had any motive for withholding the formal communication of the information to Congress.

Of the policy of the measure adopted by the Secretary in the employment of the western banks, it is presumed there can be no doubt. That it has not been entirely successful, is considered to be subject rather of regret than of censure. But that it has been mainly beneficial it is thought will not be denied by those who candidly examine the subject in all its bearings. And although very little ultimate loss is expected, yet, if the whole sum now due by those banks which have stopped payment were to be lost, it is believed that the advantages which have resulted to the country, will have been cheaply purchased at that cost.

As some misunderstanding in respect to the special deposits seems to prevail in the public mind, resulting from the misrepresentations that have been made on the subject, it may be proper to take this occasion to remove it.

About the time that the present Secretary of the Treasury took charge of that Department the special deposit amounted to upwards of three millions of dollars, being, on the 31st of December, 1816, $3,031,459, all of which has since been converted into cash funds, except $291,803. At the date of the Secretary's report of the 27th of February, 1823, the amount of the special deposit was $927,107, including the $291,803 above-mentioned. Of this sum of $927,107, about $64,000 have since been paid.* Hence it appears that, of the whole sum now on special deposit, only about $571,000, including the sum due by the defaulting western banks, have become special during the present Secretary's administration of the Department. When it is considered that this embraces a period of about seven years, during which great disorders have existed, and a great revolution has been effected in the currency, and during which upwards of one hundred and sixty-three millions of dollars have been paid into the Treasury, exclusive of loans and Treasury notes; and that of this sum upwards of twenty-one millions and a half of dollars, having been received from the sale of lands and internal duties and taxes, must have been collected in those portions of the country where the greatest disorders existed; when these circumstances are considered, it is believed that the sum which has become uncurrent during the Secretary's administration of the Treasury, instead of furnishing ground either of censure or surprise by its magnitude, justifies the conclusion that in this respect, as he trusts will be found the case in all others, the Secretary of the Treasury has not mismanaged the national funds.

In conclusion, the Secretary has the honor to state, that although it is believed that every material charge contained in the address of Mr. Edwards has now been satisfactorily explained, yet if, in the opinion of the committee, any further explanation be deemed necessary, it will afford him pleasure to give it, either personally or in writing.

BEN. STEPHENSON,
Receiver of Public Moneys for lands sold in the District of Edwardsville.

*This sum consists of $5,220 76 received from the Miami Exporting Company, $18,726 40 from the Bank of Huntsville, and $40,943 38 in discharge of the debt due by the Branch Bank of Kentucky at Louisville.

It is believed, however, that it will now be proper to include in the special deposit the sum due by the Bank of Columbia, amounting to $278,361 87; of this sum all but $40,000 were special when the present Secretary came into the Treasury, and was placed in this bank for the purpose of being converted into cash funds, as stated in the Secretary's report of February 14, 1822. Having effected this object, the bank is not now in a condition to refund the money, but an arrangement has been made by which the payment of it, with interest, has been, it is believed, well secured.

No. 15.

Treasury Department, *December* 21, 1818.

Sir: From the favorable representations that have been made to me of the character of the Bank of Edwardsville, I have proposed to make that bank a depository of the public moneys, on the usual conditions. In order to prevent any delay in this arrangement, in case the bank accedes to my proposition, you are authorized, on receiving from the officers of that institution an authentic copy of its letter of acceptance addressed to me, (and provided that acceptance is unconditional,) forthwith to make your deposits in that bank to the credit of the Treasurer. In order to give facility to those who have payments to make for the public lands, you are authorized to receive (in addition to the notes of the Bank of the United States and its branches, and specie) the notes of all the banks authorized to receive the public money, as enumerated in the enclosed printed list, and also the notes of the banks in Boston, New York, Philadelphia, Baltimore, and District of Columbia, (except the Merchants' Bank of Alexandria,) the old banks of Kentucky, and the banks at New Orleans, and the notes of any bank in Ohio that pays specie.

You will understand, however, that if any of the banks should suspend specie payments, you are no longer to receive their notes. You are also requested that if any circumstances affecting the character of the bank in which you make your deposits should come to your knowledge, you will communicate the same to me. You will understand, of course, that if the proposed arrangement with the Bank of Edwardsville shall take effect, the notes of that bank may be received on the same terms as others.

I am, &c.,

To the undermentioned Receivers of Public Moneys:

Benjamin Stephenson, Esq., *Receiver of Public Moneys, Edwardsville.*
Warren Brown, Esq., *Receiver of Public Moneys, Kaskaskia.*

A similar letter, in relation to the Illinois Bank, was addressed to—

John Caldwell, Esq., *Receiver of Public Moneys, Shawneetown.*

No. 16.

TREASURY DEPARTMENT, *March* 20, 1819.

SIR: It being represented to me, by the Secretary of War, that funds are wanted to discharge the annuities stipulated by treaty to be paid in *specie* to the Ottawa, Chippewa, and Pottawatomie tribes of Indians, I have to request that you will furnish Richard Graham, Indian Agent, with one thousand dollars in specie, and take his bills for the same, drawn in triplicates, on the Secretary of War, in your favor. The first and second of which bills, after being endorsed by you to the Treasurer of the United States, must be transmitted by different mails to my office.

I am, &c.

BENJAMIN STEPHENSON, Esq., *Receiver of Public Moneys, Edwardsville, I. T.*

No. 17.

TREASURY DEPARTMENT, *April* 9, 1819.

SIR: Being informed by the Secretary of War that Governor Cass has been instructed to authorize the Indian Agents at Chicago, Green Bay, Michilimackinac, Fort Wayne, and Piqua, to draw bills on the War Department for the amount of their quarterly salaries and contingent expenses for the present year, I have to request that you will pay cash for all bills of that description drawn in your favor by any of the aforesaid Indian Agents, provided they shall exhibit to you the authorization of Governor Cass for drawing the same. The sum which will be required at the close of each quarter is estimated at about eleven thousand dollars.

The bills are to be endorsed by you to the Treasurer, and transmitted to my office by different mails, as in other similar cases.

I am, &c.

The RECEIVERS OF PUBLIC MONEYS at Detroit, Wooster, Edwardsville, Vincennes, and Kaskaskia.

No. 18.

RECEIVER'S OFFICE, *Edwardsville, May* 5, 1819.

SIR: I have the honor herewith to transmit to you my account current for the month of May last; also a duplicate receipt of the Register for his salary and commission—his salary from the 1st to the 19th of April, inclusive, and his commission from the 1st day of April to the 1st day of May, inclusive. At the expiration of the first mentioned period Mr. Cole's commission bore date, and at the expiration of the last he took possession of the books of his office, and entered upon the duties thereof.

I am, very respectfully, sir, your obedient servant,

BEN. STEPHENSON.

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

No. 19.

TREASURY DEPARTMENT, *August* 6, 1819.

SIR: Observing by your monthly return, ending the 30th of June, that there remained in your hands a considerable sum of the public moneys, I wish to be informed why the same was not deposited in bank, in conformity with the instructions from this Department. Heretofore, when there was no bank in your vicinity, all reasonable allowance was made on account of the difficulty to which you were subjected in making your deposits; but now that a bank has been established in your place of residence, there can be no longer any excuse whatsoever for retaining public money.

I am, &c.

To the undermentioned Receivers of Public Moneys:

J. CALDWELL, *Receiver of Public Moneys, Shawneetown.*
BENJ. STEPHENSON, *Receiver of Public Moneys, Edwardsville.*

No. 20.

EDWARDSVILLE, ILLINOIS, *September* 18, 1819.

SIR: Your letter of the 6th ultimo to my husband having arrived in his absence, I hope its importance will excuse the liberty I take in stating to you that Mr. Stephenson left here a few days ago for Kentucky, to bring home a daughter that we have had for a considerable time past at school in that State.

On his return, I have no doubt he will fully satisfy you relative to the public money mentioned in your letter. I cannot pretend to have any accurate information upon the subject, but, judging from some fugitive conversations which I have casually heard between him and others, I do expect that the reason why he has not deposited more money in the bank is, that he was directed by you last spring to retain in his hands about forty thousand dollars, to be appropriated in quarterly payments to defray certain Indian expenses.

With great respect, I am, sir, your obedient servant,

LUCY STEPHENSON.

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

No. 21.

CIRCULAR TO RECEIVERS OF PUBLIC MONEYS.

TREASURY DEPARTMENT, *September* 21, 1819.

SIR: It is deemed expedient that the form of the monthly account current rendered by the Receivers of Public Moneys should be altered so as to distinguish the sums received for lands entered or intended to be entered during the month from those received on account of previous entries.

It is also deemed expedient that those accounts be countersigned by the respective Registers of the land districts.

Intimations have been frequently made to this Department that the money received in some cases on account of the Government has been exchanged for that which was less valuable, which has been subsequently deposited to the credit of the Treasurer in the banks selected as places of deposit. These intimations are no doubt generally unfounded; but it is important to the character of the officers, as well as to that of the Government, that the means of repelling them should at all times exist. This can be effected only by describing upon the back of the receipt the kind of money that was received. This will impose additional labor upon the land offices; but it is so important to possess the means of repelling insinuations against the integrity of the officers of the Government that it is deemed indispensable. If, during any public sale of land within your district, it should be found to be impracticable, it may be dispensed with until the sale shall be closed. In no other case must it be omitted. In order that the evidence intended to be obtained by this regulation may be perfect, it will be necessary for you to endorse upon all receipts for money paid by you, other than to the bank in which you make your deposits, the kinds of money paid away, including your own commissions and salary, and furnish a statement thereof to the Register of the Land Office.

I am, &c.

No. 22.

RECEIVER'S OFFICE, *Edwardsville, Illinois, October* 28, 1819.

SIR: I have the honor to acknowledge the receipt of your letter of the 21st ultimo, with the form of an account current.

I have the honor to be, very respectfully, sir, your humble servant,

BEN. STEPHENSON.

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

No. 23.

TREASURY DEPARTMENT, *November* 1, 1819.

SIR: Upon referring to your monthly accounts it appears that you have retained all the money which has been received by you since the month of August last.

As it is presumed that this has been the result of my letter of the 9th of April last, I request that you will immediately on the receipt of this letter deposit in the Bank of Edwardsville the whole of the money in your possession on the 30th instant.

You will consider the letter of the 9th of April as authorizing the purchase of bills in the manner directed therein when you have funds, but not as authorizing the detention of the public money in your hands at the end of each month for that purpose.

It is presumed that if any draft should be presented when you have not money in your hands, that there will be no difficulty in having the drafts taken up by the Bank of Edwardsville on its own account, or to be repaid by you as soon as you have funds for that purpose.

I am, &c.

BEN. STEPHENSON, Esq., *Receiver of Public Moneys, Edwardsville.*

No. 24.

SIR: I have the honor herewith to transmit you my account current for the month of October last; also R. Graham's draft on the Secretary of War for one thousand dollars, paid him in specie.

The cash received during the month of August last was overcharged in the account current for that month one dollar and sixty-five cents, which you will find corrected.

I have the honor to remain, very respectfully, sir, your most obedient servant,

BEN. STEPHENSON.

Hon. Wm. H. Crawford, *Secretary of the Treasury.*

No. 25.

Receiver's Office, *Edwardsville, November* 16, 1819.

Sir: I have the honor to transmit you R. Graham's draft, drawn on the Secretary of War, for one thousand dollars, being the second of exchange, the first having been transmitted with my last account current.

I am, very respectfully, sir, your obedient servant,

BEN. STEPHENSON.

Hon. Wm. H. Crawford, *Secretary of the Treasury.*

No. 26.

Treasury Department, *April* 20, 1820.

Sir: On the 1st of November last you were instructed by this Department to pay into bank the whole of the money in your hands on the 30th of that month, and not to retain the public money in your hands at the end of each month.

By referring to your monthly returns for the months of December, January, and February, it appears that this instruction has not been complied with; a sum exceeding ten thousand dollars upon an average having been retained by you during those months.

As the bank in which your deposits have been directed to be made is established in the place in which your office is kept, the retention of the money, or any part of it, one day beyond the expiration of the month, is without apparent excuse; you will therefore, immediately after the receipt of this letter, deposit in bank the whole of the money retained in your hands, and regularly at the end of each month make a like deposit.

In my letter of the 1st of September last, addressed to the Receivers of Public Moneys, the monthly returns of those officers are required to be countersigned by the Register. This regulation has not been complied with in your returns to the latest date. It is expected that all regulations addressed to public officers will be promptly complied with, and that when, from any circumstance, this should be found impracticable, the cause of non-compliance should be communicated without delay.

I am, &c.

B. Stephenson, Esq.,
Receiver of Public Moneys, Edwardsville.

No. 27.

Receiver's Office, *Edwardsville, January** 1, 1820.

Sir: I received your letter of the 20th of April, and hasten to answer it, in which you state, by referring to my monthly returns for December, January, and February, it appears that a sum exceeding ten thousand dollars upon an average has been retained by me during these months. Certainly it would appear so by referring to the account current, but by referring to the balanced account of that quarter ending December 31, 1819, there was in my hands, not paid over, three thousand four hundred and eighty-nine dollars and forty-six cents, and on the 31st day of March, the first quarter of 1820, there still remained in my hands two thousand four hundred and fifty-six dollars and fifty-eight and a half cents. Owing to my having advanced a sum of money to defray the expenses of the Indian Agency at this place, and Government giving me assurance that as soon as appropriations could be made by Congress my drafts would be honored, which I have expected some time, and in the meantime I took the liberty to retain about or nearly that sum of the public money.

I acknowledge that such a course was not justifiable, and if I had reflected on the subject I should not have pursued it. In future I hope you will have no reason to complain of my want of punctuality in regard to any of my public duties. Since the receipt of your letter of the 21st of September last, the absence of the Register has prevented me from a compliance with your order with regard to my monthly returns being countersigned by him; he has now returned, and it shall be punctually attended to in future.

I am, with respect, sir, your obedient and humble servant,

BEN. STEPHENSON.

Hon. Wm. H. Crawford, *Secretary of the Treasury.*

* The date of this letter is obviously a mistake, as this letter is an answer to the Secretary's letter of April 20, 1820.

No. 28.

TREASURY DEPARTMENT, *July* 26, 1820.

SIR: Your letter dated the 1st of January, 1820, (meaning probably the 1st of June,) acknowledging the receipt of mine of the 20th of April last, has been received. The explanation given in it is entirely unsatisfactory. Either your quarterly account ending with the 31st of March last or your account current for the month of March to this office is incorrect. Your returns for the months of April and May do not conform to the description which you give of your quarterly account.

The principal object of the monthly return made to this office is to inform the Secretary what is the state of the officer's account without resorting to other officers for that information. The quarterly accounts are also frequently rendered long after they are due, and when rendered frequently remain a considerable time without examination. To remedy this inconvenience monthly returns, showing the general state of the Receiver's accounts, have been required. But if they are not substantially correct, if they do not show the state of the accounts by $10,000, they do not answer the purpose for which they are required. You will therefore have the goodness to make your next returns show the true state of your accounts and explain how they have varied from your quarterly returns, and from the truth, as is alleged in your letter.

I am, &c.

B. STEPHENSON, Esq., *Receiver at Edwardsville.*

No. 29.

TREASURY DEPARTMENT, *December* 6, 1820.

SIR: Upon an inspection of your return for the month of October I find that it does not correspond with the instructions contained in my letter to you of the 21st of September, 1819, in the following instances, viz: it does not distinguish between the money received for purchases made prior to the month and the money received for sales made during the month, nor is it countersigned by the Register, as directed.

I am, &c.

B. STEPHENSON, Esq., *Receiver at Edwardsville.*

No. 30.

RECEIVER'S OFFICE, *Kaskaskia, September* 18, 1819.

SIR: I herewith transmit to your office my account current with the United States for the month of August.

The Indian Agents whose quarter salaries and contingent expenses you directed me to pay and to retain money in my hands for that purpose here, none of them have as yet called on me for any part of the amount due them. Of the notes which I have reserved for that object some of them have depreciated in value, or in their currency; they were reserved for them, to wit, those of the State Bank of North Carolina and of the Bank of Nashville. Perhaps they will not call on me before I can have the benefit of your instructions; I request, therefore, that you will advise me whether I shall insist upon their receiving those notes, or whether I shall retain them on hand and subject to your orders.

I am, very respectfully, sir, your obedient servant,

W. BROWN.

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

No. 31.

TREASURY DEPARTMENT, *November* 1, 1819.

SIR: Upon referring to your monthly account, it appears that you have retained all the money which has been received by you since the month of August last. As it is presumed that this has been the result of my letter of the 9th of April last, I request that you will immediately deposit in the Bank of Edwardsville whatever sums may be in your hands on the 30th instant.

You will consider the letter of the 9th of April last as authority to purchase the bills therein described, if you have funds sufficient for that purpose, but not as authority to retain in your hands, at the end of each month, any part of the public money received in the course of the month.

You will, after the deposit herein directed, make your deposits monthly in the Bank of Missouri, until otherwise directed.

I am, &c.

---

*No. 30.

FEBRUARY 9, 1822.

SIR: I am informed by Colonel Johnson that you have taken his certificate as to a representation I made to him at the last session of Congress in relation to certain notes which had become uncurrent

after they had been received by the Bank of Edwardsville, in deposit from certain Receivers of Public Moneys, &c.

This circumstance, taken in connexion with other remarks which I have heard of your having made, induces me to suppose it probable that you may intend to make some use of my name in the report you are about to make upon that subject. To this I can have no possible objection, provided my conduct in relation to that bank can be fully understood; and for that purpose I beg leave most respectfully to suggest that it would be but an act of justice to me to present my publication of 1819, in which I declared I would be no longer responsible for that or any other bank in any way whatever. This publication was contained in the St. Louis Enquirer, which I supposed you took at that time. It was also contained in a paper which I forwarded to you myself, and it was enclosed, referred to, and commented upon in a letter from the President of the bank to you, which letter, he informed me, had been answered.

Since the fall of 1819 my connexion with that bank has entirely ceased, except that I have been, and still am, a stockholder, without, however, ever having borrowed a cent from it. The information I gave Colonel Johnson was upon the faith of statements which I showed to him at the time and which I supposed he showed to you. They were from the President of the bank, and I have no doubt were literally true. But even in this part of the business there must be some misunderstanding, if I have been correctly informed as to the reasons you have assigned for agreeing to take the $20,000 alluded to; for these reasons, it appears to me, would have equally embraced the remaining $6,000 which Colonel Johnson stated you would not agree to receive. The whole amount of paper of that description was about $26,000. I should be perfectly willing to repeat, over and over again, any statements that I have ever made to you, either directly or indirectly, in relation to this business.

The object of this letter is to manifest my disposition or willingness to avoid the necessity, on my part, of calling for any information upon the subject, or of referring to information which you received against the bank, *the opinions you expressed to Colonel Johnson*, and what you *authorized* him to say to that institution, as appears by his written statement, which I expect shortly to receive.

I have the honor to be, very respectfully, sir, your most obedient servant,

NINIAN EDWARDS.

---

*No. 31.

WASHINGTON, *February* 12, 1822.

SIR: I have had the honor to receive your letter dated the 9th instant. I regret extremely that you should have judged it consistent with your private character or official station to write such a letter.

I trust, however, that if the report to which that letter refers should not furnish an inducement to make the call for information relative to your connexion with the Bank of Edwardsville, and to the other subjects which you have so emphatically underscored, you will, nevertheless, be impelled by other considerations to make the menaced call. I assure you, sir, it will afford me great pleasure to communicate to Congress all the information in the possession of the Department concerning that bank, your agency in bringing it into connexion with the Treasury, and the representations which were made against it, whenever it can be done consistently with the respect which is due to my own character and the station which I occupy.

I remain yours, &c.,

W. H. CRAWFORD.

Hon. NINIAN EDWARDS.

No. 32.

RECEIVER'S OFFICE AT KASKASKIA, *January* 10, 1820.

SIR: I herewith transmit to your office my account current with the United States for the month of December, 1819. I delayed making my deposit in the Bank of Edwardsville some time, hoping to be able to leave home and go with it myself; but finding that I should not be able to go myself before the expiration of the month of December, I hired two trusty persons to whom I intrusted that business, but they were delayed by adventitious circumstances before starting and on their way thither, and the deposit was not made until the 3d of January.

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

---

*No. 30.

TREASURER'S OFFICE, *May* 3, 1824.

Respecting the difference between the Treasurer's account and the Bank of Edwardsville, it is proper to state, December 31, 1819, the bank states its balance	$98,191 59
December 31, 1819, the Treasurer's balance is	53,191 59
Difference	45,000 00
October 28, 1819, a bill, No. 9642, was drawn in favor of Jonathan Smith for	30,000 00
December 28, a bill, No. 9749, in favor of the same for	15,000 00
	45,000 00

Both of these bills were outstanding on the 31st of December, 1819. The first was paid January 7, 1820, and the second, March 13, 1820.

When a bill is drawn on any bank, credit is immediately given on the Treasurer's books for the amount, on the presumption that it will be paid.

Thus, at any given date, there will appear differences which may be reconciled as above.

---

*No. 32.

WASHINGTON, *February* 14, 1822.

SIR: I have this moment (15 minutes past 7 o'clock p. m.) had the honor to receive your letter of the 12th, in answer to mine of the 9th instant.

If there be any thing in mine of such an extraordinary character as to produce the extreme regret you express, I trust some apology, at least, may be found for it in the singular circumstances which produced it, and to which it in part alluded.

Without the slightest disposition to shrink from any just responsibility in relation to the Bank of Edwardsville, it was my wish that my conduct in relation to "its connexion with the Treasury" should be so understood, as fairly to show the extent of my reponsibility. If, however, I have been erroneously betrayed into the opinion that you intended to use my name, as suggested, *I regret it.* If my letter be liable to the interpretation you are pleased to give to it, I owe it to myself, *unhesitatingly* and *promptly*, to disavow any intention of offering personal disrespect to you or the station you occupy.

I must, however, say, sir, that as the information in the Treasury Department, relative to my original recommendation of the Bank of Edwardsville, has for some time past been distinctly understood and freely used at this place, I can but consider it somewhat unfortunate for me that other communications in the Department, which ought to have terminated all responsibility on my part, have not been equally known.

That I was the cause of the deposits being made there in the first instance I freely acknowledge; but that I unequivocally declared I would not be held responsible for that or any other bank in any way whatever after the fall of 1819; that you were notified thereof in due time; that the deposits have not been continued there in consequence of my recommendation since that period; and that the bank was then in a good situation, I may, I think, according to my present impressions, fairly insist upon; and if so, the partial information now in circulation at this place surely is not calculated to do me the justice which, I hope, I have a right to expect from your magnanimity. It would, therefore, afford me great pleasure, I assure you, sir, that the whole of my conduct in relation to that business should be so fully known as to be no longer misunderstood. Considering the use that has been made of the partial information referred to, the remarks alluded to in my letter, the *novelty* of the Secretary of the Treasury's having taken a certificate of what I had said at the last session of Congress, and the time, and peculiar circumstances under which it was done, it surely is not extraordinary that I should have wished all the circumstances connected with the subject to appear, or that I should have been misled into some erroneous conclusions. If, however, there is anything in my letter inconsistent with the respect which I justly owe to you, or is due to my own character, I am sorry for it, though I am not now less disposed to do whatever I may consider necessary for my own justification.

I have the honor to be, very respectfully, sir, your most obedient servant,

NINIAN EDWARDS.

No. 33.

TREASURY DEPARTMENT, *June* 18, 1818.

SIR: The extent of the sales of the public lands which are intended to be offered at public auction during the present and succeeding year in the Missouri Territory, compared with the amount of bills of the United States Bank, and of the Bank of Missouri, in circulation in that Territory, forbids the expectation that the purchasers will be able to make payment in them or in specie. The public interest, therefore, requires that the bills of other banks should be received by the Government in payment of the public lands. You are, therefore, authorized to receive in payment the bills of the banks the list whereof is herein enclosed.

You will, at the end of each month, deposit the whole of the money received during the month in the Bank of Missouri, to the credit of the United States Bank, for the use of the United States, for which duplicate receipts will be executed by the bank. One of the receipts must be transmitted with the monthly account in which it is credited.

Should the Bank of Missouri refuse to receive as cash the bills which you are authorized to take in payment of the public lands, you will make a special deposit of it, and transmit a list of the bills so deposited to this Department with your monthly accounts. A strict regard to punctuality in complying with this instruction is confidently expected. The President calculates upon your zeal in securing to the Government in the approaching sales the full benefit of a fair competition among the purchasers; all combinations or associations, intended to repress or lessen that competition, should be discountenanced, and, if practicable, prevented by the officers of the Government, and especially by the Receiver and Register of the Land Offices.

I am, &c.

THOMAS A. SMITH, Esq., *Receiver of Public Moneys, Howard County.*
SAMUEL HAMMOND, Esq., *Receiver of Public Moneys, St. Louis.*

In addition to the above you are at liberty to receive the notes of all the banks in Baltimore, Philadelphia, New York, Boston, and District of Columbia, the Merchants' Bank of Alexandria excepted; the banks of Cincinnati, Chilicothe, Columbus, Marietta, Zanesville, in Ohio, the Bank of Kentucky, and the banks at New Orleans.

No. 34.

TREASURY DEPARTMENT, *October* 25, 1818.

SIR: Your letter of the 16th instant has been received by this day's mail. If the sales of the Alabama lands, which were advertised for the third Monday in this month, have not been effected, the amount of public money which is in your hands is known. If they take place, an early communication of the amount received will be necessary to enable me to comply with your wishes.

The doubtful state of the currency in most parts of the country, resulting from the excessive multiplication of banks by the States, renders it extremely difficult to discriminate between those that are really solvent from those that are not so. Until further advised you will take the notes of no bank except those of the Bank of the United States and its branches, the State Bank of North Carolina, the banks of South Carolina and Georgia, the two old banks of Kentucky and Tennessee, the banks of the Alabama Territory, and of the States of Mississippi and Louisiana. In the event of either of the banks just enumerated ceasing to pay specie on demand the notes of such banks must not be received.

I am, &c.

JOHN TAYLOR, Esq., *Milledgeville, Georgia.*

No. 35.

TREASURY DEPARTMENT, *November* 28, 1818.

SIR: The banks at Cincinnati, in the State of Ohio, having ceased to pay their notes in specie, you will hereafter not receive their notes in payment of dues to the United States. It is reported that some if not all the other banks in that State have also suspended specie payments; but, although there is reason to apprehend that this may be the case, I am not sufficiently informed of the fact to give you positive directions to refuse their notes. You will observe, however, as a standing instruction, that if at any time it shall come to your knowledge that any bank whose notes you are authorized to receive does not discharge its notes in specie you will no longer receive them.

I am, &c.

To the undermentioned Receivers of Public Moneys:

JAMES ABBOTT, Esq., *Receiver of Public Moneys, Detroit.*
THOMAS A. SMITH, Esq., *Receiver of Public Moneys, Howard Co., Missouri.*
SAMUEL HAMMOND, Esq., *Receiver of Public Moneys, St. Louis.*

No. 36.

TREASURY DEPARTMENT, *December* 4, 1818.

SIR: You are authorized, from and after the receipt of this letter, to receive the notes of the Bank of Georgetown, in the State of Kentucky, in all payments due to the United States for lands, at your office. In conformity with the instructions recently given, you will refuse to receive the notes of any bank contained in the list heretofore transmitted to you, as well as of the Bank of Georgetown, whenever you shall receive information, upon which you can rely, that such bank has discontinued specie payment.

I am, &c.

To the undermentioned Receivers of Public Moneys:

SAMUEL HAMMOND, Esq., *Receiver of Public Moneys, St. Louis.*
THOMAS A. SMITH, Esq., *Receiver of Public Moneys, Howard County, Missouri.*

No. 37.

TREASURY DEPARTMENT, *January* 4, 1819.

SIR: You will hereafter deposit the public moneys received by you in the Tombeckbe Bank, at St. Stephen's. Without anticipating any occurrence that can affect the character of that bank, I have nevertheless to request that if any such occurrence should come to your knowledge you will immediately inform me.

I am, &c.

To the undermentioned Receivers of Public Moneys:

WM. CRAWFORD, Esq., *Receiver of Public Moneys, St. Stephen's.*
JOHN TAYLOR, Esq., *Receiver of Public Moneys, Cahaba, A. T.*

No. 38.

TREASURY DEPARTMENT, *January* 12, 1819.

SIR: Your letter of the 14th ultimo has been duly received, and I approve of your conduct in refusing to receive the notes of the banks therein mentioned in payment of the public lands; and as there is reason to believe that the other banks in the State of Ohio have pursued the same course, the prohibition must also be extended to them.

In conformity with your suggestion, you may, until otherwise instructed, consider yourself at liberty to receive the notes of the State Bank of Georgia and its branches, and also the notes of the banks of South Carolina, observing, however, as before instructed, that if at any time it shall come to your knowledge that any bank, whose notes you are authorized to take, does not pay them on demand in specie, you will cease to receive them.

I am, &c.

SAMUEL HAMMOND, Esq., *Receiver of Public Moneys, St. Louis.*

No. 39.

TREASURY DEPARTMENT, *May* 29, 1819.

SIR: The City Bank of Baltimore, and the Franklin Bank of Alexandria, D. C., having discontinued to discharge their bills in specie on demand, you will no longer receive the bills of those banks in payment of dues to the United States.

I avail myself of this occasion to repeat the instructions heretofore given, that the paper of any bank which does not pay its notes in specie on demand shall not, on any account, be received on behalf of the United States.

I am, &c.

THE RECEIVERS OF PUBLIC MONEYS.

No. 40.

TREASURY DEPARTMENT, *July* 7, 1819.

SIR: You will no longer receive the bills of the Mechanics' Bank of Alexandria, D. C., in payment of dues to the United States.

I am, &c.

THE RECEIVERS OF PUBLIC MONEYS.

No. 41.

IN THE HOUSE OF REPRESENTATIVES OF THE UNITED STATES, *January* 9, 1822.

Resolved, That the Secretary of the Treasury be directed to lay before this House a statement showing in what banks the money received from the sale of the public lands have been deposited since the first of January, 1818; the contracts under which said deposits have been made; the correspondence between them and the Treasury Department relative thereto; the amount of deposits that were to be left in each, in consideration of taking charge of the balance of the money deposited; whether, in any instance, the deposits allowed for that purpose have been increased, and why such increase was allowed, together with copies of the statements of their situation furnished to said Department for the last twelve months preceding such increase; whether any of those banks have failed to comply with their engagements, and to what amount; the statements made by each for the last twelve months preceding its failure; what measures have been taken, in consequence thereof, to secure the Government against any losses resulting from such failure; what those measures have been, and at what expense; whether, in any instance, uncurrent or depreciated paper has been received from them, or any of them, which the Government was not bound to receive, by any agreement between such banks and the said Secretary; and whether any further measures are necessary to be adopted by Congress to provide for the transmission of the public money from the different Receivers to a more safe place of deposit; and if so, what place is most advisable.

Attest: THOMAS DOUGHERTY, *C. H. R.*

No. 42.

[Confidential.]

TREASURY DEPARTMENT, *July* 9, 1819.

SIR: At the present moment, when banks in the principal commercial cities which have been prudently managed are dividing but little, if any, more than legal interest, when those in the interior of the Atlantic States have generally failed, and such of those in the western States as have not preceded them in the loss of credit are justly alarmed with the apprehension of it, the Directors of all banks who intend to preserve their credit and usefulness are imperiously called upon to act with the utmost circumspection and prudence. All those in the management of which any departure from the principles which ought to govern banking institutions has occurred, ought with promptitude to review their proceedings, and to introduce such reforms and curtailments as are necessary to secure their stability and usefulness.

Considering the small quantity of specie in the country, which forms the basis of the paper currency, which has become its substitute, and its liability to exportation in the prosecution of the East India and China trade, as well as to meet balances which may happen to be due to the commercial states of Europe whenever the rate of exchange between the United States and those countries shall furnish inducements, it is difficult to conceive that any bank can be managed with prudence which extends its discounts more than 50 per cent. beyond its capital actually paid in. During the period of the existence of the former Bank of the United States, when there was but little bank competition, and when, owing to a most fortunate combination of circumstances, the precious metals abounded in this country more than in any other, that institution extended its discounts but little more than 50 per cent. above its actual capital. The Planters and Merchants' Bank of Huntsville has, however, during the last twelve months, generally discounted to three times the amount of its capital actually paid in. In making it the depository of the public money received at Huntsville, it was expected that it would avail itself, to a reasonable extent, of the funds deposited in its vaults to the credit of the Treasury, taking care, however, to be always prepared to answer the demands of the Treasury for the whole amount if emergencies should render it necessary. It would be difficult to define the extent to which it might, with prudence, have extended its discounts upon the public money in its possession. In times favorable to banking operations it will readily be perceived that those discounts might be extended much further than at a crisis when banking institutions were generally struggling for existence—a crisis at which the Bank of the United States has not been able to declare a dividend of more than 2½ per cent., and when it is at this moment unable to make any dividend. Under such circumstances, unless favored extremely by locality of position, prudence probably would have dictated the employment of the public money in the possession of the bank as a means of guarding against the embarrassments by which other institutions were surrounded, and under which they were daily sinking, instead of considering it a fund upon which it might extend its discounts. Such an employment would be so much the more necessary if the previous discounts of the bank were composed of what is commonly called accommodation paper.

The common misfortune of most of the banks at this moment in the commercial cities, and it is presumed to be still more so of those in the interior, is, that their discounts are generally of that description. When pressed themselves by the return of their notes, or withdrawing of the deposits, they have been unable to contract their discounts and draw in their debts in a corresponding degree. Embarrassment in their operations is the necessary consequence of this inability, and the loss of credit too frequently the result. The proposition lately made to the bank, and which has been conditionally accepted, by which a permanent deposit is stipulated, removes a part of the charge of imprudence, in preserving the discounts at the point to which they had been previously, as is believed, imprudently extended; yet still, in the existing state of the currency, it appears to me that prudence requires they should be diminished. It is possible that your local position may be so favorable as to exempt the bank under your direction from the emergencies and casualties to which banks in the commercial cities are now, and for the last twelve months have been subjected. I am not, however, able to discover that any such advantage exists. On the contrary, I perceive that banks in your vicinity, and which have not the power of charging their embarrassments to the Bank of the United States, have recently failed.

It does, therefore, appear to me that prudence requires you to diminish your discounts, and bring them into that relation with your capital and the permanent deposit proposed in my arrangement of the

9th of March last, which is considered essential to the security of banks which are prudently conducted in the commercial cities. It may, indeed, be said, that as Boston is the place where specie has, since the war, borne the highest price, that your distance from that point affords efficient protection against any serious drain of specie. This may be correct to some extent; but it is presumed that dangers await banks in the interior not less embarrassing and dangerous than the immediate drain from the Atlantic banks occasioned by the East India and China trade.

As an additional inducement to retrenchment at this time, it is my duty to add that the whole of the public money in your possession beyond the permanent deposit must be transferred to the Bank of the United States in the course of the ensuing autumn, in order that it may be applied to the reimbursement of the Mississippi stock. I will thank you, therefore, to adopt the measures necessary to effect that object with as little delay as possible, and inform me of the time and place at which it may be most conveniently effected by the bank.

It is not considered expedient to dispense with the regulation to which the Directors have objected. It has been accepted by all the banks to which it has been proposed, and it has been proposed to all those where permanent deposits have been stipulated. Among them the oldest bank in the western States is to be numbered. It is not intended to be used inquisitorially as to the debtors of the bank. The secrecy which you seem to think essential in the concerns of the bank with its debtors is one of the vices of the existing bank charters which has done more to impair the public confidence in those institutions than any other circumstance connected with them. This secrecy has rendered them instruments in the hands of the officers of the banks to their individual aggrandizement, at the expense of the interests of the stockholders and of the community. When this feature shall be obliterated from the charters of banks, and the utmost publicity given to their proceedings, a list of their debtors, with the amount due by each, published in the Gazette annually, confidence will be reposed in banks as far as the public interest requires it; at present it is lost.

I remain, &c., &c.

LE ROY POPE, Esq., *President of the Farmers and Merchants' Bank, Huntsville.*

No. 43.

WASHINGTON CITY, *March* 11, 1818.

DEAR SIR: I beg leave to call your attention to the editorial remarks in the enclosed paper upon the subject of the collection of the revenue of the United States, under the "Steubenville" head, and to ask for information, whether the arrangement in relation to the kind of money authorized to be received, as complained of, was made by the Government or the United States Bank; and if by either, whether some alteration may not be allowed without materially retarding the collection of the revenue, and such other information in relation to the subject as you may be pleased to communicate?

In making this request I have the double object in view of softening that kind of oppression incident to the payment of internal duties, and to preserve the affection of the people for the present administration of the General Government. After perusing the newspaper, I will thank you to send it to me.

I have the honor to be, dear sir, very respectfully, your obedient servant,

SAMUEL HERRICK.

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

No. 44.

WASHINGTON, *March* 31, 1818.

SIR: I herewith enclose to you a letter which I yesterday received from J. D. Hay, a respectable man at Vincennes, on the subject of a regulation which has been recently adopted by the United States Branch Bank at Louisville, Kentucky, for the government of the Receiver at Vincennes. I will only remark that these instructions, if not altered, will operate most prejudicially to the purchasers of the public lands, as well as to the citizens of the State, and I hope that you will use your influence with the United States Branch Bank at Louisville to have them so modified, at least, that the notes of the State Bank of Indiana may be received in payment for public lands.

I have the honor to be, respectfully, your obedient servant,

WALLER TAYLOR.

Hon. WM. H. CRAWFORD.

VINCENNES, *February* 24, 1818.

DEAR SIR: Your favor of the 19th ultimo came duly to hand by the last mail. We are very thankful to you for your friendly exertions in favor of our State Bank, and if the proposed arrangement could be made with the Bank of the United States it would be highly gratifying to us.

The Receiver of Public Moneys received instructions last week from the Branch of the United States Bank at Louisville, directing him to receive no note, in payment of land, but those of the United States Bank and its branches, and the notes of the State Bank of Kentucky and her branches. This we think

extraordinary, when it is recollected that this bank commenced specie payments on the 20th of February, 1817, and conformed to every wish of the Government, at all times, which was not general with the western banks.

If these instructions are to be permanent the people will experience great inconvenience, as it is difficult to obtain the notes of those banks without paying high premiums. I have been told that some have paid 20 per cent. to have their money put into a shape to go into the Land Office. Few entries are making. Some individuals have come a distance to enter land; have brought the bills of North and South Carolina, Tennessee, New York, Pennsylvania, Virginia, &c., and have had to return without accomplishing the object of their journeys.

I shall be happy to hear from you frequently.

Very respectfully, your obedient servant,

J. D. HAY.

General W. TAYLOR.

No. 45.

HOUSE OF REPRESENTATIVES, *April* 18, 1818.

SIR: Every mail from the west brings us the complaints and requests of the people on the subject of the pecuniary state of our country. The monopolizing and depressing policy of the United States Bank and its branches, in the western country, have and are producing a state of things in that quarter much to be deprecated. The branch at Louisville, we are informed, has determined to receive no deposits except of specie, United States Bank paper, and Kentucky paper. The instructions of the Treasury Department restrict the Land Offices of the United States, within the State of Indiana, from receiving payments for land in any currency which will not be received as specie deposits in the branch at Louisville. The law of the present session, it is true, will prevent forfeitures during its existence; but during that time heavy sums of interest will be accruing against those who have land payments to make, and the doors of the offices must be closed against subsequent purchasers. The emigrant will not be able to purchase, and the general prosperity of the country must be greatly paralyzed.

We would not press or ask a state of things prejudicial to the revenue, or the reception of paper below par, in payment for land; but the par value of the paper currency of Indiana is not doubted by any. There are but two banks in the State, and their credit are equal to any in the western country.

All that we would ask or wish is, that the Land Offices be permitted to receive such western paper as they may have an accurate knowledge of, and may know to be in good credit, doing a fair business, and paying specie. This arrangement we think of vital importance to the State of Indiana, and hope it may be deemed admissible by you.

The most of the above facts, we believe, exist in the State of Ohio also.

We are, sir, very respectfully, &c.,

JOSEPH DESHA.
WILLIAM H. HARRISON.
ROBERT MOORE.
HENRY BALDWIN.
WILLIAM HENDRICKS.
JAMES NOBLE.
WALLER TAYLOR.
R. C. ANDERSON, JR.
L. BARBER.

No. 46.

JANUARY 5, 1819.

SIR: The people of Illinois, and particularly that portion of them within the district of public lands sold at Shawneetown, are very much alarmed, and I think in great danger of losing their lands, unless there be some change of instructions to the Receiver, authorizing him to take in payment for lands the notes of other banks than those now taken. The only notes now receivable at Shawneetown, for debts due the United States on account of lands, are the notes of the United States Bank and the State Bank of Kentucky; or if other notes are allowed to be received there they are the notes of such banks as have no paper circulating in that country. And I am well assured, from my own knowledge and the letters of respectable gentlemen in that part of the country, that if every note that will be received in payment for land, and every dollar in specie that is in the country were in the hands of those indebted to the Government for land, that it would be insufficient to enable more than one-tenth man of our settlers to comply with his engagement. I almost daily receive letters from the people of the Shawneetown land district, and of that part of Illinois included in the Vincennes district, stating that they are in a situation truly distressing, and that, unless there be some amelioration in the direction to the Receivers, the time is but very short until they expect to see the little farm and dwelling they have provided for the support and shelter of themselves and family torn from them by the merciless, avaricious speculator.

I am sorry to be constrained to say that their apprehensions are but too justly predicated, and that they represent facts. From the best information I have upon the subject, the evil would be in a great

degree averted if the same latitude to receive bank paper were given to the Receivers at Shawneetown and Vincennes as is given to the Receivers at Kaskaskia and Edwardsville. There they take North Carolina, Georgia, and Tennessee State Bank notes. In the paper of these banks consists, by far, the greatest part of the circulating medium of our country. The receipt of these notes at the other offices is an acknowledgment of their goodness; and it is looked upon as extremely oppressive, by those who owe the Government, that they are obliged to let their farms be forfeited when they have of this kind of money enough to pay their debt. I hope what relief is possible, and in your power, will not be withheld.

Your most obedient servant,

J. M'LEAN.

18TH CONGRESS.] **No. 710.** [1ST SESSION.

OPERATIONS OF THE MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 21, 1824.

TREASURY DEPARTMENT, *May* 21, 1824.

The Secretary of the Treasury has the honor to transmit herewith three statements, marked A, B, C, which have been prepared by the Comptroller, pursuant to the 7th section of an act of Congress passed on the 2d of April, 1792, entitled "An act establishing a Mint and regulating the coins of the United States."

They contain all the information relative to the transactions of the Mint which the settlements made at the Treasury afford.

Hon. SPEAKER *of the House of Representatives.*

A.

Statement exhibiting the balance of the gold and silver bullion remaining in the hands of the officers of the Mint on the 31*st December*, 1822; *the amount deposited from* 1*st January to* 31*st December*, 1823; *the different species of coins made and paid on account of deposits; allowances for wastage; and the balance remaining in the hands of the officers of the Mint on the* 31*st December*, 1823, *to be accounted for on a future settlement, viz:*

Summary statement exhibiting the value of coins made at the Mint; the amount of disbursements on account of the establishment; the amount allowed for wastage; the amount retained of deposits; and the amount gained on the coinage of copper, from the commencement of the institution to the 31st *December, viz:*

Value of gold, silver, and copper coinage up to the 31st December, 1822			$20,809,125 71
Gold coins made from 1st January to 31st December, 1823, per account A		$872,425 00	
Silver coins made from 1st January to 31st December, 1823, per account A		895,560 00	
Copper coins made from 1st January to 31st December, 1823, per account B		12,250 00	
			980,225 00
Total value gold, silver, and copper			21,789,350 71
Net charge on the coinage of gold, silver, and copper, to the 31st December, 1822		517,217 88	
Add amount gained on the coinage of copper to the same period		112,433 26	
		629,651 14	
From which deduct amount wastage on gold and silver to 31st December, 1822	$75,931 38		
Also amount wastage from 1st January to 31st December, 1823	3,244 19		
		79,175 57	
			550,475 57
Add amount disbursed on account of the establishment from 1st January to 31st December, 1823			21,281 44
Add also the amount wastage on gold and silver to 31st December, 1823		79,175 57	
From the above deduct the amount retained from deposits to 31st December, 1822	$9,937 04		
Also this sum, from 1st January to 31st December, 1823	1,374 43		
		11,311 47	
			67,864 10
			639,621 11
Deduct amount gained on the coinage of copper from the commencement of the institution to 31st December, 1823			112,438 26
Net amount chargeable to the coinage of gold, silver, and copper, from the commencement of the institution to 31st December, 1823, including the costs of lots, buildings, and machinery			527,182 85

Comptroller's Office, 19th *May*, 1824.

LUND WASHINGTON, *Clerk.*

18TH CONGRESS.] No. 711. [1ST SESSION.

REPORT OF COMMITTEE ON NINIAN EDWARDS' CHARGES OF FINANCIAL MISMANAGEMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 25, 1824.

Mr. LIVINGSTON, from the Select Committee to whom was referred the memorial or address of Ninian Edwards, reported:

That immediately on their appointment, as the House has been already informed, they communicated a copy of this address to the Secretary of the Treasury, and they also ordered the attendance of Mr. Edwards, to be examined before them as a witness, touching the various charges in the memorial. For although in that address he refers to papers and documents accessible to the committee without his presence, as the main supports of his charges, yet the committee were of opinion that these charges were not such as should be either lightly made or superficially examined; and that it ought not to content itself with any investigation short of one in which the accuser should have an opportunity of being personally present, the better to sustain the charges, if they were capable of being sustained, or to bear the proper responsibility if, failing to sustain them, he should appear to have brought them forward, in a form thus positive and imposing, from personal and improper motives or upon frivolous pretexts. And the committee is still of opinion that this investigation ought not to be finally closed without the personal examination of Mr. Edwards; and in proceeding to make any report on the subject at the present time, and before such an examination is had, the committee acts only from the necessity imposed upon it by the approaching close of the session, and by a sense of duty which dictates that it ought not to postpone to a distant day all communication to the House on a subject so interesting to the Government, and so nearly affecting the honor and integrity of one of its highest officers.

Under the influence of these motives the committee makes this report as the result of its examination of the papers referred to in the address, and such other proofs as the committee could command. Whatsoever is here said, therefore, must be received with the qualification that, although the committee do not know that Mr. Edwards, if present, could communicate any fact likely to be important, they do not know, on the other hand, that he might not do so; and he has had no opportunity to be examined or to give any reply to the answer of the Secretary, which the committee has received, and which has already been printed by order of the House.

The address contains two general charges against the Secretary: one of mismanaging the public funds, under which various illegal transactions are alleged in reference to the deposit of the public moneys in certain banks, and the mode in which such moneys were allowed afterwards to be repaid; the other imputing to the Secretary the suppression of papers and documents, or failing to communicate them when they ought to have been communicated in answer to resolutions of the houses of Congress.

The committee has given its attention to each of these divisions of charge.

And first, as to the conduct of the Treasury Department in regard to the deposits of the public moneys in the banks, and the manner in which such banks were allowed to repay to the Treasury the balances of such deposits:

By the resolution of Congress of April 30, 1816, it is declared "that the Secretary of the Treasury be, and he hereby is, required and directed to adopt such measures as he may deem necessary to cause, as soon as may be, all duties, taxes, debts, or sums of money, accruing or becoming payable to the United States, to be collected and paid in the legal currency of the United States, or Treasury notes, or notes of the Bank of the United States, as by law provided and declared, or in the notes of banks which are payable, and paid, on demand, in the said legal currency of the United States; and that from and after the 20th day of February next no such duties, taxes, debts, or sums of money accruing or becoming payable to the United States as aforesaid, ought to be collected or received otherwise than in the legal currency of the United States, or Treasury notes, or notes of the Bank of the United States, or in notes of banks which are payable and paid, on demand, in the said legal currency of the United States."

At the time of the adoption of this resolution, debts accruing to the United States, whether on account of the sales of public lands, or at the custom-house, or from other sources of revenue, were in fact received, in some parts of the country, but evidently in disregard of the law, in the notes of the State banks which did not redeem their paper by cash payments. By this resolution it was obviously made the duty of the Treasury to correct that departure from law as soon as practicable; and it was, as is equally obvious, imperative on the Department after the 20th February, 1817, to allow nothing to be received in payment of debts due to the United States but the legal money of the United States, Treasury notes, notes of the Bank of the United States, or of those State banks the notes of which were payable and paid on demand in cash.

The Bank of the United States was incorporated in April, 1816, and went into operation at the commencement of the next year. By the act of incorporation it is provided and declared "that the deposits of the money of the United States, in places in which the said bank and branches thereof may be established, shall be made in said bank and the branches thereof, unless the Secretary of the Treasury shall, at any time, otherwise order and direct; in which case the Secretary of the Treasury shall immediately lay before Congress, if in session, and if not, immediately after the commencement of the next session, the reasons of such order or direction."

The present Secretary of the Treasury was appointed to that office in October, 1816.

In the early part of the year 1817 it is represented by the Secretary, and appears to be true, that an arrangement was made with the Bank of the United States by which the public funds were to be deposited in the branches of that institution in all places where such branches existed; and where there were no such branches, that bank was to designate certain State banks for which it would be responsible, and in which such public moneys should be deposited; and notes of all banks which the Bank of the United States would receive in deposit as cash, and none other, were to be received on sales of the public lands.

It is further represented, that in the execution of this arrangement difficulties and controversies arose between the Bank of the United States and the State banks thus employed in receiving the deposits of

the public moneys, and, ere long, the Bank of the United States signified to the Department of the Treasury that it could not continue such arrangement, and that thenceforward it could receive nothing in deposit, as cash, but the legal currency of the country or its own notes. The agreement with the Bank of the United States terminated, for these reasons, on the 30th of June, 1818.

It would appear that many of the State banks which had, in 1817, resumed specie payments, soon after this period, that is to say in the latter part of 1818, discontinued such payments, and that the debt due to the United States, on account of the sales of public land, had very greatly increased, amounting, in the early part of 1819, to not less than $18,000,000, The public expenditure in the western States was not such as to require, within those States, the disbursement of the money received on account of this debt, but much the larger part was to be remitted either to the seat of Government or to other places in the Atlantic States.

About this period, also, the Bank of the United States issued orders prohibiting its western branches from issuing any of their own notes for circulation, even in exchange for, or on deposit of, specie.

Under these circumstances the Secretary of the Treasury appears to have entered into arrangements with some of the local or State banks, generally those which had acted as agents of the Bank of the United States, for the purpose of employing them as depositories of the public money, and in the transfer of such money, when required, to places where it might be wanted in the course of Government disbursements.

Among the earliest of these was that proposed to the Bank of Missouri, by letters from the Secretary of the 1st and the 11th of July, 1818, immediately after the termination of the agreement before mentioned with the Bank of the United States; which letters, indeed, have the form of circulars to all the banks in which the public moneys were at that time deposited, that is to say, the banks which have been employed by the Bank of the United States, during the continuance of its arrangement before mentioned with the Treasury. The Bank of Missouri was one of these. It was now informed that, since that agreement had come to an end on the 30th of June, all sums deposited in the Bank of Missouri after that time must be subject to the drafts of the Treasury, and would be drawn for, as occasion should require, in the following manner, viz: If in favor of individuals, drafts to be paid at sight; if in favor of the Bank of the United States, in sixty days; drafts of the latter description to be so made that the money should be drawn out gradually and not *en masse*. The reason of this distinction between drafts to individuals and drafts to the Bank of the United States appears to be that drafts in favor of individuals, being probably intended for funds to be expended in the neighborhood of the bank, would be ordinarily paid in the notes of the bank itself, or other similar paper; but those in favor of the Bank of the United States would be such as required payment in specie or in United States Bank bills, or transfers of credit to its branches, operations which might reasonably require time. On the 1st of August the Bank of Missouri signified its acceptance of the conditions of this proposition.

On the 21st of December, 1818, the Secretary, by letter addressed to the President of the Bank of Edwardsville, signified his disposition to employ that bank also in receiving the deposits of the public moneys, and on the 1st of February following that bank assented to the terms. A similar arrangement was made, nearly at the same time, with the Bank of Illinois, the Bank of Huntsville, and the Tombeckbe Bank.

Shortly after the date of these transactions, however, a more general system of employing State banks, for the purposes before mentioned, was adopted, and conditions more precise, and which were thought more favorable to the banks, were proposed. The leading feature in this new proposition was, that as an inducement to undertake the engagement, it was agreed, on the part of the Treasury, to allow to the bank a permanent deposit of a stipulated sum, not liable to be drawn out or diminished, except in a specified case. The use of this deposit was to be the equivalent for the responsibility of receiving and keeping the funds and the expense of transferring them, without further charge on the Treasury, to such places as might be agreed on or required.

Arrangements of this nature were made with the Bank of Steubenville, Bank of Chilicothe, Franklin Bank of Columbus, Farmers and Mechanics' Bank of Indiana, Bank of Illinois at Shawneetown, Branch Bank of Kentucky at Louisville, Bank of Tombeckbe at St. Stephens, Planters and Merchants' Bank of Huntsville, Bank of Missouri, Bank of Vincennes, Bank of Edwardsville, and Farmers and Mechanics' Bank of Cincinnati.

The terms, in general, agreed to between the Treasury and these several banks were, in substance:

1. That the bank should receive in deposit, to the credit of the Treasury, as cash, from the Receivers of Public Moneys, all current notes of such banks as maintain cash payments; with power, however, to discontinue to receive the notes of any particular bank on giving seasonable notice of such intention to the Receiver.

2. That the bank should pay at sight all drafts from the Treasury, and should also transfer, on request, all sums on hand beyond the amount of the stipulated permanent deposit to the Bank of the United States or certain enumerated branches of that bank; and that a fixed sum should remain in the bank, as before mentioned, as a permanent deposit, to be transferred, however, to the Bank of the United States in six months after the termination of the agreement.

3. That if the money were wanted for disbursement in the neighborhood of the banks, it might be drawn for, at sight, notwithstanding such drafts might reduce the permanent deposit below the stipulated sum.

The amount of this permanent deposit was to be increased if it should appear that the bank should receive and transfer such large sums as that the expense thereof should not be considered as compensated by the benefit of the deposit which had been stipulated. It was also prescribed that the bank should render to the Secretary of the Treasury and to the Treasurer duplicate monthly returns of its accounts with the Treasurer; and to the Secretary confidential monthly returns of the state of its own affairs; showing, also, the credits of all public officers in the bank; and, also, quarterly lists, or returns, of all its debtors; to the end that the Secretary of the Treasury might determine on the propriety of continuing the public deposit in such bank.

Such was the general nature of the arrangements as they were adopted and entered into with the banks. There were, however, variations in some other particulars. In the bank of Steubenville, for instance, the public money in the bank, or due from it at the time of the arrangement, was declared not to fall within the arrangement; in other instances nothing is said of such balances; and in others, again, it was declared that they should be embraced by the agreement.

The following table shows the amount of the permanent deposit allowed to each bank, respectively, as the equivalent for the services rendered, or expected to be rendered, by it to the Treasury:

Bank of Steubenville	$50,000
Bank of Chilicothe	100,000
Franklin Bank of Columbus	20,000
Farmers and Mechanics' Bank of Indiana	40,000
Bank of Illinois at Shawneetown	50,000
Branch Bank of Kentucky at Louisville	100,000
Bank of Tombeckbe at St. Stephen's	100,000
Planters and Merchants' Bank of Huntsville	75,000
Bank of Missouri	150,000
Bank of Vincennes	75,000
Bank of Edwardsville	40,000
Farmers and Mechanics' Bank of Cincinnati	100,000

The amount of these permanent deposits is nine hundred thousand dollars, the interest on which sum, at six per cent., would be fifty-four thousand dollars.

It is alleged in the memorial that this sum of fifty-four thousand dollars was thus annually paid for receiving and transmitting the public money; a service which, it is said, the Bank of the United States was bound to perform without any compensation. The committee does not see the ground of this obligation on the Bank of the United States. That institution is, indeed, bound to give necessary facilities for transferring the public funds from place to place, but this can only mean *cash* funds; and it is bound, also, to receive money in deposit for the United States; but it is not bound to receive in deposit as cash the bills of any banks whatever but its own, although they may come within the provisions of the resolution of 1816. The committee does not perceive anything in the principle of these arrangements with the banks either in violation of law or contrary to the usage of the Government, since the Treasury has for many years had agreements with more or less of the banks, by which the public moneys were deposited in such banks, and drawn from them when wanted; certain terms and conditions, as to the mode of drawing, being stipulated, such as were thought beneficial both to the Treasury and the banks. Indeed, it may be proper to observe here that it seems to have been assumed by different officers at the head of the Treasury Department that it was their duty to direct its operations to the support of different moneyed institutions whenever their affairs required support, so as to defeat combinations against them and preserve an equilibrium of credit among them. And the practice appears to have been in conformity with this principle from a very early day. That benefit may occasionally result and has resulted from such operations is evident; but this is no legal employment of public funds. It is nothing but a gratuitous loan. The existence of the practice, however, as well as the avowal of the principle by different officers at the head of the Treasury, will be found by referring to a letter from the Secretary of the Treasury to the President of the Senate, of the 25th February, 1823, in answer to a resolution of that body. Such, however, was not either the object or the character of the agreements with the State banks, which are the subjects of this examination.

On the 1st of August, 1820, the Treasury issued circular instructions to the Receivers of Public Moneys, authorizing them to receive, in addition to specie and bills of the Bank of the United States and its branches, notes of the incorporated banks in Boston, New York, Philadelphia, Baltimore, and Richmond, and in the States of South Carolina and Georgia, (except the City Bank of Baltimore,) and of those specie-paying banks in the State in which the Land Office is situated. "This instruction," it is added, "supersedes those which have heretofore been given on the subject, except in so far as they prohibit the receipt of the paper of any bank which does not discharge its notes on demand in specie, and that prohibitiom must in every case be rigidly adhered to."

Among the banks with which these negotiations were made, the attention of the committee was called particularly to the Farmers and Mechanics' Bank of Cincinnati, the Bank of Chilicothe, and the branch of the State Bank of Kentucky, at Louisville, as forming the subject of a charge that does not apply to the others. In the several places where these banks were situated the Bank of the United States had offices of discount and deposit, and the law incorporating that institution, as has been before observed, creates an obligation on the Treasury of the United States to use them as places of deposit in preference to any other banks, unless the Secretary shall, for special reasons, otherwise direct; and in that case such reasons shall be laid before Congress at its then or next session. The charge is, that no such communication was made to Congress. This omission is acknowledged by the Secretary, who says it was owing to inadvertence, and that the inattention to the provision of the law was unimportant, inasmuch as the provision was intended obviously for the benefit of the bank, and the bank had full notice. The notoriety of the fact is also relied on to show that no improper conduct or desire to conceal it produced the omission.

The committee sees no reason to doubt this statement, or to attribute any improper motive to the Secretary in this inattention to the directions of the act.

The charges relative to the Bank of Missouri are, in substance:

That this bank was unworthy of credit at the time the deposits of public moneys were suffered to accumulate in it to a large and an improper amount;

That the permanent deposit allowed it was illegal and unreasonably large;

That those returns and statements of its affairs which the Secretary had himself considered essential were not exacted;

And finally, that in payment of its debt a large amount of uncurrent notes was received, some of them not worth twenty-five cents on the dollar, contrary to the positive injunctions of the resolution of 1816.

The committee thinks it very probable that the Bank of Missouri did make an improper, perhaps an excessive, issue of its paper, although the mode adopted in the address of estimating that excess appears not altogether correct, as it omits to mention the permanent deposit of the government in calculating the fund on which the omission might be made. If the capital of the bank were, as is stated, $210,000, and its permanent deposit from Government $150,000, supposing it to have no other deposits, a discount to the extent of $430,000 would not have been alarmingly excessive, supposing the loans to have been limited to safe hands and that punctuality of payment might have been expected. It is probable that a failure in this latter respect was the immediate cause of the bank suspending its payments.

The sum of $726,000, which appears at one time to have been in this bank, was certainly a very large sum to have been suffered to remain in a country bank; but whether it was a greater accumulation than

ought to have been allowed is a question that depends on many considerations, chiefly on that of the solidity of the institution, which itself again depended on the solvency of its debtors. Of this the committee has no other evidence than that arising from the report of the committee of the Legislature of Missouri, appointed to examine the affairs of the bank, who declare that the debts due on personal security, as well as those secured by mortgage, are safe. If this were well founded, the bank, even at the time it stopped payment, had in those two items more than enough to pay all it owed.

What information to put the Secretary on his guard would have been derived from the monthly returns the committee cannot determine. They appear to have been furnished only up to February 1, 1820. Nor has the committee observed any demand made by the Secretary for a compliance with this stipulation at any time between that date and the time the bank stopped payment. Whether, however, if it had been demanded and complied with any different result favorable to the United States would have been produced it seems impossible to determine, because, judging from the last and most unfavorable return made, immediately previous to the stoppage of the bank, nothing in those returns would have appeared to indicate any danger.

A more important part of the charge is, that the Secretary received from this bank, in part payment of its debt, a large amount of uncurrent notes contrary to law.

By the first arrangement made with the bank which has been already stated, it was not responsible, as far as the committee can perceive, for the solvency of the banks the notes of which might have been deposited in it by the public Receivers. When the new contract was made in August, 1819, it did not form any part of that contract, as it did with some of those of the other banks, that the bills already on hand should be at once passed to the credit of the Treasury as cash, as may be seen by a copy of the contract annexed to this report, marked B. So that the important question is, whether those notes were received before or after August 9, 1819, the day on which the bank assented to the new contract. If before, then they were received on account and at the risk of the government; if after, at the risk of the bank.

The committee think there were sufficient reasons to justify the Secretary in believing them to have been received before the 9th of August, because by the letter of the bank of that date it appears that a much larger sum in notes essentially of the same description was in possession of the bank; and an offer is therein made to transfer them to various other banks, to the order of the Treasury. And by the statement marked E, annexed to the address of Mr. Edwards, it appears that as early as September 6, 1819, a much larger sum, in notes of the description of those thus offered by the bank, had actually been received on account of the Treasury from the several Receivers, and were then on hand. On this point the committee also refer to the deposition of Thomas F. Riddick, hereunto annexed, marked F.

The committee think it proper to add, that of the whole sum received by the Treasury in these notes from the Bank of Missouri, a sum of about $20,000 only appears to be unpaid; and of this sum it is stated by the Treasury there are hopes that a considerable part will be secured.

A very large part of the address is occupied with observations on the transactions between the Treasury and the Bank of Edwardsville. This bank was made a depository of public money, at the solicitation of Mr. Edwards himself, in December, 1818. It stopped payment in September, 1821, owing at that time a balance to Government of $46,202 43.

It is not deemed necessary here to repeat all that is said on that subject in the address and the answer. The address, in this part of it, seems to have two objects: one, to clear Mr. Edwards himself from any imputation on account of having procured the public deposits to be made in the bank originally, and to repel the supposition that he had been the means of continuing them after they became unsafe; the other, to charge the Secretary with continuing the deposits after he ought to have been alarmed for their safety, and with receiving uncurrent notes from the bank against law; and also with the negligent omission of proper means to collect the debt due from it to Government.

It appears to be for this double purpose that the address alleges that in 1819 its author made a publication, announcing his intention to withdraw from the bank in which he had been a Director, and no longer to be considered responsible for its engagements; which publication, as is alleged, was transmitted to the Secretary; that he also advised the Receiver of Public Moneys to withhold the deposits from the bank until he should receive further orders from the Treasury; that the Receiver thereupon wrote to the Treasury, enclosing Mr. Edwards' publication, and, as he afterwards declared, received a letter from the Secretary directing him to continue the deposits. The Secretary has said that no such letter from the Receiver was on file in the Department, and that none of its officers had any recollection of such letter; and moreover, that there was no record of any answer. The address, notwithstanding this declaration, aims to prove that such letter was written; and among other arguments adduces the fact that there was about this time an actual suspension of deposits at the bank, which the address attributes to the caution of the Receiver, under the advice which had been given to him. To this it is answered by the Secretary, that this suspension was owing to the negligence, not the caution, of the Receiver; that the Receiver was directed frequently and repeatedly to continue his deposits, and to make them regularly and punctually; danger then being apprehended, not from the bank, but from the continuance of large sums in the hands of the Receiver.

Without entering into a detail of all the facts connected with this subject, it seems to the committee that there is no doubt that Mr. Edwards did make a publication* in the newspapers in 1819, as he represents, and that he gave such advice as he represents to the Receiver. But there is no evidence that the Receiver communicated it, or wrote on the subject of it, to the Secretary. Indeed, it is not very probable he would have done so. It is to be remembered that he was President of the bank as well as Receiver of Public Moneys, and he would hardly advise the Secretary that he, as Receiver, could not repose confidence in the bank the President and head of which he was. The committee does not deem it at all material to inquire whether the Secretary received or saw a copy of Mr. Edwards' publication. There is nothing in that communication which should have alarmed him for the safety of the public money in the Edwardsville Bank; for, although Mr. Edwards announces his intention of withdrawing from a participation in the direction of it, he speaks in most decided terms of its solvency and safety. While the committee sees no reason to believe that Mr. Edwards acted with any impropriety in procuring the deposit of the public money in that bank, or in regard to the continuance of such deposit, it perceives, on the other hand, no reason whatever for supposing that the Secretary continued the deposit after being admonished by the Receiver that they were unsafe. On the contrary, the committee thinks the correspondence fully shows that the deposits were omitted, or thought to be so, through negligence and default; and that in enforcing and insisting on them the Secretary was governed by a proper regard for the

* See paper C, annexed.

security of the public funds. The committee, however, would take this occasion to observe, that in their opinion the appointment of the Presidents of the local banks, in which public moneys are deposited, to be Receivers of the Public Moneys, to be deposited in the same bank, is injudicious; that it has happened in several cases; and that inconvenience or mischief may be not unlikely to result from such a practice.

As to the charge of receiving uncurrent notes from this bank also, contrary to law, the committee thinks that the construction which appears to have been contended for by the bank, and acquiesced in by the Secretary, of the first article of the arrangement between them, is not the true construction, especially if nothing be regarded but the terms of the contract. The words of the first article are: "That the public moneys shall be entered to the credit of the Treasurer as cash." It would seem impossible that these terms could mean anything else than that, for the amount of these deposits, the bank should become directly debtor to the United States, and that this debt, thus assumed, should, like others, be legally paid. If this construction which the committee has given to the contract be correct, these notes were illegally received.

The Secretary's view of the case appears, however, to have been different. He says the term "cash" was used in opposition to the term "*special deposit*," and was not intended to subject the bank to the payment of specie for notes which were not convertible into specie; and that it was not understood by either of the parties that the bank was responsible for the credit of other banks whose notes were deposited in it. The correspondence sufficiently shows that the bank expressed the same opinion at an early period of the connexion, and long before this case arose. The construction insisted upon was, in effect, that the bank was to receive such bills as the Receivers had lawfully taken and wished to deposit; and, as these would be of different banks more or less remote, the bank should, for the compensation which it received, be at the expense of collecting them, so that the proceeds might be transferred, without further expense or trouble on the part of the Government, to the order of the Treasury; but that, nevertheless, if any such bills became discredited while in this process of collection, by the failure of the bank which issued them, the loss should fall on the Government.

Although the committee do not agree to the correctness of this construction, yet they see no reason to doubt that the Secretary may have honestly supposed that the banks entered into the arrangement with this understanding of its meaning, nor any ground to believe his conduct, in this respect, to have been governed by any improper motive. It ought to be added that the Secretary states that one reason for receiving these bills from the Edwardsville Bank was, that he had at that time some reason to apprehend a want of punctuality or good faith on the part of that bank itself.

The case of the Bank of Tombeckbe, as it is explained in the Secretary's answer, does not call for any particular observations. It is not unlike that of Edwardsville, except that in the former case no loss appears to have occurred. The loss in the case of the Bank of Edwardsville, arising from the receipt of uncurrent notes, will be twenty thousand dollars, unless it should turn out, as the Secretary says he is assured it will, that the notes will yet be paid.

The committee has requested of the Department to be informed of the present amount due to the United States from the following banks, to wit: The Branch Bank of Kentucky, at Louisville; the Huntsville Bank; the Bank of Missouri; the Bank of Vincennes; the Bank of Edwardsville, and the Farmers and Mechanics' Bank of Cincinnati; and of the present circumstances of those banks; and whether there be reason to apprehend loss from any other bank in which the public money is deposited.

In answer to this request the Secretary has communicated a statement of the Treasurer, giving the information required, which accompanies this report, marked D.

By this it would appear that the balance now due the Government from these banks is four hundred and forty thousand eight hundred and twenty dollars and sixty-three cents.

The committee has no particular information of the measures which have been adopted to enforce the collection of these balances. In regard to some of them, as has already appeared, the Secretary expresses a confident hope of ultimate payment; a great portion of the amount, however, may be considered as lost.

The amount of money collected on account of internal taxes and from the sales of the public lands, mostly the latter, since 1816, is stated by the Secretary at twenty-one millions of dollars. If of this sum half a million should be lost by means of the failure of the banks which have stopped payment, the loss would be less than two and a half per cent. on the whole sum.

Considering the great and violent shock which credit of all kinds has sustained within this period in the western States, and comparing this amount of loss, if it should eventually happen, with that of the Bank of the United States, of other banks, and of individuals, arising in the same part of the country from similar causes, the committee is of opinion that the result does not show, in the Treasury Department, any want either of fidelity or prudence in the management of the public funds.

The other division of the charge contained in the address relates to the alleged suppression or withholding of papers called for by different resolutions of the houses of Congress.

One specification under this head is that relating to the correspondence between the Secretary and Mr. Stephenson, the President of the Edwardsville Bank. The opinion of the committee on that subject has been already given, and need not be repeated.

Another relates to the correspondence with the several western banks generally. The charge is, that material parts of it were retained when called for by the House.

The first call was made on the 9th of January, 1822, and was, as the committee think, limited in its proper construction to a requisition for the correspondence relative to the contracts for making deposits. In this way the Secretary says he understood it; but that he did, nevertheless, transmit letters not directly embraced by the resolution, but which he thought were necessary to elucidate the subject.

The next resolution was on the 12th of March in the same year, and the only correspondence it called for was that with the Missouri Bank; and there is no reason to believe that this was not substantially complied with.

A third call was made in the same year, on the 8th of May, requiring the correspondence with all the banks that had not before been communicated.

The committee have not been able to discover in the very voluminous return to this last resolution any material letters not before communicated, except a circular instruction to the western banks, directing them to note on the back of each return of the Treasurer's account a description of the moneys credited in such return, and the amount of each, according to a form of return therein given. This form is the same with that in which the return referred to in Mr. Edwards' address, marked E, is made out. This circumstance would seem to give a greater weight to the evidence to be drawn from that paper, considering it as an official document intended for the Treasury, under the agreement.

Another charge of suppression incidentally made, but which the committee deem it proper to notice, relates to a report made by the Secretary in obedience to a resolution of the House of December 31, 1819, calling for such information as he possessed in relation to the introduction of slaves into the United States. On this point the committee addressed an inquiry to the Secretary, and received from him the answer annexed to this report, marked E.

Although they are of opinion that there were papers in the Department containing information called for by the resolution, and which ought to have been communicated, yet, judging from the statement made by the Secretary in his answer, connected with the fact that the papers in question were communicated to the Attorney General, it is the opinion of the committee that the omission was not caused by a design to screen the person implicated from punishment or blame.

As to the other cases in which the Secretary is charged in the address with having suppressed or withheld papers or information called for by the houses of Congress, the committee is of opinion that, although papers coming within the scope of the resolution or call were not in some instances communicated, such omissions were either the result of accident or of a belief on the part of the Secretary, or of the persons necessarily employed by him on such occasions, that the papers so omitted were not called for or were not material; and the committee have seen no evidence that any documents or information has been withheld from the House from the operation of any improper motive or design.

Referring to what has been said in the introduction to this report, and repeating that Mr. Edwards has not had an opportunity of supporting his charges by his presence and testimony, the result of the facts which have appeared to the committee thus far in this investigation, and of their deductions from them when applied to the recapitulation of charges, as stated at the end of the address, is—

First. That the evidence referred to and examined does not support the charge of having mismanaged the public funds.

Second. That the uncurrent notes mentioned in the second charge appear, by evidence satisfactory to the committee, to have been received and deposited by the Public Receivers at a time when they were receivable under the resolution of Congress of 1816; that in the principal case—that of the Bank of Missouri—the bank did not make itself responsible for such notes as cash, and therefore the Secretary was bound to receive them from the bank; that, although the banks of Tombeckbe and Edwardsville were liable to account for such deposits as cash, if the construction which the committee give to their contracts be correct, yet, that both the Secretary and the banks expressed a different opinion as to the meaning of those contracts; and that the Secretary, in receiving fifteen thousand dollars from the one and twenty thousand dollars from the other of those banks, appears to have acted according to what he supposed to be the rights of the parties, and with a proper regard to the interest of the United States under the circumstances which then existed.

Third. That no intentional misstatement has been made to the House of the amount of uncurrent bills received from the banks, although a sum of two hundred and eighty dollars of such bills was omitted through mistake.

Fourth. That although the Secretary may have misconstrued the effect of some of the contracts with the banks to the extent before mentioned, the committee find no grounds for the charge that he has misrepresented them, inasmuch as the contracts themselves were submitted with his report to the House.

Fifth. That the Secretary did omit to communicate to Congress the reasons which led him to direct the deposit of public moneys in the three local banks of Chilicothe, Cincinnati, and Louisville, where the Bank of the United States had branches; but there is no reason for supposing that any concealment was intended, or that the omission was occasioned by design.

Sixth. That in some instances papers called for by resolutions of the House have not been communicated with other papers sent in answer to such calls, but that these omissions have happened either from accident or from a belief that the papers so omitted were immaterial or not called for, and that there is no evidence that any document or information has been withheld from improper motives.

Having already expressed the opinion that this investigation ought not to be terminated until the person preferring the charges shall have been examined, and regretting the circumstances which render such an examination impracticable during the present session of Congress, and thinking that Mr. Edwards may be expected at Washington within a few days, the committee feel it their duty to recommend to the House that they be required to sit after the adjournment for the purpose of taking his examination if an opportunity shall be presented.

B.

Conditions proposed by the Secretary of the Treasury to the Bank of Missouri for the future employment of that bank as a depository of public money.

1. The bank will receive from the Receivers of Public Moneys, and others having moneys to deposit on account of the Treasurer, the paper of such banks as pay their notes in specie on demand, or are otherwise in good credit, and whose paper is in circulation in its vicinity, (a list of which banks will be furnished by it to the Secretary of the Treasury,) and will credit the same to the Treasurer of the United States as cash. The bank may, however, discontinue to receive the paper of any of the said banks; but in such case, it will give immediate notice thereof to such Receivers and others who usually deposit public money in it; and the notes of any such banks which may have been received by them before such notice shall nevertheless be taken and credited by the Bank of Missouri as cash.

2. The bank shall pay, at sight, all drafts which the Treasurer of the United States may draw on it; and it shall, from time to time, transfer to the Bank of the United States or its branches at New York, Philadelphia, Baltimore, Washington, or New Orleans, in such moneys as will be received by them as cash, the excess of public money remaining on deposit, after such drafts are paid, over and above the sum of $150,000; which sum of $150,000 shall remain on deposit in the Bank of Missouri during the continuance of this arrangement, and shall be transferred in like manner by the bank within six months after it shall cease to be employed to receive the public moneys. It is agreed, however, that, if the amount received by the bank shall be so large as that the expense of remittance shall exceed the benefit of the deposit, the sum which is to remain on deposit in the bank shall be proportionably increased.

3. The bank shall render to the Secretary of the Treasury, and to the Treasurer of the United States, duplicate weekly returns of its account with the Treasurer, and shall also render to the Secretary of the Treasury monthly returns of the state of its affairs, which latter returns shall be considered confidential, and will, in no case, be made public, they being intended solely to aid the Secretary of the Treasury in determining on the propriety of continuing or discontinuing the arrangement with the bank.

4. It is understood that, if the moneys deposited in the Bank of Missouri under this arrangement can be disbursed at the bank, the drafts of the Treasurer shall be paid at sight, notwithstanding such payments may reduce the deposit below the sum of one hundred and fifty thousand dollars.

I have the honor to be your most obedient servant,

WM. H. CRAWFORD.

TREASURY DEPARTMENT, *June*, 1819.

Original made part of the answer of the bank in a suit instituted by the United States against it, and filed with said answer in the Clerk's office.

I certify that the foregoing, with the exception of the memorandum, is a copy from the original conditions proposed by the Secretary of the Treasury to the Bank of Missouri, for the future employment of that bank as a depository of public moneys.

THOS. F. RIDDICK, *President Bank Missouri.*

Sworn and subscribed before me, May 24, 1824.

DANIEL RAPINE, *Justice of the Peace.*

C.

WASHINGTON, *May* 24, 1824.

SIR: I have received your note of this day's date, and now enclose you a copy of the publication of Mr. Edwards, made in 1819, in reference to the Bank of Edwardsville, in the Edwardsville Spectator and St. Louis Enquirer, and from the former copied in the Illinois Gazette, published at Shawneetown, and from which last mentioned paper the enclosed is taken.

I have the honor to be, very respectfully, your obedient servant,

DANIEL P. COOK.

HON. JOHN FLOYD.

[From the Edwardsville Spectator.]

To the Editors of the St. Louis Enquirer:

GENTLEMEN: The honorable Secretary of the Treasury having, at my particular application, directed certain deposits of public money to be made in the Banks of Shawneetown and Edwardsville, I feel myself called upon, by the repeated publications in your paper against the latter bank, to make the following statements, merely for my own justification, without, however, either wishing or intending to engage in any further controversy upon the subject, unless it should become necessary to support the facts themselves, which I shall state.

Whatever might have been the original intention of those who had been most active in procuring the incorporation of the Bank of Edwardsville, I did sincerely believe, at the time it was about to be put into operation, that it was intended to be conducted with the utmost prudence and honesty; and with that belief I myself subscribed for one hundred shares. I personally knew that $30,000 had been actually and *bona fide* paid upon the stock subscribed; and the election of Directors was a further confirmation to me that nothing like fraud or imposition was contemplated.

The gentlemen chosen as Directors were—

1. COLONEL BENJAMIN STEPHENSON, formerly Delegate in Congress, then and now Receiver of Public Moneys in the Land Office at this place.
2. WILLIAM KINNEY, Esq., a Senator in our State Legislature.
3. ABRAHAM PRICKETT, Esq., a member of our House of Representatives.
4. JOSEPH CONWAY, Esq., Clerk of the Superior Court.
5. DOCTOR JOSEPH BOWERS, a gentleman of the first respectability and highly distinguished for his professional abilities.
6. Mr. ROBERT POGUE, a respectable merchant of this place.
7. T. W. SMITH, Esq., with whom I had no previous acquaintance, but in favor of whose character I have seen the most flattering and pointed testimonials from members of Congress, the Vice President of the United States, and several other gentlemen of the first respectability in the State and city of New York.
8. Major ROBERT LATHAM, whom I had known from infancy to manhood, and against whose honor I had never heard the slightest insinuation; and
9. Myself.

Reposing that confidence in a board composed of those gentlemen, which their individual characters did justify, I felt myself warranted in giving it as my opinion, to the honorable Secretary of the Treasury, that the public deposits could be as safely confided to them as to the Directors of any other institution whatever; and I am happy to say that Mr. Crawford, who has been regularly informed and is intimately acquainted with the general conduct of the Board has had no reason to believe that my confidence was misplaced.

To say nothing of the three last-named Directors, whose residence among us is of more recent date, the five first-named, who in my absence constituted five-eighths of the Board, are generally and well known; and I hazard nothing in stating, that there is not one man of respectability in this State that knows them who

will deny that their characters forbid the belief that they could so far degrade themselves as to become the wicked accomplices or willing instruments of effecting the fraudulent designs that, by its enemies, have been imputed to the bank. The personal interests of the Directors could have afforded no such temptation; for the accommodation that any of them have asked or received has been very moderate; and it is a fact, that the President and several of them have never yet borrowed a cent from the bank.

As to General Payne, who subscribed for a greater amount of stock than any other individual, and who has been so frequently alluded to in the publications against the bank, I can only say, that he has uniformly stated to me that his object in purchasing the stock was to set apart a fund and to obtain facilities for the payment of public lands which he then had purchased and thereafter intended to purchase; and, as far as I am informed, his conduct has corresponded with his professions; for while he has recommended the utmost caution and circumspection in the management of the bank, neither he nor any of his connexions have ever obtained a loan from it.

But, whatever may have been the objects of any one or more gentlemen, it is certain that the bank has been managed with such caution and discretion that I am convinced it could have nothing to fear from a comparison of its situation with that of any other bank in the United States; and so far from "struggling," as you suppose it to be, "in the last agonies of death," I pledge my honor that the amount of specie in its vaults exceeds, by several thousand dollars, twice the amount of its notes in circulation; and that it is able to pay, at a moment's warning, the whole amount it owes the Government; which statement it would be folly for me thus publicly to make if it were not true, because I well know the Secretary of the Treasury possesses the means of detecting and exposing any error which it might contain.

My object, however, in this address is, not to support the future credit of the bank, but merely to show the grounds upon which my recommendation of it was predicated, its present condition, and that the expectations which I authorized have so far been completely fulfilled.

For, notwithstanding I do verily believe that neither the Government nor any individual is in danger of being intentionally imposed upon by the bank, so long as it continues under the control of its present Directors, yet, intending to be absent from the State, and considering the disastrous pressure of the present times, the hostility which the bank has to encounter, and particularly the opposition of gentlemen in this State, high in office, who have been extremely anxious to get other banks into operation with the aid of "foreign capital," as it is termed, I have determined to resign my seat in the Directory, and to withdraw from all future responsibility of any kind whatever, in relation to this or any other bank, without making any further unsupported effort to retain any portion of the public deposits in this State, leaving it to the Directors to maintain their credit by their own good conduct, and to the Secretary of the Treasury to judge for himself, upon the returns he requires, how far it may be prudent to trust them.

I will only add that, in the support which I have heretofore given to the banks of Shawneetown and Edwardsville, I have been wholly uninfluenced by any motives of pecuniary interest, and that I never have applied for or obtained a loan from either; nor am I under any kind of obligations to them.

Very respectfully, I am, gentlemen, your most obedient servant,

NINIAN EDWARDS.

EDWARDSVILLE, *September* 13, 1819.

D.

TREASURY DEPARTMENT, *May* 12, 1824.

In answer to the letter of the honorable Mr. Floyd, Chairman of a Select Committee of the House of Representatives of the 1st instant, the Secretary of the Treasury has the honor to transmit the accompanying statement from the Treasurer, showing the balances at the credit of that officer in the banks mentioned in Mr. Floyd's letter.

By this statement it appears that the Branch Bank of Kentucky at Louisville owes nothing to the Treasury, the debt lately due by that institution having been entirely discharged in August last.

Of the present condition of the other banks mentioned by Mr. Floyd, the Secretary is not sufficiently informed to offer any opinion. As far, however, as relates to the debts due by them, respectively, to the Treasury, he has the honor to state:

1st. That the debt due by the Planters and Merchants' Bank at Huntsville, is considered safe and is in a course of payment, having been reduced since the report made by the Secretary of the Treasury, on the 14th of February, 1822, from $64,044 to $45,167 11.

2d. That the debt due by the Bank of Missouri is also considered safe, having been secured in a manner acknowledged by persons competent to judge on the subject to be satisfactory; and, moreover, that some portion of it is understood to have been already paid to the agent.

3d. That the debt of the Bank of Vincennes was heretofore supposed to have been secured, but that some doubts have since arisen both as to the validity and the value of part of the security, and that, although no correct opinion can now be formed on the subject, there is reason to suppose that a loss will be eventually sustained by the United States. To what extent this may be the case cannot at present be estimated, but measures will be taken to guard the interests of the Treasury as far as practicable.

4th. That the Bank of Edwardsville and the Farmers and Mechanics' Bank of Cincinnati, having failed to make any provision by security or otherwise for the payment of the debts due by them to the United States, suits have been instituted against them. In these cases, also, some loss is expected, though no correct opinion can now be formed as to the extent.

The Secretary has no reason to apprehend loss from any other bank in which the public money is deposited.

Hon. JOHN FLOYD,
Chairman of a Select Committee.

Balances at the credit of the Treasurer of the United States in the following banks, May 3, 1824.

Branch of Kentucky, Louisville, none.	
Planters and Merchants' Bank of Huntsville	$45,167 11
Bank of Missouri	159,955 87
Bank of Vincennes	168,511 64
Bank of Edwardsville	46,973 00
Farmers and Mechanics' Bank of Cincinnati	20,213 01
	440,820 63

The balance was $40,943 88, which was drawn for by bill No. 1846, in August, 1823, and credited to the Branch of the United States Bank at Louisville the same month.

THOMAS T. TUCKER,
Treasurer of the United States.

E.

TREASURY DEPARTMENT, *March* 20, 1824.

The Secretary of the Treasury has had the honor to receive the letter addressed to him on the 12th instant, by the Hon. Mr. Livingston, on behalf of a select committee of the House of Representatives.

As the correspondence with Mr. D. B. Mitchell, to which the committee refers, though relating partly to public transactions, was unofficial, it was not placed on record in the Treasury Department. And on examination it appears that only two of the letters included in it have been preserved. These are Mr. Mitchell's letters of February 19 and April 28, 1818; the former of which has been found on the files of the Department, and the latter among the private papers of the Secretary. They are both transmitted herewith.

To explain the circumstance of public matters being introduced into an unofficial correspondence between two public officers, it is proper to state that Mr. Mitchell, having been Governor of Georgia, and having for many years taken an active part in the public affairs of that State, had long been personally well known to the Secretary; and that during the Secretary's residence at Washington, though his own duties left him but little leisure for private correspondence, Mr. Mitchell had been in the habit of writing to him freely and frequently, introducing into his letters, as may naturally be supposed from the former and actual situation of the parties, a variety of topics, both of a public and local character. It is also to be observed that although Mr. Mitchell, as Indian Agent, was not precluded from any official correspondence with the Secretary of the Treasury, yet, as it was the War Department to which, under the President, he was officially accountable, it was to that Department that his communications in relation to his public duties were properly to be addressed. And it appears by a publication which has been since made by Mr. Mitchell, that on the 3d and 18th of February, 1818, he communicated officially to the Secretary of War the same information, in substance, respecting his conduct in relation to the Africans, as was contained in his private letter of the 19th of February to the Secretary of the Treasury.

An examination of Mr. Mitchell's letters of the 19th of February and 28th of April will show that they were not merely unofficial, but in part, at least, private and confidential. The letter of December 25, 1817, which is the only other letter of Mr. Mitchell required by the committee, is believed to have been of the same character, but in what degree is not now recollected.

Although it was no part of the duty of the Secretary of the Treasury to have taken official cognizance of the subject of Mr. Mitchell's letter of the 25th of December, even if the letter had been official, yet he submitted it to the President, and as the circumstances communicated in it appeared to show a defect in the existing laws on the subject, he submitted it also to a committee of the Senate which had been appointed to inquire into the expediency of making further provisions by law for preventing the introduction of slaves. Whether the letter was returned to the Secretary by that committee, or what disposition was finally made of it, he is now unable to state. He has written, however, to Mr. Roberts, who was chairman of that committee, for such information as he can furnish, and when the answer is received it shall be communicated to the committee.

The additional circumstances disclosed in Mr. Mitchell's letter of the 19th of February induced the Secretary to submit it to the Attorney General, and while it was before him the letter of the Collector of Darien, of the 9th of March, 1818, containing his official report of the seizure of the Africans, was received, and was also submitted to the Attorney General. As the opinion of the Attorney General recommended that the case should be left to the decision of the courts before which it was then supposed to be pending, the Secretary informed Mr. Mitchell of the fact; presuming that, as far as the Secretary was concerned, the affair was then terminated, as, indeed, it soon after was by the delivery of the Africans to the executive authority of Georgia. As this letter was written in answer to unofficial letters, and probably contained allusions to some of the private matters noticed in those letters, it was not made official, and consequently was not placed on the records of the Treasury Department. Copies of unofficial letters are rarely retained by the Secretary, and of this letter none was taken.

The opinion of the Attorney General, however, was filed in the Department, and it appears that with it were filed the papers upon which the opinion was founded, viz: Mr. Mitchell's letter of the 19th of February, and the letter of the Collector of Darien of the 9th of March.

There is reason to believe that it was owing to the circumstance of these papers having been filed with the opinion of the Attorney General that the letter of the Collector of Darien was overlooked when the papers were collected to be transmitted under the resolution of the House of Representatives of the 31st of December, 1819. It will be seen by the endorsements made on the original resolution (which is herewith transmitted) by the Secretary and Mr. Jones, the Chief Clerk of the Department, that the duty of collecting the papers called for by the resolution was assigned by the Secretary to the Chief Clerk,

and was performed by him. And by the interlineation in his handwriting, in the original rough draught of the Secretary's report, under that resolution, (which is herewith transmitted,) it will be seen that the report passed through his hands from the Secretary to the House. From the lapse of time that gentleman is not now able to explain why the Collector's letter of the 9th of March was not transmitted with the other letters; but the probability is that in collecting the papers required his examination was confined to the files of the several Collectors and officers of the customs, without recollecting that this letter of the Collector and Mr. Mitchell's letter of the 19th of February had been put up with the Attorney General's opinion, and placed with it on the file set apart for that officer's communications. The originals of the opinion and of those papers, with the endorsements made on them at the time, are now transmitted in the same state as that in which they were filed; and it is believed that their appearance affords intrinsic evidence that they were so filed.

The papers herewith transmitted include all the correspondence in the possession of the Secretary, or in the Treasury Department, having relation to the subject of the letters required by the committee, not heretofore communicated to the House of Representatives.

It has been insinuated by Mr. Edwards that these letters were withheld by the Secretary, in violation of the resolution of the House of Representatives of the 31st December, 1819, for the purpose of screening Mr. Mitchell. The charge, however, is contradicted by the facts, and particularly by the facts upon which it purports to be founded. The letter of the Collector of Darien of the 14th of March, which was communicated under that resolution, and to which, as well as the other papers communicated by the Secretary on the 11th of January, 1820, the committee is respectfully referred, begins thus: "I had the honor to address you per last mail, and to enclose to you papers respecting forty-seven African negroes, taken by the Surveyor of Darien from one Jared E. Groce, on their way to the Alabama Territory through the Indian nation, and forty-one others at the Creek agency, from the negro houses of the Agent for Indian Affairs." Here, then, is a disclosure of the very fact which, if the Secretary's design was to screen Mr. Mitchell, it was fatal to disclose, viz: that a large number of Africans who had been illicitly introduced had been seized, not only at Mr. Mitchell's residence, and at the seat of his authority, but in his own negro houses. It will be seen by the committee that the Collector's letter of the 9th, though it contains the details of the seizure, does not more strongly implicate Mr. Mitchell than he is implicated by this disclosure. But, whatever may be the purport and bearing of the letter of the 9th, that letter is particularly pointed to in the letter of the 14th, as containing papers respecting the seizure of those negroes. And if there had been a design to suppress the letter of the 9th, it was necessary to its success that this reference to a letter, which would have defeated the design, should also have been suppressed. But upon what principles that govern human conduct can the design of favoring Mr. Mitchell, at the expense even of honor and of duty, be reconciled with the suppression of papers that tend to his justification? For it will be seen by the committee that Mr. Mitchell's letters, which the Secretary has been charged with concealing and withholding, represent his conduct in the transaction referred to as that of a vigilant, intelligent, and faithful public officer. And it is believed that if the guilt or innocence of Mr. Mitchell were to be determined on no other grounds than those afforded by the communications made to the Secretary by the Collector of Darien and himself, all of which (with the exception of the letter of the 25th of December) are now before the committee, Mr. Mitchell would be free from suspicion. So far, then, from having been improperly influenced by any sentiment of partiality towards Mr. Mitchell in withholding these papers, it is believed that if any error has been committed by the Secretary in relation to them it is on the other side. If, on the one hand, the letters of the Collector inculpate Mr. Mitchell, so, on the other hand, his own letters justify him; and though one letter of the Collector was omitted to be communicated to the House, yet, on the other hand, all the letters of Mr. Mitchell were omitted. So that, as far as Mr. Mitchell was concerned, the charge was presented without the justification.

It is believed that while the circumstances stated in this communication explain satisfactorily the reasons why the correspondence referred to by the committee was not laid before the House under the resolution of the 31st of December, 1819, it is demonstrated by the communications made by the Secretary to the President, to the committee of the Senate, to the Attorney General, and to the House itself, that there has been no wish nor intention on the part of the Secretary to withhold from the proper authorities any information, whether made known to him officially or unofficially, of the violation of the law in the case alluded to or of Mr. Mitchell's conduct in the transaction.

F.

Thomas F. Riddick, President of the Bank of Missouri, having been called on by the Committee of Investigation on the address of Ninian Edwards to state whether or not it is known to him that the sum of $138,179, paid by the Bank of Missouri to the Treasury of the United States in bills of certain banks, was received by the bank on public account prior to the arrangement made by the Secretary of the Treasury with said bank, by which the bank became bound to pay in specie or its equivalent?

Answers: That it is known to him that the bank did receive all the notes transferred by said bank to the Treasury, amounting to $138,179, from the several Receivers of Public Moneys, prior to the 9th of August, 1819, the day when the bank became, for the first time, bound to pay cash for all deposits on public account made after that date.

Thomas F. Riddick further states that he was elected a Director of the Bank of Missouri when the bank first commenced its operations, and has continued until this day, either as Director or President; that he has always taken an active part in the direction of said bank; and that all its affairs and business have passed under his immediate inspection. That the paper marked E, accompanying Mr. Edwards' address, is a copy from a memorandum kept by John Dales, former Cashier, in his lifetime, for the purpose of showing to the Secretary of the Treasury the amount received by the bank in funds at par, and the amount received in notes under par, that on final settlement the bank might pay in kind according to its receipts.

That the Bank of Missouri did transfer in eastern funds to the Bank of the United States and its branches near $450,000, which funds were worth four per cent. premium to the bank; and he believes

that the price of good bills at Louisville, Kentucky, was at that time four per cent. and upwards, a part of the time as high as six. These funds were transferred on drafts issued by the Treasurer of the United States for the use of the Treasury.

He further states that a part of the balance due by the Bank of Missouri to the United States has already been paid, and that the remainder is in a course of payment, and he verily believes the ultimate payment to be well secured.

THOMAS F. RIDDICK.

Sworn and subscribed before me.

DANIEL RAPINE, *Justice of the Peace.*

MAY 24, 1824.

18TH CONGRESS.] No. 712. [1ST SESSION.

REPORT OF COMMITTEE ON NINIAN EDWARDS' CHARGES OF FINANCIAL MISMANAGEMENT.

MADE BY SELECT COMMITTEE, AND PRINTED DURING THE RECESS, JUNE 21, 1824, UNDER AN ORDER OF THE HOUSE OF REPRESENTATIVES.

Mr. LIVINGSTON, from the Select Committee, to whom was referred the memorial or address of Ninian Edwards, having, in obedience to the resolution of the House of Representatives of the 26th of May, continued to hold its sittings after the adjournment of the House, until this 21st day of June, have agreed on the following report:

In recommending, in their former report, a continuance of the existence and powers of the committee, it will be remembered that the reason given for that recommendation was the obvious propriety, before a final close of the investigation, of having the personal presence and examination of the author of the address which had occasioned the appointment of the committee. Such examination has now been had. Mr. Edwards attended the committee, in obedience to its summons, on the 7th of June; has been examined as a witness by its direction; cross-examined by a gentleman attending in behalf of the Secretary of the Treasury; and his testimony, together with that of the other witnesses, is communicated with this report, as are also various documents and papers which have been referred to and produced in the course of the examination.

A paper, in reply to the communication heretofore received by the committee from the Secretary, and another in the nature of an argument on the whole case, have also been presented by Mr. Edwards, and considered by the committee.

The evidence has run into much detail, and some parts of it, probably, have not a very material application to the main subject of inquiry. It seems proper, however, to the committee to allow to those concerned a liberal indulgence in this respect.

After a patient attention to all the evidence, and to whatever has been urged in the way of reasoning on the case, the committee see no cause to change or modify, in any material respect, the result to which they came on the former investigation, and which they have already submitted to the House. On the contrary, they find, in this further and fuller examination, a corroboration, generally speaking, of the opinions which they have heretofore expressed.

On some parts of the inquiry, indeed, evidence has now been produced to points which were not, individually and particularly, taken into the consideration of the committee on the former occasion. To these, perhaps, some reference ought now to be made. They may be considered as new articles, or new specifications of charge; and although not very definitely or formally made, yet, as evidence has been taken intended to support them, they become subjects of consideration.

One of these respects the deposits of public money, made or allowed by the Secretary, in the banks of this District, at the instance and on the solicitation of the banks themselves, and as an accommodation to them at a time of considerable pecuniary pressure, in 1819.

In their former report the committee expressed their opinion in relation to deposits of this nature, and referred to a public communication of the Secretary, in which the facts were avowed, and in which a practice of a like character was stated to have been of early existence and long continuance. The committee did not deem it necessary to call for proof of that which was admitted; and as it was of opinion that the practice itself was irregular and dangerous, it did not think it material to inquire particularly whether, in the only case in which loss was apprehended from this cause, the probability of such loss was either greater or less than the Secretary had supposed. This apprehended loss is in the case of the Franklin Bank of Alexandria. In the letter of the Secretary to the President of the Senate, of the 25th of February, 1823, he says, in regard to this bank, that a letter of the District Attorney, therewith communicated, showed that there was no danger of loss to the United States.

The evidence now offered and received tends to show that there is a probability of final loss from this bank, but in other respects there is no new view of the case presented.

The debt due to the Government from the Bank of Vincennes has also been brought forward and made the subject of inquiry and proof. Nothing distinguishing this case from those of other western banks in which the public money had been deposited, and in regard to which loss had happened, or was expected, had attracted the attention of the committee, as important to be considered, at the time of their former report. The case of this bank had been previously made the subject of a report to the House by the Secretary on the 21st of February, 1823, in answer to a resolution passed on the 31st of January

preceding, in which a statement of the debt and the means which had been taken and used to secure it were laid before Congress. The evidence now taken relates principally, as in the preceding case, to the amount of the loss, which may be expected to be incurred.

The only remaining charge which may be regarded as not before examined is an allegation or intimation that, owing to the fault of the Secretary, the pensioners and public creditors of the Government in East Tennessee were in some instances paid in bank paper not equivalent to specie.

The circumstances attending this transaction seem to be fully stated in the testimony of Hugh L. White. It does not appear that any knowledge of these payments having been made in depreciated paper was communicated to the Secretary. The measures adopted by him for the reasonable provision of a proper fund at the place of disbursement were, as far as the committee can judge, suitable and judicious. He had a right to expect the payments to be made in specie, or its equivalent, or at least to be informed if anything should happen to prevent such payment. No information was given to him of any disappointment of his expectation in this respect by those whose duty it was to pay; and no complaint appears to have been preferred by those whose right it was to receive.

In regard to the contested letter of Benjamin Stephenson, of the 12th of October, 1819, the committee see no cause to change the opinion which was entertained, and which they intended to express in their former report, that, although the letter was written as stated by Mr. Edwards in his testimony, there was no evidence that Mr. Stephenson communicated or transmitted it to the Secretary of the Treasury.

The committee do not deem it necessary to extend their report by protracted observations on the various parts of the evidence, as the whole is submitted to the House. They content themselves with saying that, in their opinion, nothing has been proved to impeach the integrity of the Secretary, or to bring into doubt the general correctness and ability of his administration of the public finances. To this point, as the main object of inquiry, the chief attention of the committee has been directed, and they have come to the result which has now been stated with the unanimous concurrence of the members present. Other points there are of less importance, but which may nevertheless be supposed not to have escaped consideration by the committee. These, however, under all the circumstances, they have thought it proper to leave, without observation, in the light in which they are placed by the evidence.

EXAMINATION OF WITNESSES.

JAMES LLOYD, of the Senate, sworn at the request of Mr. Edwards.

Questions by Mr. Cook, in Mr. Edwards' behalf:

Question. State, if you please, what is meant by a *special deposit* made in banking institutions?

Answer. That will depend on the custom of the place or the usage of the bank where the deposit is made. A special deposit is not a very definite term: a piece of blank paper, said to contain a thousand dollars, may be a special deposit, as may a bundle of notes left at a bank for collection or safe-keeping. Some banks receive as special deposit paper issued by other banks in the same State, or in other States, and which is repaid by the bank receiving it in the same bills as those in which it was deposited, or in bills of banks previously designated. I should consider as special deposit that which did not mix nor mingle with the general circulation of the bank.

Question. Are special deposits ever made without designating the amount and description of money or the thing deposited?

Answer. I should think they were sometimes, merely for the purpose of safe-keeping; more generally there would be a label on the outside specifying the contents of the bundle, box, &c., deposited. It may be noted in the memorandum book of the Cashier, but does not enter into the transactions or records of the bank at all. Plate is often deposited in this manner, and other valuable articles. In one of the Boston banks I have now a deposit of this description.

Question. When deposits are made for safe-keeping, is it ever understood that the bank is allowed to trade upon them as its own funds?

Answer. Never, I believe. Some of the banks in Massachusetts keep accounts of two kinds of money; Boston money, for example, and foreign money; which latter means bills of banks located out of the city. If a sum is deposited repayable in foreign money, the banks designate on a list generally posted in the banking-house a certain number of banks whose bills they will receive as "foreign money," which money they use; and if they repay the sum deposited in the bills of these banks they deem the contract fulfilled. If any one of these banks becomes insolvent previous to the payment, it is my opinion that the bank receiving its bills runs the risk of the loss thence accruing.

Question. When a deposit is made of foreign money, or such as is not received as general deposit, but subject to be refunded to the depositor in paper of a similar kind to that deposited, if paper of a similar kind at the time of making the deposit should afterwards depreciate in value, would the depositor be bound to receive it in its depreciated state in payment of such deposit?

Answer. I should say yes to a question thus specific, but I do not know whether, strictly considered, the notes of different banks can be viewed as precisely similar. If the bank specifies beforehand in what money it will repay, it is a special contract, and the depositor must abide by his own agreement. But if one of the banks in whose paper the deposit is to be repaid has subsequently failed, the bank receiving the deposit would not, in my opinion, be authorized to repay the deposit in the notes of such bank as had thus failed. What rate of depreciation would justify a bank in offering to pay, or a depositor in refusing to receive depreciated notes I cannot state.

Question. Where money of any description is deposited in any bank and is mingled with the funds of such bank generally, and the bank uses it in its general transactions, is not such bank always considered liable to pay the amount in legal money to the depositor?

Answer. I should consider the bank liable if the deposit is received and credited as general deposit.

Questions by Mr. Webster:

Question. By a general deposit you understand a deposit to be credited as cash in account?

Answer. Yes.

Question. By a special deposit you understand a deposit for safe-keeping merely?

Answer. Yes; or a deposit on particular conditions.

Question. If there be a deposit of an intermediate character between a general deposit and a deposit for safe-keeping where, though the particular notes deposited may be used or put in circulation by the bank, yet the bank is not answerable for the amount in cash, do the rights of the parties in such case depend mainly on their contract or agreement, or is there any general bank usage which should govern the case?

Answer. I know of no established usage. The conditions of the deposit are indicated by the terms prescribed by the bank from time to time, which are frequently varied by it according to its sense of its own interest.

Question. Is your knowledge of bank usage confined principally to that prevailing in the banks of the Atlantic cities, or does it include the usage of the western banks.

Answer. It is confined wholly to the former.

JAMES LLOYD.

HUGH L. WHITE sworn, at the request of Mr. Edwards.

Question by Mr. Edwards:

Question. Have you any recollection of the sum of forty thousand one hundred and fifty-six dollars of notes on the Bank of Tennessee and its branches which was directed to be transferred by the Bank of Missouri to the Branch Bank of Louisville, and which was to be subject to the drafts of the Treasurer in favor of the Bank of Tennessee?

Answer. I think it proper to state to the committee that my memory of the transaction is not to be entirely depended on, as it took place several years since, and latterly my mind has been so much taken up with other concerns that I may not recollect correctly some matters relative to this. So well as I remember, it was in the fall of 1819 the Knoxville Bank received from Mr. Crawford a letter, the substance of which was, that he proposed to give the bank at Knoxville a draft on the Bank of Missouri for the whole amount of Tennessee paper then in the hands of the Missouri Bank, and which had been received by it for the United States, which should be payable at Louisville, in Kentucky, in Tennessee bank paper; and that, upon the receipt of such draft, the State Bank at Knoxville should place to the credit of the Treasurer of the United States a like sum as specie, which should be drawn for as the Government might have occasion to use it in that quarter of the country. On the receipt of this letter he was answered that we could not agree to such an arrangement; that, as to the amount of Tennessee paper upon the Bank of the State of Tennessee and its branches, we were willing to accept such draft upon the Missouri Bank upon the terms proposed in his letter; that, as to other Tennessee paper that did not belong to the State Bank or its branches, we could not agree to receive it. In pursuance of this arrangement, early in the year 1820, I think in March or April, a draft was received from the Treasury for $40,156 on the Bank of Missouri, payable at the place and in the description of notes agreed upon. I think the amount was placed to the credit of the Treasurer of the United States immediately after receiving the draft. We had no correspondence with the Bank of Missouri, but only with the Secretary of the Treasury, so far as I can remember at this time, and upon this point I feel pretty certain I am not mistaken. After waiting what we supposed a reasonable time to allow the Missouri Bank to have the money at Louisville, where the draft was to be paid, I went, and took a young man with me, to receive the money. For form's sake the draft was transferred to me. I went to Louisville, and, no particular place in Louisville being specified in the draft where the money was to be paid, I went to the Branch Bank there. I found no funds provided to meet the draft; and, after waiting a few days without being able to hear anything which induced me to think a longer delay would be useful, I had the draft protested, a copy of the protest forwarded to the drawer, with such notice as would make him responsible, and returned to Knoxville. Some time afterwards, I think in the same year, a letter was received from the Cashier of the United States Bank, stating that a bundle, said to contain the $40,156, had been forwarded and left there by the Missouri Bank for the purpose of lifting this draft; but, as we had had the trouble and expense of going once to receive it, we took no notice of this communication, and wished to have the money sent to us at our own place, at the expense and risk of the Missouri Bank. We were content with the paper, and ready to receive it at any time. Thus matters stood until we heard that the Missouri Bank had failed. I advised that the Knoxville Bank should again send to get this money. This was in the winter of 1821. As soon as they could make the arrangement, they sent on and received the money at Louisville early in the year 1822. I understood that the whole amount of $40,156 was received in notes of the Knoxville Bank and its branches. In the meanwhile the Treasury continued to draw on the Knoxville Bank, and, as President, I directed the Cashier not to pay cash for these drafts, but, if current money would be taken, to make advances in it, though the money was not yet received for the draft, under a belief that ultimately the Secretary would cause the amount of the draft to be paid to our bank.

My impression was, that when the Missouri Bank had received these notes the banks were all paying specie, but that afterwards the branches had ceased to do so. The first information we got was from Mr. Cochran, Cashier of the Branch Bank of the United States at Louisville, that the money was ready for us, and was in the same summer, viz: of 1820, as I believe, but cannot be certain. I never exchanged a line with the Missouri Bank, nor received a line from it, according to my best recollection. I considered our transaction only with the Treasury. The mail from St. Louis to Knoxville was at that time tedious, and not very regular. I am yet ignorant of the reason why the money was not ready for us at Louisville. I had no reason to doubt, nor have I now, that the Treasury did all that was reasonable towards notifying all parties concerned of having given the draft. The amount of notes on the principal bank itself was small in comparison to that on its branches.

I understood that the draft for $40,156 was a mode of transfer from one bank to another for the purpose of having placed to the credit of the United States, as cash or general deposit, this sum, which the Bank of Missouri could not transfer to the Bank of the United States. We paid creditors of the United States who presented drafts in current bills, though not in specie; and there were no complaints at the time, of which I have at present any recollection. We did not pay the specie, because the fund had not been received upon the foundation of which we had agreed to pay it; and if any blame is due, it is due to myself in preference to the Cashier, as I forbade him to pay the specie, as it related to this transaction, until the fund for which we had agreed to pay it should be paid to us.

Question. I want to know the character of Mr. Lee, whose report is in my hand?

Answer. I have seen that report. Mr. Lee is a man of the utmost integrity; and if that report varies

from my statement as to this transaction it is more to be relied on than my own statement, which is from memory, without the same means of being correct which Mr. Lee had.

Question. Was a part of the money deposited to be suffered to remain in the bank?

Answer. The Treasury was to draw out the money only as the wants of the Government required; something may have been said as to the time it was to remain in the bank, but have no recollection of any positive agreement on that subject. Mr. Crawford's letter shows the understanding upon that subject more correctly than I can state from memory merely.

Question. What was the discount on your paper?

Answer. None upon that of the principal bank; but upon that of the branches and other Tennessee paper it has fluctuated from ten to twenty-five per cent.

Question. What were notes on the branches of the Knoxville banks worth at that time?

Answer. I cannot recollect at that particular time. The depreciation, taken for a series of years, was from ten to twenty-five per cent., as before stated, in East Tennessee; in West Tennessee the discount has been sometimes higher.

Question. Did not the pensioners receive from ten to twenty per cent. less than if they had received specie?

Answer. The money in which they were paid was of the kind which was at the discount before stated.

By Mr. Taylor:

Question. At the time these payments were made at the Bank of Knoxville was there a credit in that bank to the United States?

Answer. Yes, and that credit always stood as a specie credit. But we thought that it was more than balanced by the draft unpaid, and we held the Treasury responsible for the amount of that draft.

By Mr. Webster:

Question. In other transactions did you pay specie for the drafts of the United States?

Answer. Our rule always was to pay in such funds as had been placed with us, if the payee so wished. If the fund on which the draft was drawn was specie, we paid it in that, if desired. If the fund was other than specie, we did not pay specie.

By Mr. Edwards:

Question. In crediting the draft from the Treasury in your favor was the word "cash" used?

Answer. I cannot remember. The intent was to credit it as cash. A deposit, when nothing is said to the contrary, is considered by us as being payable in cash, if demanded. We viewed special deposit of certain kinds of notes as not binding us to repay in those identical notes, but only similar notes, or such as the depositor would be as well satisfied with.

Question. Did you receive deposits from the Treasury in drafts on the Bank of Tombigbee?

Answer. That draft never was included in the arrangement before spoken of, and nothing has been received by us upon it; and if it ever was credited on our books I don't remember it. That bank, however, is a specie-paying bank, as I have understood and believe.

Question. Was the paper of the Huntsville Bank received at your bank?

Answer. We never had a draft on the Bank of Huntsville. The paper of that bank is esteemed rather better than our own branch notes; and we have, until long after this transaction, made no distinction between it and what is called by us current Tennessee paper.

Question. Was the notice of the protest at Louisville forwarded to the Treasury?

Answer. I do not recollect further than that I took the ordinary steps to make the drawer liable before leaving Louisville; and upon my return, in May, wrote the letter now shown me by one of the committee to the Secretary.

Question. When you received the draft did you credit the amount to the Treasury?

Answer. Yes, as I now believe. That, I think, was our understanding of the agreement; and I suppose, and believe, that we complied with that part of it.

By Mr. Webster:

Question. Did you inform the Treasurer that you did not pay his drafts in specie, but in your own bills?

Answer. I have no recollection of making any communication to Mr. Crawford on that subject. The Cashier may have given such notice, but I do not know that he did. I gave him no order to do so; and think if he had done so I should have known it.

By Mr. Edwards:

Question. Do you believe that any one pensioner would have taken your bills if he had supposed he could get specie?

Answer. Doubtless he would have preferred specie to any of the bills in which he was paid.

By Mr. Forsyth, on the part of Mr. Crawford:

Question. Did you hold the United States responsible for the amount of its draft on the Bank of Missouri?

Answer. Yes.

Question. How, then, did you refuse to pay in specie?

Answer. We thought that, as the money for the draft had never been paid to us, it was a just interpretation of the agreement that we should not pay in anything till we received the proceeds of the draft; but preferred advancing in such funds as we could spare to having the drafts protested.

By Mr. Edwards:

Question. When you received the amount of the draft was it not chiefly in notes of your branches?

Answer. I understood so, but have no personal knowledge, as I was not then in Knoxville.

Question. Had not most, or all, of those branches then stopped payment?

Answer. They had ceased cash payments when we made the agreement; but my impression is, that when these notes were received in the Bank of Missouri the banks all paid specie. This answer is given, however, upon the presumption that the Missouri Bank had received them as they were represented to the Secretary. How that fact was I, of course, do not know.

Question. What means has a Director of knowing from what persons a sum, say of $100,000, found in bank, and received in a series of months, has been so received?

Answer. I can only speak as to the rules of the bank to which I have belonged. As to the rules of others I could only speak from information. By the rules of ours the President, Cashier, &c., can inspect all accounts of every person whatever; but no *individual Director* has such power; but the Board of

Directors, if they choose, have as much right as any of the individual officers to examine any and all accounts; but any information thus acquired would be confidential, and is intended to prevent any improper conduct, and to enable the *Directors* and *officers* to discharge their respective duties to the public and to individuals.

By Mr. Forsyth:

Question. As the President of the Bank, would you not have preferred advancing in current notes with the Government bound to pay the draft, to its having been paid punctually, and your being bound to pay in specie?

Answer. I would have preferred that the payment of the bill should have been made when I was at Louisville, and that the transaction should have gone on as originally intended; because we would then have been as able as we ever may be to lift our paper, and as I never expected more from the Government than payment at our bank in the same kind of money specified in the face of the draft; but, at the same time, felt a confidence that the Government would cause us to be paid in such funds at our own place, it could make but little difference, as most of the pensioners were very probably paid in branch paper or funds equal to it, and I have ever believed, as President, that the interest of the bank was most promoted by acting honestly. I make this observation without feeling that the question was intended to doubt our integrity.

H. L. WHITE.

JAMES SANDERSON, of Alexandria, sworn, at the request of Mr. Edwards.

By Mr. Edwards:

Question. I wish you to state what you know concerning sums of money obtained by the Mechanics' Bank of Alexandria from the Secretary of the Treasury?

Answer. In January, 1819, I was President of that bank. At that time there was a run on that bank, and the bank was much embarrassed. I waited on the Secretary of the Treasury and he loaned at one time $17,000, at another $20,000. I showed him a statement of the concerns of the bank, proving its condition to be good, and reminded him of former loans by the bank to the Government in an hour of its necessity. He replied that he would consult the President of the United States and let me know the result; and when I called again, told me the Government was disposed to do all it could to relieve the bank, as well as the other banks of the District, and gave me a draft on the Bank of Alexandria for $17,000. This was on or about the 12th January; on or about the 23d of the same month I called on him again, and he gave me another draft on the same bank for $20,000. I understood these sums as loans, or deposits, made to relieve and aid the bank. I continued President of the bank a few weeks, and soon after I left it it stopped specie payment for a time—some time about the middle of March.

Question. Has the bank repaid any of these loans?

Answer. I went this morning to look at the books of the bank, and find that the amount appears to have been repaid.

By Mr. Forsyth:

Question. When did you first call on the Secretary?

Answer. It was on Friday; but as I understood he was much engaged on Saturdays in receiving visits of members of Congress, I called again on Monday, when I received the $17,000.

Question. Were there any deposits made by Government in that bank previously to those of which you have now spoken?

Answer. There were not, I believe, except the money which had been loaned to the Government previous to the time I speak of.

JAMES SANDERSON.

JUNE 9, 1823.

JACOB MORGAN, of Alexandria, sworn, at the request of Mr. Edwards:

I was Cashier of the Mechanics' Bank of Alexandria for a time after Mr. Sanderson left it. There were some loans obtained by Mr. Swan, President, from the Secretary of the Treasury, and received by me. Mr. Sanderson had left it. One loan, I think, was of $10,000, another of $20,000. The first was returned in a short time, say thirty or sixty days; and a few weeks after the first, the second loan was obtained. This latter was not repaid when I left the bank, which was, I think, in 1821. When I came into the office of Cashier I found little specie and a very small amount of current money, and about $80,000 of notes in circulation. I reduced these before I left to less than $7,000.

The second loan of $20,000 was, as I understand, subsequently paid, or secured to be paid, through the Bank of Alexandria; but when I left the bank the two loans mentioned by Mr. Sanderson and the second mentioned by me remained unpaid. This last was received in Treasury drafts on Carolina and Virginia. I went to Raleigh, in North Carolina, and exchanged the drafts for Virginia paper. The Raleigh Bank then paid specie, and was willing so to pay these drafts, but I did not wish to take away the specie.

The first $10,000 was obtained to enable the bank to pay specie; but this being found insufficient, the second loan was obtained. The bank paid some of its notes as it was able, and as fast as the notes were paid they were withdrawn; but many notes were not paid when presented. I did understand from the Secretary of the Treasury that the loans were obtained in order to enable the bank to wind up its affairs. The Secretary frequently applied to me for repayment, and being told by me that the bank was unable to do it, he insisted upon interest being allowed on the loan, which was agreed to by the bank. I do not recollect when this agreement for interest was made; not, however, before the money had remained due for a year; nor do I remember from what date the interest was to be calculated. The present statement I make from memory merely, not having had access to the books of the bank for several years.

JACOB MORGAN.

AUGUSTINE NEWTON sworn, at the request of Mr. Edwards:

I was Cashier of the Franklin Bank, and became so in March, 1821. There is a credit on the books of the bank to the Treasurer of the United States for $48,000. The money was obtained before I went into office. Mr. Crawford was once at the bank while I was Cashier, say in August, 1821, applying to have the money either paid or secured, at which time the bank agreed to transfer to him all its property as security, and that this loan was the first debt to be paid. The charter of the bank expired on January 1, 1822, but I have the books in my possession.

The discounted notes were first to be resorted to, and if these proved insufficient, resort was to be had to stock notes. A small sum, less than one thousand dollars, has been collected. The notes are now in suit by Mr. Swan, District Attorney. The stock notes are notes given by stockholders for stock, for the payment of which stock is pledged as security. I know of no reason for the agreement that one class of notes was first to be sued for, unless it may have been the convenience of the debtors on the stock notes. All the real property was also transferred. It consisted of a few houses taken for debts.

The agreement was accepted by Mr. Crawford before the expiration of the charter, and sent to Mr. Swan to have a regular conveyance drawn up. That conveyance was not consummated till after the charter had expired, say in October, 1822. Many of the notes assigned were under protest, and some of them in suit. Notes, including stock notes, to the amount of $185,000, and real estate to the amount of $5,000, were offered to be transferred; but Mr. Crawford did not at that time accept of this offer, because it did not extend to the payment of interest; but afterwards, the interest being stipulated for, the agreement was accepted and the transfer made in October, 1822, as I have above stated. The stock notes are still in my possession. They have never been endorsed to the Government by any one. If suits can be sustained there will be ample funds to repay the loan.

When I went into the office of Cashier I was under the impression that provision had been made by Congress for continuing the charter of the bank for five years beyond the time originally limited for its expiration. I continued under that impression for a long time, and I believe the Directors were under the same impression.

AUG. NEWTON.

JUNE 9, 1824.

Mr. NEWTON again called, (June 10.)

The transfer above referred to from the bank to the United States was made on the 3d October, 1822. The terms of the agreement were finally arranged and assented to by the parties on the 5th December, 1821.

A. NEWTON.

CHARLES T. CHAPMAN sworn, at the request of Mr. Edwards:

I was Cashier of the Union Bank of Alexandria. In June, 1819, owing to the heavy pressures upon the bank, and considering a disadvantageous loan had been made by this bank to the Government, and believing as I then did and do now, that, unless some temporary relief could be obtained at the moment, a serious inconvenience would have resulted to the institution; under such circumstances, a committee was appointed to solicit from the Hon. Wm. H. Crawford, Secretary of the Treasury, a temporary aid, which he was pleased to grant, under the conditions that the amount should be refunded when demanded. The sum received from the Treasury was $30,000, in June, 1819; and, having received information that it must be refunded in January, 1820, a part was paid in the latter month and the balance in February of the same year; and although the funds we received from the Treasury were not, nor could have been, desirable under any other circumstances than those above mentioned, yet interest was paid upon the same. The money thus received from the Treasury was all, I believe, paid into the Office of Discount and Deposit of the Bank of the United States at Washington, either by deposits or drafts of the Treasurer through that bank upon us.

The solvency of the Union Bank was, I believe, never questioned at any time during its operation.

C. T. CHAPMAN.

JUNE 9, 1924.

JONAH THOMPSON sworn, at the request of Mr. Edwards:

I am President of the Bank of Alexandria, and have been since March 1, 1819.

The bank never applied to the Secretary of the Treasury for a loan, but have always had the deposits from the Custom-house. On the 9th of January there was an application, and understood to be the wish of the Secretary of the Treasury, that the Bank of Alexandria would assume and pay the sum of forty-six thousand dollars to the Government. The Bank of Alexandria gave credit to the Government for the amount, and the Mechanics' Bank agreed to secure it by notes and real estate. The bank pays the drafts of the Government when called upon. It has a deposit of more than $139,000. The Bank of Alexandria has never applied to the Treasurer for any indulgence, to my knowledge.

JONAH THOMPSON.

JAMES L. M'KENNA sworn, at the request of Mr. Edwards:

I am Cashier of the Bank of Alexandria; I became so in 1811. The bank has never had a loan or an indulgence from the Treasury. It has always had the deposit of the Government from the Collector. It has made advances to the Government when under pressure. And at one time remonstrated with Mr. Crawford on the closeness with which the public deposits were drawn. The average amount of public money remaining on deposit in the bank since Mr. Crawford has been Secretary of the Treasury has been less, I think, than it was during the incumbency of Mr. Gallatin.

JUNE 9. J. L. M'KENNA.

I had an agency in obtaining one of the loans made by Mr. Crawford to the Mechanics' Bank of Alexandria, when that bank was in difficulty. I accompanied Mr. Sanderson in his visit to the Secretary when he obtained the second loan, and represented the injurious consequences of permitting that bank to fail. I redeemed, repeatedly, the notes of that bank out of the hands of brokers and others. Mr. Crawford seemed dissatisfied at the second application so soon after the loan of $17,000. He applied to me for my opinion of the solvency of that bank, and whether the loan would enable it to redeem its paper. I represented the circumstances of the bank as being safe, (to the extent of its debt, but that its stockholders might lose,) though I doubted the sufficiency of the loan to enable it to redeem its paper. I represented the permitting the Mechanics' Bank to fail as being calculated to injure, and the granting of the loan to benefit, materially, the commercial interests of Alexandria; and Mr. Crawford acquiesced in the wishes of Mr. Sanderson, and made the loan in drafts on some of the western banks in sums of 2, 3, and 4,000 dollars each.

By Mr. Edwards:

Question. When a general deposit is made in your bank, without anything being said on either side, is the amount demandable in cash?

Answer. Always, except when plate or notes of district banks are left for safe-keeping, to be delivered to order.

J. L. M'KENNA.

WILLIAM RHODES sworn, at the request of Mr. Edwards:

I was Cashier of the Franklin Bank of Alexandria from May, 1816, to June, 1819. When I left that bank it was indebted to the United States, I think, in the sum of $48,000. I cannot certainly tell when it became indebted, but believe it was in 1818 or 1819. It became indebted, as I understood, in consequence of an application by our Directors to the Secretary of the Treasury for a loan. There were, I believe, three such applications. At the first, we received $18,000; the second, $18,000; and at the third, $12,000. The money was advanced to the bank to relieve it from its embarrassments. I feel very certain as to the aggregate amount of $48,000, but am not so sure as to the amount of the different sums obtained at each application, nor respecting the time when they were obtained. My impression is, that the loans were all obtained within the course of about six months. I cannot state whether interest was or was not to be allowed upon them. I have no further knowledge of the transaction than that I received the warrants from the Treasury and passed the amounts to the credit of the United States. I now recollect that I was, in one instance, requested by the Directors to write a letter to the Secretary, requesting a deposit in our bank, which I did accordingly. But I do not remember at what time, nor whether it was before or after the first loan.

WM. RHODES.

JUNE 10, 1824.

ALEXANDER KERR sworn, at the request of Mr. Edwards:

I am Cashier of the Bank of the Metropolis in this city, and have been so for ten years past. It was one of the banks in which public deposits were made previous to the existence of the United States Bank. When the Bank of the United States went into operation the Bank of the Metropolis owed the United States about $90,000, which was drawn for by the former in one check. This sum had come into the bank by deposits of individuals only, and not by loan.

There is a deposit now in the bank to the credit of the United States, in consequence of payments for western lands being made partly in bills which the United States Bank would not receive as cash, and which were received by the Bank of the Metropolis and receipted for to the Treasurer of the United States as cash. The notes were on specie-paying banks. We received them as cash, and considered the accommodation to the Government quite equal to any benefit received by the bank. The sum has gradually increased and vibrated from $40,000 to $60,000. It was never made at the solicitation of our bank, but the Secretary of the Treasury directed persons wishing to pay for lands, as above stated, to apply to our bank to know if we would receive the notes and credit them as cash; which we agreed to do. The amount of deposit as reported to the Treasury the 1st of January of the present year was about $60,000. Neither specie nor United States notes to any considerable amount were included in the above deposits.

ALEX'R KERR, *Cashier.*

JUNE 10, 1824.

DANIEL KURTZ sworn, at the request of Mr. Edwards:

I am Cashier of the Bank of Columbia, and have been for more than two years; since I have been Cashier the bank has been indebted to the United States in all about $300,000. The bank was appointed agent for the Treasury to collect certain uncurrent money; the whole amount above mentioned did not, however, consist of such collections; there were some balances, about $40,000, left from former transactions with the Treasury. The sum I have mentioned was owing by the bank when I became Cashier, and has remained about the same ever since. When the United States Bank went into operation the Bank of Columbia owed the Government from $30,000 to $60,000, a part of which was drawn for by the Treasury, say about $15,000. The balance has not been drawn for and remains a cash debt due to the United States.

I do not know precisely what arrangement was made with the bank respecting the collection of uncurrent notes, but I have understood that so much of those notes as the bank could collect and turn into current money might remain in the bank on deposit; but I cannot state for how long a time. About $200,000 worth of uncurrent notes have been thus converted and credited as cash to the Treasury; part of the residue has been drawn out by the Secretary of the Treasury, and part remains now in the bank. These uncurrent notes were a part of those reported as uncollectable by the Bank of the United States, and were received from that bank by an order of the Treasury.

Question. What is the amount of notes delivered for collection and what were the dates of delivery, and specify on what banks?

Answer. The amount of notes delivered for collection was $545,991 37, as appears by a statement now delivered, marked Z, in which also the dates of the orders for the delivery of the notes to the bank will appear. The notes were actually received between the months of December, 1818, and August, 1819. The banks whose notes were so received are so numerous that it has been impossible for me at this time to make out the list. A statement of a number of them is, however, contained in a paper now delivered, marked Y.

Question. What were the amounts of these notes cashed by the bank.

Answer. $238,361 87, as also appears by the paper marked Z.

Question. What was the amount of uncurrent notes drawn out of the bank by the Treasury?

Answer. $123,102 59, as appears by a statement now delivered, and marked X.

Question. What is the amount of such uncurrent notes now on hand, and where are they lodged?

Answer. $53,661 40, lodged principally at the several places contained in a statement now delivered, and marked W.

Question. What is the total amount of the debt now due from the Bank of Columbia to the United States?

Answer. About $372,000, of which $318,361 87 is cash, and includes about $30,000 standing to the credit of the Treasurer on sundry accounts, and the remaining balance of $53,661 40 is special deposit.

Question. What probability is there of the United States recovering this debt?

Answer. In my opinion the security given for the debt is amply sufficient, and I believe the whole will be

recovered. The bank owes, in all, about $800,000, and the nominal amount of its assets is more than a million and a half of dollars. An agreement has been made with the Bank of the United States to assign to it property and debts to secure the debt from the Bank of Columbia to the Bank of the United States, and to the United States. For the whole of the above amount of $318,361 87, excepting the sum of $30,000 above specified, the Government received a credit on the books of the bank, as cash, in 1819 or 1820. At that time the Bank of Columbia paid specie. The above sum, credited as cash, was suffered to remain in the bank from that time to the present. This, as I understand, was in pursuance of an agreement with the Treasury. This deposit was the only compensation the bank received for the trouble of collection. I do not know that any time was specified for the continuance of the deposit. The Secretary of the Treasury has pressed the bank very much for the amount; more, I think, than he ought to have done, considering the trouble and expense to which the bank was put.

D. KURTZ, *Cashier of the Bank of Columbia.*

STATEMENT W.

Evidences of debt in possession of the bank.

Cumberland Bank of Alleghany	$1,176 61
Bank of Wilmington and Brandywine	7,376 00
Farmers and Mechanics' Bank, Pittsburg	1,311 00
Urbanna Banking Company	2,339 00
Bedford Bank of Pennsylvania	4,059 57
German Bank of Wooster	23,761 00
Union Bank of Pennsylvania	9,758 00
Sundry bank notes, among which are Kentucky Insurance Company, $797; Marietta and Susquehanna Trading Company, $1,360; Susquehanna Bridge Company, $796; and $482 counterfeits of various banks	3,880 22
	53,661 40

STATEMENT X.

Evidences of debt in these cases delivered and in possession of the Treasury, August, 1820.

Elkton Bank of Maryland	$19,865 25
Alexandria Society, Granville	2,463 00
Owl Creek Bank	64 00

					176,763 99		

In addition to the balance, as stated in the account current, there is due to the United States on the books of the Office of Pay and Deposit, on sundry accounts, about $30,000.

EDWARD JONES sworn, at the request of Mr. Edwards:

I am chief clerk in the office of the Secretary of the Treasury. I have heard of a letter mentioned by Mr. Edwards as having been written by Mr. Stephenson, Receiver of Public Moneys at Edwardsville, to the Secretary of the Treasury. I first heard of it very lately. I believe the first intimation I had concerning it was derived from Mr. Edwards' memorial to Congress.

By Mr. Cook:

Question. Did you ever see, in the Treasury Department, previously to Mr. Edwards' memorial, any letter or notice in any part of the public papers concerning Mr. Edwards' having withdrawn from the Directorship of the bank at Edwardsville?

Answer. Never.

Question. Does the correspondence between the Secretary of the Treasury and the banks which are depositories of the public moneys pass through your hands?

Answer. Yes. When the Secretary is in town he opens the mail himself; writes on the different bundles such directions as will designate what is to be done with each, so that they may respectively be acted on; they are then sent out to me, and I distribute them among the clerks.

Question. Have you read the report of the Secretary of the Treasury made to Congress on the 22d day of March of the present year?

Answer. Yes, I have.

Question. Did the Secretary consult you in making out that report?

Answer. No.

Question. Did he say anything to you in reference to that report before it was made?

Answer. No.

Question. Do you or do you not know that the letter from Mr. Stephenson referred to by Mr. Edwards has since been found in the Treasury Department?

Answer. No; I do not know any such thing.

Question. Have you heard that that letter has been found?

Answer. Never.

Question. Do you remember whether the Secretary of the Treasury received the St. Louis Enquirer in 1819?

Answer. I do not recollect. I have seen that paper several times in the Department. Papers are frequently sent to the Secretary which he has not subscribed for, and after a few numbers are sent and no subscription obtained they are sent no longer.

Question. When, according to your best recollection, did you first see that paper in the Department?

Answer. I do not recollect.

Question. Do you think it was several years past?

Answer. I have seen it within two years.

By Mr. Forsyth:

Question. Does all the official correspondence of the Secretary of the Treasury pass through your hands?

Answer. Yes.

Question. In order to distribute the different papers sent out to you by the Secretary is it not necessary that you should read them?

Answer. To read them all would occupy more time than I can spare, but on merely opening them I can immediately perceive whether they are from banks or Receivers of Public Moneys, or what is their general character.

Question. Who makes the endorsements on these letters?

Answer. If they require an immediate answer I usually draw the answer, and in that case I endorse them myself; but if they do not require immediate attention, or do not need any answer at all, I hand them over to a young man who assists me, and he makes the endorsement. The greater part of the letters received are of the description first mentioned. I do not draft all the answers, but most of the letters are of such a kind that there are precedents for the answer required.

Question. When calls are made upon the Secretary of the Treasury for papers does the direction usually pass through your hands?

Answer. Yes, it usually does. (The direction is generally endorsed on the back;) in some few cases it has been sent immediately by the Secretary to the person having charge of the papers.

Question. To which of the clerks go the letters from the Receivers of the Public Moneys?

Answer. They remain with me, unless where they contain inquiries for directions concerning the kinds of moneys to be received, and the place of deposit, in which case they are considered as pertaining to the duty of Mr. Dickins.

By Mr. Cook:

Question. Where and by whom were the copies of the voluminous documents laid before Congress the present session, in answer to a call for the correspondence of the Treasury with the western banks, made?

Answer. That is a question which I cannot answer very fully. I had no share in making out those copies. Mr. Dickins was engaged in superintending that business. A Mr. Elkins, a Mr. Philips, and a Mr. Washington were employed, and Mr. Laub, an extra clerk in the office.

Question. Was any part of the correspondence taken away from the Department to be copied?

Answer. I was told by Mr. Richards, who had the largest portion of the letters from banks to copy, that he took them with him to Connecticut. I also understood from Mr. Elkins that he took some of those assigned him to his lodgings. Those given to both these gentlemen were letters from banks to the Department. Those given to the extra clerks were records taken from the files of the office.

Question. At what time did this copying commence?

Answer. I think about the first of last July.

Question. At what time was it finished?

Answer. A few days before the report went in to Congress. It occupied some days to arrange so great a number of copies of letters, but as soon as that was done and the report made out, the whole was sent in. I understood that the arrangement intended was, that each letter should be followed by the answer to it. But I had no hand in the business from the commencement to the end of it.

EDWARD JONES.

CLEMENT SMITH sworn, at the request of Mr. Edwards:

I am President of the Farmers and Mechanics' Bank of Georgetown, and have been for about four years. The bank has not been, in that time, indebted to the United States, nor is there a credit now on the books to the United States.

C. SMITH.

OVERTON CARR sworn, at the request of Mr. Edwards:

I am Cashier of the Patriotic Bank, and have been since its establishment, in 1815. The bank had one deposit from the Treasury of $10,000, on the 13th of September, 1819. It was made at my request, in consequence of the pressure then existing in the concerns of the bank. It consisted of a draft on Salem, Massachusetts, for $5,000; Portsmouth, $2,000; Bristol, $1,000; Petersburg, $2,000. On the 11th of February, 1820, this loan was repaid by a deposit in the United States Branch Bank, in this city. Interest of six per cent. was paid on the deposit, and a loss was sustained of 1½ per cent. in converting these funds into cash, which was done through the agency of brokers. The banks drawn on were specie-paying banks, and their notes current in their own States, respectively. The loss arose merely from the rate of exchange. The bank has never, before or since, been indebted to the United States.

OVERTON CARR.

RICHARD SMITH sworn, at the request of Mr. Edwards:

I am Cashier of the Branch Bank of the United States in this city, and have been since its institution.

By Mr. Cook:

Question. In what manner was the deposit of $1,175 made by Colonel Reddick in that bank; and how was it credited to the United States?

Answer. To the best of my recollection, it was entered to the credit of the United States, part as cash and part as special deposit; perhaps $285 entered as special deposit, on paper of the Franklin Bank of Alexandria. The residue entered as cash. I have no memorandum with me to refer to; but presume the above to be the transaction referred to in the question.

RD. SMITH.

THOMAS SWANN sworn, at the request of Mr. Edwards:

Question. Please to state at what time the transfer of the effects of the Franklin Bank of Alexandria to the United States was made, for the purpose of securing certain loans made to it by the Treasury, and all the circumstances connected with such transfer.

Answer. I was applied to, as the Attorney of the United States for the District of Columbia, by the Secretary of the Treasury, some time in the summer or fall of 1821, to carry into effect an agreement which had been entered into between the Secretary of the Treasury and the Franklin Bank of Alexandria, in relation to a debt of about $48,000, due from the Franklin Bank to the United States. The agreement appeared to have been entered into on the 23d of August, 1821; and the bank bound themselves to transfer to William H. Crawford, and his successors in office, all the debts due to that bank, and all the real estate of every description belonging to the bank, and all the notes given by the stockholders of the bank on account of stock by them severally subscribed thereto. The real estate was to be disposed of on the most advantageous terms, and the whole amount of the moneys collected were to be placed in the Bank of Alexandria to the credit of the Treasurer of the United States.

The debts were to be collected by gradual instalments, excepting the stock debts, which were to be applied, in the first place, to the payment of the deposits and issues then due from the bank; and in the second place, to make up any deficiency that might be due to the United States. Schedules of the debts due to the bank were annexed to the agreement.

Very shortly after this application was made by the Secretary of the Treasury, I prepared a deed of assignment for the purpose of carrying this agreement into effect, and made various efforts in the course of the fall of that year to get it executed by the Board of Directors of the Franklin Bank, but without effect; objections and difficulties of one sort or other were constantly made, and an indisposition to execute the assignment, as I thought, manifested on the part of the Board. I had understood that the deposit had been originally made by the Secretary of the Treasury in that bank at the instance of General Thomson Mason and Mr. John T. Ricketts, who were then Directors of the bank, and if they had been alive at the time that I prepared the assignment I have no doubt that the assignment would have been promptly executed; but the death of these gentlemen, and of my brother, William T. Swann, who had acted as the President of the bank, produced, I am inclined to think, the delays which attended the final completion of this business. After making my efforts to get this paper executed, I was requested to send it to the Secretary of the Treasury, and I accordingly did so, and I believe that a correspondence took place between him and the bank upon the subject of the deed. It was returned to me about the month of May, 1822, and was finally executed by the Board of Directors of the bank some time afterwards, the precise period I do not now recollect. At the time it was executed, none of us, I believe, were aware that the charter of the bank had expired. The impression generally was, that a power had been reserved to it, in common with the other banks of the District, to wind up its affairs, and the time given was, I think, five years; but so it was, upon looking at the law, the Franklin Bank was omitted, and its charter at an end before the deed of assignment was finally executed.

When this information was obtained I was requested to turn my attention again to the original agreement, and to see whether the United States would be able to recover their moneys upon that paper. Upon considering that paper it seemed to me that the notes which [had] been negotiated in the bank while it was incorporated and endorsed in blank might be applied to the use of the United States, and I accordingly obtained possession of those notes and filled up the endorsements payable to the United States, and brought suits at law upon those notes in behalf of the United States, which suits are still mostly depending.

As to the stock notes, no measures have yet been taken upon them, nor did the agreement with the bank authorize any steps to be yet taken; but when it may be necessary to resort to them, it seemed to me that a Court of Chancery would compel the payment of them and give to the United States the same relief as if the assignments had been regularly made.

If the United States should be able to enforce the payment of those stock notes, I should entertain no doubt but that the money due to the United States may be obtained; but otherwise a considerable loss would be sustained.

THOS. SWANN.

DAVID ENGLISH sworn, at the request of Mr. Edwards:

I am Cashier of the Union Bank of Georgetown, and have been since its institution in 1809. That bank received one deposit in August, 1819, from the Treasury, of $25,000. The bank was under some fears on the subject of the resumption of specie payments, and application was made to the Treasury for aid and the loan was obtained, which was repaid in October following by deposits in the United States Bank or its branches. No other deposit has since been made by the Treasury in the Union Bank to my knowledge No interest was paid on the above loan.

D. ENGLISH, *Cashier.*

THOMAS DUNGAN sworn, at the request of Mr. Edwards:

I am a clerk in the Office of the Secretary of the Treasury, and have been about eight years.

Question. Have you heard of a letter said by Mr. Edwards to have been written by Mr. Stephenson, Receiver of Public Moneys at Edwardsville, to the Treasury, in 1819?

Answer. Not until lately, when it has been mentioned in the public papers. I never heard of it until after Mr. Edward's memorial was communicated to Congress.

Question. Was it after that memorial was presented to Congress that you first heard the subject spoken of?

Answer. I have answered that question.

Question. Have you heard anything of that letter having been found in the Treasury Department since that memorial was presented to Congress?

Answer. I have not.

Question. Do you know whether the St. Louis Enquirer was received at that Department in 1819?

Answer. I do not know.

Question. Did you see the report of the Secretary of the Treasury of the 22d of March, of the present year, previous to its communication to Congress? Or did you know anything of the subjects of its contents before it was communicated?

Answer. I did not see or copy any part of the report before it went to Congress; I had only a general

knowledge of its contents, such as everybody else had from the call to which it was an answer. My business in the office did not lead me to any special knowledge of that report.

THOMAS DUNGAN.

SAMUEL M. M'KEAN sworn, at the request of Mr. Edwards:

I am a clerk in the Office of the Secretary of the Treasury I never heard of the letter said to have been written by Mr. Stephenson, Receiver of Public Moneys at Edwardsville, to the Treasury Department, before the evening of the day in which Mr. Edwards' memorial was presented to Congress. I attend, among other things, to that part of the business of the office which relates to the remission of fines and forfeitures, and also to the issuing of commissions. I have never heard of that letter having been found by any one in the Treasury Department.

S. M. M'KEAN.

PETER G. WASHINGTON sworn, at the request of Mr. Edwards:

I am a clerk in the office of the Secretary of the Treasury, and have been since July 1, 1822. I copied a portion of the documents submitted to Congress the present session by the Treasury Department. I first heard of Mr. Stephenson's letter to the Treasury on the day after the memorial of Mr. Edwards was presented to Congress. I have never heard that that letter has been found in the Department since the presentation of that memorial. The letters addressed to the office generally, and among them those which contain the correspondence with the banks, are mostly deposited in the room in which I am employed, and are considered as placed more particularly under my charge, and I think that, had such a letter been found, I must have heard of it. The letters have always been under my charge since I went into the office, but every gentleman in the office has free access to them, as a matter of course, in the discharge of his official duty. My duty in relation to them consists in placing and keeping them on the proper files, and restoring them to their places when removed. The custom of the office, in relation to letters sent from it, is to preserve in the Department the draught of letters, and to send away the fair copy of that draught made by one of the clerks. The original draught is sometimes made by the Secretary himself, and, if it is sufficiently fair, the original itself is sometimes sent and a copy retained. These copies or draughts are filed, and usually recorded monthly. No directions were ever given me by the Secretary to search for the letter of Mr. Stephenson; as I before said, I never heard of that letter until Mr. Edwards' memorial was presented. The instructions of the Secretary were, that all the letters to and from banks should be communicated to Congress; in consequence of which, many letters were so communicated which I did not conceive to be embraced in the call of the House.

PETER G. WASHINGTON.

PETER G. WASHINGTON again called:

By Mr. Webster:

Question. Are you able to state at what time the copying of the correspondence with the banks commenced, by order of the Secretary of the Treasury, which was called for by a resolution of the House of Representatives of May 8, 1822, and which was communicated, with a letter of the Secretary, to the House, of March 22, 1824?

Answer. Soon after the adjournment of Congress in 1823; I think, in April.

By Mr. Cook:

Question. Look at the paper now shown to you. [Here Mr. Washington was shown a paper submitted to the committee by Mr. Edwards as the enclosure in the letter of the Secretary of the Treasury to the Cashier of the Bank of Edwardsville, dated November 1, 1819.] Do you know the handwriting?

Answer. I do.

Question. Will you state whose it is?

Answer. It is the handwriting of the late Edward Fox, formerly a clerk in the office of the Secretary of the Treasury.

Question. Do you know who copied the letter of the 1st of November, above referred to, for the purpose of being communicated to the House with the report of the Secretary of the 24th of March last?

Answer. I do; it was copied by myself.

Question. Did the original copy of the enclosure accompany the original letter when copied by you?

Answer. It did not. The enclosure was a letter to a Receiver; the letters called for were letters to and from banks.

Question. Do you or do you not know that the Secretary of the Treasury could have commanded the same means during the recess of Congress in 1822, for the purpose of preparing the documents to accompany the report made on March 22, 1824, as were employed during the succeeding year to prepare the same documents; and if so, do you know what reason prevented their employment?

Answer. The power of the Secretary of the Treasury on that subject must always be the same. In his report of February, 1823, he states why all the correspondence with the banks was not then communicated, and I know of no other reason than the one he assigned.

Question. Do you know of any reason to doubt the truth of the facts stated in that report as the cause for not sooner communicating the correspondence?

Answer. I do not.

By Mr. Forsyth:

Question. At what time did Mr. Crawford return from Georgia to Washington in that year?

Answer. Late in the fall.

PETER G. WASHINGTON.

ROBERT NEWELL sworn, at the request of Mr. Edwards:

I am a clerk in the office of the Secretary of the Treasury. I never heard of the letter of Mr. Stephenson to the Treasury until I read the memorial of Mr. Edwards to Congress. I have been in the office three years. I had charge of the letters in the apartment where Mr. Washington now is, for a time. I never saw such a letter as that said to have been written by Mr. Stephenson in the Department. It is now nearly two years since I left that room. I have heard nothing of such a letter being found in the Department since Mr. Edwards' memorial was presented to Congress. Nothing was ever said to me, either by Mr. Crawford or by any other person, respecting that letter, previous to Mr. Crawford's report of March 22, 1824.

R. NEWELL.

ASBURY DICKINS sworn, at the request of Mr. Edwards:

I am a clerk in the office of the Secretary of the Treasury. I do not recollect that I had any agency in the negotiation concerning the collection or securing of the loan to the Franklin Bank of Alexandria after the time at which the terms of the agreement were settled, which appears to have been on the 5th of December, 1821. I never heard anything, as I now recollect, of the letter said to have been written to the Treasury by Mr. Stephenson, of Edwardsville, previously to the Secretary's directing me to draw up the report of the twenty-second of March last. I wrote the report according to directions previously given me by the Secretary, and when it was completed I read it to him. Before receiving those directions I do not recollect to have heard Mr. Stephenson's letter spoken of by any one. At the time Mr. Edwards was examined last year before a committee of the House of Representatives I was not present. I may have afterwards read Mr. Edwards' deposition concerning that letter, but when I received the directions above alluded to I had forgotten everything in relation to it. I received Mr. Crawford's instructions to prepare the report a few days before the papers were ready which were to accompany it. He expressed impatience at the delay which had taken place, and urged me to use despatch myself and to hasten the other persons employed. The greater part of the correspondence of the Secretary with the banks has passed through my hands ever since I have been in the office, which has been since October, 1816. I had no instruction to search for the alleged letter of Mr. Stephenson until the time I received Mr. Crawford's instructions to draw up the report. He then directed me to have the search made. I made the search accordingly but did not find such a letter, nor have I since heard of its being found. I searched for it on the files of the office; the letters had been put away in bundles. I directed the messenger to bring me the bundles which contained the letters of the period alluded to. I searched all of those bundles and examined all the files of letters they contained. Those bundles were not in my charge, and I cannot say how long they had remained untouched. They are usually put away by the junior clerks. They may be said to be in the particular care of Mr. Jones, or rather of the messenger; they are put away in cases. The report, as I believe, bears date the same day it was sent to the House, which, I think, was also the same day on which the fair copy was written. I do not remember that I had any conversation with Mr. Crawford on the subject of that letter, between the time when I first received his instructions to draw up the report and the time when I read the draught of the report to him. He then inquired whether I had made the search directed, and I informed him that I had and of the result. Mr. Richards, as far as I recollect, returned the letters he took away to copy in October or November. When he returned I employed several persons in making further copies. At the time I had the first conversation with Mr. Crawford concerning the letter of Mr. Stephenson, he directed me to search the records for an answer to that letter; which I did accordingly, and found none.

ASBURY DICKINS.

THOMAS F. RIDDICK sworn, at the request of Mr. Edwards:

The Bank of Missouri had a capital of $250,000, of which sum $40,000 was placed in an Office of Discount and Deposit at St. Genevieve, which said office was entirely under the control of the principal bank in all respects; the Cashier and all the Directors and officers were appointed by the mother bank and removed at pleasure; their general operations were also directed by the principal bank at St. Louis. The office at St. Genevieve loaned money on personal security, but never on pledge of stock. Stockholders residing at St. Genevieve pledged their stock at St. Louis if they wished to borrow on that security; not more than 80 per cent. was allowed on such pledge, which was considered only as collateral security; those loans were always considered safe, and better than any personal security. I believe that this stock has never fallen below 80 per cent.

A large amount of public moneys had accumulated in bank prior to the 9th of August, 1819, but it consisted, for the most part, in notes of the various banks of the west which had been received by the Land Offices and could not be used by the Treasury in discharge of debts due by the Government. The Bank of Missouri, at its own expense and risk, (and for which they have not as yet been allowed any compensation) converted those funds to a large amount, say $600,000, into such funds as would pay the Treasurer's drafts at St. Louis, but the Government having no occasion to disburse any considerable amount at St. Louis (as the bank was informed) made a proposition to the bank to transfer its funds to the Bank of the United States and certain of its branches; and, as a compensation for this service, agreed that $150,000 should remain in bank as a permanent deposit, but which might, nevertheless, be drawn on when disbursements could be made at St. Louis; agreeing, also, that further compensation should be made if the deposit should not be found adequate for the service proposed to be rendered. This was accepted, in part, on the 9th of August, 1819, and a sum amounting to near $450,000, before and after that time, was paid to the Bank of the United States and branches, or funds worth four per cent. premium to the bank; the permanent deposit was frequently drawn on and reduced to an amount considerably below $150,000. The bank has been allowed no compensation as yet for this service beyond what the uncertain benefit of this deposit might have been worth to them, which, under the circumstances, ought to be estimated at a very small sum. Moreover, the Bank of Missouri had to encounter the hostility of nearly all the institutions of the west from whom the Bank of Missouri had to make demand for specie funds or such other funds as would satisfy the Treasurer's drafts, and also from gentlemen connected with those banks; this fact will be seen by a reference to the printed correspondence with banks. See letters from the President of the Bank of Kentucky to the Secretary of the Treasury, May 25, 1819, September 29, 1819; a letter from Hon. W. H. Crawford to the President of the Bank of Kentucky, July 30, 1819; also, letters from Hon. Ninian Edwards, a senator of the United States, May 10 and 12, 1819, directed to Thomas F. Riddick, one of the Directors of the Bank of Missouri; which said letters last named are filed with the Committee of Ways and Means, in support of a petition presented by said Thomas F. Riddick, as agent for the bank.

It will also be seen by a reference to the several agreements made by the bank with the Treasury Department, and the general correspondence, also the original certificates of deposit, that the Bank of Missouri never became bound until August 9, 1819, to pay over to the Treasury any other or better funds than such as they should receive from the Land Offices, not having it in their power before the said 9th of August to direct what kind of paper should be received in payment for lands; this was before that date regulated by a list furnished the different Receivers by the Treasury Department, and whether at par or not was received from them by the Bank of Missouri, and certificates of deposit issued by the Cashier, stating the amount received in par funds and the amount received in such paper as had been authorized by the Treasury Department. The bank, therefore, clearly had a right to pay over such funds

as was received by them; and the Government in common justice is bound to make compensation for the risk and loss incurred by the bank in converting those funds into such other funds as could be used by the Treasury in payment of demands against them.

Whenever these fair demands of the bank shall be liquidated and settled, the amount that will be then found due the United States will be much lessened, and the amount that has been transferred by the bank ample and greatly more than sufficient to satisfy every cent justly due by the bank to the United States; the amount that now stands charged on the books of the Treasury is the nominal amount of all the moneys of every description paid into the bank by the Land Offices without any deduction having been made for services rendered and for risk and loss in exchange.

It will also be seen by reference to the reports of the bank and the report of the committee of the Missouri Legislature that the Bank of Missouri did, at all times, conduct its operations with great care and circumspection, never having an average discount, including notes on pledges of stock, (with the exception of the deposit of $150,000,) greater than the capital stock, and never having its paper signed for circulation to a greater amount than $204,938 29, of which sum (if the books of the bank were within my reach) I am satisfied it would be found that the average amount in circulation, from the completion of the payment of the capital stock to the day of suspension, did not exceed $80,000; the greatest amount that appears ever to have been in circulation was $153,899 50, of which sum $25,000, or near that amount, was specially deposited in the Branch Bank of the United States at Lexington, and belonged to the Bank of Missouri; at the time the bank suspended payment only $86,000, or thereabouts, was in circulation.

The suspension in August, 1821, cannot, therefore, be attributed either to excessive loans or to an excessive issue of the paper of the bank, but to the general situation of the western country, which rendered it impossible for the bank to collect from its debtors with sufficient promptness to meet the demand for specie created by the pressure that existed at that time, and to the circumstance of this bank being almost the only one who continued to pay specie on demand in the western country.

By Mr. Cook:

Question. Were you President of the Bank of Missouri in 1821?

Answer. I was.

Question. Do you believe that the account and monthly returns made by that bank were correct, just, and true?

Answer. I believe they were, and that the statements made by myself and forwarded to Mr. Crawford, under date of June 30, 1821, were also just and true.

Question. From what Land Office were the largest deposits made in the Bank of Missouri between July 1, 1818, and August 9, 1819?

Answer. From the Land Office at Franklin.

Question. When did General Smith make his first deposit?

Answer. I believe on the 7th of December, 1818?

Question. How much larger do you suppose those deposits were than those from any other office?

Answer. Something more than twice the amount from the office at St. Louis.

Question. What was the amount of General Smith's deposit between the aforesaid periods?

Answer. I believe they amounted to $460,966 76; this I take from a memorandum in my possession.

Question. Were any of the notes received from him refused to be received as cash, and were they specially entered; if so, state the circumstances, and whether General Smith was apprised thereof?

Answer. General Smith very seldom made his deposits in person, his office being near two hundred miles from the bank; they were generally placed in bank by some person in whom the General had confidence, travelling to St. Louis or to the eastward, or by boats trading on the Missouri river. I do not remember that the bank ever had any difficulty with General Smith or any other person about his deposits. I believe they were always made in the same funds which he received for lands, and certificates were issued to him by the Cashier, stating the kind of funds deposited, which certificates were no doubt forwarded by him to the Treasury Department as vouchers.

Question. What amount of internal taxes were deposited, much or little?

Answer. I do not remember of any deposits being made of that description.

By Mr. Forsyth:

Question. When were the deposits of the Tennessee paper made by the Bank of Missouri at Louisville?

Answer. I believe in May, 1820, having promised Mr. Crawford to have it forwarded as soon as I arrived at St. Louis, which was done by a special agent. I was afterwards informed that the agent of the Nashville Bank received the amount of Nashville Bank paper, but that the agent of the Tennessee Bank had left Louisville a short time before the arrival of the special agent of the Missouri Bank at Louisville and deposited it in the Branch Bank of the United States.

Thomas F. Riddick states that while a Director of the bank he had access at all times to the books and papers of the bank, being nominated by the President to act in his place *pro tem.* when he was absent at his farm, or was holding Indian treaties, or otherwise unable to attend; that he counted the Tennessee and other paper transferred to the Treasury before the proposition of the 9th August, 1819, was made, and that he took with him when he left St. Louis for Washington City in December, 1819, a considerable part of the funds intended to be so transferred, and made a deposit at Chilicothe and in the Branch Bank of the United States at Washington, which deposits made a part of the charge against him as agent of the bank, as contained in the monthly returns made to the Treasury in the months of January and February, 1820; also that what I have stated before the committee, of my own knowledge, is true, and what I have stated as matter of opinion I believe to be true.

By Mr. Cook:

Question. When you discounted notes for individuals in what kind of money did you advance the amount of such notes?

Answer. Those discounts were usually left in deposit and drawn for in small sums at different times; they were then paid, generally, in notes of the Bank of Missouri, or in such other funds as the bank had at the time, or as the party demanded.

Question. Did not the amount of discounts by the Bank of Missouri always very greatly exceed the amount of its notes in circulation?

Answer. It is my impression that it always greatly exceeded that amount.

Question. Did not so much of the money advanced for discounts as exceeded the amount of the bank's own paper consist of moneys deposited in it by the Government?

Answer. It consisted in part of such moneys, but not wholly, because some part of those moneys were in notes that the bank could not use.

Question. Did the bank ever refuse to receive deposits made by General Smith as cash?

Answer. So much of the deposit as was in cash was received as cash, so much of it as consisted of bills was receipted for as such, but the whole amount was credited together without distinction.

Question. Did you, in receiving deposits from the Land Offices, ever keep a separate account of paper and of cash?

Answer. A memorandum of the sort of funds received was kept by the Cashier, but it did not go into the books of the bank. But in private accounts with individuals a separate account was in some instances kept for cash and for notes, by inserting in the ledger, opposite to the sums paid, the words "cash" or "foreign notes," as the case might be. When deposits were made on account of the United States, a certificate was issued by the Cashier, stating whether the deposit had been made in cash, or in such notes as the Land Offices were directed to receive.

Question. Was not the principal part of the funds deposited by Government in the Bank of Missouri transferred to the Branch Bank of the United States at Louisville, and to other banks in Kentucky?

Answer. There was no transfer made to any other bank in Kentucky but the bank at Louisville. The transfers made by the bank will appear in the communication of the Treasurer, No. 2, dated March 1, 1823.

Question. Were not the funds which you say were worth four per cent. premium, and paid over by the bank to Government, derived from the Government deposits?

Answer. Some part of them might have been; the greater part was by the purchase of bills on the Government sent to the Bank of the United States at Philadelphia, and to the Branch Bank of the United States at Washington City, for collection on the part of the bank.

Question. Were not these bills paid for in the funds that had been deposited in the bank by the Government?

Answer. They were paid for out of the general funds of the bank.

Question. Did such general fund embrace the public deposits?

Answer. There was no distinct account kept between the public funds and the general funds of the bank.

Question. Was any premium paid by the bank on these Government bills in their purchase; and if so, on how many and to what amount?

Answer. A premium was frequently paid by the bank upon such purchase; I cannot say, without a reference to the books of the bank, to what amount; a premium of two per cent. has in some cases been paid, but it varied from par to one and a half and two per cent. When the bank sold their own bills on the Bank of the United States it sold them at four per cent. premium.

Question. By what means did the Bank of Missouri acquire funds in the Bank of the United States on which it could draw bills?

Answer. By collections made in the Bank of the United States for and on account of the Bank of Missouri, and, perhaps, in some instances, by deposits made there by individuals to the credit of the Bank of Missouri.

Question. What description of debts were they which were collected by the Bank of the United States for the Bank of Missouri?

Answer. A part of them were bills drawn by individuals, and a part of them were bills drawn by persons authorized to draw on the Secretary of the Treasury for the expenditure of public moneys; much the greater part, I believe, however, were bills drawn by individuals.

Question. You stated that the Government funds in the Bank of Missouri, at the time it suspended cash payments, consisted of bills which could not be converted into cash, or such suspension would not have happened. I wish you now to state what amount of bills deposited on account of the Government was in the Bank of Missouri at the time the suspension of cash payments took place?

Answer. I was not correctly understood if it was supposed that I said that the Government funds in bank at the time of the suspension consisted of bills. Although a credit then stood on the books of the bank to the United States, the money corresponding with that credit was not actually in the bank. The amount due the Government, as appeared on the books of the bank, was very near the amount allowed as a permanent deposit, which was payable six months after the bank ceased to be employed as an office of public deposit.

Question. What sum did then remain in bank of bills which had been entered to the credit of the United States?

Answer. A very small amount—perhaps about $5,000.

Question. When the arrangement was made with the Bank of Missouri under which it was to retain a permanent deposit, what was the amount first understood it should so retain?

Answer. $150,000.

Question. Was there not an arrangement made with the Secretary of the Treasury, by letters of August and September, 1819, by which the same moneys were to have been received by the Government (or a considerable portion of them) as were received under the subsequent arrangement of March, 1820? And did not the bank fail to comply with the first arrangement alluded to?

Answer. The letter of the bank of August 9, 1819, and the arrangement made by me in March, 1820, will answer that question. Whatever paper, under the first arrangement, was not transferred, the bank, of course, was accountable for in cash.

Question. Was not a part of the same paper which was to have been transferred under the first arrangement afterwards received under the second in a depreciated state?

Answer. No. I believe that all the paper transferred to the Government was of the same value at the time of the transfer as it was at the time it was agreed to be transferred by letter of the 9th of August.

Question. Was not a considerable part of the paper transferred under the arrangement contained in the letter of March 20, 1820, greatly below par?

Answer. It was.

Question. What amount of it, as nearly as you can recollect, was below par?

Answer. Something more than $100,000.

Question. Did the Bank of Missouri ever receive an answer from the Secretary of the Treasury to the following clause in a letter signed by Aug. Chouteau, President, and dated August 9, 1819, viz:

"As to the Bank of Edwardsville, the only one near us, we cannot give it our confidence. Their paper is received with distrust even in their own neighborhood, and passed from hand to hand as soon as

possible. Owing to the intimate connexion which it had with the Bank of St. Louis, which cannot pay its debts, and has entirely discontinued business, the capital stock of that bank has been taken, for the most part, and is now owned by five or six individuals, some of them living out of the State, and the direction secured to such persons as they may choose to appoint. There are other objections, which we forbear to mention."

Answer. I never saw any answer to this clause, and believe that none was ever received by the bank.

Question. Was the opinion here expressed by the Bank of Missouri concerning the Bank of Edwardsville continued to be entertained by the former for any length of time after the date of that letter, and how long?

Answer. I cannot positively say as to any other person but myself; but my impressions were changed after I understood from common report that the Bank of Edwardsville had determined to forfeit the stock of those persons who should not pay the requisitions of the bank. I understood that General Payne, of Kentucky, and others, were stockholders to a large amount, and I believed that they would fail to pay for the stock subscribed if demanded in cash. This, I think, was my impression at the time; but it was derived merely from report then prevailing.

THOS. F. RIDDICK.

Exhibit of the amount, &c., deposited in the Bank of Missouri by the Receivers of the Land Offices at Kaskaskia, Franklin, St. Louis, and Edwardsville, as contained in twenty-six certificates of deposit, enclosed in a communication from the Secretary of the Treasury, of June 8, 1824, to the committee appointed on the address of N. Edwards.

Land Offices.	Date of the certificates of deposit.	DEPOSITED.		Amount of each deposit.
		In the notes of banks designated by the Secretary of the Treasury.	In specie in United States Bank notes, and in the notes of the Bank of Missouri.	
Kaskaskia	September 4, 1818	$20,243 00	$4,236 21	$24,479 21

JAMES L. ANTHONY sworn, at the request of Mr. Edwards:

I am a clerk in the office of the Secretary of the Treasury. I first heard of Mr. Stephenson's alleged letter to the Department since Mr. Edwards' memorial was presented to Congress. I have at all times free access to the room in which the bank letters are kept, and have had occasionally to go there to consult those letters with respect to deposits by individuals in payment of debts to the Government. I was not consulted previously to the report made by the Treasury to Congress on the subject of its correspondence with the banks as to my knowledge of the receipt of the alleged letter from Mr. Stephenson. I have not heard that that letter has been found in the Department since Mr. Edwards' memorial was presented; nor have I ever heard from any person in the Department, or in any way connected with it, or from any other person, that such a letter ever was there, or that the Secretary of the Treasury had at any time seen it.

J. L. ANTHONY.

JOHN FORSYTH, of the House of Representatives, sworn, at the request of Mr. Edwards:

I first heard of the alleged letter of Mr. Stephenson to the Treasury after Mr. Edwards' memorial was presented to Congress. A day or two after Mr. Crawford's report came into Congress I read that report, but had no conversation with any person respecting Mr. Stephenson's letter until afterwards. I never have heard from the Secretary of the Treasury, from any person connected with the Treasury Department, or from any member of Congress, that such a letter has been found. I was shown by a member of the

House of Representatives a letter from a gentleman in Richmond, in which the writer stated that a passenger on board the steamboat from Washington down the river had said that Mr. Cook, a member of Congress from Illinois, had Mr. Crawford's answer to the letter of Mr. Stephenson ready to produce; on which I called upon the Secretary of the Treasury, and mentioned to him what I had heard. He replied, "it was possible, but it scarcely could be so."

JOHN FORSYTH.

JONATHAN JENNINGS, of the House of Representatives, sworn, at the request of Mr. Edwards:

By Mr. Cook:

Question. In the report made by the Secretary of the Treasury to Congress, February 14, 1822, he states that "for the public money on deposit in the Bank of Vincennes at the time of its failure collateral security has been obtained." I wish you to state your knowledge of the nature of that security.

Answer. The collateral security consisted of assignments of certain bonds given to the Bank of Vincennes in behalf of the State of Indiana, and a note of a Mr. Piatt and his endorsers, as also a transfer, in trust for the use of the United States, of certain real property. The value of the collateral security, when given, I should have estimated, provided there had been no substantial objections to the character and circumstances under which the assignments and transfer were made, as being worth a sum not to exceed $80,000; the greater part of which, however, since the assignments and transfer, owing to various causes, has become unavailable to the United States, and, in my opinion, the residue will not yield more than twenty thousand dollars.

Question. Do you know of any steps taken since the arrangement of 1821 to get security for this debt?

Answer. I know of none except what was obtained through General Noble, at Brookville, Indiana, in the year 1822, of the value of which I am unacquainted.

By Mr. Floyd:

Question. Had you any agency in procuring the Bank of Vincennes to be made a depository of public moneys?

Answer. Among others I recommended that measure. The bank then appeared from its quarterly returns, submitted to me as Governor of the State, to be entirely solvent. Those returns contained only the general accounts of the bank; nor was the institution required by any provision of its charter to submit any list of its debtors, and the amount owing by each, to any State authority, which it uniformly refused to do when applied to for that purpose.

Question. When the bank thus refused, and you were Governor, did you communicate that refusal to the Secretary of the Treasury, or did you at any time express to him any doubts or suspicions touching its solvency?

Answer. I never entertained any doubt of the solvency or integrity of the Bank of Vincennes until late in the year 1820, and the records of the State Government will show that, in my communications to the Legislature, I did not recommend an examination into the situation of the bank until December, 1820; prior to which time it will appear, however, from the communications of the Secretary of the Treasury to the bank, that the latter had committed "a breach of its engagement" with the former, in failing to pay drafts drawn by the Treasurer as early as the 19th of October, 18th of November, and 28th of December, 1819, and 10th of March, 1820, of which failure to pay those drafts I have no recollection of having had any information until the session of Congress before the last. I was informed, however, of one small draft, drawn on the bank by the Treasury, having been dishonored during the winter of 1820-'21, shortly before I personally examined said bank. Upon this examination I discovered the bank had not two hundred dollars of available funds, and that a draft drawn upon it for moneys, in favor of the Pension Agent, for the Indiana roll, had been diverted from its legitimate object, to the prejudice of the Government. I advised the Secretary of War of the circumstances. I made no communication to the Secretary of the Treasury when the bank declined giving a list of its debtors and the amount owing by each. The bank was not bound to give such list, nor was it required by me only in compliance with resolutions of the Legislature, nor was it incumbent on me, or necessary, to detail to the Treasury Department such refusal on the part of the bank, and the reasons offered by the bank as inducing a refusal on its part to give publicity to such list, inasmuch as the Secretary of the Treasury made the rendition of such list by the bank, quarter-yearly to himself, a condition upon which deposits were to be made in the Bank of Vincennes, and which was acceded to by the latter.

JONATHAN JENNINGS.

LANGDON CHEVES sworn, at the request of Mr. Edwards:

I became President of the Bank of the United States on March 6, 1819, and continued till the beginning of January, 1823. I know but very little concerning the liability of local banks to the Government of the United States. My duties in the United States Bank consisted wholly of superintendence; I could not concern myself with the details of its business. I considered the liability of local banks to the Government as a matter external to the business of the United States Bank. The chief of what I do know on that subject is derived from a letter from the Cashier of the Bank of Edwardsville to the Cashier of the Branch Bank of the United States at Louisville, dated May 2, 1820, a copy of which I now produce. [Here Mr. Cheves read the letter.]

Question. When the Treasury of the United States gave drafts to the Bank of the United States on any of the local banks, did the Bank of the United States feel itself bound to receive in payment of such drafts anything else than its own paper or the legal currency of the country?

Answer. The Bank of the United States did not feel itself legally bound to receive anything but its own paper and the legal currency of the country; but it was in the habit, with a view of being useful to the Government and the country, of receiving almost anything that it could convert safely and conveniently into cash.

Question. The rule of the United States Bank in receiving deposits is, that when a deposit is made generally, the bank is liable for the amount of such deposit in cash, is it not?

Answer. That is the general rule, to which I recollect but one exception, which was under a particular arrangement in respect to certain western banks, by which the bank received deposits from Receivers of Public Moneys in current bills of these banks, and credited them as cash on the condition that, if not duly paid, they should again be charged to the Government.

Question. This exception grew out of an arrangement which took place after you entered into the superintendency of the United States Bank, did it not?

Answer. Yes.

By Mr. Forsyth:

Question. Do you know what is the per centage of the loss of the United States Bank on their debts in the western States?

Answer. I cannot state with accuracy. It exceeded ten per cent., and amounted, perhaps, to fifteen.

Question. As President of the Bank, you had, of course, constant intercourse with the Secretary of the Treasury. Can you testify as to the zeal, integrity, and ability with which that part of his duty which relates to the collection of the public moneys was performed, so far as it came under your observation?

Answer. I had much and anxious intercourse with the Secretary of the Treasury, personally and by letter, in relation to the currency of the country and the collection of the public debts, as well in the Atlantic as the western States. It was a crisis of unexampled difficulty. The great object was to restore and preserve a sound currency, generally, through the Union. As it regarded the Atlantic portions of the Union, it appeared to my judgment to involve the soundness of the currency; but as it regarded the western States it seemed to me to involve the existence of any currency at all. I understood distinctly that it was the object of the Secretary of the Treasury, in the western States, to prevent its sudden and total prostration. In my opinion the Secretary of the Treasury displayed much ability, great zeal and industry, perfect integrity, and commanded as much success as was practicable under the circumstances of the times.

By Mr. Cook:

Question. In expressing this opinion, do you do it with a full knowledge of the connexion between the Treasury Department and the western banks in which the public moneys were deposited, and of the manner in which those banks fulfilled their engagements with the Treasury?

Answer. I do not do it with a full knowledge of these circumstances, but I do it with a great deal of knowledge of the subject. If this question be intended to refer to my answers to previous questions concerning the arrangements between the western banks and the Government, it is necessary to state that I understood those questions and answers to refer to the details which governed the transactions of those banks with the Government, of which I am ignorant; but the answer which I have just given refers to the general conduct and the success of the measures of the Treasury; and I know them from my correspondence and intercourse with the Secretary, and from the operations of the Bank of the United States, through which large sums of money were collected for the use of the Government in the western States.

LANGDON CHEVES.

Hon. NINIAN EDWARDS sworn, by order of the committee:

By Mr. Livingston:

Question. You stated in an examination before a former committee, in your answer to the 8th interrogatory, that you had prevailed upon Colonel Stephenson to write a letter to the Secretary of the Treasury, relative to the propriety of continuing deposits of public money in the Bank of Edwardsville, and that you saw him write the letter and enclose a publication made by you therein. The committee wish to know whether you read that letter immediately after it was written, and, more particularly than is stated in that deposition, what passed between yourself and Colonel Stephenson on that occasion?

Answer. The circumstances under which it was written were these: Colonel Stephenson was at that time the Receiver of Public Moneys, and also the President of the bank. He was very unwilling that I should withdraw from the bank, and supposed that my doing so would be likely to impair its credit and increase the responsibility upon him for the deposits in it. I was myself glad of the opportunity of circumstances so favorable to my advising him, with success, to write the letter to the Secretary, and he was very easily prevailed on to do so, and applied to me to write such a letter for him as I thought he ought to write to the Secretary, and I accordingly wrote the draught of such letter, went to his office, remained there until he had copied it, and afterwards compared the copy made by him with the draught. At the same time that he wrote the letter, he enclosed, to be sent with it, as I believe was his intention, a printed copy of my publication announcing my intention to withdraw from the Bank of Edwardsville. I have no doubt that he sent the letter, because, from the conversation I had with him, it appeared to be his desire to send it, so far as I could discover, and his subsequent conversation left no doubt on my mind that he did send it. I have no recollection of having seen the original draught above mentioned from the time it was copied by Colonel Stephenson until the time of my late return to Edwardsville. It was then shown to me by Thomas Lippincot, who was employed in doing business in the Land Office, and who took it, in my presence, from among the files of that office. The copy now presented was made out, I think, by himself, and is either sworn or affirmed to as a true one. Mr. Lippincot is a gentleman of fair and respectable character, and, as I understand and believe, was secretary or clerk to one branch of the last Legislature of Illinois. Although I cannot swear that this is a literal copy of the original draught, I know it to be substantially correct, nor have I the least doubt of its being literally so. Upon the original draught, as found on the files of the office, was an endorsement in the handwriting of Mr. Stephenson, the words of which were, as far as I recollect, the following: "*Copy to the Treasury Department, October*, 1819," or words to that effect. An additional reason which induces me to believe that the letter was sent is, that the said Mr. Lippincot also showed me the copy of another letter, which he took from the files of the office, which was in the handwriting of Colonel Stephenson, the late Receiver, and purported to be a letter from the said Receiver to Mr. Crawford, dated, I think, the 22d October, 1819, which, from the subject of it, appears to refer to the before described letter.

By Mr. Forsyth:

Question. Was there any part of the original draught of the letter from Mr. Stevenson of October 12, 1819, underscored?

Answer. I do not recollect that there was. I perceive that there is an underscoring in a part of the copy now presented, which may have been done in consequence of the object for which this copy was taken, which originally was not that it might be sworn to, but that it might be published. It was sworn to subsequently to the arrival of the summons from this committee to myself.

Question. Was that underscoring made by you, or at your request?

Answer. I do not think it was made by me, and I do not remember that it was made at my request.

I do suppose it was made by the gentleman who took the copy, and that it was done by him in consequence of his knowledge of my object in searching for the letter.

Question. You say that you perceive a part of the copy is underscored. Is this the first time you have noticed the circumstance?

Answer. I do not recollect noticing it heretofore; but think it is highly probable that I did, as a copy was intended for publication, and this is a point to which I should naturally have wished to call the public attention, and of which wish the gentleman who made the copy was well apprised.

Question. Your belief is that this underscoring was done before the affidavit was attached to the copy?

Answer. Such is my belief; I have no doubt of it.

Question. This copy has been already published. Have you seen the publication of it in one of the public newspapers of this city?

Answer. I have.

Question. Was the copy for that publication furnished by you?

Answer. I submit to the committee whether that is a proper question.

[Mr. Forsyth here stated that he had a particular reason for making the inquiry; the letter as published contains a part in italics, which corresponds to the part underscored in the copy now presented; and he wished to ask whether the types of the publication were set from this copy?]

Answer. I have no objection to answer, provided the committee think it a proper question. This copy is that from which I suppose the publication was made, as it was furnished by myself for that purpose.

Question. How long was it out of your hands?

Answer. Not more than a day or two, as well as I can recollect.

Question. Was it sent to the editors of the paper in which it was published, or was it delivered personally?

Answer. I do not recollect which; my impression is, that I delivered it to some person to take it to the printers; probably Mr. Cook. Whoever took it, I consider the act as equivalent to a personal delivery of it by myself.

Question. Did you search, or cause search to be made, in the office of the Receiver at Edwardsville, for the answer of the Treasury Department to the letter of which you now present a copy?

Answer. I went to the office for the special purpose of endeavoring to ascertain if there was not a letter in it from Mr. Crawford to the late Receiver, directing him to continue the deposits in the Bank of Edwardsville.

Question. Did you find the answer to the letter of which you now present a copy?

Answer. I found a letter from Mr. Crawford of the 6th of August, 1819, I think; another of the 1st of November, same year; and one of April, (probably the 20th,) 1820. The second of these, viz: that of the 1st of November, it is my opinion, was written in consequence of the letter of the Receiver of October 12, 1819.

Question. You state in your examination before the committee of the last Congress that Colonel Stephenson informed you, after he had written that letter, that he received a letter from the Secretary of the Treasury, directing him to continue the deposits in the Bank of Edwardsville. In your letter to the Secretary of the 9th February, 1822, you say that he (meaning Mr. Stephenson) informed you that that letter had been answered. I wish to know exactly what the declaration made to you by Mr. Stephenson was; whether he said that he had received an answer to the letter, or whether he said that he had received a letter directing him to continue the deposits in the Edwardsville Bank?

Answer. The letter of the 12th October was written previously to my coming on to Congress. On my return from Congress, after the session succeeding the date of this letter, I asked the Receiver what answer Mr. Crawford had given to that letter? He told me either that he had received a letter from Mr. Crawford, directing him to continue the deposits, or that Mr. Crawford had written to him, directing him to do so; from which I understood him that he had received an answer from Mr. Crawford. I am positive he told me that he had received a letter from Mr. Crawford, directing him to continue the deposits; but whether he alluded to the letter of the 1st November, 1819, or to that of the 20th April, 1820, or to any other letter in particular, I do not know; for I do not recollect to have seen either of these letters from Mr. Crawford until my late return to Edwardsville.

Question. Did not you consider that letter, which you draughted for Mr. Stephenson, as a letter from the Receiver of Public Moneys to the Secretary of the Treasury?

Answer. It was certainly a letter from the Receiver of Public Moneys; but he was at the same time President of the Bank of Edwardsville. I perceive from the copy it is dated at the "Receiver's Office;" I know that the Receiver's letter was written there from the draught alluded to.

Question. You state that you returned from Congress in the spring of 1819, and found the Bank of Edwardsville under great pressure. I wish to know whether you apprised the Secretary of the Treasury that such was the fact, or advised the Receiver of Public Moneys to withhold deposits in that bank on account of it?

Answer. I do not recollect that I did write directly to the Secretary myself, but I am under an impression that the President of the bank did write him a letter, the object of which was to induce him to forbear drawing upon the bank while it was under difficulty. I made a communication to Colonel Johnson during that summer, whose brother-in-law held more stock in the bank than any other person, of the difficulties with which the bank was then struggling, and with a view that he should, and the expectation that he would, communicate the same to Mr. Crawford. I am induced to believe that he did so from a letter from Mr. Crawford to Colonel Johnson of the 15th July, 1819, which I now submit to the committee, and which acknowledges the receipt of a communication from me to Colonel Johnson upon the subject alluded to. Nothing of this, however, was done with a view to show Mr. Crawford the danger to Government of continuing the deposits in that bank, but rather to induce him not to draw upon it at that particular time.

The difficulties of the bank I considered, at that time, but temporary; I thought it could be conducted through them, and did not feel myself at liberty to withdraw from it until this had been done; which, finally, was effected, as I conceive, in a great measure, by my own diligent management of, and my assistance to the bank.

I do not recollect that I did, particularly, advise the Receiver of Public Moneys to withhold deposits in the Edwardsville Bank at that time, nor until after I had made my publication in the St. Louis Enquirer.

Question. After your publication, and when you considered the bank as out of danger, you then advised the Receiver to withhold deposits?

Answer. Yes. My object, in that publication, was to free myself from all responsibility for the bank; to state what I believed to be the real truth concerning it, and to leave the public and the Secretary to judge for themselves how far they could confide in it without any responsibility on my part.

Question. You state that you enclosed a copy of this publication to Mr. Crawford. Was it accompanied with anything written to him, or simply covered with an envelope and directed to him?

Answer. I think it was simply enclosed and directed to him; and that nothing was written but the direction.

Question. Did you not write, at Mrs. Stephenson's request, a letter purporting to be from her to the Secretary of the Treasury, and dated September 18, 1819?

Answer. I submit to the committee whether this is a proper question. I am perfectly willing to answer it if they so decide, and I am also willing to waive the objection.

[The committee having decided that the question was a proper one.]

Answer. I did write a letter for Mrs. Stephenson, which I believe she copied, signed, and, I have no doubt, sent in reply to a letter from Mr. Crawford to Colonel Stephenson, which was received during his absence on a journey to Kentucky; and the original draught, which was written by myself, I have lately seen on the files of the Receiver's office at Edwardsville.

Question. Do you recollect whether Mr. Stephenson was in Edwardsville at the time your publication in the Enquirer appeared?

Answer. I do not.

Question. After your publication, and before the writing of this letter of Mr. Stephenson's, which you allege to have been written, you knew that complaints had been made, on the part of the Treasury, of his withholding deposits of public moneys in his hands?

Answer. I have no knowledge of having seen or heard anything on that subject, saving the letter which arrived at Edwardsville, directed to Colonel Stephenson, during his absence.

Question. Do you, or not, know that before or about the time of this transaction, in the spring, summer, or fall of 1819, Colonel Stephenson had loaned large sums of money to different individuals?

Answer. I do not recollect of knowing or hearing of any such loans by him. A list, I understood, was found after his death of moneys loaned; but this was subsequent to the time mentioned in the question, nor do I remember of hearing the name of more than one individual to whom it was then ascertained he had loaned money.

Question. You insinuate in your memorial to Congress that there was a letter written by Mr. Crawford to the Receiver at Edwardsville, which was, in reality, an answer to the letter alleged by you to have been written by Mr. Stephenson, but which was so contrived as to appear not to be such an answer; can you assign any conceivable motive which could lead to such a course, on the part of Mr. Crawford, at that time?

Answer. Mr. Crawford, as I believe, had received much information against the bank at Edwardsville, some of which appears in the documents, and particularly the letter of the President of the Bank of Missouri, dated, I think, August 9, 1819. This was naturally calculated to excite his fears for the safety of the deposits; my withdrawal from the bank was calculated to confirm those fears; and I think it highly probable that he might not have been willing to disclose any circumstance which was calculated to increase his responsibility for continuing those deposits in that bank; and I believe those deposits were continued there more through the influence of General Payne and his connexions than from that of any other persons.

Question. I understand you, then, to say that Mr. Crawford, at that time, anticipated the failure of that bank, and sought to provide a screen from the responsibility of having continued the public deposits there?

Answer. My opinion is, that he did receive my publication and the Receiver's letter, and that he has withheld them, and I have already assigned the motive which I supposed might have governed him in doing so; but whether that resulted from an actual anticipation of the failure of the bank, or from an apprehension only that it might fail, I do not undertake to decide.

Question. You say that you determined to sustain that bank, and you lay great stress on the circumstance of your withdrawal from it; will you state how you were enabled to sustain it?

Answer. I endeavored to sustain it by my influence, by my own funds, and by my personal attention to it.

Question. Did you make any deposit about that time with a view to sustain it; and if so, to what amount?

Answer. I aided it by advancing my own money or bills; but cannot say to what amount. I held myself ready to give it further assistance if it had required it.

Question. When you stated that you did not see the draught of the Receiver's letter until "your late return to Edwardsville," did you mean your return in April or May last?

Answer. I did.

Question. Did you see that draught after it was copied by the Receiver and examined, and previously to its being taken from the files by Mr. Lippincott?

Answer. Not that I recollect.

Question. Was a letter-book kept in the office of the Receiver at Edwardsville?

Answer. I believe there is.

Question. Is this letter from the Receiver copied in that book?

Answer. I think that in the letter-book I saw that letter does not appear. There are also other letters, and one or more, I think, from Mr. Crawford, which are on the files in the office, which are not recorded in the book I examined; or if they were, I did not see them.

Question. Are there any of the letters from the Receiver to the Department of the Treasury of the same year with the alleged letter, which are not recorded in that book? I include Mrs. Stephenson's letter in this question.

Answer. My examination of the letter-book was so slight that I cannot pretend to say whether it was so or not. I do not recollect whether Mrs. Stephenson's letter appears upon the letter-book or not. It is my impression that Mr. Crawford's letter of the 1st of November, 1819, is not recorded in the book that I saw; though I cannot speak with certainty about it.

Question. Were you not engaged prior to your journey to Edwardsville in preparing a publication with respect to these documents against Mr. Crawford?

Answer. To that question I positively object. My communication to the House is here; it speaks for itself. It cannot be material when or where it was written. [The committee decided he was not bound to answer.]

Question. You have stated in your communication to the House of Representatives that you are the author of these A. B. publications which accompanied your address; are you not also the author of the other A. B. publications which appeared either before or since in the Washington Republican, against the Secretary of the Treasury?

Answer. To that question I object to answer. I am answerable only for those A. B. publications which I have acknowledged. [The committee decided that he was not bound to answer.]

Question. Have you not, at another time, denied your being the author of the said A. B. publications which you now avow?

Answer. To this question I also object to answer. [The committee decided that he was not bound to answer.]

Question. The packet I now present to you contains the original address presented by you to the House of Representatives; will you please to separate those parts of that address which were sent to this city by mail from those parts which were supplied after its arrival here?

Answer. The communication is before the House as a whole, and as a whole was referred to this committee. I do not feel myself under any obligation to state how its several parts got here. [The committee decided that he was not bound to answer.]

Question. I wish to know whether you are not the author of the printed letter now shown to you, and which is contained in the Washington Gazette of December 24, 1821, and dated the 12th of that month, and purporting to be written by a gentleman in Ohio?

Answer. I do not consider myself bound to answer the question, unless the committee shall so direct me. [The committee decided that he was not bound to answer.]

Question. Are you the author of all those A. B. publications which accompany your memorial to Congress?

Answer. I am.

Question. Were not the materials of your memorial to Congress collected and prepared by you before you had seen that letter of Mr. Crawford to Congress, which you allege to be the ground of that memorial?

Answer. I had no intention last session of attacking Mr. Crawford, unless it should be necessary to my own defence, or unless I myself had been attacked. I had no knowledge of Mr. Crawford's report until the morning after it was made; a copy of it was then brought to my room by Mr. Cook, in consequence of which I changed my determination to have left here on that day, and endeavored then to collect such documents as I thought might be useful to me in case I should reply to it. Not one word of my address to the House was written in the city of Washington, nor have I any recollection of having conversed on the subject of Mr. Crawford's report but with three members of the House of Representatives, viz: Mr. Cook, Colonel Moore, and Mr. Campbell, of Ohio. I left the city the next day, the 24th, without any settled plan of answering it; and with the aid of no other materials than those I collected here in the city and my own memory. In making the references which are contained in my address to the House of Representatives I had recourse in general to the A. B. publications which I had collected here, and which contained a reference to those documents. I occasionally made some notes on my journey to Wheeling, where my address was written, and from which place it was sent to this city; and I expect the documents referred to by Mr. Forsyth as having been furnished here were obtained by Mr. Cook, to whom I wrote for that purpose. I regretted the necessity that I felt myself under to write at all, and would not have done so if I could have hoped, by any more pacific means that would not have been degrading, to have obtained a withdrawal of an insinuation which I conceived was calculated to injure me. Every single thing used in my address to the House was collected from a mass of my own private papers, and by two of my friends, as they could get them elsewhere, after the report of Mr. Crawford was presented. These things, thus collected, with the aid of my own memory, constituted the materials from which my address to the House was written.

Question. Did you not, immediately after Mr. Crawford's report was made to Congress, and before you left this city, state to Mr. Campbell, of Ohio, that you then had twenty or thirty pages prepared against Mr. Crawford? State what conversation took place between you and Mr. Campbell on that subject.

Answer. I think it was on the morning I left this city that I met with Mr. Campbell, who introduced a conversation concerning this report of Mr. Crawford's by asking me whether I had seen the report, and appeared, from the remarks which he made, to consider that report as containing an attack upon me. He spoke of its being presented at so late a period of the session. In the course of the conversation I mentioned to him that I considered it on this last account as being very ungenerous, or words to that effect. I stated to him that I had, during last summer, received information that I was to be attacked at the then ensuing session of Congress; and I think it is probable I stated to him the particulars of that information. Thinking it so probable that I may have stated it, I will now repeat what the information was: In travelling through Kentucky last summer, in Russelsville I received a confidential communication from Virginia, stating that I was to be attacked, as is before alleged; that Governor Coles, of Illinois, was expected to co-operate in the attack, and advising me to come on a week or two before the meeting of Congress, to be prepared for it. In consequence of this information, and not expecting to return home for some considerable time, I wrote to Mr. Cook to call upon Governor Coles upon the subject; and I have since seen a correspondence between Mr. Cook and Mr. Coles on the subject, which I mention because it affords to any who may be inclined to make further inquiry the means of ascertaining the truth of the fact. Under an expectation thus produced, I had been engaged in writing and preparing for the warfare which I expected was to come on; and I believe I stated that fact to Mr. Campbell. I know that I alluded to it in speaking to him, but there is nothing copied into my address that I had previously written with that view. In consequence of the impression which Mr. Campbell's conversation left upon my mind, that he thought I ought to answer Mr. Crawford's statement, I wrote back to him, while on my journey, that I should do so the first leisure time I got, and intimated that I did not expect to occupy more than three hours in doing it. I do not know whether he received the letter, but I expect that he did.

Question. Did you not state in that conversation to Mr. Campbell that you had written twenty or

thirty pages against Mr. Crawford, which you could not complete until you got to Wheeling, for want of documents which you expected to find there?

Answer. I do not recollect that I made such a statement to Mr. Campbell; but I think I made some allusion to what I had written, and stated some things in general terms, admitting my preparation to meet, and determination to repel, an attack that I had expected would have been made upon me; but I cannot suppose that I could have stated to him anything like preparation for the particular case of Mr. Crawford's report, which was entirely unexpected to me.

Question. In one of the A. B. publications which accompany your memorial to the House of Representatives, you refer to a short article, calling the public attention to suppressions by the Secretary of the Treasury, which produced an investigation in that House. Do you allude in this part of your publication to the article which was the foundation of what you call, in your address, the A. B. plot? [The committee decided that this question was inadmissible.]

Question. When did you reach Wheeling after leaving this city on the 24th of March last?

Answer. My impression is, that I arrived there on the first Sunday in April, which was the 4th day of that month.

Question. When did you leave Wheeling?

Answer. I have no distinct recollection of the precise day, but think it was on or about the 12th of April.

Question. Did you apply to the President of the United States or the Secretary of State, before you left Washington, for permission to remain here for a short time, for the purpose of defending yourself from the accusation which you understood Mr. Crawford to have brought against you?

Answer. I did not. I have never seen the President since I saw the report of Mr. Crawford to Congress.

Question. Was there anything in your instructions which prevented you from remaining in Washington which did not equally apply to your remaining at Wheeling on this business?

Answer. I had no written instructions at that time; but the President had expressed great anxiety that I should get off as soon as possible; and the arrangement was, that I should leave this city so as to attend to my own business, and be ready to meet the vessel at New Orleans on the 1st of June at furthest, which was to carry me out. In conformity to which I left this city on the 24th, went to Baltimore to settle some private business, and also to lay in some articles which I intended to take to Mexico. I afterwards went to Wheeling, where I also had private business to attend to connected with a part of my business in Baltimore.

Question. You knew then that you were not expected to leave the United States till the 1st of June?

Answer. The arrangement was, that I should reach New Orleans by the 1st of June at furthest, and this left me but little time, considering the extent of my business, to arrange my private affairs preparatory to going to Mexico. I did not believe at the time, nor do I yet believe, that the President would have consented to my staying for the purpose suggested by Mr. Forsyth.

Question. Was not the vessel in which you were to embark in a course of preparation for her voyage when you left this city?

Answer. If the vessel had arrived here I did not know it. It was expected that she could reach New Orleans about the 15th of May; but there was no certainty, and I think she had not arrived.

Question. You say "it was expected;" what do you mean by that expression?

Answer. I waited upon the President, in consequence of a wish he had expressed for my early departure, and in conversation with him he requested me to go to the Secretary of the Navy and inquire about a vessel to carry me out on the mission. I called on the Secretary of the Navy, who called in Commodore Rodgers to consult upon the subject; and from them I understood that the vessel in which it was concluded I should go had not arrived, but was shortly thereafter expected. Commodore Rodgers spoke of some repairs which would have to be made upon the vessel; made some calculation as to the time these repairs and the voyage to New Orleans would take; and in this way "it was estimated that the vessel could probably reach New Orleans about the middle of May, or between that time and the 1st of June."

Question. You stopped at Wheeling, then, instead of at Washington, for your own personal convenience?

Answer. I left here because it was necessary to attend to my business at Baltimore, and a part of my business at Wheeling, which was in the route to my own home, that I intended to visit previous to my departure.

Question. I see by referring to your address that, in addition to the numbers of the Washington Republican, there are ten numbered documents, from No. 1 to No. 10. Were not all these documents in your possession at the time Mr. Crawford's report was made to Congress?

Answer. They were not. I had no expectation of such an attack as was contained in Mr. Crawford's report, and had made no preparation in anticipation of such an attack as constitutes the subject of that report in relation to myself.

Question. Which of these documents were then in your possession?

Answer. I had No. 11; I had, also, No. 7; I had the paper from which No. 3 is taken, all among my papers, but not collected for any purpose of attack. I may have had some of them in the published documents, but I think I had at that time none of those documents in my possession. I was preparing to leave the city, and if I had had any printed documents but my own I presume I must have returned them; and my own I had sent to Mr. Cook. Nothing was collected or prepared for the subject of my memorial, or to be used for any such purpose, till after Mr. Cook furnished me the copy of the report.

Question. Did you send your address by mail from Wheeling?

[The committee decided this to be an improper question.]

Question. Do you know when that address arrived in Washington?

Answer. I do not know, but presume it must have arrived here the latter part of the week before it was presented to Congress. After it was written, in part, it was detained for some time, with the hope that I should have been able to obtain a document I wanted from the residence of the Hon. Mr. Ruggles, about ten miles from Wheeling; to which residence I sent twice to procure it. It was kept open from the paragraph preceding the last on page 24 of the printed address. I had intended to have pursued the subject further at that time, but from indisposition, from the want of the document I desired, and from my anxiety not to be longer detained, I concluded not to do so, and I referred to the A. B. publications in consequence thereof. I had to have a copy of it made, which would of itself have occasioned some delay,

and this was increased by waiting for the document above alluded to. I sent on the copy of such part as was ready, as I believe, the mail before the original was forwarded. I think I enclosed it to Mr. Cook. When I left Wheeling my intention was to avail myself of the earliest opportunity of making an additional defence, and I did not expect to be able to make a full defence until I could reach Edwardsville, where I hoped to find some of the documents that would establish the truth of my statements. On my journey, at Shawneetown, in Illinois, I found my publication of 1819, announcing my intention to retire from the Bank of Edwardsville; from which place I transmitted that publication to this city; and after my arrival at Edwardsville I wrote another address to the House of Representatives, and had obtained documents to accompany it, which I was prepared to transmit when the Sergeant-at-arms arrived at my house, intending, if Congress had adjourned, to get the same inserted in the National Intelligencer, if I could.

Question. Did you transmit the original of *your* address by mail; and if so, when did you put it into the post office at Wheeling?

Answer. I did not put it into the post office myself. I gave it to a gentleman to put in for me, the post office being at a considerable distance from my lodgings; and I expect he did so in time for its arrival here in the latter part of the week before it was presented to Congress.

Question. Who was that gentleman?

Answer. It was some one of the gentlemen about the house where I stayed, but I do not recollect which one.

Question. On what day of your stay at Wheeling did you deliver it to him?

Answer. I have no recollection except from the calculation which I think I then made as to the probable time of its arrival here, and I therefore suppose it must have been about the 10th or 12th of the month.

Question. You intended, then, that it should arrive the latter part of that week?

Answer. I knew, from the time I delivered it to be put in the mail, that it could not arrive before that time, and I intended it should arrive by the due course of mail.

Question. Do you know when the copy of your address was finished?

Answer. I do not know the particular day, but I think that the copy, so far as one was made, was sent on by the first mail after it was finished, and that it was sent in the mail before the original was sent.

Question. Please to read this address in the Washington Republican, of January 20, 1823, signed A. B. and addressed to Gales & Seaton. Is that the publication to which you refer in one of the A. B. publications communicated with your address, (page 62 of that address?)

Answer. It is.

Question. Were you not just about to leave Edwardsville when the messenger from the House of Representatives arrived?

Answer. I expect I should have left it for New Orleans in about three days.

Question. Did you find in your examination of the office of the Receiver any letter from the Secretary of the Treasury, to which that conversation could possibly refer which you had with Mr. Stephenson after your return from Congress, respecting the letter he is said to have written on the 12th of October, except the letters of the 1st of November, 1819, and the 20th of April, 1820?

Answer. I did not.

Question. I remind you that in the fourth quarter of 1819 there was a deposit of upwards of $50,000 made by Mr. Stephenson in the Bank of Edwardsville, and I ask you whether you think it possible he could have referred in that conversation to the letter of the 20th of April, 1820?

Answer. At the time of that conversation I did not know what deposits he had made after October 12, 1819, nor to what amount. I think it possible he may have referred to the letter of April, 1820, although I consider that the letter of the 1st of November, 1819, was the letter written in consequence of the Receiver's letter of the 12th of October preceding. The letter of November directs the Receiver to deposit the money he should have in his hands on the last day of that month in the Bank of Edwardsville, but I think it contains no express order in regard to future deposits. A letter of the same date was written by Mr. Crawford to the Cashier of that bank, with an enclosure, and the paper I have presented to the committee was delivered to me by the Cashier of the bank as being that enclosure, from which it would appear that both the Receiver at Kaskaskia and at Edwardsville had been directed to make their future deposits in the Bank of Missouri, until otherwise ordered. And it appears, by the letter of the 20th of April, that the Receiver at Edwardsville was specially directed to make his deposits in the Bank of Edwardsville. Being the President of the bank to the Cashier of which the letter was directed, he may have supposed he was bound to take notice of the information which it is natural to suppose he must have received concerning the order contained in that enclosure. But these are all circumstances which have come to my knowledge since the conversation alluded to, and I cannot undertake to say what letter it was the Receiver referred to in that conversation.

Question. Do you not know that in January and February, 1820, notwithstanding this circumstance, he did make deposits in the Bank of Edwardsville?

Answer. I do not. I was at Congress during the time spoken of, and I have no recollection of having known anything at that time concerning his deposits. All I know on the subject is from recent publications. I am under the impression that during the winter succeeding the letter of November 1, either Colonel Johnson or myself was written to on the subject of the enclosure above spoken of, but my recollection is so indistinct that I cannot speak with any certainty about it.

Question. It is stated in an account current of Benjamin Stephenson with the United States, printed with Mr. Crawford's publication, ordered to be printed on the 11th of May, No. 13, that there was cash deposited in the Bank of Edwardsville, on the 31st of January, 1820, amounting to $2,526 82, and in another account, No. 14, that there was cash deposited in the same bank by Stephenson on the 29th of February, $2,881. If these statements are true, do you now think it possible that the letter of the 20th of April was the letter alluded to in that conversation before mentioned with Stephenson?

Answer. I still think it possible. His own letter being silent on the subject of the future deposits, he may have thought that that would have justified him in continuing to make those deposits, and yet, from the enclosure above referred to, Mr. Crawford may have intended to prohibit their being made there. I have already stated that my impression is that Colonel Johnson or myself received a letter on the subject of that enclosure, and I suppose that the enclosure and the Receiver's letter together may have occasioned the latter some uncertainty how he was to act.

Question. You speak of your impressions concerning a letter to yourself or Colonel Johnson. By whom was that letter written?

Answer. My impression is that it was by the President of the bank, who was also the Receiver. Colonel Johnson's brother-in-law holding a very large portion of the stock of that bank, he has been principally relied upon for some years past to make all negotiations with Mr. Crawford concerning it that have been made here, and we have generally had conversation upon the subject when he has had to act in those cases. If I received the letter no doubt it was communicated to him, and if he received one it is equally probable that it was shown to me.

Question. Do you know that the Receiver at Edwardsville ever saw that paper called the enclosure in the letter of November 1.

Answer. Of my own knowledge I do not, but I should think it very strange if he had not seen it, he being the President of the bank.

Question. In examining the records in the Receiver's office did you see a letter from Mr. Crawford of the 1st of November?

Answer. I did.

Question. Does it contain any direction to the Receiver to deposit moneys in the Bank of Missouri?

Answer. I think not. I have already stated that I believe it is silent as to his future deposit, after the one therein specially referred to.

Question. The letter to the Receiver, of the 1st of November, and the enclosure of which you speak, differ in this respect. That part of the enclosure which relates to the Bank of Missouri is not found in the letter to the Receiver. Is there not this difference?

Answer. The letter which I saw at the Land Office at Edwardsville, from Mr. Crawford to the Receiver, of November 1, 1819, I feel confident contains no directions to make the deposit in the Bank of Missouri, but is silent, as I have before stated, as to future deposits.

Question. Could the Receiver, if he had seen this enclosure, have doubted about the propriety of continuing his deposits, with the letter of the 1st of November in his hands?

Answer. I think he could.

Question. In giving your advice to the Receiver, in the fall of 1819, did you give it in the character of his friend, or, as a person holding a high place in the Government, with a view to promote the public interest?

Answer. At that time I had lost confidence in banks, generally, so much so that I did not wish to be held responsible for any bank. I advised the Receiver as a friend to him, and also with a view to free myself of all responsibility for the bank, by placing things in such a situation that Mr. Crawford could act in the case as he should think fit on his own responsibility, leaving the funds in the Receiver's hands entirely to his control.

Question. Did you consider the funds of the United States safer in the hands of the Receiver than in the Bank of Edwardsville for ninety days?

Answer. I considered the funds, at that time, as safe in the hands of either, with this difference, however, that the bank might have been more liable to use them than the Receiver.

Question. Did you not, after or about this time, write to a paymaster or paymasters, recommending, suggesting, or soliciting him or them to pay the troops of the United States in notes of the Bank of Edwardsville?

Answer. I have no recollection of having written to any paymaster at all on the subject. I had, at that time, as much confidence in the notes of the Bank of Edwardsville as in any other of the local banks. Their notes were receivable in the Land Office, and were current in that part of the country; and I should suppose might have been taken by persons to whom the paymaster was to make his payments, as safely as any other notes in that quarter of the country, nor should I have had any objection to recommend them to any paymaster as readily as any others of the notes of the local banks which circulated there. I think about that time I had heard of some order having been given by the War Department, which, as well as I now remember, required the troops to be paid either in Missouri paper or in specie; and I think I wrote to the Secretary of War, and probably to other persons, probably to Colonel Johnson, complaining of the order.

Question. Do you recollect whether it was before or after you attended Congress that you wrote these letters?

Answer. I do not recollect the time, but I suppose it must have been after the first and before the second session I served in Congress. The bank only got into operation a short time before my departure for Congress in 1818; I recollect but little of the case alluded to. I am, however, strongly impressed with a belief that there was, or that I so understood it, an order to paymasters that I considered very partial to the Bank of Missouri.

Question. Was the letter which you wrote at the request of Mr. Stephenson dated on the same day on which it was copied?

Answer. I do not recollect; but I presume it was.

Question. Did you see him on that day enclose a printed copy of your publication? And were both in the same package?

Answer. It was on the same day, and I think both letter and paper were put in one cover.

Question. Was the Land Office then kept in Mr. Stephenson's house, or in a separate building?

Answer. It was in a separate building not far from his house.

Question. Did you see him carry the letter to the post office, or do you know that he did so?

Answer. I did not see it put in, nor do I know that it was; the post office was at a considerable distance from the place.

Question. At what time of the day, in the morning or the afternoon, was the copy taken?

Answer. I do not recollect.

Question. Did you make the draught at the office, or in your own house before you went there?

Answer. I think it was written in my own house.

Question. Was it made on the same day on which it was copied, or the day before?

Answer. I do not recollect, but I think it was on the same day.

Question. At what hour of the day did the mail leave Edwardsville for Washington City at that time?

Answer. I do not remember the hours of arrival or departure.

Question. How long does it usually take letters to reach Washington City from Edwardsville by mail?

Answer. From 16 to 18 days I think, in regular course of mail, and when the weather is good; but it may be very much delayed when the weather is bad. The mail has been very irregular.

Question. What is the average time in which you have received letters from that place when you have been in this city? Would 20 days be an unreasonable allowance?

Answer. I do not know how to make an average; miscarriages are more liable to happen in the winter time, not only from accidents, but from the accumulation of letters. And I cannot now specify in how long a time I have received a single one of my letters after it was mailed from there. I think I have received much fewer in 20 days than those which have taken a longer time. The mail has been irregular in the winter time during the sessions of Congress, or letters at least have arrived very irregularly.

Question. I understand you to have said that but for the Secretary's report to Congress on the 22d of March you would have gone quietly to Mexico without disturbing yourself with any of those charges against him?

Answer. I believe I have stated, and I now state again, that I should not have made the attack upon Mr. Crawford if I had not considered him as attacking me.

By Mr. Webster:

Question. Have you been pretty well acquainted with the general operations of the Treasury in the western States for several years in regard to the collection of the public debts?

Answer. I have been in regard to collection from the sale of public lands, but of the special facts contained in the documents I had no other means of knowing than every other member of Congress, except what I knew from being a Director of the Bank of Edwardsville while I was such.

Question. When did you first become a member of Congress?

Answer. I was elected in 1818.

Question. Have you continued a member without intermission from that time until your recent diplomatic appointment?

Answer. I have.

Question. Have you generally attended the sessions of Congress?

Answer. I have.

By Mr. Livingston:

Question. Do you know anything further, of your own knowledge, in support of the facts and specifications against Mr. Crawford contained in your memorial?

Answer. Nothing that I recollect at this time that relates to the matters specifically alleged in my address to the House.

JUNE 16, 1824.

Mr. EDWARDS being again called:

By Mr. Forsyth:

Question. You state that you received from the Cashier of the Bank of Edwardsville an enclosure contained in a letter from Mr. Crawford to him of the 1st November, 1819. Can you state whether there was not another paper enclosed in that letter?

Answer. I cannot. I neither saw nor heard of any other.

Question. For what purpose was your address to Congress, and the letter to the Speaker accompanying it, sent in a different manner, and to a different person, from the documents and the copy of the address which you state was first sent?

[The committee decided that the question should not be put.]

Question. You state, in one of your addresses to the public at Louisville, dated May 18, 1824, that you sincerely believed, and had been advised by your most dispassionate friends, and other impartial gentlemen, that it was absolutely and essentially due to your own character to enter into this controversy with Mr. Crawford. I wish you to state who these dispassionate friends and impartial persons were.

Answer. I object to the question.

[The committee decided it should not be put.]

Question. Did not your affidavit before the Committee of Investigation of the last Congress, with respect to this correspondence, which you allege took place between the Secretary of the Treasury and Mr. Stephenson, impose upon the Secretary the necessity, when he made his final report, either to produce that correspondence or to account for the omission to produce it?

Answer. I submit the question to the committee.

[The committee decided it should not be put.]

Question. Do you think it possible that, in the year 1819, a letter should have come by mail from Edwardsville to Washington from the 16th of October to the 1st of November following?

Answer. Judging from the statement I have to-day seen from the Post Office Department, I should think it was not; but if the letter of the Receiver did not leave Edwardsville before the 16th of October, I do not believe that Mr. Crawford's letter to the Receiver, of the 1st of November following, was written or sent on the day of its date, unless the letter of the Receiver was sent by private conveyance to Louisville and mailed there.

By Mr. Floyd:

Question. When, in your deposition heretofore taken, you mention the name of "Colonel Moore," to what Colonel Moore did you allude?

Answer. To a representative in Congress from Alabama.

Question. You state that you had prepared another address to the House of Representatives subsequently to writing the first, which, should Congress have adjourned, you intended to get published in the National Intelligencer if you could. What was your object in wishing to have it so published?

Answer. I thought I had obtained sufficient testimony to establish my innocence of the charge or imputation which I understood Mr. Crawford as having made against me, and I wished to lay that testimony and my address before the people of the United States.

JUNE 19.

Mr. EDWARDS further examined:

By Mr. Forsyth:

Question. Have you, or have you not, had in your possession the paper which you say Lippincott found in the Receiver's office in your handwriting at any time since the 12th of October, 1819?

Answer. I presume that the draught of the letter of the Receiver of the 12th October is alluded to. There

is nothing that I more firmly believe than that I have never seen that paper from the time it was copied by the Receiver, as has been before stated, until it was found by Mr. Lippincott in the office, in April or May last, as has also been stated. I then had it in my hands, and read it, I believe, more than once, but never had it in my possession out of the office after it was so found by Mr. Lippincott.

Question. Do you know who prepared the rough draught of the letters from the President of the Edwardsville Bank to you, of January 7, 1820; to the Secretary of the Treasury, of the same date; and to the Secretary of the Treasury, of April 18, 1820, or either of them?

Answer. I do not.

NINIAN EDWARDS.

JAMES NOBLE, of the Senate, sworn on the part of Mr. Crawford:

Question. You were employed by the Treasury in some arrangements with the Bank of Vincennes, were you not? Will you be so good as to state whether, in your opinion, the debt due by that bank to the Government is secured, or any part of it, and if any, what?

Answer. So far as I had the agency in it, which is to the amount of about $26,000, I believe and consider the debt as secured.

Question. Do you consider the claim of the United States on that bank, apart from the collateral security, as being safe?

Answer. As to the residue of the claim which the United States has against the Bank of Vincennes, I know nothing of it except from information which has been derived from the Directors, who say that the bank is able to pay the debt, and has secured its payment. A part of that debt, consisting of $10,000, (not included in the $26,000 before mentioned,) was transferred by that bank to the Treasurer of the United States in a draft on John H. Piatt, secured by two good endorsers; and from very recent information I learn that this draft is now in the hands of the Treasury Department or the District Attorney, Mr. Dewey, and in a train to be recovered. A further sum of $7,000 is secured in obligations against the State of Indiana, which is a matter in negotiation between that State and the Treasury of the United States.

Question. Have you had any conversation with Governor Edwards concerning Mr. Crawford's management of the western banks, and concerning his authorship of the A. B. letters?

Answer. I have, and it was introduced by himself.

Question. State that conversation, with the time and circumstances.

Answer. The precise day I cannot recollect; it was pending his nomination, made by the President of the United States to the Senate, as minister to Mexico, and it was after the 21st or 22d of February last. I make this statement from the fact that on the 21st or 22d of February I went to Mrs. Queen's to board, where Governor Edwards resided, and this conversation was after I went there. He stated that he was about to be attacked in the Senate of the United States, for the purpose of defeating his nomination; that party and political spirit was now high; that he understood that charges would be exhibited against him, and that it had been so declared in the Senate chamber. I remarked to Governor Edwards that he well knew, according to the rules of that body, while on executive business secrecy was required; that I was not at liberty to mention any occurrence or the remark of a single member, excepting so far as related to myself; that I was not governed by party or political feelings or motives; that I adhered to the expression made use of by Jefferson, and the only inquiry with me was, "Is he capable and is he honest?" Governor Edwards then remarked that, although secrecy was required in that body, yet he was informed almost every day of the transactions and remarks of individuals when his nomination was called up, and he added, "Noble, I shall not forget you." I then replied that I did not understand his meaning. He said it was unimportant; he was satisfied I was not governed by the party feelings which were then prevailing. It was on the day in the evening of which this conversation took place that I had moved to take up his nomination in the Senate. This must have been his meaning when he said he would not forget me; for he explained it next day, and said he had heard that I had done so. Mr. Edwards further remarked that he knew me to be the decisive friend of William H. Crawford, and, said he, I am considered as being his bitter enemy, and I am charged with being the author of the numbers signed A. B.; but (raising his hand) I pledge you my honor I am not the author, nor do I know who the author was. "Crawford and I," said Mr. Edwards, "have had a little difference; but I have always considered him a highminded, honorable, and vigilant officer of the Government. He has been abused about western banks and the unavailable funds." Leaning forward and extending his hand, he added: "Now, d—n it, you know that we both live in States where there are many poor debtors to the Government for lands, together with a deranged currency. The notes on various banks being depreciated after the effect and operation of the war in that portion of the Union, and the banks, by attempting to call in their paper, having exhausted their specie, the notes that were then in circulation became of little or no value. Many men of influence in that country," said he, "have united to induce the Secretary of the Treasury to select certain banks as banks of deposit, and to take the notes of certain banks in payment for public lands. Had he not done so (meaning Mr. Crawford) many of our inhabitants would have been turned out of doors and lost their lands, and the people of that country would have had a universal disgust against Mr. Crawford; and I will venture to say," said Governor Edwards, "notwithstanding I am considered his enemy, that no man in this Government could have conducted the fiscal and financial concerns of the Government with more integrity and propriety than Crawford did." I further remarked to Governor Edwards, in speaking of his nomination, that inasmuch as he was nominated by the President, unless some charge was brought against him, I had already evinced in the Senate my disposition to vote for the confirmation of his nomination, without any previous consultation with him; but added, if I had the power of making the nomination, I would not have nominated him, and, as an evidence of it, I had written a letter to Mr. Monroe, urging the nomination of William Henry Harrison, and with that letter I had enclosed the unanimous recommendation of the members of the Legislature of Indiana in favor of General Harrison.

By Mr. Cook:

Question. When Governor Edwards mentioned to you that he received information of what the Senate was doing, did he not at the same time observe that he was a member of the Senate, and had a right to know what they were doing as much as any other member?

Answer. If he made that observation I do not recollect it. He might have done so.

Question. When you had this conversation with him, had not the Richmond Enquirer, on that or some day not long before, been received in this city, containing an allegation that Mr. Edwards, "the author of

the A. B. plot," had been nominated as minister to Mexico? and can you say positively that the denial of authorship on the part of Mr. Edwards did not relate to the plot, instead of the writings themselves under that signature? and did not the conversation grow out of that publication?

Answer. I saw an article in the Richmond Enquirer, stating that Ninian Edwards, the "author of A. B.," or "of A. B. plot memory," (I do not recollect which,) had been so nominated. The paper I saw at the boarding-house of Mrs. Queen, and I think in the hands of Mr. Elkins. Whether it was before the conversation with Governor Edwards or afterwards I do not distinctly recollect. I am inclined to think it was after the conversation; but I am very well satisfied that, in the conversation with Governor Edwards, when he declared himself not to be the author of A. B., and pledged his honor to the declaration, I understood him to have an explicit reference to the numbers signed A. B. which appeared in the Washington Republican; and I so understood him because he had reference to the reports of the two committees who examined into that subject at the previous session of Congress. No allusion whatever was made in this conversation to the article in the Richmond Enquirer.

Question. In the course of the conversation, was reference made to any particular numbers of the publications signed A. B.?

Answer. There was not.

Question. Was the name of General Cocke at all introduced?

Answer. It was not.

Question. When did you first mention the conversation you have now repeated as having passed between yourself and Governor Edwards, and to whom?

Answer. According to the best of my recollection, I never repeated it to any person until the evening of the day that I was informed that Governor Edwards' address was presented to the House of Representatives. On that evening, in conversation with several of the members of that House, and amongst whom were Mr. Reed and Mr. Nelson, some of whom said that Governor Edwards had avowed himself to be the author of A. B., and others said that he had not done so, I remarked that they must have misunderstood the address, for Governor Edwards had pledged his honor to me that he was not the author of A. B.; in the same evening I made the same remark to Mr. Elkins.

Question. Did you mention the subject to any member of the Senate?

Answer. Not while his nomination was pending, nor before his address appeared. Afterwards I spoke of it without reserve.

Question. I perceive from the Richmond Enquirer that a letter, purporting to have been written in the Senate Chamber, and dated April 26, 1824, states: "Mr. N. Edwards declared to Mr. Noble, Senator from Indiana, that he was not the author of the A. B. publication; he did this pending his nomination as minister to Mexico. In consequence of this declaration, Mr. Noble states that he voted for him." Did you make any such communication to any member of the Senate? [Mr. Forsyth objected to this question, and the committee decided that the question was improper.]

Question. Did you ever have any conversation with Colonel Benton, of the Senate, on the subject of your conversation with Mr. Edwards?

Answer. Yes.

Question. In the conversation you had with Mr. Edwards, did he speak of the original plan adopted by the Secretary of the Treasury for the relief of the people of the west, or did he speak of the manner in which that plan was executed?

Answer. He spoke of the conduct of the Secretary of the Treasury generally.

Question. Did you understand the conversation you have mentioned as intended to affect your vote on the then pending nomination?

Answer. I did not suppose that that was its design, nor had it any such effect upon myself. I considered him as speaking as an honest man. If he had told me that he was the author of A. B. it would not, in my opinion, have had the least weight with me whatever in relation to my vote, for I considered that matter as done with, and I had already taken an active part for him in the Senate.

By Mr. Forsyth:

Question. What do you now understand as having been the effect intended to have been produced by that conversation?

Answer. Governor Edwards having pledged his word and honor to me, unsought for, that he was not the author of A. B., and having expressed his opinion of the integrity and vigilance of the Secretary of the Treasury, and mentioned that he expected an attack in the Senate, as I now suppose, from the friends of Mr. Crawford, I consider him as having expected that I would take this information that he gave me into that body, and it would be the means of securing the confirmation of his nomination.

By Mr. Cook:

Question. Did Governor Edwards request you to mention what he had said to any members of the Senate, or did he afterwards inquire whether you had done so?

Answer. He did not.

Question. Did you, in the conversation with Mr. Edwards, signify to him that his being or not being the author of A. B. would have no influence on your vote?

Answer. I did not.

JAMES NOBLE.

Witness called again.

By Mr. Edwards:

Question. Please to state the value of each division of the property you received at Brookville, as security for the debt of the Bank of Vincennes to the United States?

Answer. As to the value it would be but mere opinion, and I cannot from recollection name each division of the property. But at the time the property was conveyed by mortgage to the Treasurer of the United States, I supposed and believed that it would cover nearly the sum of $26,000, according to the terms of the mortgage, (and the valuation fixed on the property by two disinterested persons who had valued it previously to its being conveyed by the owners to attorneys or trustees for the use of the Directors of the Bank of Vincennes, and for the purpose of discharging their debts, as will fully appear from a report of the Treasury Department, marked F, and dated April 29, 1822.)—(See Executive Papers of second session of 17th Congress.)

Question. What is its present value?

Answer. It is impossible for me to state.

Question. Was it not your opinion, while my nomination was pending and shortly after you came to Mrs. Queen's to lodge, that there would be no opposition to it in the Senate?

Answer. It was my opinion that there would be an opposition, and you yourself told me that there would; but the fact turned out that there was no opposition, for reasons which you know. You know that the opposition was expected from Colonel Benton, and he was sick. I did not know what the charges to be brought against you were, and I told you at the same time that if there were no charges brought I should vote for you, and should not regard political feeling. You remarked to me that the friends of Mr. Crawford would oppose you. I replied that some of those whom I knew to be his friends would scorn such a line of conduct; I mean, would scorn to suffer political feeling to bias their votes in such a case.

Question. Where did the conversation which you have testified as having passed between you and myself take place?

Answer. In my room at Mrs. Queen's.

JAMES NOBLE.

JOHN MASON, jr., sworn, on the part of Mr. Crawford:

By Mr. Forsyth:

Question. Have you or not had a conversation with Mr. Edwards concerning the A. B. publications; and if so, state what it was?

Answer. I had such a conversation with Mr. Edwards, and, as far as I recollect, it occurred while his nomination was pending in the Senate, and before it had been confirmed: but of this I will not be positive. He stated to me that there would probably be, or that he had expected, an opposition in the Senate, and that one of the grounds of that opposition was the authorship of the A. B. publications, which had been imputed to him; that as to that, although it was well known that he had taken a decided stand against Mr. Crawford, he had done nothing which he had hesitated to avow, (or would hesitate to avow,) I cannot be certain which he said, and that his opposition had been open and fair.

J. MASON, JR.

Mr. MASON called again:

Question. When you first saw me after I occupied the *back* room of Mrs. Queen's boarding-house, what was the state of my health?

Answer. You were, as I thought, quite ill.

Question. Was not this shortly after my nomination?

Answer. It was.

Question. Was it at this time that you had the conversation you have related?

Answer. It was subsequently to this visit.

Question. Had I not then got well?

Answer. You were then certainly much better.

J. MASON, JR.

DANIEL P. COOK, of the House of Representatives, sworn, on the part of Mr. Crawford:

Question. Did you receive the address of Mr. Edwards to Congress by mail; and if so, at what time?

Answer. I received it on the Saturday next previous to the Monday on which it was presented to the House, accompanied by a letter through the mail from Wheeling, requesting me to place it in the hands of the Speaker, after supplying some documents which were referred to in the memorial, but were not forwarded with it. These documents I supplied, and on the next day did place it in the hands of the Speaker.

Question. Was the address itself communicated by mail?

Answer. Yes.

Question. Did the address come through the mail addressed to you?

Answer. No.

Question. To whom did it come addressed?

Answer. I submit to the committee whether this is a proper question.

[The committee decided that the question should not be put to the witness.]

Question. State what reason you had for knowing that it came by mail at all.

Answer. By the mail preceding that which I believe brought it on, I received a copy of a part of the same memorial with a letter from Mr. Edwards, stating that he expected by the next mail to forward it complete; and by the next mail I received a second letter from him, stating that he had by that mail forwarded the memorial, as suggested in his former letter, and the person to whom it was sent did, early on that day, place the memorial in my hands, which was in the original blank envelope, having the post-mark of Wheeling upon it, and directed by Governor Edwards, whose handwriting I know; and therefore I believe that it came by mail.

Question. Was it opened?

Answer. The seal of the envelope had been broken.

Question. I think it was early in the day that you received both your own letter and this envelope?

Answer. I think it was not later than ten o'clock.

Question. Do you not know that Mr. Edwards is not the author of those A. B. publications printed in the Washington Republican, which he has avowed in his memorial?

Answer. Since I understood he was the author of any of them, I have understood from him that he was the author of all of those which relate to the subject of this investigation. I did understand that the first number of those publications was communicated to that paper by a different person, but I have since learned from Mr. Edwards that he wrote all of them which refer to the subject of this investigation, and I know nothing to the contrary.

Question. Did you, in supplying documents for that memorial, furnish any but printed ones?

Answer. I furnished no others, the rest came in the packet.

Question. Was postage charged on the packet you received?

Answer. If there was I have no recollection of it. I am sure I paid no postage.

D. P. COOK.

Mr. Cook called again.

By Mr. Forsyth:

Question. Please to separate those papers which you furnished for the memorial of Mr. Edwards from those which came enclosed to you?

Answer. I furnished one, and I am not certain but two, of the A. B. publications, and I furnished numbers one and two of the documents annexed to the memorial. My impression is that these are all which I furnished.

Question. You state that the seal of the envelope which was handed to you had been broken. Were the papers within it sealed up and directed to you?

Answer. They were not. I received six or seven newspapers and documents directed immediately to myself, but the memorial was not.

Question. What motive did Mr. Edwards state to you for sending the memorial to you indirectly?

Answer. He expressed none. The memorial and the letter to the Speaker of the House came in the same envelope.

D. P. COOK.

Jeremiah Elkins sworn, on the part of Mr. Crawford:

Question. Had you a conversation with Mr. Edwards about the A. B. publications.

Answer. I have heard him allude to those publications, and mention his being charged with the authorship of them.

Question. State what took place?

Answer. I think it was an article in the Richmond Enquirer which led to the remark I heard him make, in which article it was stated that "Mr. Edwards of A. B. plot memory," or words to that effect, had been nominated by the President as minister to Mexico. Mr. Edwards observed that he was not the author of those publications, or (as I think the expression was) that he was no more the author than the editor of the Enquirer himself.

By Mr. Cook:

Question. Where and when did this conversation take place?

Answer. It was at Mrs. Queen's boarding house, and during the pendency of Mr. Edwards' nomination before the Senate. I cannot recollect the particular day.

Question. Was any other person present at this conversation?

Answer. Probably there were others present. I think it was either at dinner or during the time that the boarders were coming in to dinner. Mr. Edwards inquired whether any gentleman took or had seen the Richmond Enquirer; that he understood there was in it an article to the effect stated above, and then made the remark relative to it which I have mentioned.

Question. Can you remember in what part of Mrs. Queen's house he then had his room?

Answer. I do not recollect.

Question. Did General Noble then board there?

Answer. I think it was about the time General Noble came there, probably within a day or two before or after; of this, however, I am not certain.

Question. Do you remember having any conversation with General Noble about that article in the Richmond Enquirer before the presentation of Mr. Edwards' memorial?

Answer. No. I might have had, but do not recollect any.

Question. Had you the Richmond Enquirer in which this article was contained then in your possession?

Answer. It is impossible for me to recollect; the Enquirer was taken by Mr. Locke, a member of Congress from Massachusetts, who then lodged at Mrs. Queen's.

Question. Did you, at or about that time, hand or show that paper to General Noble?

Answer. I do not remember; such a thing might have occurred without my recollecting it.

Question. Is that the only conversation you ever had with Governor Edwards on the subject?

Answer. I do not recollect any other.

JEREMIAH ELKINS.

Witness again called.

By Mr. Cook:

Question. Did Mr. Edwards, in making the denial you have referred to, use the words "A. B. plot," or "A. B. publications?"

Answer. I knew of no difference between the two, and therefore do not recollect.

JEREMIAH ELKINS.

William W. Seaton sworn, on the part of Mr. Crawford:

By Mr. Forsyth:

Question. Did you ever have a conversation with Mr. Edwards relative to the authorship of the A. B. publications?

Answer. Mr. Edwards spoke of those papers to me incidentally. He came to our office to have, as he said, a free and frank conversation; it was the first time he had been there, to my knowledge, for a year; it was during the pendency of his nomination before the Senate as minister to Mexico, and some time before Mr. Crawford's report was made to Congress. He wished to know, he said, if we would publish his defence? I asked him what defence? A defence against whom? He replied that he expected to be attacked; and whenever he turned upon his enemies he generally got the better of them, (or words to that effect.) He further said (and this I remember distinctly, for he twice or thrice repeated it) that when he commenced he never stopped at the line of just retribution. I answered him that if he was attacked in our paper he should have the free use of it to defend himself; that if he were attacked any where else, he should have the same rights extended to him as were extended to all other citizens; but he could have no positive promise of publication until we had read the matter he wished published. Passing then from that subject, Governor Edwards said he knew that we had thought him, for some time, hostile to us on account of that foolish business of last session, (or that A. B. affair of last session, I do not recollect which phrase he used,) but he had nothing to do with it. Mr. Gales was present during the greater part if not the whole of this conversation. It was on the authority of this conversation alone that we expressed, in the paper, our belief that Mr. Edwards was not the author of the A. B. publications.

By Mr. Cook:

Question. Had you not, previous to this conversation, said to others that you did not believe Mr. Edwards was the author of the A. B. publications?

Answer. At the time the A. B. papers appeared it did not strike me that Mr. Edwards was the author, and when the subject was continued in the Franklin Gazette, after Congress had adjourned, and Mr. Edwards gone to Illinois, I believed that another member of Congress was the author. Such being my impression I may have stated it, but do not recollect having done so. But the conversation with Mr. Edwards was the only authority beyond conjecture we had for stating that he was not the author; nor should we have published the paragraph but for that conversation.

Question. Can you say distinctly that in that conversation Mr. Edwards did not speak of an imputed plot; and in saying he had nothing to do with it, that he did not refer to a plot and not to the publications?

Answer. I do not distinctly recollect Governor Edwards' language, except so far as that it left a strong impression on my mind that he disclaimed having anything to do with the A. B. business. He spoke of it generally, and I do not recollect that he made the distinction referred to in the question now put.

By Mr. Livingston:

Question. When you speak of the A. B. business, the A. B. plot, and the A. B. publications, do you not mean the same thing?

Answer. In applying some of those terms I have used the language commonly applied to them, and understand them all to mean the same thing.

By Mr. Cook:

Question. Was not the word "plot," as applied to this subject, first used in the National Intelligencer?

Answer. I cannot tell; it has frequently been used in the National Intelligencer; but I believe that epithet was applied to it by the public as early as it was by the National Intelligencer.

By Mr. Edwards:

Question. Do you not recollect that in the conversation which I had with you and Mr. Gales, I stated that in consequence of certain rumors about the publications of A. B., and what had been stated in your paper about an A. B. plot, that I might find it necessary to say something about yourselves, and show that there was no A. B. plot in the case at all, or words to that effect; and did not Mr. Gales reply?

Answer. Such a remark may have been made, but I cannot call it to my recollection. As it seems Mr. Gales replied to the remark it is possible it was addressed to him, and on this account I may not particularly have noticed it.

Question. In saying, as you have done, that I intimated that I had nothing to do with the A. B. affair, did you not consider me as rather alluding to any effects it might have upon you than upon others?

Answer. Your object at the time appears to me to have been to remove any impression of your entertaining feelings of hostility to us; but the concurrent impression which you conveyed to my mind was that you were not the writer of the A. B. publications.

Question. Was not this an inference of your own, from the general scope of the conversation, rather than from any expressions of mine?

Answer. Your exact language I do not remember. I can only speak with certainty of its effect upon my mind, which was as I have stated. We thought the denial clear, because that was "the good reason" spoken of in our paragraph which we stated ourselves to be in possession of for not believing you to be the author.

Question. Did I not expressly state, in connexion with the conversation about the A. B. affair, that I had no intention of injuring you?

Answer. I think not; because that would have been a virtual admission that you were the author, and we understood you to deny being so.

Question. Do you not recollect my making the following remark: that I never was the aggressor in any controversy, and never would be; but that when attacked I did not know that I always stopped at the just bounds of retribution?

Answer. Of this remark I remember distinctly only that part which I have already stated; but the residue may have been expressed by you in connexion with it.

Question. In Mr. Dickins' testimony he mentions you as having procured the copying of some of the bank correspondence. By whom was this copying executed, and under what circumstances?

Answer. Being informed, last fall, by Mr. Little, of this city, that he should be glad to obtain from some of the public offices some clerical employment to fill up his leisure time, and knowing that, in times of pressure, writing was given out by some of the public offices, I inquired of Mr. Dickins, in the month of October last, if there was in the Treasury Department any extra writing he could give out. He mentioned that the voluminous bank correspondence, called for by a resolution of Congress, was more than the clerks in the office could get ready, and, as others were employed on it out of the office, if I knew of any trustworthy person he would give him a part of it to do. On my vouching for the integrity of the gentleman mentioned, Mr. Dickins gave me a bundle of letters, which he wished might be copied without delay, as the Secretary of the Treasury was anxious to transmit the correspondence to Congress early in the session. These letters were transcribed in three or four weeks and returned. Soon after, Mr. Dickins called on me and said he was afraid the other persons would not be able to get the remainder of the letters copied in time, and asked me if the same gentleman would undertake some more. He left another bundle with me, which were also copied. On their being returned I inquired if he could tell how soon the correspondence would be sent in. He could not say, as there was yet much of the correspondence remaining to be transcribed. I told him the same gentleman, and one or two others also, would be glad of as much writing as they could get. I then received from Mr. Dickins a third large bundle of the letters, and they were immediately put in hand. I afterwards received several messages from Mr. Dickins to hurry the copying, as the Secretary was very impatient to send the correspondence to Congress, and as, after the copying should be completed, it would take much time to compare the transcripts with the originals. Towards the latter part of the copying, I received, every day, a message from Mr. Dickins, urging despatch, as all the rest of the copying was finished; and he was so importunate to have it done that I was induced to obtain for Mr. Little the aid of an additional person. The precise time that this copying was completed I do not remember, but it was, I think, some time in March.

W. W. SEATON.

CHARLES H. W. WHARTON sworn, on the part of Mr. Crawford:

By Mr. Forsyth:

Question. Have you ever had a conversation with Mr. Edwards about the authorship of the A. B. publications? If yes, relate it.

Answer. I had a conversation with him on that subject, in December or January last, at his lodgings, at Mrs. Queen's. Mr. Edwards said that he was not the author of the A. B. plot; that he did not know anything about it.

Question. In what manner was this denial made, and in what words, so far as you can recollect?

Answer. The manner appeared to be solemn. The expressions were: "He would be d——d if he knew anything about that d——d A. B. plot."

Question. How came he to say anything about the A. B. plot?

Answer. I called upon Mr. Edwards for the purpose of procuring recommendations to the different Secretaries of the Departments, with a view to obtaining for myself a clerkship. He stated that he was intimately acquainted with all of them, and could give letters to all of them, except Mr. Crawford; and a letter to him would do no good, for, (to use his own expressions,) that he and Mr. Crawford "did not set horses together;" that Mr. Crawford was under a belief that he was the author of the d——d A. B. plot, the authorship of which he disavowed; and he concluded by saying that he considered Mr. Crawford as a very clever and honorable man.

By Mr. Cook:

Question. Are you certain that Mr. Edwards, in speaking of an A. B. plot, did not say that "he knew nothing of any plot?"

Answer. I have correctly stated the conversation as it occurred.

C. H. W. WHARTON.

JOHN S. BARBOUR, of the House of Representatives, sworn, at the request of Mr. Edwards:

By Mr. Cook:

Question. Have you had any conversation with Mr. Noble on the subject of a conversation held between him and Mr. Edwards relative to the authorship of the A. B. publications? If so, please to state what that conversation was?

Answer. I will relate the circumstances under which such conversations were held. Shortly after the communication of the address of Governor Edwards I read, with two members of the Kentucky delegation, a letter printed in the Richmond Enquirer, in which Governor Edwards is said to have declared to Mr. Noble that he was not the author of those publications signed A. B., and that, in consequence of such disavowal, Mr. Noble had voted to confirm his appointment in the Senate. I felt anxious to know whether such disavowal had been made for such a purpose. Under the influence of that anxiety, I met with General Noble in this Capitol, and heard him say that such was not the fact; that Governor Edwards had disavowed the authorship of those publications, but it had no connexion with his vote, as he was his friend and should have voted for the confirmation of his appointment in any event.

Question. Did General Noble say at that time that he did not believe that disavowal was intended to have any effect upon the nomination of Governor Edwards?

Answer. All that I know of it is embodied in my answer to the first interrogatory.

Question. Have you had any conversation with Mr. Elkins on the same subject? If so, please state what it was, and when.

Answer. I think, at some period of time shortly after the address of Governor Edwards was presented to the House, and after the publication in the Enquirer to which I have alluded, Mr. Elkins informed me, in a conversation sought by myself, that he had heard Governor Edwards incidentally remark, upon reading this article in the Enquirer, in which he is spoken of as "Ninian Edwards, of A. B. plot memory," that he was no more the author of that plot than the editor of the Enquirer. I speak with more preciseness of the conversation with Mr. Elkins than of that with General Noble.

JOHN S. BARBOUR.

THOMAS H. BENTON, of the Senate, sworn, on the part of Mr. Crawford:

By Mr. Forsyth:

Question. Were you not well acquainted with the connexion of Mr. Edwards with the Edwardsville Bank?

Answer. From general report only. I never did any business with him in that character.

Question. Do you know that he made efforts, from the establishment of the institution till its failure, to keep up its credit with the public?

Answer. What I know personally is the publication in the St. Louis Enquirer, of which I was an editor.

Question. Do you know whether the statements in that publication are correct?

[To this question Mr. Cook objected. The committee decided that it might be put.]

Answer. I very well remember my opinion at the time that publication was made. It was that the publication would give a credit to the bank to which it was not entitled. In conformity with that opinion, and from no other motive than to countervail the effect of that publication, I wrote an article which was published either in the same paper or in one next succeeding, (but I think the same,) in which I gave some of the reasons which induced me to believe that the bank was not entitled to the credit which Mr. Edwards gave to it in his publication. I have not seen that article since, but the facts and circumstances rest upon my mind, and I am still of the opinion that I then was.

Question. What were the facts on which this opinion was formed?

Answer. The first was one leading fact, which I had from general report, that a majority of the stock was held by two or three stockholders, who were persons of little or no property. The stockholders to whom I allude were Mr. Robert Latham and General Payne, the latter of whom was reputed to cover stock for the Messrs. Johnson, of Kentucky. Mr. Latham was generally reported to be the insolvent partner of a firm in Kentucky—I think either Latham and Broadhead, or Latham and Morehead—and that he was insolvent I am certain, having been employed as a lawyer to collect debts from him. The Messrs. Johnson were generally reputed to be in bad pecuniary circumstances. These stockholders, having a majority of the stock, could change the Directors at any election. This circumstance deprived the bank of credit in my eyes. Another circumstance which made me believe that the publication of Mr. Edwards would give the bank a credit which was not due to it was its silence upon points necessary to be known,

such as the pecuniary stability of several of the Directors. Mr. Smith, one of the Directors, of whom a high character is given in that publication, was generally reputed to be without property, or very recently insolvent. Dr. Joseph Bowers, of whom a high character is also given, was a speculator lately arrived in the country, claiming and talking of much property, but, as was believed, without solid foundation. The other Directors, with the exception of two or three, were generally reputed to own but little property, and to hold a minority of the stock. Another circumstance to the prejudice of the bank was my belief that it could not do a business which would defray its expenses and support it, owing to the little commerce existing in the place where it was established.

By Mr. Cook:

Question. You state that Mr. Edwards made his publication in the St. Louis Enquirer of 1819. Was Mr. Crawford on the list of those to whom that paper was statedly sent?

Answer. Yes.

Question. At the time you spoke of the character of the Bank of Edwardsville and its claims to public credit, did you know anything of its actual condition?

Answer. I had no personal knowledge of its affairs; my opinions were bottomed on general current report.

Question. Did you not, about the same time, write to the Secretary of the Treasury, stating strong objections to the claims of this bank upon his confidence and that of the public?

Answer. I did so some time before, soon after the bank went into operation.

Question. Did you receive any reply from the Secretary on that subject, by which you ascertained that he had received your letter?

Answer. I did; and he stated that, availing himself of the permission expressed in my letter to show it to whomsoever it concerned, he had shown it to Mr. Edwards and Colonel Johnson.

Question. Were you at that time a Director of the Bank of Missouri?

Answer. I was not till long after, say two years or more.

Question. About this time, however, did you not make communications in your paper to the public strongly supporting the claims of the Bank of Missouri to public confidence?

Answer. I made very few, if any; I do not now remember one.

Question. Was it not your opinion that that bank was entitled to confidence?

Answer. It was, most decisively. After my first arrival at Washington City, in 1820, I had spoken to Mr. Crawford in favor of the Bank of Missouri. After that bank had stopped payment and resolutions had been submitted in the House of Representatives upon the subject of its failure and of the public deposit in it, myself and Mr. Scott, representative from Missouri, went to Mr. Crawford and offered to give him in writing the previous statements which we had made verbally in favor of the bank. Mr. Crawford declined receiving any statement from us; his precise words I do not remember, but he declined taking from us anything like vouchers to shield him from responsibility, stating, I think, that the correspondence would show that everything was fair, and that he had proceeded on sufficient grounds.

Question. Which bank first failed to pay specie for its notes, the Bank of Missouri or the Bank of Edwardsville?

Answer. The Bank of Missouri; but I have been informed, and believe, that the Bank of Missouri had assets at the time of its stopping specie payment to an amount beyond the claims upon it; that it has settled all these claims, either by paying them or securing them to be paid, while the Bank of Edwardsville has neither paid nor secured its debt to the United States.

Question. At what time were you employed to collect debts against Mr. Latham?

Answer. Sometime before I came to Congress, in 1820.

Question. Do you, or do you not, know that General Payne is reputed to be, and do you not believe him to be, among the wealthiest men in Kentucky?

Answer. I have always understood that he was a man of large property; but the general report was that the shares in his name were really the property of the Messrs. Johnson.

Question. Do you, or do you not, know or believe that the Messrs. Johnson were at that time also considered among the wealthiest men in Kentucky?

Answer. All the information which I had upon the subject represented them to be engaged in large and critical moneyed enterprises, and that their pecuniary credit was most uncertain.

Question. Do you not know that Robert Pogue, another Director in the Bank of Edwardsville, was at that time engaged in large mercantile concerns and of unsuspected credit?

Answer. I knew Mr. Pogue as a merchant, and his credit and standing were very good.

Question. William Kinney, Joseph Conway, and Abraham Pricket were also Directors. Were not these gentlemen all, at that time, of high respectability and of considerable unincumbered property, so far as your knowledge extends?

Answer. I knew them all personally. Mr. Kinney was always represented to me as a person of considerable property. I never heard the others so spoken of. I know nothing about incumbrances on any of their estates. They were all respectable.

Question. Dr. Joseph Bowers, another Director, is spoken of by Mr. Edwards as a gentleman of respectability; was not that his general character at that period?

Answer. It was; but my objection to Governor Edwards' publication was its omitting to speak of the pecuniary circumstances of the Directors and stockholders.

Question. Were the Directors and stockholders liable beyond the amount of the stock paid in?

Answer. The Bank of Edwardsville was an incorporated bank; and I suppose, of course, they were not.

Question. What was the conversation you had with General Noble which induced you to write the letter in the Richmond Enquirer in relation to that conversation?

Answer. I had two conversations with Mr. Noble upon the subject of his conversation with Mr. Edwards. The first soon after the appearance of Mr. Edwards' address. It occurred accidentally, while passing each other in the large circular room in the centre of the Capitol. It was very short. I was going in haste into the Senate Chamber. Either replying to a question from me, or from some other person, (for there were several passing at the same time,) Mr. Noble said that Mr. Edwards had declared that he was not the author of the A. B. publications, and that he had supported him in the Senate. In repeating that conversation I reported it, and in writing to the editor of the Richmond Enquirer the letter in question, I represented it as if Mr. Noble had voted for Mr. Edwards in consequence of that disavowal. It was the construction which I put upon the *support* which he had given. I was not in the Senate during the time that Mr. Edwards' nomination was pending. A week or two afterwards, and

when there occurred some leisure in the Senate, and in consequence of suggestions that Mr. Edwards had only denied the authorship of the A. B. publications by way of avoiding an improper curiosity, I asked Mr. Noble whether he had made inquiries of Mr. Edwards which led to the disavowal? Mr. Noble then stated to me, particularly, his conversation with Mr. Edwards. He said that the disavowal was wholly voluntary on the part of Mr. Edwards; that he had pledged his honor that he was not the author of the A. B. publications, but Mr. Noble had intended to vote for him before he heard this disavowal; that he had, before hearing it, made a motion in the Senate to take up his nomination; that Mr. Edwards in that same conversation spoke honorably of Mr. Crawford—spoke well of his management of the finances and of his relief to the western debtors. The second and full conversation was the same as has been detailed before the committee by Mr. Noble in his testimony. The first was short and imperfect, and so slight that Mr. Noble with difficulty could recollect it when I have since mentioned it to him.

Question. Do you not know that the representations which you have stated were made by you to the Secretary of the Treasury against the Bank of Edwardsville were counteracted by those of Mr. Edwards and Colonel Johnson?

Answer. I do not know that they were.

THOMAS H. BENTON.

ABRAHAM BRADLEY, jr., sworn, on the part of Mr Crawford:

By Mr. Forsyth:

Question. In October, 1819, what was the shortest time in which a letter could come by the mail from Edwardsville to Washington?

Answer. I have examined the contracts, and am unable to state.

Question. Could a letter have come at that time in less than twenty days?

Answer. It is difficult to answer with certainty, but, according to my best information, I should say it could not.

Question. Have you made out a list of the arrivals and departures of the mail between this city and Edwardsville? Is the paper now shown to you such a list, and is it made out according to the best information you possess?

Answer. It is. I have made it out from the contracts in all its items saving one, and that I have stated from the advertisement of the Post Office Department for a contract, which is the route from Wheeling to Louisville. The mail takes a longer time to come from Edwardsville than to go there.

Question. Do the dates on the bills of the mails sent, which appear in the quarterly returns, ascertain the time of the departure of the mails?

Answer. They always ought to do so.

ABRAHAM BRADLEY, JR.

List of departures and arrivals of the mails at Washington and Edwardsville, 1818, 1819.

Days.	
	Washington.—Leave Sunday, Tuesday, and Thursday, at 2 a. m.; arrive Monday, Wednesday, and Friday, at 10 p. m.
	Fredericktown.—Arrive Sunday, Tuesday, and Thursday, at 2 p. m.; leave Monday, Wednesday, and Friday, at 10 a. m.; leave Sunday, Tuesday, and Thursday, at 3 p. m.; arrive Monday, Wednesday, and Friday, at 9 a. m.
2	Cumberland.—Arrive Monday, Wednesday, and Friday, at 8 p. m.; leave Saturday, Tuesday, and Thursday, at 3 a. m.; leave Tuesday, Thursday, and Saturday, at 4 a. m.; arrive Friday, Monday, and Wednesday, at 8 p. m.
1	Brownsville.—Arrive Tuesday, Thursday, and Saturday, at 8 p. m.; leave Friday, Monday, and Wednesday, at 4 a. m.; leave Wednesday, Friday, and Monday, at 3 a. m.; arrive Thursday, Saturday, and Tuesday, at 9 p. m.
	Wheeling.—Arrive Wednesday, Friday, and Monday, at 4 p. m.; leave Thursday, Saturday, and Tuesday, at 8 a. m.; leave Wednesday, Friday, and Monday, at 5 p. m.; arrive Thursday, Saturday, and Tuesday, at 7 a. m.
6½	Shelbyville.—Arrive Tuesday, Thursday, and Saturday, at 10 a. m.; leave at 2 p. m.; leave Tuesday, at 11 a. m.; arrive at 1 p. m.
	Louisville.—Arrive Tuesday, Thursday, and Saturday, at 8. p. m.; leave Friday, Monday, and Wednesday, at 9 a. m.
½	Bairdstown.—Arrive Tuesday at 8 p. m.; leave Wednesday at 5 a. m.; leave Wednesday at 5 a. m.; arrive Tuesday at 8 p. m.
3½	Shawneetown.—Arrive Saturday at 10 a. m.; leave Saturday at 2 p. m.; leave Saturday at 2 p. m.; arrive Saturday at 10 a. m.
3½	Kaskaskia.—Arrive Tuesday evening; leave Wednesday morning; leave Wednesday, 6 a. m.; arrive Tuesday, 6 p. m.
1½	Cahokia.—Arrive Thursday at 2 p. m.; leave Monday noon; leave Thursday at 3 p. m.; arrive ———.
½	Madison Court-house, or Edwardsville.—Arrive ———; leave ———.

The within is a true extract from an original paper headed "Account of mails sent from the post office at Edwardsville, Illinois, 1819," furnished to the committee appointed by the House of Representatives of the United States to investigate the charges preferred against the Secretary of the Treasury by Ninian Edwards.

S. BURCH,
Chief Clerk Office House of Representatives.

JUNE 16, 1824.

GEORGE SWEENY sworn, on the part of Mr. Crawford:

Question. Are you a clerk in the City Post Office?
Answer. I am.
Question. Look at the post-mark on this letter. What is the date there marked?
[Here the witness was shown the letter from Mr. Crawford to the Cashier of the Bank of Edwardsville, dated November 1, 1819.]
Answer. The day appears to be the 3d, but of what month cannot be discovered.

GEORGE SWEENY.

WASHINGTON, *July* 15, 1819.

DEAR COLONEL: Yours of the 28th ultimo came to hand this morning.

The circumstances connected with the Bank of Edwardsville, as developed in the two letters of Governor Edwards, submitted by you to my perusal, will receive due consideration.

I am much surprised at the contents of his first letter to you. I am gratified with the explanation you have given him upon that subject. With Governor Edwards I had no personal acquaintance before the last winter. The opinion which I had formed of his talents and integrity, from the official correspondence which had been carried on between us both in the War and Treasury Departments, has been confirmed by personal acquaintance.

The different subjects upon which he had occasion to ask my opinion or decision during the last session of Congress were fairly and candidly stated; his comments upon them were judicious, and it afforded me great pleasure to be able, after due examination and reflection, generally to coincide in opinion with him.

The gentleman who has stated that I was unfriendly to Governor Edwards has entirely mistaken my feelings and motives of action. Certainly everything which occurred between the Governor and myself was decidedly calculated to inspire feelings of a very different character. I had every reason to be satisfied with him, and hope that nothing occurred on my part to produce dissatisfaction with him with any part of my conduct. I believe the only difference of opinion that occurred between us was in relation to

the eligibility to office of a minor. In that case it would have afforded me great pleasure to have thought with him, inasmuch as it would have enabled me to have aided in doing an act highly acceptable to my friend Colonel McKee. My inability to concur with him in opinion was cause of regret and not of complaint. I had, therefore, no possible cause of hostility with the Governor, and assure you that I never felt anything like hostility to him.

I remain, with sentiments of the highest respect, your friend and most obedient servant,

WM. H. CRAWFORD.

P. S. I return you Governor Edwards' first letter.

Colonel RICHARD M. JOHNSON.

ELIZA QUEEN sworn, at the request of Mr. Edwards:

By Mr. Edwards:

Question. I wish you to state what you know concerning my sickness at your house, after my removal into the room in the back building which opens on the balcony.

Answer. I know that you were very sick while you lodged in that room; so ill that the servant was obliged to sit up with you every night.

Question. How long do you think that I continued in that situation? Do you suppose it was two weeks?

Answer. I do not recollect the exact time; I should think two weeks, but cannot be certain.

Question. Do you recollect how long it was after General Noble came to lodge at your house that I became so sick as to be confined to my room?

Answer. I am not certain, but think it was two or three days. It was on a Tuesday or Wednesday.

Question. Do you recollect that I breakfasted or dined at the table with the other boarders after breakfast on the Monday next after General Noble came to your house?

Answer. I do not recollect that you did.

Question. Was it not in consequence of my indisposition that I did not?

Answer. I supposed that it was.

Question. Was not my room, in which I was sick, one of the remotest back rooms on the second floor of the back building, and was not Mr. Noble's the front room on the first floor of the front building?

Answer. Yes.

Question. Do you recollect my being very lame after I began to recover?

Answer. I remember your wearing socks, and complaining of pain.

Question. Do you think I could have walked from my room to the front part of the house within a week after my being taken so ill?

Answer. I do not recollect seeing you do so.

Question. Was not your room adjoining mine, and would I not have had to pass by your room to get to the front of the house?

Answer. Yes.

By Mr. Forsyth:

Question. You have answered that you do not recollect that Mr. Edwards dined with the other boarders after breakfast on the Monday next after General Noble came to board at your house. Do you recollect that he did not come to the table?

Answer. I do not recollect seeing him at table after that time at breakfast or tea. I do not go to the table at dinner, but I do at breakfast and tea.

Question. When did Mr. Noble come to lodge at your house?

Answer. On Saturday, the 21st of February.

Question. And you think it was on the Tuesday or Wednesday following that Governor Edwards was taken so sick?

Answer. Yes.

Question. Where was Governor Edwards' room when Mr. Noble first came to lodge at your house?

Answer. It was the front room on the first floor; the same room which General Noble afterwards occupied.

Question. When did Governor Edwards remove to the back building?

Answer. On Sunday, the next day after General Noble came.

ELIZA QUEEN.

ADELAIDE LINDSLEY sworn, at the request of Mr. Edwards:

By Mr. Edwards:

Question. Did you not board at Mrs. Queen's during the whole of the last winter?

Answer. Yes.

Question. What do you know concerning my being sick there, after I removed into the back building?

Answer. You were taken sick about the middle of the week, and continued confined to your room, I should think, about a fortnight.

Question. Was I not sick previous to my being taken so very ill in that room?

Answer. Yes.

Question. Do you recollect my eating at table with the other boarders after the Monday which succeeded General Noble's coming to Mrs. Queen's to lodge until I got well?

Answer. I do not recollect that you did.

By Mr. Forsyth:

Question. Do you recollect that he did not?

Answer. I was never at table saving at breakfast and tea.

Question. Do you recollect that he did not come to table?

Answer. I don't know.

ADELAIDE LINDSLEY.

WILLIAM B. HODGSON sworn, at the request of Mr. Edwards:

By Mr. Edwards:

Question. Please to state what you know about my being sick, after my removal to the room in the back building at Mrs. Queen's.

Answer. I recollect finding you frequently very ill in that room, when I visited you there, so much so as to be confined to bed.

Question. How soon was this after my nomination?

Answer. I think it was the week after I understood the nomination to have been made, I believe on Tuesday.

Question. Do you not recollect calling on that day, and telling me that you understood my nomination had not on that day been taken up in the Senate?

Answer. If I did not say so on that day, I recollect to have made the observation frequently at other times when I visited you.

Question. Do you recollect that I told you that Mr. Francis Key had been to see me on the day before you visited me?

Answer. I think you did.

By Mr. Forsyth:

Question. Are you employed in the office of the Secretary of State?

Answer. I have been occasionally employed in that office to translate foreign languages; but I am not a stated clerk. I have only been employed there within six or seven weeks past.

Question. Did you visit Governor Edwards before he removed into the back room?

Answer. Yes.

Question. At what time?

Answer. On the same week on which I understood the nomination to have been made.

Question. Had you, in these visits, any conversation with Governor Edwards on the subject of the nomination?

Answer. Yes.

Question. Did he speak, in these conversations, of an opposition which he expected to his nomination, and of the grounds on which he expected it would be made?

Answer. The opposition was casually spoken of, but I do not recollect that any special grounds for it were stated by Governor Edwards.

Question. Did he say anything about the A. B. plot, or the A. B. publications?

Answer. If he did not, I mentioned it.

Question. Please to state what passed between you on that subject?

Answer. I had seen it mentioned in a New York paper that Governor Edwards was supposed to be the author of these A. B. publications. This I mentioned to him. At that time nothing positive was said by the Governor as to the authorship; but, at a subsequent visit, knowing that there were doubts entertained of his having been the author, to satisfy myself, I asked him if he did write them. He replied, "I neither confess nor deny."

Question. What was the reason of your frequent intercourse with Governor Edwards on this subject?

Answer. Motives of friendship and interest.

Question. Has there been a former connexion or acquaintance between you and Governor Edwards?

Answer. Not before my first visit to him at Mrs. Queen's. I was an applicant to be appointed his private secretary.

Question. Were you so appointed?

Answer. Yes.

Question. Are you to go to Mexico with Governor Edwards?

Answer. I am not; I have procured other employment.

WILLIAM B. HODGSON.

JEREMIAH NELSON, of the House of Representatives, sworn, at the request of Mr. Edwards:

By Mr. Edwards:

Question. Please to state what you recollect of my being sick at Mrs. Queen's, after Mr. Noble came to lodge there.

Answer. I then lodged at Mrs. Queen's, and understood from several members of the family that Governor Edwards was very sick. I should think it was more than a week after Mr. Noble's coming there that I visited Governor Edwards in his room; he was then very much indisposed; but I do not know whether he had or had not been out of his room since his being taken sick.

By Mr. Forsyth:

Question. When you visited him was he, in your opinion, well enough to go from one room of the house to another?

Answer. I cannot tell; he often went out when I thought that a person so sick as he ought not to have done so.

Question. Have you not known him to be out, night or day, when he was apparently more indisposed than he appeared to you to be at that time?

Answer. I have not.

By Mr. Edwards:

Question. Do you recollect seeing me out of my room for a fortnight after Mr. Noble's coming there?

Answer. I cannot recollect whether you were or were not.

By Mr. Forsyth:

Question. Do you recollect whether Mr. Edwards had any medical attendance at that time?

Answer. I cannot tell whether he had or had not.

JEREMIAH NELSON.

ASA E. HOUGH sworn, at the request of Mr. Edwards:

By Mr. Edwards:

Question. Do you recollect to have seen me at Mrs. Queen's after I occupied the back room?

Answer. I do.

Question. What was my situation at that time?

Answer. You were sick in bed.

Question. Do you recollect at what time this was?

Answer. I cannot remember the precise day. It was some time towards the latter end of February. I recollect that you were so much indisposed that I did not communicate the business for which I had

come. I called again some time afterward, but learning that you were still confined to your room I did not go in.

A. E. HOUGH.

HENRY WASHINGTON QUEEN sworn, at the request of Mr. Edwards:

By Mr. Edwards:

Question. Did you lodge in the same house with me during the last session of Congress?

Answer. Yes.

Question. Please to state what you know about my being confined to my room after General Noble came there to lodge?

Answer. You were not, during your illness at that time, out of your room, to my knowledge, after Wednesday while General Noble remained there. I am under the impression that you became confined to your room on a Tuesday. I remember your being at breakfast on the Monday morning previous. I do not recollect your being out of your room after Tuesday until you recovered.

By Mr. Forsyth:

Question. What enables you to fix with so much certainty on Monday and Tuesday?

Answer. General Noble came on Saturday; was not at breakfast on Sunday; and came to breakfast for the first time on Monday, in company with Governor Edwards.

Question. Were you much in Governor Edwards' room during his confinement?

Answer. I was several times there.

Question. Do you know how long he was confined to bed after his first being taken so ill?

Answer. I do not.

H. W. QUEEN.

JOHN C. RIVES sworn, at the request of Mr. Edwards:

By Mr. Edwards:

Question. Please to state what you know of my indisposition while I was in the back room at Mrs. Queen's?

Answer. I know that you were sick while there, but I cannot say exactly at what time. I visited you between the beginning and middle of March. You told me that you were then unwell, and had had on the day before a very severe ague. I think it was two or three days after Mr. Hubbard (Lieutenant Governor of Illinois) was in this city.

JOHN C. RIVES.

List of bank notes which will be received by the Bank of Missouri, according to the letter of the President of that bank, dated the 9th of August, 1819.

United States Bank and its branches.
Bank of Missouri and branch.
Bank of Kentucky and its branches at Louisville, Shelbyville, Lexington, and Paris.
Bank of Virginia and its branches at Fredericksburg, Lynchburg, and Petersburg.
Bank of Illinois, at Shawneetown.
All the banks in New Orleans, Philadelphia, Baltimore,* New York, and District of Columbia,† whose paper is received on deposit at the United States Bank and its branches.

STATE OF ILLINOIS, *Madison County, ss.*

On the 13th day of May, 1824, personally appeared before the undersigned justice of the peace in and for said county, Thomas Lippincott, who, being duly affirmed according to law, deposes that the above is a correct copy of a paper found on the files of official letters in the Receiver's office at Edwardsville; that the paper, of which the foregoing is a copy, was folded in the letter of the Hon. William H. Crawford of November 1, 1819, and is in the same handwriting of the letter of the Hon. William H. Crawford of the 6th August, 1819.

THOS. LIPPINCOTT.

Affirmed and subscribed before me—

HAIL MASON, *J. P.*

TREASURY DEPARTMENT, *August* 6, 1819.

SIR: Observing by your monthly return, ending on the 30th June, that there remained in your hands a considerable sum of the public moneys, I wish to be informed why the same was not deposited in bank, in conformity with instructions from this department. Heretofore, when there was no bank in your vicinity, all reasonable allowance was made on account of the difficulties to which you were subjected in making your deposits, but now that a bank has been established in your place of residence there can be no longer any excuse whatsoever for retaining the public money.

I am, very respectfully, sir, your obedient servant,

WM. H. CRAWFORD.

BENJAMIN STEPHENSON, Esq.,
Receiver of Public Moneys, Edwardsville.

STATE OF ILLINOIS, *Madison County, ss.*

On the 13th day of May, 1824, personally appeared before the undersigned justice of the peace in and for the county aforesaid, Thomas Lippincott, who, being duly affirmed according to law, deposes that

* Except the "City Bank." † Except the "Franklin Bank" and the "Mechanics' Bank," both of Alexandria.

the above is a correct copy of a letter found by the deponent on the files of official letters in the Receiver's office at Edwardsville; that the said letter appears to be in the handwriting of a clerk, but with the proper signature of the Hon. William H. Crawford, as the deponent believes, from a comparison with other letters received from the Treasury Department.

THOS. LIPPINCOTT.

Affirmed and subscribed before me—

HAIL MASON, *J. P.*

RECEIVER'S OFFICE, *Edwardsville, Illinois, October* 12, 1819.

SIR: My absence from this place, on a necessary and indispensable visit to Kentucky, has put it out of my power, by an earlier opportunity than the ensuing mail, to acknowledge the receipt of your letter of the 6th of August last, in which you express a wish to be informed why the public money in my hands has not been deposited in the bank of this place, in conformity with your instructions.

I should certainly have continued to make the deposits in the bank had it not been for your letter of the 9th of April, in which you requested me to pay certain bills which you expected to be drawn on me by the Indian Agents of Chicago, Green Bay, Michilimackinac, Fort Wayne, and Piqua, at the same time apprising me that the sum which would be required at the close of each quarter was estimated at eleven thousand dollars.

Knowing that, if I deposited the money in the bank to the credit of the Treasurer of the United States, I could not, without special authority, draw it out, I conceived I was fulfilling your wishes by retaining the money in my own hands for the purpose of paying, when presented, the drafts mentioned in your letter of the 9th of April; and I presume that the same construction has been given by the Receiver of Public Moneys at Kaskaskia to a similar letter which, I have been informed, he received from you, as he also, for a considerable time past, has made no deposits in the bank.

As your letter of the 6th of August makes no reference to that of the 9th of April preceding, I should, at all events, feel somewhat at a loss how to act; but I believe I should make the deposits, were it not for other considerations which I feel it my duty previously to communicate to you.

You are doubtless apprised of the hostility of the Bank of Missouri and citizens of St. Louis towards the bank of this place, supposed to be produced in consequence of certain deposits being withheld from that bank and placed in this. It seems to be believed, with what justice I do not pretend to say, that their object is to destroy this bank, with a view to coerce the regaining of the deposits in that; and, under the impression that they employ the public funds for the purpose of accomplishing that object, stockholders in and several Directors of the bank have, in disgust, either withdrawn or declared their intention to withdraw from any further concern in the bank. Some of them seem even willing that the Bank of Missouri should regain the deposits, professing to believe it would be the readiest means of causing the State pride and public feeling of this and some of the neighboring States to react upon that institution with the more effect.

In this state of things the principal part of the stockholders have declined paying the instalments that otherwise were expected to be paid upon their stock. Two of the Directors have already resigned; others talk of doing so; *and the publication of Governor Edwards, herewith transmitted, shows the course he is disposed to pursue.*

Though these measures—adopted, probably, with too much irritation—may not produce any serious evils to the bank, (and I hope they will not,) yet I feel that they impose a greater responsibility upon me than I am willing to take upon myself without the full disclosure of the whole circumstances to you, and such instructions as you may think fit to give thereupon.

The situation of the bank at present I consider as favorable as could either be expected or desired, and, under the control of the Directors who have hitherto had the management of it, I should apprehend no kind of danger to the public or to individuals; but I know not who may succeed those that have resigned and intend to resign, nor who may be elected at the next annual election on the first of January next. It is true that I have no reason to apprehend, nor do I anticipate, any unfavorable change in the directory; but, under all the circumstances of the case, I would not wish to risk the responsibility of making the deposits in the bank till after the first of January next, without your instructions, given upon a knowledge of the facts above disclosed.

I am the more averse to doing so from the difficulty that the bank must constantly encounter in converting Land Office notes into specie, so as to be prepared at all times to meet your drafts, and from the fear that those drafts may fall into the hands of persons who, under the influence of St. Louis, would be disposed to insist upon specie when notes would answer their purpose equally well, merely for the purpose of harassing and distressing the bank.

In fact, while such a variety of notes are receivable for public lands, and specie so much in demand, I do not consider it any advantage to the bank to receive the deposits on terms that subject it to the payment of cash as often as you may find it necessary to draw for it, unless the times of payment could be fixed upon at certain regular periods that would afford ample opportunity for the necessary preparation. The Land Offices now receive but little money of any kind. This consists of notes on such a variety of banks, so remotely situated from each other, that it must be a considerable time before the notes upon any one bank would accumulate sufficiently to bear the expense of sending for the money; and in most cases there is no other opportunity of converting those notes into specie, owing particularly to the locality of the banks from which they issue.

To make the deposits of any advantage the time of payment ought to be fixed as above suggested, or the drafts made payable in such notes as should be Land Office money at the time of presenting these drafts, or partly the one and partly the other. To continue to convert all the notes receivable at this office into specie, and concentrate it at a single spot, must be utterly impracticable, and, if practicable, would be attended with great expense.

I beg leave to add that the Bank of Edwardsville has received foreign gold under the expectation that it would be taken by the Government, even after the 1st November next, and it is now held ready to be paid in consequence of notice from you of an intended draft for $30,000. It is to be hoped that no

difficulties upon the subject will arise if the expected draft should not be presented till after the 1st November.

I have the honor to be, with great respect, sir, your very humble servant.

STATE OF ILLINOIS, *Madison County, ss.*

On the 13th day of May, 1824, personally appeared before the undersigned justice of the peace in and for the county aforesaid, Thomas Lippincott, who, being duly affirmed according to law, deposes that the foregoing is a true copy of a paper which was found by the deponent on the files of official letters appertaining to, and now in the Receiver's office at Edwardsville, and endorsed, or filed, in the handwriting of the late Benjamin Stephenson, Esq., Receiver of Public Moneys, as follows, to wit: "Copy to the Treasury Department, October, 1819."

THOMAS LIPPINCOTT.

Affirmed and subscribed before me—

HAIL MASON, *J. P.*

EDWARDSVILLE, *Illinois, October* 22, 1819.

DEAR SIR: Twelve thousand five hundred dollars of the capital stock of the Bank of Edwardsville having been paid into the bank since the date of my last letter, I feel it my duty to inform you of the circumstance, in consequence of some of the suggestions made in that letter.

I have the honor to be, very respectfully, sir, your obedient servant,

BENJAMIN STEPHENSON.

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

STATE OF ILLINOIS, *Madison County, ss.*

On the 13th day of May, 1824, personally appeared before the undersigned justice of the peace in and for the county aforesaid, Thomas Lippincott, who, being duly affirmed according to law, deposes that the above is a true copy of a paper on the files of official letters in the Receiver's office at Edwardsville, in the handwriting of the late Benjamin Stephenson, Receiver.

THOMAS LIPPINCOTT.

Affirmed and subscribed before me—

HAIL MASON, *J. P.*

TREASURY DEPARTMENT, *November* 1, 1819.

SIR: Upon referring to your monthly accounts it appears that you have retained all the money which has been received by you since the month of August last.

As it is presumed that this has been the result of my letter of the 9th of April last, I request that you will, immediately after the receipt of this letter, deposit in the Bank of Edwardsville the whole of the money in your possession on the 30th instant.

You will consider the letter of the 9th of April as authorizing the purchase of bills, in the manner therein directed, when you have funds, but not as authorizing the retention of the public money in your hands, at the end of each month, for that purpose.

It is presumed that if any draft should be presented, when you have not money in your hands, that there will be no difficulty in having the draft taken up by the Bank of Edwardsville on its own account, or to be repaid by you as soon as you have funds sufficient for that purpose.

I remain, with respect, your most obedient servant,

WM. H. CRAWFORD.

BEN. STEPHENSON, Esq., *Receiver Public Moneys.*

STATE OF ILLINOIS, *Madison County, ss.*

On the 13th day of May, 1824, personally appeared before the undersigned justice of the peace in and for the county aforesaid, Thomas Lippincott, of said county, who, being duly affirmed according to law, deposes that the within is a true copy of an original letter on the files of official letters in the office of the Receiver of Public Moneys at Edwardsville; that the deponent has been employed in the Receiver's office the greater part of the time since the winter of 1821–'2, and has had access to the files and papers thereof; and that the letter, of which the within is a copy, appears, from a comparison with the signature, and with the signature of other letters and papers received from the Treasury Department into the said office, evidently to be the handwriting of the Hon. William H. Crawford: And further this deponent saith not.

THOS. LIPPINCOTT.

Affirmed and subscribed before me—

HAIL MASON, *J. P.*

TREASURY DEPARTMENT, *November* 1, 1819.

SIR: The letter of which the enclosed is a copy was addressed to the Receivers of Public Moneys at Kaskaskia and Edwardsville.

From the returns of those officers it appears that the whole of the public money received by them since the month of August last has been retained, as it is presumed, for the purpose of meeting the drafts

which might be drawn in pursuance of that letter. From the same returns it appears that no such drafts have been presented.

To prevent the inconvenience and risk which may result from the accumulation of such large sums in the hands of those officers, I have this day directed them to deposit in the bank the sums which may be in their possession on the 30th instant, and to deposit, monthly, the money which may be received during each month. Should any bill be presented to the Receiver of Public Money at Edwardsville or Kaskaskia, when they have not funds to meet it, I presume the bank will have no difficulty in making the advance, which will be refunded by the Receiver when funds to that amount shall be received by him, or the amount will be remitted to the bank by the draft of the Treasurer on the bank itself. Either course will be acceptable to the Department. Payments made in this manner will be found to be the most convenient mode of meeting the demands of the Treasury upon the bank on account of the public money deposited in it.

I remain, with respect, your most obedient servant,

WM. H. CRAWFORD.

CASHIER *of the Bank of Edwardsville.*

TREASURY DEPARTMENT, *November* 1, 1819.

SIR: Upon referring to your monthly account it appears that you have retained all the money which has been received by you since the month of August last.

As it is presumed that this has been the result of my letter of the 9th of April last, I request that you will immediately deposit in the Bank of Edwardsville whatever sums may be in your hands on the 30th instant.

You will consider the letter of the 9th of April as authority to purchase bills therein described when presented, if you have funds sufficient for that purpose, but not as authority to retain in your hands, at the end of each month, any part of the public money received in the course of the month.

You will, after the deposit herein directed, make your deposits in the Bank of Missouri until otherwise directed.

I am, &c.

TREASURY DEPARTMENT, *June* 12, 1824.

In compliance with the request of the committee on the address of Ninian Edwards, communicated through Mr. Forsyth, the Secretary of the Treasury has the honor to transmit the accompanying statements (Nos. 1, 2, and 3) from the Treasurer, showing:

1. The balance of public moneys in the Bank of Steubenville at the end of every quarter, from the commencement of March, 1817, to the 31st of March, 1824, and continued to 7th June, 1824.

2. The same in relation to the Bank of Tombeckbe, from the commencement of March, 1819.

3. The aggregate of moneys deposited to the credit of the Treasurer, and the balance remaining at his credit on the 7th of June, 1824, in each of the following banks: Steubenville, Chilicothe, Mississippi, Tombeckbe, Missouri, Vincennes, Edwardsville, Illinois, Franklin Bank of Columbus, Farmers and Mechanics' Bank of Indiana, Branch Bank of Kentucky at Louisville, Planters and Merchants' Bank of Huntsville, and Farmers and Mechanics' Bank of Cincinnati.

The Secretary has the honor to state that no payments have been made, directly, by the Bank of Missouri since its failure. It is known that previously to the 23d of November last $781 43 had been paid in specie by some of the parties whose debts had been assigned by it to the Treasury, and it is understood from the President of the bank that other sums have been paid in like manner, but the Receiver at St. Louis, who is employed by the Treasury as its agent in collecting the debt of that bank, has not yet reported them to the Secretary. Among the debts assigned to the Treasury was one of $10,030, and it appears that for the reasons and under the circumstances stated in the accompanying papers, (marked *a** and *b*,) the agent entered into an arrangement by which $8,000 in notes of the treasury of the State of Missouri (commonly called Loan Office paper) were taken, at the rate of seventy-five cents to the dollar, in part payment of their debt, and these notes the Secretary directed to be specially deposited in the Branch Bank of the United States at Louisville, to the credit of the Treasurer. It also appears by the same papers that there were among the securities assigned by the bank for the payment of its debt to the Treasury, $15,006 in paper of this description. Of this sum (together with another of $50, which he appears to have since received) the agent at St. Louis, on his own judgment, subject to the approval of the Secretary, exchanged $4,539 64 for certificates of the Auditor of Missouri, and $5,000 for notes of the State Bank of Illinois, all which, with the balance of the Loan Office paper, have been placed to the credit of the Treasurer, as a special deposit, in the Branch Bank of the United States at Louisville. The exchange is represented as advantageous to the United States, but has not been sanctioned by the Secretary of the Treasury.

Hon. CHAIRMAN *of the Committee on the Address of Ninian Edwards.*

* *a* Extracts of a letter from George F. Strother to the Secretary of the Treasury, dated St. Louis, April 27, 1823.
b Extract of a letter from Thomas Sloo to the Secretary of the Treasury, dated November 23, 1823.

BANK OF STEUBENVILLE.

THOMAS T. TUCKER, *Treasurer United States.*

TREASURY OF THE UNITED STATES, *June* 11, 1824.

[*a.*]

Extracts of a letter from George F. Strother, to the Secretary of the Treasury, dated St. Louis, April 27, 1823.

"SIR: Amongst the debts transferred to the United States by the Missouri Bank was one of $10,000 upon Wilson P. Hunt. This debt was secured by mortgage, but the land pledged to secure the payment

had been previously mortgaged to Mr. Astor, of New York, for $10,000, upon which there was due eight or nine years' interest. When this note was proposed to be transferred the debt was desperate, as the land would not bring more than $10,000; and the debt was considered nominal until Mr. Hunt stated that by mortgaging the land to a friend, if relieved from the bank incumbrance, he could procure $5,000, with which he could purchase a sufficient sum of money to purchase the amount of the bank debt in Loan Office paper. Upon reflection, it was determined to receive Loan Office paper in payment of his debt, at 25 per cent. discount. Mr. Hunt on that day, and frequently, expressed to me a great desire to discharge this debt, and expressed a wish that if I should see any for sale I would send it to him. In February last he paid Mr. Barton $1,800." "Considering the debt in some peril, my wish was to have it placed upon a sure footing. Three or four weeks since a gentleman applied to me to procure a loan of money; I informed him that I had none, but that if he would give ample security to return the Loan Office paper when wanted, I would put him upon the plan to secure it; that Mr. Hunt wished to discharge a debt due the Government in Loan Office paper; and if he would give his note, with sufficient security, to pay the United States $6,000 in Loan Office paper, with 6 per cent. interest, upon demand, that Mr. Hunt would give him, in money, the selling price, amounting to $2,250. My object was to accommodate two deserving, meritorious men, and serve the Government, by placing the debt upon a sure footing. The whole arrangement I communicated to Mr. Hunt, and told him I should communicate the transaction to you. He considered it a fair and advantageous arrangement for the Government."

[*b.*]

Extract of a letter from Thomas Sloo to the Secretary of the Treasury.

ST. LOUIS, *November* 23, 1823.

SIR: Agreeably to your request of the 24th of August last, I called on George F. Strother, Esq., on the 19th instant, to exhibit to me the evidences of transfer received by him from the Bank of Missouri as collateral security for the public money in its possession at the time of its failure. Not having received the list mentioned in your letter, I requested Colonel Strother to furnish me with one, a copy of which is herewith transmitted, and with which the evidences of debt generally agree. In some cases, however, they exceed, and in others they fall short of the amount stated in the list. The former is owing to credits which the parties are entitled to that have not been entered on their notes. The latter arises from interest due on stock notes, accounts of which were to have been furnished by the bank, as appears from a memorandum of the President in the hands of Mr. Strother, and which he informs me has been repeatedly called for without effect. Amount received by Mr. Strother, as will appear from notes of payment in the list, is $781 43 in specie, and $50 in Loan Office money. The only case in which the evidence of debt has been at all changed is that of Wilson P. Hunt, who appears to have owed at the time of transfer $10,030, secured by mortgage on a tract of land in the neighborhood of St. Louis, that had been previously mortgaged to John Jacob Astor, of New York, for $10,000. Such was the uncertainty of this claim that the bank agreed to receive the amount in Loan Office paper when it was worth only 25 cents in the dollar, as I am informed by Mr. Strother.

At present the debt of Hunt appears to stand thus:

Debt transferred	$10,030 00
Offset claimed	108 00
Amount received by Joshua Barton, Esq., as per his receipt in the hands of Mr. Strother, (in Loan Office money)	1,866 67
Hunt's note in hands of Strother	3,333 33
Amount secured by conveyance of the Missouri Hotel to George F. Strother, in trust, to be paid in Loan Office money at any time the Government may require it, with six per cent. interest	6,000 00

From every information which I have been able to obtain in relation to this debt, I believe the change to have been a favorable one, inasmuch as I deem the security for the payment of the $6,000 as amply sufficient; and you now hold, for the payment of the balance due by Hunt, the same security which was held for the payment of the whole debt transferred.

I have received from Mr. Strother, in Missouri Loan Office money	$5,466 50
Auditor's warrants	4,539 64
Illinois State Bank paper	5,000 00
	15,006 14

Received by Mr. Strother, in Missouri Loan Office money, viz:

From Franklin Bank	$8,000 00
From Franklin Branch	6,956 00
From P. Detchemendy	50 00
	15,006 00

I have received this paper from Mr. Strother, considering it equal to the whole amount in Loan Office money. The Loan Office paper bears an interest of three per cent. per annum; the Auditor's warrants an interest of six per cent. per annum; and the Illinois paper two per cent. And as to the warrants, no difficulty can arise in regard to the constitutionality of the issue. Mr. Strother informs me that it was his wish to have exchanged the whole amount of Loan Office money for Auditor's warrants, by which arrangement the interest would have been increased three per cent. and the debt rendered eventually

more certain. Should this transaction not be considered as entirely satisfactory, Mr. Strother has assured me that he will make good the amount in Loan Office money, by redeeming the Auditor's warrants and Illinois paper. The amount received I shall deposit, as directed, in the Branch of the United States Bank at Louisville, Kentucky, in the early part of next month.

You will herewith receive the act of the State of Missouri establishing Loan Offices. I thought it unnecessary to incur the expense of obtaining an exemplification from the office of the Secretary of State, presuming that you wished it for your own satisfaction, and not to exhibit in a court of justice.

Mr. Strother informed me that he had brought all the suits commenced on the debts transferred by the Bank of Missouri in the State courts, in consequence of doubts having arisen of the bank being chartered, for want of the signature of the Governor. The Supreme Court of the State, however, pronounced it chartered.

DEPARTMENT OF WAR, *June* 15, 1824.

SIR: Your letter of the 14th instant is received, enclosing a note of the honorable Mr. Forsyth, expressive of his wish to have "a copy of Mr. Edwards' letter to the War Department, remonstrating against, or complaining of, an order which prevented the receiving of the Edwardsville Bank notes in payment to the troops of the United States, written in or after 1819, and any other letters on the subject of the Bank of Edwardsville from Mr. Edwards," and, in answer thereto, I have the honor to transmit a copy of a letter from Mr. Edwards to this Department, dated June 11, 1819, which the clerk charged with the files of letters received by the Department states to be the only letter from Mr. Edwards on the files of the Department in relation to that subject.

In addition to my own files, I directed the files of the Paymaster General's Office to be examined, and herewith transmit a copy of a report from that office, containing a copy of a letter from Mr. Edwards to the Paymaster General, of the same tenor and date as the one addressed by him to this office, which it will be seen by the report from that office is the only letter in relation to the subject on its files.

I have the honor to be your obedient servant,

J. C. CALHOUN.

Hon. EDWARD LIVINGSTON, *of the Committee of Investigation on the memorial of Hon. N. Edwards.*

EDWARDSVILLE, *Illinois, June* 11, 1819.

DEAR SIR: I beg leave to inform you that the Paymaster of the United States troops (Major Hall, now at St. Louis) is, by an order, (to which I hardly think you have ever given your approbation,) required to pay those troops in specie, United States Bank notes, or the notes of the Bank of Missouri, in which latter it is understood those troops are generally if not exclusively paid.

I am sure I need not remark to you that such a preference of a little petty bank of a Territory over all the respectable banks of the western States, enabling it exclusively to circulate its notes at the distant points to which the troops are destined, cannot fail to be very objectionable to those States, even if such a distinction were not unjust in itself.

I have the honor, &c.,

NINIAN EDWARDS.

Hon. SECRETARY OF WAR.

PAYMASTER GENERAL'S OFFICE, *City of Washington, June* 15, 1824.

SIR: I have the honor to enclose, in obedience to your directions, a copy of a letter from the honorable Ninian Edwards to the Paymaster General, dated "Edwardsville, Illinois, June 11, 1819," in relation to payments said to have been made, by order of the Paymaster General, to the troops in that part of the country, "in specie, United States Bank notes, or notes of the Bank of Missouri," &c., &c., being the only letter found on the files of this office upon that subject.

I am, very respectfully, your most obedient servant,

NATH. FRYE, JR., *Chief Clerk.*

Hon. J. C. CALHOUN, *Secretary of War.*

EDWARDSVILLE, *Illinois, June* 11, 1819.

DEAR SIR: I think it my duty to apprise you that Major Hall, the Paymaster of the United States troops, is, and has been for some time past, acting under an order (which I am convinced you never authorized) requiring him to pay those troops in specie, United States Bank notes, or notes of the Bank of Missouri, in which latter it is understood they are generally if not exclusively paid.

Considering the remote points at which those troops are destined to be stationed, the advantages which the present arrangement must afford to the Bank of Missouri, by enabling it to issue and circulate a great amount of its notes, without danger of their returning upon it for payment, are not less obvious than such a preference of a little petty bank of a Territory over all the respectable banks of the western States would be odious to those States; more I am sure it cannot be necessary to say on the subject.

I have the honor to be, very respectfully, sir, your most obedient servant,

NINIAN EDWARDS.

PAYMASTER GENERAL OF THE ARMY OF THE UNITED STATES, *Washington City.*

TREASURY OF THE UNITED STATES, *June* 11, 1824.

THOS. T. TUCKER, *Treasurer United States.*

Replication to Mr. Crawford's communication to the Committee.

In replying to Mr. Crawford's communication to the committee on the 8th ultimo, the subject that seems first to demand notice, in the order in which he has presented it, is his attempt to free himself from the imputation of having taken advantage "of the moment of my departure," to arraign the testimony which had been given by me before a former select committee of the House. In this, however, he does not pretend to deny any of the facts upon which that imputation was predicated, and, consequently, may be fairly considered as admitting them. For, seeing how ready he has been to advert to and dilate upon other minute and unimportant particulars, he would hardly have been silent in regard to the circumstances

which I had relied on, to prove that he must have been apprised of my intended departure, had he not been conscious of their truth.

Laboring as he has done, in his communication, to prove that no such letter *as I swore* I saw the Receiver at Edwardsville write, could have been written, and that no such directions to continue the deposits as those mentioned in my testimony had ever been given, it can no longer be doubted by any one that the object of his report was to impeach my credibility.

As nothing could justify so serious an insinuation upon light and frivolous grounds, he ought not to have made it without the most thorough conviction that it was well founded; and being so convinced, if he felt it his duty to allege it at all, it should have been done in distinct, unambiguous, and intelligible terms. Making it in a doubtful and equivocal manner shows a disposition to inflict the injury, and at the same time to secure a retreat from a just responsibility for it. His delay would, under any circumstances, render his motives suspicious. Under the particular circumstances of this case, it affords the strongest presumption that he intended to take advantage of my absence. The facts which he now affects to question I had asserted to himself two years, and with his knowledge had sworn to them more than one year before he thought proper to indicate the slightest doubt of their truth. How, then, is his silence on the subject during the whole of this period to be accounted for? Can any one who knows his disposition towards me believe that he would have delayed this imputation a moment if he had believed he could have sustained it in a fair and honorable contest? His having so long forborne to make it, when he knew I could have had an opportunity to defend myself, affords reasonable ground to believe that he would not have made it at all if he had not supposed I had actually lost that opportunity by having taken my departure for a foreign country. Why did he not question any of the facts to which I had deposed, in his letter of February, 1823, which he addressed to the chairman of the select committee alluded to, eleven days after my examination? Had he really believed that I had not sworn truly, there was then a most suitable occasion for making his present statement, and his conduct being then under investigation, there would have been every motive for making and none for withholding it.

But this was not the only opportunity he let pass by unimproved. On the 27th of February, 1823, he made a partial report to the House, in obedience to the very resolution of May 8, 1822, of which he availed himself to make his recent attack upon me. This he might with as much propriety have done on the former as on the latter occasion. According to his own view of the subject, the letter in question being from a Receiver of Public Money, was not embraced by "a call only for the correspondence between certain banks and the Treasury," and, of course, if "no such letter was called for," his official duty did not require him to make any reference whatever to it. His communication on that subject was, therefore, wholly gratuitous, and might just as well have been made without any resolution of the House as under one that had no relation to it. But even supposing it to be otherwise, it is certainly a poor excuse for his not having transmitted the information called for on the 8th of May, 1822, before the 22d of March, 1824, that he could not get the correspondence copied sooner, when, from the swarm of applicants for employment competent to this business with which the city constantly abounds, it cannot be doubted that he might at any time have had the whole of the correspondence copied in less than one month. From the very nature of it many hands might have been employed in it at the same time; and with a call so imperative, and his own plighted word afterwards that he would have the correspondence "prepared and transmitted to the House at the *commencement* of the late session of Congress," he should not have felt himself at liberty to have made a profitable job of this business in favor of any individual, so as to have delayed it till the 22d of March last.

But I shall not conclude this replication without exhibiting still greater difficulties to overcome before he can successfully exempt himself from the suspicion of having contemplated some advantages by postponing his attack to "the moment of my departure." At present, I will proceed to a brief examination of some of the new grounds and arguments thereupon by which he has elaborately endeavored to prove me guilty of perjury.

In meeting him upon this accusation I must protest against the dexterous use he makes of the same facts to establish directly opposite conclusions in his favor. I am perfectly willing to yield him one side of the argument, and have no right to object to his taking choice, but more than this it would be unreasonable in him to ask and imprudent in me to concede.

He attempts to infer that "my publication, announcing my intention of withdrawing from the Directorship of the Bank of Edwardsville," as mentioned on my "oath," could not have been communicated to him by the Receiver at Edwardsville, and even that it could not have existed, because it was not referred to in the letter of the Receiver at Kaskaskia of September 18, 1819, who, if it had existed, was bound by the Secretary's instructions to communicate it, as "a circumstance affecting the character of the Bank of Edwardsville;" and yet he contends "that even if both the communications (my publication and the letter in question) alleged had actually been made, there was nothing in the fact for the Secretary to conceal; Mr. Edwards has stated, on oath, his opinion, that in the fall of 1819 the Bank of Edwardsville was in as good a condition as any bank in which the public moneys were deposited; and if so, what necessity was there for the Secretary to discontinue the deposits?"

Now, if the latter be true, there was surely "nothing in the fact" of my publication having been made, which the Receiver at Kaskaskia "was bound by the Secretary's instructions to communicate." On the other hand, if there was anything "in the fact" which the Receiver was bound to communicate, according to those instructions, it must have been something indicative of danger in continuing the deposits. It must be evident, therefore, either that the silence of this Receiver as to my publication is no evidence against its existence, or that it contained something "to conceal;" or, at least, to render the propriety of continuing the deposits somewhat questionable.

The truth, however, is that I have nowhere contended that the Receiver's letter rendered it Mr. Crawford's duty to discontinue the deposits, and the avowal of such an opinion is most erroneously imputed to me, in direct opposition to the explanations I have given, and my declared objects in referring to that letter. Neither in my publication of 1819, avowing my intention of retiring from the bank, nor in my correspondence with him in February, 1822, nor in my oath before the committee in February, 1823, nor in my late communication to the House of Representatives of the 6th April last, is any such idea suggested. In fact, owing to the responsibility which I thought I had imposed upon myself by recommending the bank as a depository of public money, I did not think myself at liberty to retire from it until I had seen it through all the difficulties and embarrassments with which I found it struggling on my return from Congress, shortly after it had been authorized to receive the public money. These difficulties having been overcome, and the time arrived when I thought I could with propriety announce my intention of

resigning, I made the publication which has been submitted to the committee, in which, after explicitly stating that "I was convinced it (the bank) could have nothing to fear from a comparison of its situation [as to solvency] with that of any other bank in the United States," I add, "Notwithstanding I do verily believe that neither the Government nor any individual is in danger of being intentionally imposed upon by the bank *so long as it continues under the control of its present Directors*, yet, intending to be absent from the State, and considering the disastrous pressure of the present times, the hostility which the bank has to encounter, and particularly the opposition of gentlemen in this State high in office, who have been extremely anxious to get other banks into operation with the aid of 'foreign capital,' as it is termed, I have determined to resign my seat in the Directory, and to withdraw from all future responsibility of any kind whatever in relation to this or any other bank, without making any further unsupported effort to retain any portion of the public deposits in this State, leaving it to the Directors to maintain their credit by their own good conduct, and to the Secretary of the Treasury *to judge for himself*, upon the returns he requires, how far it may be prudent to trust them."

Although I believed at the time that one of the papers in which my publication appeared was regularly sent to Mr. Crawford, yet I enclosed to him a paper containing it, and, that he might have as perfect control over the subject as possible, I prevailed upon Colonel Benjamin Stephenson, the Receiver and the President of the bank, who apprehended that ill consequences would result from my withdrawing from it, to write to the Secretary of the Treasury on the subject, and enclose to him one of my publications also; and I advised him (the Receiver) in the meantime to withhold the deposits till he could receive further orders from the Secretary.

In my correspondence with Mr. Crawford in February, 1822, which is exhibited by himself, referring to my publication and the situation of the bank at that time, I say, in one of my letters: "This publication was contained in the St. Louis Enquirer, which I supposed you took at the time; it was also contained in a paper which I forwarded to you myself; and it was enclosed, referred to, and commented upon in a letter of the President of the bank to you." In the other letter I say: "That I was the cause of the deposits being made there in the first instance I freely admit; but that I unequivocally declared that I would not be held responsible for that or any other bank, in any way whatever, after the fall of 1819; that *you were notified thereof in due time;* that the deposits have not been continued there, in consequence of my recommendation, since that period; and that *the bank was then in a good situation*, I may, I think, according to my present impressions, fairly insist on."

In my oath before the select committee on the 13th February, 1823, which Mr. Crawford has thought proper to impeach, after having testified to Colonel Stephenson's having written the letter in question, and enclosed my publication, &c., I add: "The bank continued to pay specie, notwithstanding the pressure, and in the fall of that year I expect was *in as good a situation as any bank in which the public money was then deposited.*"

In my late communication to the House of Representatives of the 6th April last I not only re-assert the same facts substantially in regard to the situation of the bank, but, by its monthly return for November, 1819, have unquestionably proved them true to the fullest extent. And I expressly state in that communication that "even at the time of its failure its resources were, I am well satisfied, more than amply sufficient to have secured its debt to the Government."

It is, therefore, inconceivable to me upon what ground it has been assumed that in referring to the Receiver's letter my object was "to charge the Secretary with continuing the deposits after he ought to have been alarmed for their safety," especially while it is admitted that I spoke "in the most decided terms of the solvency and safety of the bank" at the time the letter was written.

It is true I cannot consider it very prudent management in Mr. Crawford to have continued it a depository of public money after he had, as he says himself, "*reason to apprehend a want of punctuality or good faith on its part*," especially without enforcing a compliance with its stipulation to make those returns which *he* considered necessary to insure the fidelity of all the banks that were made depositories of the public money. The former is acknowledged in his communication to the committee, (page 18.) The latter appears by his letter to the President of the Bank of Edwardsville of the 10th November, 1821, in which he states that "no statement of the account between the Bank of Edwardsville and the Treasurer of the United States has been rendered to this Department since that of the 31st January last."—(See document 140, part 2, page 439.)

But whatever may be my opinion of his subsequent careless management in regard to this, as well as other western banks, I certainly never intended to refer to the letter in question *for the purpose of showing* that there existed *at that time* any such a state of things as rendered it necessary to withdraw the deposits from that bank.

But as my having been a Director thereof at the time it was authorized to receive the public money might have had its influence with Mr. Crawford in selecting it for that purpose, I deemed it important to give him timely notice of my intention to resign, and to afford him a fair opportunity of adopting such a course as he might think expedient under the circumstances of the case. The Receiver, who was also the President of the bank, and who was more afraid of jeopardizing the former than anxious to retain the latter office, (for which he was not then allowed a cent of compensation,) fearing that the credit of the bank might be impaired and that other ill consequences might result from my withdrawing from it, and being also bound "by the Secretary's instructions to communicate any circumstance affecting the character of the bank," was very easily prevailed on to write the letter in question, to enclose my publication, and to withhold the deposits for the purpose of lessening the additional weight of responsibility which he thought, and truly thought, the circumstances mentioned in his letter had devolved upon him.

My objects in referring to my publication and to this letter were two-fold:

1. To show the course of conduct I had pursued in relation to my withdrawal from the bank.

2. To show that Mr. Crawford was well informed and duly notified thereof. Both were rendered necessary by the ungenerous and disingenuous attempts to subject me to unjust censure which are adverted to in my correspondence with him in February, 1822.

It is remarkable that, with a pertinacity the most extraordinary, he still perseveres in his efforts to implicate me in the transactions of that bank, well knowing that my connexion with it has long since ceased. And hence is his labored effort in his late communication to the committee to prove that I continued to be a Director thereof after the fall of 1819. In doing this he must have attempted to impose upon others what he himself could not have believed. With all the information which he must have had at the time of writing his late communication what could be less justifiable than the implications

to which he has thus so recently endeavored to subject me? Whatever else he may think of me, you cannot believe that he thinks me so great a fool as to have so repeatedly and publicly asserted, and finally sworn to, the fact of my having withdrawn from the Directorship of that bank if it had not been true, since, in that case, it would have been so easy to have convicted me of falsehood and perjury. What, then, can be thought of his candor in insisting, even at this late period, that I continued to be a Director of that bank after the fall of 1819?

Let us, however, see how he endeavors to establish this fact:

Referring to that part of my oath before the committee, in February, 1823, in which I had sworn that, though I had once been elected a Director since the fall of 1819, I had refused to accept the appointment, and had had nothing to do with the management of the bank since that time. "Yet," says he, "in the following winter Mr. Edwards is found presenting himself to the Secretary, not only in the character of a *Director* of the bank, but of a Director *specially delegated* and *authorized* by the bank to conclude an important arrangement with the Secretary in respect to the terms on which the bank was to continue a depository of public money. By the printed papers accompanying the Secretary's report to the House, of the 27th of April, 1822, it appears that on the 16th of February, 1820, Mr. Edwards, then in Washington, transmitted to the Secretary a letter from the bank to the Secretary, signed by this very Receiver as President of the bank, containing a list of Directors for the year 1820, in which Mr. Edwards' name is included; that at the same time he also transmitted to the Secretary a letter from the bank, signed by the same Mr. Stephenson, informing the Secretary that Mr. Edwards, as one of the Directors of the institution, is authorized to *suggest certain modifications* of the contract between the Secretary and the bank and to conclude such arrangements as he may deem acceptable, which will be considered obligatory; and he likewise transmitted at the same time a letter from the bank, addressed to himself, signed also by Mr. Stephenson, stating to him at large the changes desired by the bank and the reasons therefor."

Contrasting all this parade of circumstances with *all* that I did in regard to *the authority* thus conferred upon me "*to suggest certain modifications of the contract*," and to my "*special delegation* to conclude *the important arrangement*," it would seem that Mr. Crawford could not have desired a stronger confirmation of the truth of the very statement which he now affects to question. *What did I do?* Nothing more than write to him a short note in the following words, viz: "I have the honor herewith to transmit to you certain communications which I have recently received from the Bank of Edwardsville, the object of which is fully explained by the communications themselves." Is it presumable that any member of the Senate, (not excepting my colleague, who was opposed to the bank,) would not, under similar circumstances, have done this much? Could I, with any kind of decent respect for a portion of the people I represented, have *done less?*

Without otherwise saying anything to him on the subject, I simply left the papers *to speak for themselves.* At this time he and myself were on terms of intimacy, and, as I thought, cordiality and friendship. Had I not been determined not to interfere further in the business I should certainly have spoken to him about it. Had he not perfectly understood from my publication, &c., the reasons of my silence, he would, doubtless, have mentioned the subject to me. But no conversation having taken place between us in regard to this matter confirms my statement, and affords a very strong presumption that he had received all the information before referred to.

His attempt to produce an impression unfavorable to me from the circumstance of my name appearing on the list of Directors is the more extraordinary, since he himself has prefaced his remarks on that subject with an extract from my oath, from which it appears "that, though I had been once elected to that station since 1819, I had refused to accept it." He well knows that to constitute a Director requires the concurring wills of the electors and the person elected; and knowing I had "refused to accept the appointment," nothing can be more disingenuous than to pretend to recognize me in that character. If he had entertained the least suspicion that I had not sworn truly on the subject his whole conduct towards me can leave no doubt that he would have spared no pains to have been prepared to prove the fact. It being, therefore, obvious that he must have believed my statement, in this particular at least, what can be thought of his effort to mislead others in regard to it? More frankness and candor surely were due to the exalted station he occupies.

My name's appearing on the list of Directors was produced by the following circumstances: The election took place on the 1st of January, 1820, while I was attending to my public duties in this place as a Senator of the United States, and though I had positively declared that I would not serve, I was elected by the influence of General Payne, of Kentucky, who held nearly half the stock of the bank, and hoped that he could prevail upon me to change my determination, which he in vain attempted to accomplish; all of which, I have no doubt, Mr. Crawford well understood. It was probably owing to this gentleman's influence, and that of his powerful connexions in Kentucky, that this bank continued so long a depository of public moneys.

From Mr. Crawford's present attempt, under all these circumstances, still to implicate me in the transactions of that bank, it may well be supposed that his first efforts for that purpose in 1822, which have been systematically and pertinaciously persevered in to the immediate cause of the present controversy, have not left me without just cause of complaint.

My conduct in regard to that bank has been fairly stated. It was the result of a justifiable desire to protect my own character against casualties that might have injured it, and not with a view to injure or give dissatisfaction to any human being. Nor did I imagine that it could have produced any motive or furnished any ground for accusation against me. Finding, however, contrary to every reasonable expectation, that "partial information from the Treasury Department," concerning my agency in bringing that bank into connexion with the Treasury, was extensively used with no little success, for the purpose of producing injurious implications against me, and thinking that I had just reason to apprehend they were about to be presented in a more imposing form, I felt myself called upon to address to Mr. Crawford my letter of the 9th of February, 1822, in which, from a desire that my conduct should be fairly understood, and with no intention or expectation of giving offence, I referred to and asserted the facts, substantially, in relation to my publication of 1819, and the Receiver's letter, which are contained in my oath before the select committee in February, 1823.

Nothing could have been more preposterous than my assertion of these facts and the request with which it was accompanied, if I had not supposed that all these documents were in Mr. Crawford's possession. Nor can anything be more reasonable than to suppose that if they had not been received by him, he would then have said so.

He, however, alleges that "his not having replied to this or any other matters contained in those

letters, resulted from his having declined any correspondence with Mr. Edwards on the subjects to which they referred, in consequence of *a menace* which the first of them contained." But let us inquire what that menace was.

Having stated, in my letter above referred to, circumstances which induced me to suppose, *as well they might*, that he intended *to make some use of my name* in a report he was about to make to the House of Representatives on the subject of the Bank of Edwardsville, I say: "I beg leave, most respectfully, to suggest that it would be but an act of justice to me to present my publication of 1819, in which I declared I would be no longer responsible for that or any other bank, in any way whatever;" declaring, in the same letter, that the object of it was to manifest my disposition or willingness to avoid *the necessity* on my part of calling for any information upon the subject, or referring to other matters.

It is this declaration, candidly made with a view to avoid any measure that might be construed into an evidence of hostility, that he is pleased to consider "the menace which my first letter contained." As, however, my real object was what I had declared it to be, I had no hesitation in saying in my second letter that "I owe it to myself *unhesitatingly* and *promptly* to disavow any intention of offering personal disrespect to you, or the station you occupy." The *menace*, then, if any had been made, was withdrawn. Still, however, he did not think proper to deny that the communications alluded to were in his possession, which no doubt he would gladly have done if such had been the fact.

But he did not, in fact, "decline any correspondence with me on the subjects to which my letters referred;" for, in his answer to my first one, among other observations which he made in relation to those "subjects," he says: "I assure you, sir, it will afford me great pleasure to communicate to Congress *all* the information in the possession of the Department concerning that bank, your agency in bringing it into connexion with the Treasury, and the representations which were made against," &c., thereby manifesting a disposition rather to show that he had no desire to conceal and withhold the documents alluded to, than to deny their existence.

Under these and other circumstances mentioned in my communication to the House of Representatives, it would be extraordinary, on the supposition that my publication and the Receiver's letter had not been received, even if he had declined replying to my letter of February, 1822, that their existence should have remained for a period of more than two years unquestioned; and that even a doubt upon the subject should have been for the first time suggested "at the moment of my departure for a foreign country."

But Mr. Crawford has, in his communication, attempted to avail himself of an additional ground to convict me of false swearing in what he is pleased to call my "alleged expectation" that the letters referred to in my testimony, as having passed between himself and Colonel Stephenson, would have been communicated to the House under one or other of the resolutions of February, 1822.

"As the resolutions," says he, "under which it is alleged these letters should have been communicated, call only for the correspondence between certain 'banks' and the Secretary, it is unnecessary to explain why, among the letters which were communicated, any correspondence between a 'Receiver' and the Secretary was not to be found; nor is it easy to imagine how any one informed of the tenor of those resolutions should have entertained the expectation of seeing the letters in question among the papers which were transmitted."

In order to a correct understanding of this part of the subject, it may be useful to advert to my testimony before the committee. In this, after stating that I had prevailed upon "Colonel Benjamin Stephenson, the Receiver, and the *President of the Bank of Edwardsville*, to write to the Secretary," &c., I say, "I was much surprised at not seeing this correspondence in the report, as well as one or more letters which, I confidently believe, were written to the Secretary of the Treasury in 1819, for the purpose of apprising him of the situation of the bank at that time, and inducing him to forbear to draw upon it until it could relieve itself from the pressure it was then encountering." Now as, from my whole statement in regard to this matter, it is evident that the subject-matter of the letter referred to in my testimony related much more to the affairs of the bank than to the ordinary duties of the Receiver, it surely is not more extraordinary that I should have expected to have seen this letter, or so much of it, at least, as related to the affairs of the bank, "among the papers which were transmitted," than that Mr. Crawford himself should have transmitted a variety of letters from *this same Receiver* under the resolutions referred to.

But he has in other instances acted upon the very consideration which induced the "expectation" on my part to which he now excepts; or why did he transmit his letter to the Receiver at St. Louis of January 19, 1822, (see Document No. 119,) and state, in the report which it accompanied, that he had transmitted "all the additional returns and correspondence required by the resolution, *except two letters from the Receiver at St. Louis, which were of a confidential nature?*" Nothing could have rendered it necessary to have communicated the first, or to have apologized for not transmitting the latter, but the circumstance of their relating, as the letter of Colonel Stephenson did, to the affairs of the bank.

Having thus disposed of the amplifications which he has given to his original charge, as contained in the report in question, I now return to the latter, which is as follows:

"The Hon. Mr. Edwards, late a Senator from Illinois, having stated on his examination before a committee of the House, on February 13, 1823, that the late Receiver of Public Moneys at Edwardsville had, on his advice and in his presence, written a letter to the Secretary, enclosing a copy of a publication which Mr. Edwards represents himself to have made some time in the year 1819, announcing his intention of retiring from the Directorship of the Bank of Edwardsville, and that he had advised the Receiver to withhold his deposits from the bank until he could receive further orders from the Secretary; and that *the Receiver* afterwards informed him that he had received *a letter* from the Secretary, directing him to continue the deposits; the Secretary deems it proper to state that no such letter from the Receiver is to be found on the files of the Department; that the officers employed in it have no recollection of the receipt of such a letter; and that, on an examination of the records of the Department, it appears that no answer to any such letter, *directing the Receiver to continue the deposits*, was ever written to him by the Secretary of the Treasury."

Whatever different interpretations, ingenious and forced constructions might have given to this report, Mr. Crawford's elaborate commentary upon it must now carry conviction to every mind that its real object was, at least, to create a suspicion of the truth of my statement, both in regard to the Receiver's having written the letter mentioned in my testimony, and of his having "afterwards informed me that he had received a letter from the Secretary *directing him to continue the deposits.*" The report itself, as well as the commentary, alleges circumstances which are intended to invalidate the former, and he has impeached the latter by denying that he *ever gave such instructions to the Receiver.*

The facts, then, fairly at issue between us are—

1st. Whether the Receiver did write the letter alluded to.

2d. Whether he "afterwards informed me that he had received a letter from the Secretary directing him to continue the deposits."

As to the first: It appears that on August, 6, 1819, Mr. Crawford addressed a letter to the Receiver most emphatically requiring him to state "why he had not then deposited the public moneys in his hands in the bank, in conformity with the instructions from the Department," and alleging that there could be "no longer any excuse whatever for retaining the public money."—(See page 115 of this report.)

It is difficult to believe either that the Receiver would have neglected to answer this peremptory letter, or that Mr. Crawford would have tolerated such a disrespectful omission. The latter, however, has stated additional circumstances which render it wholly improbable that any such neglect should have occurred. He represents the Receiver as having been guilty of great remissness in regard to making his deposits for months before, and says that he (the Receiver) "must have discovered that the Secretary was dissatisfied with him for retaining the public money in his hands. He must have been aware that every subsequent return which he transmitted to the Treasury, as it exhibited an increasing balance, and as it showed that he made no deposits in bank, would aggravate the Secretary's dissatisfaction." Mr. Crawford, however, relies upon these circumstances to prove that if the Receiver had answered this letter he would in his subsequent correspondence, consisting of two short notes, have made "some allusion to the communication which explained the reason of his apparent disobedience, and to the instructions which he expected in answer, for the government of his conduct in that important particular;" but would it not, let me ask, have been much more extraordinary and unaccountable that he should not have answered the letter at all, than that he should have failed in one or two short subsequent communications to have alluded to his answer?

The letter, in fact, was fully answered on the 12th October, 1819. No other answer was ever given by the Receiver. And this is the very letter in question which, after accounting for its delay, assigns as a reason for not having theretofore made the deposits, *a difficulty that might thereby have been created* of complying with previous instructions; presents an account of the then situation of the bank; intimates apprehensions as to its future prospects; declares an unwillingness to make further deposits without such instructions as the Secretary might think fit to give "on a full disclosure of the whole circumstances of the case;" and, among other things, expressly states that "*the publication of Governor Edwards, herewith transmitted, shows the course he is disposed to pursue.*" All of which, I am happy to say, can be established by the original draught of the letter itself on file in the office of Samuel D. Lockwood, Esq., Receiver of Public Moneys at Edwardsville, with an endorsement thereon in the handwriting of the late Receiver, (who has been dead about eighteen months,) purporting that the letter was sent to Mr. Crawford in October, 1819, (of which an attested copy is hereto annexed.)—(See page 116 of this document.)

On the 22d October, 1819, ten days after the date of the letter last referred to, the Receiver again writes to Mr. Crawford, and states that "twelve thousand five hundred dollars of the capital stock of the Bank of Edwardsville having been paid into the bank since the date of my *last letter*, I feel it my duty to inform you of the circumstance *in consequence of some of the suggestions made in that letter.*"—(See page 117.) The first fact in issue between Mr. Crawford and myself is therefore established.

As to the 2d, viz: "That the Receiver informed me he had received a letter from the Secretary directing him to continue the deposits." It must be admitted that my statement does not render me at all responsible for the truth of this information, and that it might have been given to me even if it had not been true. But as this circumstance would have weakened, so the fact of Mr. Crawford's having actually writen a letter to the Receiver in November, 1819, expressly saying "*I request that you will, immediately after the receipt of this letter, deposit in the Bank of Edwardsville the whole of the money in your possession on the 30th instant,*" must sufficiently corroborate my testimony.

This letter, it is true, does not profess to be an *answer* to the letter of the Receiver of the 12th October, 1819, nor have I imposed upon myself any obligation to prove it to be so. But there are certainly strong circumstances to show—

1. That it was written in consequence of the Receiver's letter.

2. That it could not have been written on the grounds upon which it professes to have been written.

As to the first: It is worthy of remark that, in noticing "*the difficulty*" suggested by the Receiver as an excuse for not having made the deposits, Mr. Crawford is so *particular* in pointing out the means of obviating that difficulty, that it is almost impossible to resist the belief that he had then received the letter in question.

This belief, however, acquires great additional, if not irresistible strength from another document which Mr. Crawford enclosed in his letter to the Receiver of the 1st November, 1819. It will be perceived that among the strongest reasons urged by the Receiver for declining to make the deposits in the Bank of Edwardsville without further instructions from the Secretary, were his apprehensions of danger to it from "*the hostility of the Bank of Missouri*, and *citizens of St. Louis;*" and his apprehensions that the drafts of the Secretary might fall into their hands, or those of persons who, under their influence, would be disposed to insist upon *specie*, when *notes* would answer them equally well, *merely* for the purpose of harassing and distressing the bank." It is presumable that it was to allay these apprehensions that Mr. Crawford (who had checked the Bank of Missouri for its conduct towards other banks) transmitted in his letter to the Receiver, who was also the President of the Bank of Edwardsville, the document alluded to, which is headed "a list of bank notes which would be received by the Bank of Missouri according to the letter of the President of that bank dated August 9, 1819."—(See page 115.) For what other possible purpose could this "*list*" have been intended? And what else could have induced him to send it to the Receiver at Edwardsville?

Further corroboration of his having received the letter in question is furnished by the circumstances of his having, on the same day that he wrote to the Receiver at Edwardsville, written on the same subject to both the Receiver at Kaskaskia and the Cashier of the Bank of Edwardsville, giving to the former particular instructions about making his deposits, and enclosing to the latter a copy of a letter that he represents himself to have written to both these Receivers, from which it appears that he ordered them to deposit all the public moneys which they should receive after the last day of the month in which he wrote, *not in the Bank of Edwardsville*, but in the Bank of Missouri until otherwise directed.—(See page 118.)

Considering the circumstances disclosed by Mr. Crawford, in regard to the withholding of the deposits by those two Receivers, it is not to be presumed that either of them would have been guilty of any

unnecessary delay in making the deposits after the receipt of his letters to them of the 1st November, 1819; and if these letters, which purport to have been written at that time, were promptly transmitted by mail according to their respective destinations, it is inexplicable that the Receiver at Edwardsville, who resided within about two hundred yards of the bank, of which he was also the President, should not have deposited "the whole of the money in his possession on the 30th November," before the 31st December, and that the Receiver at Kaskaskia should not have made his deposits until the 3d January following. Mr. Crawford admits that the former did not receive his letter till some time in the month of December, but at what time in that month is not stated, nor how the fact was ascertained or is ascertainable.—(See his communication, page 6.) Such delays as must have intervened between the date and receipt of those letters, at a season of the year when the mail is liable to so little obstruction, afford matter of speculation, in which, for the present, I forbear to indulge.

But, I would ask, what, but the letter of the Receiver at Edwardsville of the 12th October, could have startled Mr. Crawford into all this hurry of writing, and sudden change of the place of deposit, and at the same time account for the subsequent hesitation that seems to be fairly inferrible from these otherwise unaccountable delays? As that letter was well calculated to produce such results, and nothing else appears to account for them, it cannot be unreasonable to refer them to that cause.

He attempts to avoid the inference of his having received this letter and my publication, by stating "that if they had been known to him, they would naturally have been alluded to on such an occasion" as that of writing to those Receivers; in other words, that the receipt of them would have been acknowledged by him. But he admits the receipt of the letters of Mrs. Stephenson and the Receiver at Kaskaskia of the 18th September, 1819, and attaches much importance to them in his communication; yet, though it would have been just as "natural" that he should have alluded to them as to the letter of the Receiver of the 12th October, he is as silent as to either of them as he is to the latter, or as he was to that part of the letter of the President of the Bank of Missouri, of the 9th August, 1819, which gives such an alarming account of the Bank of Edwardsville. His not having noticed the letter in question in any of his subsequent communications, therefore furnishes no evidence to rebut the strong presumption that I have relied upon to prove that he must have received it.

Let us then briefly inquire whether his letter of the 1st November could have been written on the grounds upon which it professes to have been written?

He professes to have been induced to write it from an inspection and examination of the *monthly accounts* of those Receivers, and commences it in the following words, viz: "Upon referring to your *monthly accounts*, it appears that you have retained all the money which has been received by you *since the month of August last.*" Now a moment's reflection is all that can be necessary to convince you that there could not have been at Washington on the 1st November more than *one monthly account* of moneys received *after* the month of August preceding. And if he had really referred to their *monthly accounts*, he would have perceived that the Receiver at Kaskaskia had retained in his hands all the money received by him after the 18th May, and that the Receiver at Edwardsville had made no deposit since the first day of the preceding July; circumstances which it is extremely improbable he would have overlooked, or neglected to advert to in his letter, unless, indeed, there was some peculiarity in these cases, that defies all skill in guessing, which rendered it more excusable in these officers to have retained one part of the public money than another.

But, if something more than meets the eye was not intended, why was his letter to the Bank of Edwardsville of 1st November, 1819, together with its enclosure, on the subject of those very deposits, suppressed? Their omission concealed a fact which affords a very strong presumption that he had received the letter of the Receiver at Edwardsville of the 12th October, and it is rendered less probable that they were withheld through inadvertence or forgetfulness, from the circumstances of my having called his attention to the subject, by my correspondence with him in February, 1822, just about the time he made the report that ought to have contained them.

This letter, though at last brought out upon the third call upon Mr. Crawford for his correspondence with the banks, and accompanying the report that was intended to affect me so injuriously, is still given in such a manner as not only to conceal the true state of the case, but to produce an impression directly contrary to the fact, by omitting to communicate its enclosure, which is so referred to as necessarily to make it a part of the letter, and this impression would probably never have been questioned, but for the present contest in which the report has involved me.

The letter commences by saying, "The letter of which the enclosed is a copy, was addressed to the Receivers of Public Money at *Kaskaskia* and *Edwardsville.* * * * To prevent the inconvenience and risk which may result from the accumulation of such large sums in the hands of those officers, I have this day directed *them* to deposit in *the* bank the sums which may be in *their* possession on the 30th instant, and to deposit monthly the money which may be received during each month."

Now, in what bank would any one suppose these monthly deposits were to be made? Certainly in the Bank of Edwardsville, to which the letter was addressed. But palpable as this conclusion may appear, the fact is directly otherwise, and the enclosure will prove it. By the latter, Mr. Crawford says "I request that you will *immediately* deposit in the Bank of Edwardsville whatever sums may be in your hands on the 30th instant, (November, 1819.) * * * You will, after the deposit herein directed, make your deposits *in the Bank of Missouri* until otherwise directed." Who, let me ask, could have inferred from this letter alone that these directions had been given to those Receivers or to either of them? And can it be denied that this enclosure ought to have been communicated for the sake of truth if nothing more?

But let us see how this case stands in other respects. If he did not send such a letter and give such instructions to those Receivers, he made a direct and positive misrepresentation to the bank, for which no adequate motive can be perceived. But if, *as he himself asserts*, he did give such instructions, it shows most clearly that he did intend to suspend the making of deposits in that bank, and accounts, much more satisfactorily than he has done in his communication to you, for his letter of the 20th April, 1820, which directs the deposits to be continued with a degree of particularity that would scarcely have been thought necessary if there had been no reason to suppose it had been his intention to discontinue them.

But he has appealed to the want of any assignable motive for the concealment of any of the foregoing facts as proof that none was intended. I take no issue with him upon his motives or intentions. I may, however, be permitted to say that the pertinacity with which, in opposition to all the proofs I have exhibited, he still endeavors to hold me responsible for the Bank of Edwardsville, after the fall of 1819, renders it probable that he might not have been willing to let me escape from responsibility at that time. Overwhelmed, as he was, with representations against the bank, my withdrawal from it may have confirmed

his fears, and rendered him reluctant to disclose any circumstance that was calculated to devolve upon him an increased responsibility for events then apprehended and since realized.

Having received a communication, through the committee, that contains a reference to a conversation that I am represented to have had with Mr. Campbell, of Ohio, on the day of my departure from the city in March last, I feel myself authorized to give the following explanations:

In travelling through Kentucky last summer I received, at Russellville, in that State, a confidential communication from Virginia, warning me that I was to be attacked at the then succeeding session of Congress, and that Governor Coles, of Illinois, was expected to co-operate in it, and advising me strongly to come on to Washington a week or two before the meeting of Congress, for the purpose of preparing for a defence. These intimations coming from a source that I knew to be entitled to the highest respect, I did not think it prudent to disregard them, and not expecting to return to Illinois for some time thereafter, I wrote to the Hon. Daniel P. Cook on the subject; in consequence of which, a correspondence took place between him and Governor Coles, in which, I believe, the latter disavowed the correctness of the information as it related to him. I refer to this correspondence with less reluctance, because Governor Coles, whose character is well known here, can establish it.

Being thus warned, I endeavored to prepare for the threatened attack, and came on to Congress with a determination to do nothing unnecessarily to provoke it, but to meet it, whatever it might be, with firmness whenever it should be made. I, however, never once suspected anything like the insinuation contained in Mr. Crawford's report; and though I may have written as much, or even more than has been supposed, preparatory for an anticipated attack, yet it is most certain that not one word of it related to the subject of the report. This I had neither anticipated, heard of, nor seen, till about one hour before my intended departure, on the day after it was communicated to the House. It then took me by such perfect surprise that I neither knew nor could decide what was best to be done with it; and I left the city without ever having mentioned the subject, as well as I can recollect, to any person or persons, except three members of the House of Representatives, of whom Mr. Campbell, of Ohio, was one. I met with him on the morning I left the city, and my impression is that he introduced the subject, and seemed to have no doubt that the report was intended as an attack upon me. In the course of the conversation with him I alluded to the confidential information above referred to, probably spoke of what I had prepared and intended to have done in any event that might have rendered it necessary to have defended myself at an earlier period, and regretted that I could not have been permitted to get off in peace. It is idle to insinuate that my answer to the report could have been written before my departure from this place. The latter could not be answered till it existed; and after it was known to me, I did not remain here long enough for any such purpose. Besides, a letter which I wrote to Mr. Campbell, on my journey, (towards whom I had no motive for concealment,) will show that my communication was then not only written, but that I did not expect to employ more than three hours in replying to the report. One thing is certain, that no man could have been less disposed than myself to be the aggressor in any controversy whatever at that time; and if I had not considered the report as intended and calculated to fix an indelible blot upon my reputation, which I knew I did not deserve, nothing would have been heard from me in regard to Mr. Crawford.

The anxiety which the committee manifest, and must so naturally feel, to get through with this investigation, and my continued indisposition rendering it impossible to proceed with my replication to Mr. Crawford's communication as I had intended, so as to finish it within the time which I could reasonably hope to prevail upon the committee to wait, I feel myself compelled to postpone to a future occasion, which will not be neglected, a full answer to all his remarks, and at present to content myself with a few observations upon those of them which are most prominent, and seem to demand the most immediate attention.

Commencing his justification for receiving so much uncurrent paper, some of which was greatly below par, from certain local banks, with a history of the commencement of the direct connexion of the Bank of Missouri with the Treasury Department, on the 1st August, 1818, he says: "Before this time the bank had acted as the agent of the Bank of the United States. It had fulfilled its engagements with that institution with good faith, &c. * * * * The large amount of money to be received from the sale of public lands in that quarter rendered a connexion with such a bank not only convenient, but necessary. * * * The Receivers were instructed to receive the notes of such banks as paid specie on demand for their notes, and no other, and to deposit them in the bank to the credit of the Treasurer." But, says he, in this arrangement with the bank "there was *no stipulation* as to what kinds of money it should receive or pay for the Treasury." These, therefore, must have been general deposits; and having been made at the solicitation of the bank, without any special agreement, it thereby imposed upon itself the highest obligation in regard to them that the acceptance of an unconditional and general deposit could create upon any bank whatever.

But, besides this general principle, there was a contract that excludes every construction which could have imposed upon him any obligation, moral or legal, to have taken from the bank any paper that was not of as much value as the deposit at the time it was made.

This bank was continued a depository of the public money on the same terms on which it had been employed as the agent of the Bank of the United States, except that instead of the deposits being subject to the drafts of the Cashier of the Bank of the United States, they were, on this second arrangement, to be drawn out "from time to time by Treasury drafts."

In both cases they were to be drawn for "as occasion might require, subject to the following conditions, viz:

"1st. If in favor of individuals, to be paid at sight.

"2d. If in favor of the Bank of the United States, payable in sixty days."

It appears from Mr. Crawford's own reports, "that in 1817 an arrangement was made between himself and the Bank of the United States, by which the public funds were to be deposited in the branches of that institution in all places where such branches existed; and where there was no such branches, the bank was to designate certain State banks, for which it would be responsible, and in which such public moneys should be deposited," &c.

In conformity with this arrangement, the Bank of the United States, having selected and employed the Bank of Missouri as a depository of the public money, became responsible to the Treasury Department to pay cash for all moneys therein deposited. This it could have had no motive for doing without a correspondent obligation on the part of the Bank of Missouri. Who could be better judges of what would create such an obligation than the enlightened President and Directors of the Bank of the United States?

Their disinterested opinion on the subject is practically demonstrated by the adoption of measures which they must have considered fully adequate to secure their own interest, and impose upon the Bank of Missouri the correspondent obligation above referred to." Their, therefore, not requiring "a stipulation as to what kind of money the Bank of Missouri should pay" is the best proof that they did not consider any stipulation, in addition to those expressed or implied by the contract, as necessary to impose upon that bank the obligation to pay cash.

If, then, notwithstanding the want of such a stipulation, the Bank of Missouri was answerable to the Bank of the United States for the public deposits as cash, by what kind of argument can it be demonstrated that the absence of such a stipulation exempted it from a similar obligation in its subsequent engagements with the Treasury Department?

By the contract there were but two ways by which the Secretary could claim the right to demand or the bank the right to make payment: The one by drafts in favor of individuals, payable at sight; the other by drafts in favor of the Bank of the United States, payable in sixty days. There was, therefore, no obligation on Mr. Crawford to receive one cent himself, nor to enter into an arrangement with other banks to receive any part of the deposits from the Bank of Missouri. How, then, was he "bound" to accept the uncurrent money which he received from that bank? By the contract he could have lawfully required it to pay the whole amount of deposits, either on drafts in favor of individuals or of the Bank of the United States, subject to the conditions that apply to each. Had he drawn for the whole amount of the deposits, according to the contract, his drafts could not have been discharged, without the consent of the holders thereof, in anything but legal money, and a protest of the drafts would unquestionably have furnished good cause of action against the bank.

But it is manifest, from other considerations, that it could not have been the intention of the parties that the deposits were not to be considered as a cash demand upon the bank. Both parties knew at the time of the contract that the Bank of the United States would not receive in payment anything but cash, or its equivalent; a contract, therefore, on the part of the Bank of Missouri to pay, if required, the whole amount of the deposits to the Bank of the United States, must have been understood as an obligation to pay it in legal money, or such other funds as that bank would consent to receive.

If the construction now contended for by Mr. Crawford be correct it equally applies to all the other banks which he employed, whose connexion with the Bank of the United States ceased on the 30th of June, 1819, and a more injudicious arrangement, nor one better calculated to perpetuate "the evils of special deposits," could not well have been made. They were not bound to receive any notes which, at the time of deposit, were not equal to cash; and if they might thereafter discharge the obligations created by those deposits in depreciated paper, there could not be worse management than permitting the deposits to accumulate, as he says they did, in the Bank of Missouri, in rather less than one year, to the amount of upwards of $640,000, composed principally of notes most liable, from the very nature of the times, to depreciate.

Under such circumstances, however solvent the Bank of Missouri might be, such an amount of notes could not be kept on hand so long without danger of great loss to the Treasury; and therefore it must have been bad management not to have found some means of exchanging them for cash, or applying them to the public service.

It is, however, but a waste of time to dwell upon a point which the testimony of some of the best informed and most distinguished gentlemen of which this country can boast, taken in this case, proves to be so incompatible with the general usage and practice of banks in such cases.

I will, therefore, notice this part of Mr. Crawford's communication no further than to make a single remark upon the evidence by which he endeavors [to prove] that he was "bound" to have taken even more uncurrent notes than he did receive from the Bank of Missouri. "This evidence (says he) is statement E, prepared at the Bank of Missouri, and laid before the Missouri Legislature by a committee which was appointed to examine the report of the bank, and which committee represents itself to have had before it, and carefully examined, the books, notes, and such other papers of the bank as were necessary." The statement is "of moneys on hand September 6, 1819, received from the several Receivers of Public Moneys, being such as they were authorized to receive by the Hon. Wm. H. Crawford, Secretary of the Treasury." It purports, he adds, to have been taken from a register kept by the Cashier of the bank from August 8, 1818, to September 6, 1819, which period includes only twenty-seven days not embraced by the first arrangement under which the bank was accountable only in kind. By this statement it appears that the bank had then on hand notes taken from Receivers, of a description not receivable by it on general deposit as cash, amounting to $569,064, of which $283,757 were of the kinds transferred by it to the Treasury."

In stopping so short, however, with his quotation from this document, he has omitted a most material part of it, which overthrows his whole conclusions, for, in reference to those very notes, the document states that though they had been received as above stated, "*the bank did, at its own expense and risk, convert the same into specie.*" If, then, this document is good for anything, it leaves him wholly destitute of any apology whatever for receiving uncurrent notes from that bank.

But waiving all question of his obligation to receive uncurrent notes from this bank, I return to and insist upon a specific statement contained in my communication to the House, which I think he has but poorly evaded.

It is this: "That being called on by a resolution of the House of Representatives to state the amount of uncurrent notes which he received from those banks, he has misstated it, making it less than it really was."

To decide this matter, it is necessary to see both what he has said and what he has done in regard to it.

In his report of February 14, 1822, page 8, in replying to the call that had been made upon him for the amount of uncurrent paper which he had received from certain banks, he says as follows, viz:

"From the Bank of Tombeckbe there have been received $15,311 in the notes of the State Bank of North Carolina.

"From the Bank of Missouri there have been received the following sums, viz:

"In notes of the State Bank of North Carolina	$42,000
"In notes of the Bank of Nashville	29,844
"In notes of the Farmers and Mechanics' Bank of Cincinnati	11,845
"In notes of the Miami Exporting Company	8,661
"In notes of the Bank of Cincinnati	3,846

"In notes of the Bank of Muskingum $291
"In notes of the Farmers, Mechanics, and Manufacturers' Bank of Chilicothe 350

"And from the Bank of Edwardsville there have been received $18,562 in notes of the Bank of Kentucky and its branches.

"In the two first cases the notes were received in the month of March, 1820, and in the third, in October, 1821. All these notes above described were uncurrent at the time they were received from the banks * * * * * * In no *other case* have uncurrent bank notes been received from any bank in which the public money has been deposited."

These are the assertions of Mr. Crawford, about which there can be no dispute. If, then, I can show *another case* or *other cases* in which *uncurrent bank notes* have been as clearly received from the Bank of Missouri as in the cases he has mentioned, I make good my statement. This being all that I desire, I shall content myself with but a single case at present.

In his letter, I No. 9, of March 2, 1820, to the President of the Bank of Missouri, he acknowledges that, "in consideration of a proposition made by Colonel Reddick, as agent for the Bank of Missouri," he had agreed to take a draft "in favor of the Bank of the State of Tennessee, payable at Louisville, for $40,156 in notes of that bank and its branches."—(See document 66.)

His letter, B No. 25, to the President of the Bank of Missouri, of the 14th of November, 1820, and the President's answer, B No. 26, of the 12th of December, 1820, (see document 119,) show that the said $40,156 in notes of the Bank of Tennessee and its branches, were transmitted to the Branch Bank of the United States at Louisville on the 21st of May, 1820, according to his orders, where they were received by him.

The Hon. Hugh L. White's testimony shows that these notes were mostly on the branches of the State Bank of Tennessee, and that those branches had suspended specie payments some time in the summer of the previous year.

These notes, it will be seen, are not included among the uncurrent notes which Mr. Crawford acknowledges to have received, though they were equally entitled to that denomination. I therefore submit the naked fact to the committee, that he did receive uncurrent notes to a considerable amount in *another case* besides those specified in his report on that subject.

Without positively denying this statement, Mr. Crawford would seem to impugn it by alleging that those notes were immediately placed to the credit of the Treasurer, as cash, by the Bank of Tennessee. This, if ever so correct, cannot disprove the fact I have alleged. The notes in the hands of the Treasurer were as much a cash demand upon the bank as any entry it could make on its books upon their alleged transfer. But, had they been paid the next day, it would not prove they were not uncurrent when received. They, however, remained at Louisville from May 21, 1820, till January, 1822, and have only been discharged by payments in depreciated paper to pensioners, and, possibly, a few other public creditors; so that, if the Treasury has escaped a loss, it has fallen upon those who were entitled to the gratitude and justice of their country. But I have not pretended to allege anything more upon this subject than the mere fact that more uncurrent notes were received than has been stated by Mr. Crawford, and therefore it is not incumbent upon me to show that the Treasury has sustained any loss, or that the Bank of Missouri has gained an advantage at the expense of the poor pensioners on the Government. I have not represented these "as notes of insolvent banks," as those on some of the banks of Ohio actually were; but I have no doubt that as much might have been said in favor of the receipt of some of the other Tennessee notes, which Mr. Crawford acknowledges were uncurrent, as of those on the branches of the Bank of Tennessee. If, however, I am bound to pursue the subject further, for my own justification, then, certainly, I have a right to call for and should wish to see the proof on which Mr. Crawford has predicated the statement which he has made to the committee on this subject.

The next subject to which I be leave to call the attention of the committee is to my fifth statement, in the following words, viz:

"That he has, in his report to the House, misrepresented the obligations of those banks, or some of them, at least, and predicated thereon an indefensible excuse for his conduct in receiving those uncurrent notes."

It is evident that I have been misapprehended in regard to this statement. I certainly never intended to be understood as alleging that Mr. Crawford had misrepresented the contracts which were submitted with his report; for I myself relied on those contracts and the *fact* that no public money had been received by the Banks of Edwardsville and Tombeckbe, before the date of their respective contracts to pay cash for the deposits, for proof of my allegation.

The committee justly consider this statement as the recapitulation of a charge previously made, and it will be seen that, for a specification thereof, I referred to a preceding part of the communication that contained it. This is expressed in the following words, viz:

"Being called on by a resolution of the House of Representatives to state the amount of uncurrent paper which he received from the local banks that had been made the depositories of public money received from the sale of public lands, he admits the receipt of a large amount from the Banks of Edwardsville, Missouri, and Tombeckbe; but, as an excuse for his conduct, he represents those notes to have been deposited in these banks "before the date of their contracts under which they agreed to account for the public deposits as specie."

My opinion certainly is, that any statement which either adds to or diminishes the real obligations of those banks must be a misrepresentation of their obligations, and, taking Mr. Crawford's statement to be correct, it implies the existence of obligations different from those contained in the "contracts submitted with his report;" for the deposits could not have been made "*before*" the date of those contracts without an expressed or implied contract thereupon, which was not communicated, but which, from his statement, must be understood as giving to those banks a right to tender the money which he received from them.

My object, however, was to show that he had misstated the fact in saying "that the uncurrent notes which he had received from the Banks of Edwardsville and Tombeckbe had been deposited in these banks *before* the date of their contracts under which they agreed to account for the public deposits as specie;" and this statement I now beg leave to submit to the decision of the committee, holding myself ready, if the committee have any doubts on the subject, to show that those deposits were made in these banks *after* and not *before* the date of their contracts to pay cash for them.

Mr. Crawford has labored to show that the interest of the western country required the employment of the local banks as depositories of public money. I am not disposed to contest this point, nor to deny that a judicious employment of solvent and prudent local banks for this purpose might have afforded

some relief; though the principal object which he seems to have had in view was to relieve the Bank of the United States from the odium of collecting the public revenue and converting it into available funds by substituting the local banks for that purpose. According to his arrangement, as he himself has developed it, his intention was to render the public money, by whomsoever collected, available wherever the public service might require it. Of course, whether collected by the local banks or the Bank of the United States, it was *intended* that all of it which could not be appropriated to the public service in the western should be transferred to the Atlantic States. The drain of specie, or its equivalent, therefore, from the west, with the exception of the permanent deposits, was *intended* to be the same in either case; and it is doubtful, at least, whether the ephemeral relief thus afforded to the western community has not been more than overbalanced by the evils which finally resulted from the injudicious execution and suicidal extension of this plan. Certainly great losses have resulted from it, as the events of every day exhibit, and if they have not fallen upon the Treasury the people cannot have escaped them.

The principal ground of my objections to Mr. Crawford's conduct in this respect has been exhibited to the House in the following words, viz: "The most objectionable parts of his conduct in regard to these matters are his mismanagement of those banks, and his continuing to employ them after he himself had become sensible of the danger of doing so."

To establish this statement I rely upon his communication to the committee to show that he continued the Bank of Edwardsville a depository of public money after he was so convinced of its want of good faith as to act, in other respects, upon that opinion.

I rely upon his correspondence with the Banks of Tombeckbe, Huntsville, Steubenville, and Vincennes, and Governor Jennings' testimony in regard to the latter, to show that he was apprised that there was danger in continuing the deposits in the three first, and that he continued the latter a depository of public money after it had forfeited all claim to his confidence, and proved to his own satisfaction that it could not safely be trusted.

I rely upon the testimony that has been taken before the committee to prove, 1st. That he has acted illegally in making deposits of public money in local banks in the District of Columbia, and even in this city, without making report to thereof Congress, according to law; 2d. That he has, in a variety of instances, abused his power to make deposits of the public money by actually making pure gratuitous loans thereof; and, 3d. That of the loans which he thus made in 1819 a part thereof has not been repaid, and is in danger of being lost.

By the document 66, A No. 10, it appears that, notwithstanding he had made loans to certain local banks in the District of Columbia which were so crippled as not to be able to continue their operations without the assistance he afforded them from the Treasury, and particularly the Mechanics' Bank of Alexandria, whose situation he well knew, and to which he had made five several loans of public money to enable it, as the witnesses say, to wind up its affairs, and which loans, or the major part thereof, remained unpaid, he did, on the 1st of August, 1820, the year after these loans were made, direct the Receivers of Public Moneys in Ohio, Indiana, Illinois, Missouri, and Michigan to receive the notes of those banks in payment for public lands.

By document No. 66 it appears that the Farmers and Mechanics' Bank of Cincinnati, into which he directed the public deposits to be made in 1819, besides its other debts, owed to the Bank of the United States $220,000, had issued its own notes to the amount of $77,550, and had of specie only $19,430, and that he was twice offered any additional security for the fulfilment of its engagements which he might require, but which he declined taking.

By the same document it appears that he declined the offer to pay interest by the Bank of Huntsville which the Treasury was justly entitled to receive from that bank.

By his report in the case of Mr. Brahan, Receiver of Public Moneys at Huntsville, it appears that that officer had appropriated a very large amount of the public money to his own use; that he was continued in office an improper length of time after his misconduct was known to Mr. Crawford; that, finally, in settling with him, a large amount that was justly due to the United States as interest upon the money which he had misapplied was relinquished; and that the indulgence he received as to the time of repayment was more than he deserved.

By Mr. Crawford's own communication to the committee he himself has shown a case of a Receiver which would have rendered it improper to continue any man in such an office under the circumstances which he has stated.

There must also have been some bad management in his permitting the deposits in the Bank of Missouri, to accumulate to the amount of $726,000 when the transfer of any part thereof to the Branch Bank of the United States at Louisville was so practicable by the facilities constantly afforded by steamboat navigation between St. Louis and that place; in his permitting the Bank of Missouri to delay the payment he required from it in June, 1819, for about five months; in his withdrawal, in March, 1820, of his previous drafts upon it, and then agreeing to take a much less sum, and a great portion of it in uncurrent notes, with an intimation to the President of the bank of ten months additional indulgence, (see his letter I No. 9, 66;) and this, too, at a time when the bank must have had in its vaults, besides its other good funds, about $221,599 40 in specie, which it was permitted to retain and use, and which was $43,424 40 more than the whole amount of the payments stipulated for by Colonel Reddick as the agent of the bank.—(See bank return, February 1820.)

Admitting that Mr. Crawford was right in receiving so much uncurrent money from this bank, I submit it to the committee whether he was not wrong in permitting the bank at that time still to retain such a large amount of public money in its possession, and, for a more detailed illustration of this subject, I beg leave to invite the attention of the committee to the last document attached to my communication to the House, and to a comparison of the statements therein contained with the public documents to which they refer.

I greatly regret that the want of time will not permit the committee to allow me the benefit of testimony that I otherwise could produce in relation to the management of the Banks of Tombeckbe and Steubenville. I beg leave, however, to refer you to a table herewith transmitted, which shows the amount of continued deposits in those banks for years in succession above the permanent deposits allowed to them, respectively, and to submit to you, whether these deposits thus continued can be considered in a less objectionable light than loans without interest.—(See pages 91, 92, 93.)

NINIAN EDWARDS.

JUNE 11, 1824.

To the honorable John Floyd, Chairman of the Committee, &c.:

Deeply impressed with the importance of the present investigation to myself, personally, I beg leave, with unfeigned deference and respect, to submit to the consideration of the committee the following remarks:

Sensible I am that the statements of my address to the House, to use the language of the committee, are such as should not be "lightly made," and resolved I am that, if they are "superficially examined," it shall be in spite of my utmost exertions.

It is obvious to the common sense of mankind, and apparent from the reasoning of the committee, that from the active nature of responsibility, both moral and official, in this country, upon him who undertakes to arraign the conduct of an important functionary must the weight of his charges recoil if he fail to establish them. This consideration, while it furnishes a motive for zeal and perseverance on my part, is calculated to oppress me with mortification at finding that the committee have given this decided and injurious direction to the statements, which they think fit to denominate *charges*, contained in my address, after they had commanded, and before they could procure, my appearance for the purpose of explaining and enforcing those statements.

This having been done, I trust I shall be pardoned for endeavoring to show to the satisfaction of the committee that the course of reasoning by which it was effected is not authorized either by the facts admitted by themselves or by the evidence which was presented to them.

To relieve this subject, as far as may be, from the complexity of words and inferences in which it is involved, I must be permitted to define, beyond the power of misinterpretation, the character and import of the statements which I made, and to claim, if I show that they are sustained by the facts and evidence offered to the committee, relief from the culpable responsibility with which their report has a tendency to burden me, and from the onerous task of investigating motives which my address does not assign, or of abiding in the accountable position indicated by the committee the result of a moral inquiry, which, however it may comport with the partialities of Mr. Crawford's friends, is certainly excursive and gratuitous in reference to the statements which I had the honor to advance. These the committee, not adverting to the document by which they were occasioned, have denominated *charges*, and as such they are fairly and conveniently susceptible of a division into two general heads, each of which may be supported by maintaining the specifications upon which they depend.

According to this arrangement the first is to this effect, viz: *That the Secretary of the Treasury, the Hon. William H. Crawford, has mismanaged the national funds;* and the second amounts to this: *That the Secretary of the Treasury has been guilty of neglect of official duty.*

In order to sustain these charges I shall follow the example of the committee, and shall, in the first place, recite the resolution of Congress of April 30, 1816, which declares "That the Secretary of the Treasury be, and he is hereby, required and directed to adopt such measures as he may deem necessary to cause, as soon as may be, all duties, taxes, debts, or sums of money accruing or becoming payable to the United States to be collected and paid in legal currency of the United States, or Treasury notes, or notes of the Bank of the United States, as by law provided and declared, or in notes of banks which are payable and paid on demand in the said legal currency of the United States; and that from and after the 20th day of February next no such duties, taxes, debts, or sums of money accruing or becoming payable to the United States, as aforesaid, ought to be collected or received otherwise than in the legal currency of the United States, or in notes of banks which are payable and paid on demand in the said legal currency of the United States."

By the terms of this resolution it is not only plain to the understanding of every man, but expressly declared by the committee, it was made "obviously imperative" on the Secretary of the Treasury, after the 20th of February, 1817, "to allow nothing to be received for *debts* due to the United States but the legal currency of the United States, Treasury notes, notes of the Bank of the United States, or of those State banks the notes of which were payable and paid on demand in cash."

In conformity with the injunctions of this resolution, and with the act incorporating the Bank of the United States, an *arrangement*, (agreement,) it is affirmed by the committee, was concluded in the early part of 1817, between the Secretary of the Treasury and that institution, by which it was stipulated that the public funds were to be deposited in the branches of the Bank of the United States in all places where such branches existed, and in others that bank was to select and designate certain State banks for which it was to be responsible, and in which such public moneys were to be deposited, and notes of all banks whose paper the Bank of the United States would receive in deposit as cash, *and none other*, were to be received on sales of the public lands. On the 30th of June, 1818, this agreement, it is stated by the committee, terminated at the instance of the Bank of the United States, and under the circumstances attending this fact the Secretary entered into agreements with certain State banks, by which *they* were employed as points of deposit and instruments of transfer for the public money in the course of its collection and disbursement. Engagements of this description were effected by the Secretary with the Bank of Missouri on the 1st of August, 1818; with the Bank of Edwardsville on the 1st of February, 1819; and with those of Illinois, Huntsville, and Tombeckbe about the same time. Soon, however, it is declared by the committee, this connexion between the State banks and the Secretary of the Treasury was extended in its application and varied in its obligations. A greater number of banks were embraced by it, and more favorable conditions were allowed them. It was agreed that as an equivalent for the risk and expense of deposit and transfer the use of a stipulated sum should be permitted them as a permanent deposit, which was not to be withdrawn except in a certain specified case.

The substance of this agreement between the Treasury and these State banks is expressed by the committee in the following words:

"1. That the bank should receive in deposit to the credit of the Treasury, as cash, from the Receivers of Public Moneys all the current notes of such banks as maintain cash payments; with power, however, to discontinue to receive the notes of any particular bank on giving reasonable notice of such intention to the Receiver.

"2. That the bank should pay at sight all drafts from the Treasury, and should also transfer, on request, all sums on hand beyond the amount of the stipulated permanent deposit to the Bank of the United States, or certain enumerated branches of that bank; and that a fixed sum should remain in the bank, as before mentioned, as a permanent deposit, to be transferred, however, to the Bank of the United States in six months after the termination of the agreement.

"3. That if the money were wanted for disbursement in the neighborhood of the banks it might be drawn for at sight, notwithstanding such drafts might reduce the permanent deposit below the stipulated sum.

"The amount of this permanent deposit was to be increased if it should appear that the bank should receive and transfer such large sums as that the expense thereof should not be considered as compensated by the benefit of the deposit which had been stipulated. It was also prescribed that the bank should render to the Secretary of the Treasury and to the Treasurer duplicate monthly returns of its accounts with the Treasurer, and to the Secretary confidential monthly returns of the state of its own affairs; showing also the credits of all public officers in the bank, and also quarterly lists or returns of all its debtors, to the end that the Secretary of the Treasury might determine on the propriety of continuing the public deposit in such bank."

The effect of this *arrangement* is thus summed up by the committee:

"The following table shows the amount of the permanent deposit allowed to each bank respectively, as the equivalent for the services rendered, or expected to be rendered, by it to the Treasury:

"Bank of Steubenville	$50,000
"Bank of Chilicothe	100,000
"Franklin Bank of Columbus	20,000
"Farmers and Mechanics' Bank of Indiana	40,000
"Bank of Illinois, at Shawneetown	50,000
"Branch Bank of Kentucky, at Louisville	100,000
"Bank of Tombeckbe, at St. Stephen's	100,000
"Planters and Merchants' Bank of Huntsville	75,000
"Bank of Missouri	150.000
"Bank of Vincennes	75,000
"Bank of Edwardsville	40,000
"Farmers and Mechanics' Bank of Cincinnati	100,000

"The amount of these permanent deposits is nine hundred thousand dollars, the interest on which sum, at six per cent., would be fifty-four thousand dollars." And I allege, in support of my first charge, that, by means of it, the Treasury of the United States was made to pay to the State banks enumerated the sum of $54,000 annually for receiving and transferring the public money—a service which the Bank of the United States was bound by the provisions of its charter, as well as by the agreement of the early part of 1817, to perform without compensation.

This allegation the committee declare to be unfounded. They consider that the Bank of the United States was bound to transfer no other description of public funds *than cash funds;* and, in order to sustain their declaration, they affirm that the Bank of the United States was not bound to receive in deposit "as cash the bills of any banks but its own." In this affirmation there appears to me to be something of a fallacy, the detection of which may perhaps induce the committee to doubt the correctness of their construction of this obligation of the Bank of the United States. By the circular of the Treasury to the State banks under date of the 1st of July, 1818, announcing the termination of the agreement between the former and the Bank of the United States, and expressing conditions upon the acceptance of which the advantage of deposit and the services of transfer between the former and the Bank of the United States were extended to these banks, they are instructed in relation to all sums deposited subsequently to the 30th of June, 1818, (the period at which the agreement with the Bank of the United States expired,) "to enter them, as *heretofore, to the credit* of the Bank of the United States for *the use of the* United States." And in his letter to this institution, of the 30th of June, the Secretary maintains earnestly and successfully the existence of a complete right in the Treasury to hold the Bank of the United States responsible for whatever "moneys were deposited to its credit in the State banks;" and after remarking that "an examination of the returns made by the bank to the Treasury, and the public money in its possession for which the Treasurer [of the United States] is credited, supports this position, he alleges in illustration of it "for whatever the bank has charged itself in its accounts with the Treasury, *except for the special deposits*, it is, I presume, in point *of law and common sense*, responsible. The special deposits were entered to the credit of the Treasury *upon the express stipulation* that the bank should not be accountable until they were converted into specie, or into bills admitted by the bank to be equal to specie." He adds below, "I am persuaded that the facts and inferences drawn from them in the preceding pages will be sufficient to show that the responsibility deemed so extraordinary by the Directors has been assumed from the date of the arrangement and continues to the present moment unimpaired."

These extracts establish the following conclusions, viz: That, up to the moment when the Secretary permitted the obligation of the Bank of the United States to expire (as he says in his circular of the 1st July following) "*by agreement*," that institution was responsible *in cash* for all the public funds received by it on deposit, except such in regard to which *the contrary was expressly stipulated*, and that, consequently, it was bound to transfer them, at the will of the Secretary of the Treasury, free of expense, and without compensation. This, it is admitted by the committee, it was bound to do in reference to "cash funds;" a description from which it will be difficult to exclude all sums not held as *special deposit;* for all other funds were entered by the bank, as the Secretary declares, and as the returns of the bank prove, *to the credit of the United States*, and, of course, represented such an amount of ready money, or pecuniary force, at the disposal of the Secretary, on the books of the bank. *Cash funds* is a phrase not restricted to coin or the precious metals, for no one will deny that *ready money* is *cash*, and that $1,000 in United States Bank notes is $1,000 *cash*.

These extracts further exhibit the proper and admitted distinction between *general* and *special deposits*. They show, as would appear, *ex vi termini*, that all sums not received expressly as *special deposits*, were considered as general deposits, were credited to the United States as cash, and under that description were embraced by the obligation of the bank to transfer the cash funds of the United States at the request or order of the Secretary of the Treasury. It follows then that, according to the Secretary's own showing, the Bank of the United States was under an obligation to the United States to transfer all public funds, other than *special deposits*, received by it or its branches, or by the State banks it had designated, at the request of the Secretary of the Treasury, free of all expense, and without compensation; and it can hardly be denied that when the Secretary of the Treasury, "*by agreement*," as he declares, permitted the bank to withdraw from this obligation, and agreed to allow certain State banks $54,000 annually (a fact which is not disputed) for performing the very same service, he voluntarily increased the annual expenditure of the Treasury by that amount; relinquished, "*by agreement*," a right which, by the charter of the Bank of

the United States, and its own engagement with him, he held in the fiscal services of that institution, and then gave to the State banks $54,000 annually for a right to command the same fiscal services from them.

This new agreement, *injudiciously extended* and *carelessly executed*, I have ventured to denominate, in what the committee consider my *first charge*, "*mismanaging the public funds*," nor am I now able to devise a more appropriate expression. The committee would, probably, have come to the same conclusion in regard to this subject, but for what I suppose to be the fallacy which, as already intimated, they admitted into their reasoning of restraining the import of the word *cash* to the synonyme of coin, and of considering the public funds as consisting of other than such as were cash, or equivalent to coin, and such as were not; a mode of classification which implies, obviously, that the parts are greater than the whole.

Under their favorable but, as I conceive, erroneous view of this part of the Secretary's conduct, which in a private individual would be considered highly indiscreet, the committee justify it as conformable "to usage for many years," and to the "practice of different officers at the head of the Treasury of assuming that it was their duty" to manage the public funds in a manner similar to the case here investigated. But this reference to antecedent usage is not likely to strengthen the position it was intended to support. The duty of Mr. Crawford and the usage of the Treasury were necessarily repugnant; for the resolution of 1816 and the law incorporating the Bank of the United States were adopted for the express purpose of correcting the evil *usage* which, according to the admission of the committee, "was evidently in disregard of law." Therefore, when they prove, as they do prove, that the management of Mr. Crawford was in conformity to usage and the practice of his predecessors, they prove it was "evidently in disregard of law;" was contrary to the resolution of 1816, which they themselves declare "made it the duty of the Secretary to correct this departure from law;" and thus demonstrate not only that he *mismanaged the public funds*, but that he violated, at the same time, both his duty and the law.

If these permanent deposits and the accumulated sums which were patiently permitted to remain in some of those banks are not to be considered gratuitous loans and an illegal employment of the public money, the loans which it is now in proof before the committee the Secretary has made to various banks of this district, cannot fail to satisfy the committee that the charge of *mismanaging the national funds* has been clearly established.

The corruption of the British Parliament and the illegal conduct of the British ministry are subjects of frequent and just reprobation, as the purity of our Legislature and the exact subservience of every branch of our Executive to the laws of the land are deemed causes of satisfaction and sources of pride. When Mr. Pitt, whose influence in Parliament was as transcendent as his fame, undertook, at a period of great commercial pressure, and at a calamitous season of war, to make a loan of £40,000 sterling to the house of Boyd and Benfield, the subject was brought before Parliament, and as the loan, though not gratuitous, was found to be "no legal employment of public funds," and although the opposition admitted there was *no* ground to impute improper motives to the Premier, it was declared by the House of Commons an act of *dangerous usurpation;* and to prevent its being assumed as a precedent, or extended into usage, as well as to acquit this powerful and celebrated minister of moral or official liability on account of it, a bill of indemnity was introduced by one of his friends and passed into a law.

Here it is to be observed that the loan of Mr. Pitt was advanced (even as Mr. Whitbread confessed) on *unquestionable securities*. Those of Mr. Crawford do not appear to have been so safely provided for. On Mr. Pitt's loan no loss occurred. A considerable part of Mr. Crawford's loans is yet endangered, and probably will be lost. Mr. Pitt's loan carried interest; Mr. Crawford's were made without any such stipulation. If Mr. Pitt's conduct could be exculpated only by an act of Parliament, can Mr. Crawford's be justified in the teeth of an act of Congress? In this case, let me ask, would not the vital principle of our Government be lost sight of? This is a Government of laws. Responsibility is the soul of the Republic, and is intended, like gravitation in the material world, to hold every orb and every atom, every officer and every citizen in their legal position. It was intended to prevent the Secretary of the Treasury from committing any act which could be justly called "no legal employment of the public funds;" and will hardly be satisfied with the declaration that any officer of the Government, but especially the head of the Treasury, can employ the national funds "in disregard of law," and yet not *mismanage* them. Surely there is something less secure in the public treasure of the United States than in that of England.

Having proved clearly, by the declarations of the Secretary and the expressions of the committee, that the former relinquished, "*by agreement*," on the 30th June, 1818, the right of the United States to the fiscal instrumentality of the Bank of the United States in the collection and disbursement of the national funds, and employed, by conditions offered to them on the 1st July following, the instrumentality of certain State banks for the same purpose; and having shown that when, shortly after the latter date, an extended agreement was entered into on conditions more favorable to these banks, allowing them as an equivalent, or rather as pay for similar instrumentality, $54,000 annually, by way of interest on permanent deposits; and having also shown that the Secretary has made various loans of the public money, I shall proceed to a subject connected with my second charge.

This imputes to the Secretary of the Treasury, without any investigation of his motives, *neglect of duty*. In relation to it, the committee admit that the act of Congress incorporating the Bank of the United States makes it the duty of the Secretary of the Treasury to employ the offices of that institution as places of deposit for the public funds in preference to all other banks, unless for special reasons he should think fit to use other banks for the purpose; and in that case, the special reasons are to be communicated to Congress by the Secretary at its then or its next session. This communication the committee pronounce, and the Secretary confesses, he failed to make. I may safely rest the truth of my second charge on this admission, since a failure in an officer of the United States, from any cause, to comply with the directions of a law prescribing his duties, is, to all intents and purposes, *a neglect of duty*. The Secretary, however, accounts for it, and the committee justify it, upon the ground of *inadvertence*.

The admission of inadvertence in this case is a confession of a neglect of duty so complex that it may fairly be denominated *a violation* of duty; for, as the object of the laws in requiring the prompt communication of these *special reasons* was not only to know that they *existed*, but also to know that they were *sufficient;* a failure to make the communication, if justified by inadvertence, is justified only as to the *existence* of the special reasons, and leaves the Secretary more directly obnoxious to the charge of having proceeded in the business upon reasons that were *insufficient*—a charge which, if substantiated by inquiry, could not, from its nature, be justified by *inadvertence*, but would infallibly discredit either the judgment or the integrity of the presiding officer of the Treasury.

After recapitulating my statements in regard to the intercourse between the Secretary and the Bank

of Missouri, the committee remark upon that which (they say) declares that *this bank was unworthy of credit at the time the public money was suffered to accumulate in it to a large and improper amount;* they admit that, at one time, this accumulation amounted to $726,000, and then affirm that the propriety of permitting this state of things is a question of prudence depending on the solidity of the institution. I endeavored to show in my address to the House that, in reference to this enormous accumulation, the limited capital and excessive issues of the Bank of Missouri left nothing like a substantial or reasonable security to the United States. But the committee, not denying the justness of this inference, seem to avoid it by affirming that my estimate of the capital of this bank is incorrect, inasmuch as it does not comprehend the amount of permanent deposit as part of its capital, and as raising the latter to such a proportion to the amount of its issues of paper as would give it, in relation to the whole sum of public money confided to it, the character of solidity. The reasoning involved in this affirmation cannot be maintained. If the bank had lost its solvency from the excess of its issues above the amount of its capital, a common creditor would hardly be persuaded, in order to secure a debt of $576,000 due to him from the bank, to lend it $150,000 more to add to its capital and restore its proper proportion to the issues of the institution. This step might be beneficial to the other creditors, and friendly in regard to the stockholders and officers, but, except in this benevolent light, would certainly be considered folly on the part of the creditor. The proportion, then, between the capital and the circulation of this bank, upon the fitness of which the committee declare the prudence of accumulating $726,000 of public money in it depended, is not as $360,000 is to $430,000, but as $210,000 is to $430,000; and the amount hazarded in deposit by the Secretary of the Treasury stands related to the capital of the bank to which it was confided, not in the proportion of $526,000 to $360,000, but in that of $726,000 to $210,000; and this $210,000 endangered by its disadvantages and inadequate proportion to an admitted excessive amount of issues. Besides, this nominal capital of $210,000 was subjected to the pressure of other exhausting operations. The discounts to the stockholders and Directors were made on a pledge of their stock, so that to this extent that species of financial capacity which $100 of capital may represent and authorize $150 in issues was destroyed

As this proposition of the committee cannot be sustained, the force of my statement, which it was intended to obviate, still bears upon the conduct of the Secretary, and demonstrates that in his intercourse with the Bank of Missouri he not only was guilty of *neglecting his duty* but of mismanaging the public funds.

In my address to the House it was alleged that the Secretary had neglected to exact monthly returns and quarterly lists of its debtors from this bank, and thus disregarded the means in his power of understanding the condition of the bank, and of providing against any loss which might occur to the United States from the embarrassment or insolvency of this institution. This fact is admitted by the committee to its full extent, but is not viewed by them as evincing *neglect of duty* or censurable inattention to the interest of the United States, although in the Secretary's contract with this bank, as represented by the committee, these returns, &c., are carefully insisted on, in order "solely to aid the Secretary in determining the propriety of continuing or discontinuing the arrangement with the bank."

In considering my statement, which falls under both charges, and imports that the Secretary received a large amount of uncurrent paper from the Bank of Missouri, the committee declare this institution was not bound by the condition proposed to it by the Secretary, previously to the 9th of August, 1819, to receive as cash, on account of the United States, such sums as the Receiver should deposit in it, but was responsible for the same only in kind. But this, if correct, does not diminish, but only removes to an earlier point, the *mismanagement* of the Secretary. It appears to place him in a dilemma. If his contract with the Bank of Missouri did not, as is stated, secure to him the right of general deposit and transfer to the same extent that, by the charter of the Bank of the United States and his contracts with that bank, he possessed that right, it follows that he was indiscreet in permitting the Bank of the United States to withdraw from this obligation before he could impose it on another bank. And if, as may be inferred from the observations of the committee, it was proper that the Secretary should receive *in kind* notes which, under the contract with the Bank of Missouri, had been for months deposited to the credit of the United States, because at the time they were deposited they were good, it would seem that a custom-house bond might be discharged when it became due in notes, however depreciated, provided they had been good at the date of the bond.

To justify this unwise and irregular proceeding upon the ground that from the conjectures of the Secretary no ultimate loss will be sustained by the United States on the uncurrent paper so received, would be to proceed upon a principle which would allow of every species of speculation on his part with the public funds—a principle at war with integrity and prudence in fiscal operations, and with the practice and regulations of this and other countries.

In the British House of Commons the first charge brought against Lord Melville was not for the loss or waste of the public funds, but for permitting their mismanagement by a subordinate officer, who had deposited them in private banks in a manner similar in all respects to the operations of the American Secretary of the Treasury, with this only difference, that the British Government sustained *no loss* by this malversation of Mr. Trotter. It was the *practice* and not the *event* which was denounced before the House of Commons. "I am appalled (said Mr. Whitbread) at the reflection of no less than thirty-four millions of the public property having passed through Lord Melville's paymaster's hands. Why, sir, the report states, explicitly, that upwards of eight millions had been in the hands of his private bankers, and nearly seven millions more are allowed to have passed through the same channel. I cannot but think that this negligent criminality is deserving of the severest reprehension."

Mr. Pitt, the warm and powerful advocate of Lord Melville, was forced by a sense of truth to confess that this permitted misapplication of public money, contrary to law, though "*without actual loss to the State,* was not to be justified," was constrained to advise the erasure of his friend's name from the list of privy counsellors; and thus expressed to his admiring country the conflict between the tenderness of his friendship and the sublimity of his patriotism. "I am not," said that magnanimous man, "ashamed to confess that I have not given this advice without a bitter pang. I will not erase from my bosom the feelings of private friendship."

When the report of the committee was framed, the only evidence which was known to exist that I gave the advice represented in my address to the Receiver at Edwardsville was my own solemn declaration to that effect, and my publication of 1819, announcing my intention of withdrawing from the Directorship of the Bank of Edwardsville. Upon this evidence the committee thought fit to admit "that there was no doubt Mr. Edwards gave such advice as he represents to the Receiver," and at the same time and

against the same evidence they deny "*that the Receiver wrote on the subject of this advice to the Secretary.*" For this discrepancy there is no apparent reason. The second fact is as credible, at least, as the first; indeed the admission of the first seems to establish the probability of the second—a probability not weakened by the remark of the committee, that inasmuch as the same person was Receiver of Public Money and President of the Bank, "it is hardly probably that as Receiver he would advise the Secretary that he could not repose confidence in the bank of which he was President." Even if in this double relation he might not have dissuaded *excessive confidence,* it is yet very clear that as his interest in the former capacity greatly exceeded that which he held in the latter, he was under the operation of a direct motive to give such information as he did communicate. And upon this motive, which the committee declare *could not exist,* the Secretary actually relied, (see his reply, page 11,) as insuring the faithful communication of all such information. These remarks apply with equal force to the declaration by which the committee would seem to accuse me of swearing falsely, "that there is no evidence that the Receiver wrote on the subject of this advice to the Secretary." *I asserted upon oath that I saw the Receiver write to the Secretary and enclose my publication;* and I confess that I feel no inconsiderable distress at the reflection that my oath is falsified by the committee, in regard to a fact probable in itself, and at least as credible as one which my oath is suffered to establish.

As to the famous letter from the Receiver, there can *now* be no doubt that it was written and despatched to the Secretary; or if, from technical objections to the testimony, the committee should not be disposed to act upon it, enough may be seen to show the propriety of allowing further time for producing, in due form, testimony enough to establish the fact, and this I ask the committee to do, if they are not satisfied of the fact. It must be admitted that, as I had no power to summon witnesses after I myself was summoned, I could do no more than obtain voluntary affidavits, and that I had but little time for doing this much.

The question of this letter having been received by the Secretary appearing to depend on a comparative estimate of the opposing weights, of the probabilities of the fact on which I have relied, and of the Secretary's denial, it is proper to examine minutely the character of that denial. This will be found to be very equivocal. I assert that such a letter was written, and that I believe, as is now evident, it was transmitted, and of course *received.* The Secretary does not deny that it was *received,* but declares it is not on file, and is not recollected by the officers employed in the Department to have been received, of whom, however, it now appears by their own testimony (with the exception of Mr. Dickins) that neither himself nor any one else made any inquiry in regard to that matter.

When I state my belief that the letter was *received,* I obviously mean *by the Secretary;* and it is an infirm and fallacious answer to reply, not that *the Secretary did not receive it,* but that it is now *not on file,* and is not recollected by the officers employed in the Department (whose credit is rather liberally pledged) to have been received, both which declarations may be true, and yet the letter be in the Secretary's pocket. Again, I stated that the Receiver told me he had, after transmitting this letter to the Secretary, received *a letter* from him, directing him (the Receiver) to continue the deposits. This also the Secretary denies in his report, and in the same indirect and evasive manner. He does not say that *no such letter* was written, but that no letter to this effect was written *in answer* to the one which he had laboriously asserted was never received—had strenuously argued was never written! Now, it is very clear that if the letter from the Receiver was never written, or even was never received, no *answer* of any sort could have been returned to it; and yet the *letter* directing a continuance of the deposits may have been written. These careful ambiguities in the report do not seem calculated to make the defensive declarations of the Secretary outweigh the strong improbability that a public despatch deposited in the post office should have miscarried in a mail to which no casualty or interruption is known to have occurred, and at a season of the year, too, when the mail is least liable to any difficulties in its transportation.

In addition to his *neglect of duty* in his transactions with this bank, as suggested in my address to the House, and in my replication to his communication to the committee, they might have adverted, in support of the same charge, to the case of the Bank of Vincennes; where, also, the Receiver was President of the bank, where the United States lost $168,000, on which bank the Secretary drew successively, from October, 1819, to March, 1820, four drafts, together amounting to $165,000, suffered as many continuous protests, and after neglecting, as usual, all measures of precaution, took no measure of redress until July, 1820.

A course of didactive admonition in the form of four official letters is then pronounced to this delinquent institution, the initial gravity of which is compensated by its final lenity, (see documents.) He recapitulates the acts of ill faith which he had patiently endured, mentions the protests of his drafts for $165,000, warns the Directors that unless they reform their demeanor and pay the drafts it *will be* proper for him to proceed with rigor, but concludes with proposing a relaxation of that meditated rigor, provided they will agree to honor the drafts within forty days, and even promises to pay for this tardy and extorted justice (out of his never failing fund) by continuing the course of deposit in a bank thus attempted to be bribed and threatened into common honesty by himself! To this persuasive proposal the bank, increasing in audacity and sagacious of the character of its customer, did not condescend to reply for nine months; at the expiration of which pregnant period the President was delivered of the abortive fact of the corporation's insolvency. In this feeble and exhausted state it asks further indulgence, and concludes its appeal to its munificent benefactor with the most eloquent encomiums upon his liberality. This letter reflects in interesting colors the substance and complexion of the intercourse between the Treasury of the United States and the banks of the west, and, whatever may be said of its prudence, must certainly be commended (by a hunter of motives at least) for its candor. As the presentation of a moral scene it is delightful to contemplate the sordid gratitude of the delinquent corporation glowing under the injudicious if not illicit favors of this liberal minister of finance. "*Your friendly disposition towards the west,* in times peculiarly difficult, *and the interest you have evinced for this remote section of our common country,* leads to a hope that the hand *that has hitherto protected us* will not be withdrawn." This *friendly hand* was not withdrawn for at least twenty-one months, when measures of recovery were commenced in a manner *evincing such interest for this remote section of our common country* that the bank was allowed three years more to pay the debt—a period extending beyond the present *important year,* and upon conditions of collateral security imposed with such "*a friendly hand*" that the security was defeated by private creditors *in this remote section of our common country;* and in consequence of the *friendly dispositions* of the Secretary *for the west* the loss falls upon the United States.

As both my charges have now been established, and of course the specifications upon which they depend, by the confessions of the Secretary and the admissions of the committee, I shall not press the

distinction which, it seems, escaped the committee, when comparing the amount of money lost by Mr. Crawford's mismanagement (about half a million) with the amount collected, (twenty-one millions,) they contrast favorably to the Secretary this proportion with that which obtains in the ordinary collections of private or mercantile debts. They appear to forget, besides the superior regularity, vigilance, and power at the disposal of the nation, and the difference between the profits and loss of trade and the even exaction of the revenue, that the loss incurred by the Secretary was not of debts *outstanding* but of *funds collected*, and collected, too, by salaried officers, at an enormous expense.

Upon one point, however, which has already been considered, I shall add some remarks. The committee have admitted distinctly and in correspondence with my statements, that Mr. Crawford did, on some occasions, neglect to make such communications to Congress as by law it was his duty to do, and that on others he failed to report such facts and documents as by a resolution of the House of Representatives he was required to do; yet as they, very naturally, cannot detect the motives of this misconduct, (which God alone can do,) they acquit him of all blame or responsibility. In this they appear to lose sight of the distinction which has hitherto obtained between private and official rectitude, and of the well established fact that bad motives in the man are not necessary to constitute misconduct in the minister.

When Burke brought Warren Hastings to the bar of the House of Lords, and in strains of portentous eloquence invoked upon the head of the Indian Viceroy the vengeance of humanity, the power of justice, and the imprecated terrors of the English law, in portraying to this august tribunal a course and torrent of plunder and desolation which had overrun regions that the arms of Alexander could not reach, in charging him with the pillage of towns, the ruin of districts, the sacking of cities, the plunder of princedoms, the devastation of provinces, the waste of empires, he did not fail also to accuse him, with intense and awful formality, of having neglected *to communicate to the Government* the documents *which were called for* by the proper authority.—(Burke's Works, vol. 12, page 454.) "That in defiance of the said orders and in breach of the above recited act of Parliament, the said Warren Hastings has, in sundry instances, concealed from his council *the correspondence carried on between him and the princes or country powers in India, and neglected* to communicate the advices and intelligence he from time to time received," &c.

This great statesman, this political philosopher, this experienced orator, did not appear to consider that the illegal conduct of a minister could be justified by an alleged absence of improper personal motives, nor that a duty, upon the punctual performance of which the whole fabric of legislation rests, should be repeatedly violated, and with perfect impunity.

I will not complain of anything that has happened to myself in this business; of the liberality with which *bad motives* have been imputed to me, of that impatient justice which on this floor condemned me for defending myself and argumentatively accusing a responsible officer, upon *statements* which are now established, but which were then not examined. But I beg leave to ask whether treatment like this can be just in itself, or is likely to sharpen that inspection which it is the right of every citizen to apply to the conduct of the high officers of this Government, and which cannot be repressed without great danger to the liberties of the people.

The disadvantages under which I have labored in this investigation must be obvious to the committee. While I have been informed by them that no charges against me have been submitted to them, the trial, if such it may be called, has assumed much more the appearance of an investigation of my conduct than that of Mr. Crawford. Called upon as a witness, against my own consent, not being willing to rest any of my charges against the Secretary, or my own defence, upon my own oath, I have been required to swear to facts that I consider wholly immaterial, as it relates to his conduct, at least, (the avowed object of inquiry;) and the occasion has been embraced of requiring me to defend not only my general character for veracity, but to maintain it in particular and special cases, by which I have been perfectly surprised, and for which no adequate time is allowed me.

In my address to the House I have made certain statements against Mr. Crawford which the committee are pleased to denominate charges. For specifications of some of those statements I have referred to certain publications under the signature of A. B., of which I acknowledged myself to be the author, thereby making myself responsible from that moment for the charges they contain. When I wrote them, or whether I actually wrote them at all, neither could add to nor diminish the responsibility I had taken upon myself, by exhibiting them as charges to the House; and it might, with as much propriety, have been asked of me to swear that I wrote my address as that I wrote these publications, which, by the reference made to them, became part of that address. How they originated, or what was their object, before they were offered to the consideration of the House, does not appear to me to be either material in an inquiry into Mr. Crawford's conduct, nor to have been within the intention of the reference to the committee, especially if "no charge against me has been submitted to them."

The only inquiries that appear to me material in regard to those publications are, whether the facts they allege are true or false, and if true, whether they amount to proof of anything on the part of the Secretary worthy of reprehension. If the charges against him are well founded, no motive for making them can justify or excuse him.

If I am to be convicted of having made them unjustifiably and criminally, not barely by an acquittal of him but by a positive judgment against myself, distinct allegations ought to have been made against me, and a fair opportunity of defence should have been allowed me. Such a trial I should be very willing to meet; but against any collateral and indirect operation for that purpose, and particularly where technicality has not been overlooked, I solemnly protest.

I have been required to swear that I wrote these publications more than two years ago; and this has afforded the ground for attacking my veracity in the special cases alluded to, without my being allowed the necessary time to disprove, invalidate, or explain the allegations that have been made against me.

With regard to my having denied the authorship of those publications, I have no hesitation in admitting that I have frequently and truly denied that I wrote all that appeared under that signature during the time referred to by the testimony in this case—that is to say, the period that includes the first and the last of those publications.

I have also constantly denied that there was any A. B. plot or conspiracy in the case, and have at all times treated such suggestions with the contempt they deserved. Not only has the existence of such a "plot" or "conspiracy" been affirmed in several of the most distinguished newspapers of the Union, but the committee have recently heard it boldly asserted on the floor of the House of Representatives. This I have denied and still do deny, so far as it is intended to implicate me. No man but myself is or ought to be responsible for anything I have written on the subjects embraced by those publications, and one

man cannot make a conspiracy. For whatever purpose the assertion of a "plot" or "conspiracy" has been made, it has, I know, been more correctly denied than affirmed.

I am also equally free to admit that, though my general course was neither to deny nor acknowledge that I was the author of these publications, yet I may have repeatedly spoken in regard to that matter as any man has a right to speak in regard to an anonymous publication which he may have written, but which he does not choose and is under no kind of obligation to avow; but that I ever said anything that could be considered as equivalent to a denial of my authorship of these publications, for the purpose of avoiding any kind of responsibility, or to gain any point whatever, I do most positively deny. In fact, no man who did not choose to give his name to the public on such an occasion could have taken less pains to conceal it than I have uniformly done in this case; and hence there is reason to believe that nine-tenths of Congress, and almost every one else who read these publications and knew the general circumstances of the case, considered me as the author of them. In one of them I offered to avow my real name, provided the House of Representatives (then seeming to threaten to do so) would adopt any measure to operate directly upon me in consequence thereof. And it must be known to several of my friends that I intended to avow myself the author of such of those publications as I had then written, if the question had been put to me (as was expected) by the committee before whom I was examined in February, 1823, and that I had prepared the preface for my deposition, which is designated No. 3 in the documents accompanying my address to the House, for that and other like objects.

That I had justifiable cause, as well from private as public considerations, for writing those publications, I shall always be able to prove whenever it may become necessary. At present I will barely ask whether the public attempt that was made in several respectable newspapers, and even on the floor of the House of Representatives, to implicate me in the suppression alluded to in the first of those publications, did not justify me in endeavoring to show that such a charge was ridiculous and absurd? This is fully shown in the subsequent publications; and containing nothing but the truth, expressed in decent and respectful terms, what could there be in them to be ashamed of? No attempt, that I have ever seen, has been made to prove that they contained even an indecorous expression in regard to the Secretary, or that the facts they allege were not true.

As to a suggestion which has been made, that if they contained anything which, in my opinion, was wrong in the conduct of the Secretary, it was my duty as a Senator of the United States to have noticed it in a different way, I have only to remark that it may be seen that they treated of "suppressed documents;" and it will, I think, hardly be contended by any reflecting and well informed man that it was my duty as a Senator of the United States to have noticed officially a contempt offered to the House of Representatives by the suppression of information called for by that House, the more especially as the House itself had taken the subject under its own consideration.

That I denied my authorship of those publications for the purpose of obtaining a confirmation of my appointment as minister to Mexico is certainly but poorly supported by proof (if admitted to its fullest extent) that such denial was made or known to one Senator only, who had previously taken an active part in my favor, and who swears that he was wholly uninfluenced by that consideration. Considering the time and circumstances when and under which this controversy commenced, and that all the Senators were then present, it is hardly to be presumed that if such an attempt had been made by me, or such a denial had been known to any other Senator, further proof could not and would not have been produced.

If, however, the committee should suppose there is proof enough before them to support this imputation, I ask it of their justice to afford me a fair opportunity of producing testimony to the contrary, which I only want time to do. This being granted me, if it shall appear, or there shall be the least reason to believe, that I obtained a confirmation of my nomination by such means, I pledge myself instantly to surrender my appointment.

The committee having requested me, since the foregoing was written, to reduce to writing my motion to have Mr. Crawford examined as a witness, that there may be no misunderstanding on the subject, I proceed to comply with their request, and to explain the grounds of this application.

I deduce my right to claim the benefit of his testimony from the precedent that has been established by the committee in my own case. Legal principles have been pretty rigidly insisted on, in some instances, in the course of the present investigation, and although I am not able to point out the legal principle or usage that justifies this precedent, I presume it will be sufficient to entitle me to the benefit of it to show a strict analogy between the case to which it has been applied, and the one to which I now respectfully propose to apply it.

I am considered by the committee as Mr. Crawford's accuser. I might rely upon his report and his subsequent communication to the committee to show that he has made himself mine. But I also wish to prove that such was his intention. If, under these circumstances, either himself or the committee have a right to make me a witness against my own consent, in order to inquire into my motives and a variety of other matters not included in either of my six charges against him, or in any of their specifications, justice must accord to me the same privilege in regard to his implications against me. I claim the same right to examine him, and with equal latitude in regard to all the matters contained in his report and subsequent communication, which implicate me, that has been demanded of me in relation to all the matters contained in my address to the House.

It is true that I myself consider such a course, either in his or my own case, as equally contrary to all former usage and inconsistent with well established and incontestable legal principles. But if I have been mistaken, or a new rule is to be adopted, all I ask is, that while it is applied against me in one instance, I may not be denied the benefit of it in a similar one.

I had supposed that neither of us could, either as accuser or accused, be required, contrary to our consents, to become a witness and to testify for or against ourselves. The rights of a prosecutor and a defendant in this respect are the same in any form of trial that has been adopted in this enlightened country. Either has a right to decide for himself upon how much or how little testimony he may choose to submit his case, and neither can be compelled to strengthen or weaken it by his own oath.

I invite the committee to review all the facts that have been required to be proved by myself, and that have been admitted to be proved by others, in regard to my conduct, and to contrast them with your own decision to confine the present investigation of Mr. Crawford's conduct to the charges which I have alleged against him. It will be perceived from the whole of the testimony in this case that I have been put upon my trial for a malicious prosecution in the most injurious possible form, requiring me to convict myself by ym own oath before it is decided whether tne charges I have alleged against the Secretary are true or false.

If those charges are true, as I alleged them to the House, I would ask what have the committee to do with my motives for making them, and upon what legal principle could I be arraigned, even in due form, for a malicious prosecution?

If, on the other hand, these charges are not true, (there being "no charge against me submitted to the committee,") it may not only justify the acquittal of Mr. Crawford, but may furnish ground of future trial of myself for having maliciously and falsely made them. It cannot, however, authorize any distinct judgment against me till I shall be put upon my trial, and have a fair opportunity of defending myself. This I am ready to meet, but I cannot consent to the blending of both trials together.

If you should think such a charge against me sustainable, I would rejoice to have an opportunity to meet it fairly before the House of Representatives or the Senate of the United States; and for this purpose I beg leave earnestly to request the committee, in case that should be their opinion, to state distinctly which of the six charges I have alleged against Mr. Crawford are false, and in what respect they are so, that I may know how to prepare for my defence. In this I ask no more than any subaltern in your army is entitled to in cases of infinitely less importance. I presume and hope, therefore, it will not be denied to me.

In the mode of trial of myself that has been adopted, (as appears by the testimony,) by which I have only known against what I should have to defend myself from the mouths of witnesses, the common sense of all mankind must perceive that I cannot have had any reasonable opportunity of defence. If, therefore, the committee think themselves authorized to inquire, for any purpose, whether I denied my authorship of the writings signed A. B., at all, or that such denial was made with a view to obtain the confirmation of my nomination as minister to Mexico by the Senate, I claim additional time to rebut the testimony that has been given, and to summon every Senator, if less will not satisfy you, to prove that no member of the Senate either voted for me, or forbore to vote against me, on account of any such supposed denial, and thereby to demonstrate the utter improbability of any such intention on my part.

I have not made myself Mr. Crawford's prosecutor, and am not willing to be so considered. With his immense advantages over me, I have not the hardihood to be willing to take issue with him upon his intentions. My object has been, and is still, to defend myself in the most effectual manner in my power against his attack upon me. This being accomplished, I care not what disposition is made of his part of the case. I had a right to urge the facts I have alleged in my own defence; and none can admit their truth and deny the justness of the arguments I have deduced from them.

In doing all this I have imposed upon myself the obligation to show my own innocence of his imputation against me, and to prove the six specific statements I alleged against him to be true, without reference to his intentions. This is the extent of my responsibility; the public regard it in that point of view, and I protest against any further responsibility and all collateral and indirect trials of myself, being, however, perfectly willing to meet any charge in due form.

These statements against Mr. Crawford I have, I think, completely established. If the committee think otherwise, and will specify wherein I have failed, I will still redeem the pledge I have given to the public in the proper place.

NINIAN EDWARDS.

P. S. All the witnesses, except one, who have testified on the subject of the A. B. publications, say they considered them and the A. B. plot as one and the same thing. It will be perceived, however, that in my address to the House I made a material distinction between them before I could have anticipated any contest on the subject, for while in that address I spurn the insinuation of "a plot," I acknowledge myself the author of the publications themselves.

NINIAN EDWARDS.

I submit to the committee the testimony herewith transmitted, with a statement of the points to which it is intended to apply.

Thomas F. Riddick states, in his affidavit annexed to the report of the committee, as follows, viz:

"That the Bank of Missouri did transfer, in *eastern funds, to the Bank of the United States and its branches*, near $450,000, which funds were worth four per cent. to the bank."

I refer to the list of drafts drawn by the Treasurer of the United States on the Bank of Missouri since July 1, 1818, (see page 99,) to show that the whole amount of transfers to different banks was $481,943 60

By the said Riddick's affidavit it also appears that he himself gives an account of funds of a very inferior kind transferred $138,179

By letter B No. 16, document No. 119, it appears that there was transferred to the branch at Louisville, of Kentucky notes 67,731

By the enclosure of letter I No. 16, documents 66, p. 104, it appears there had been transferred to Louisville, of Georgetown and Kentucky notes 6,000

211,910 00

Leaving only, that could have been transferred 270,033 60

I have not had time to examine further into this statement.

I refer to a statement of the Treasurer of the United States, dated June 11, 1824, headed "A statement showing the aggregate of moneys deposited to the credit of the Treasurer of the United States in the following banks," &c., (see page 93,) to show the proportion of loss to the amount deposited in certain banks that were depositories of public money received from the sale of public lands, and which have failed to fulfil their engagements with the Treasury.

And I refer to the enclosure of letter I No. 16, document 66, page 104, to show that more uncurrent notes were received by Mr. Crawford than I have alleged in my address to the House, viz: Georgetown and Kentucky notes, $6,000, which appear to have been received between the 20th May, 1820, and the 30th June, 1821; or, if they were not received, this document, furnished by Mr. Crawford himself, must afford a very sufficient apology for thinking so.

I refer to an "extract of a letter from Thomas Sloo to the Secretary of the Treasury," furnished by the Treasury Department, (see page 94,) and to the letter of George F. Strother, (page 93,) to show that the prospects of collecting the debt of the Bank of Missouri to the United States are not as good as they have been represented to the committee to be, &c.

NINIAN EDWARDS.

To the Hon. John Floyd, Chairman, &c.:

The committee having again repeated to me, on last evening, that there are no charges against me submitted to them; that their investigations will be confined to the six specific statements which I have alleged against Mr. Crawford in my address to the House; and that, if I wish to produce further testimony, I must state in writing the names of the witnesses whom I wish to have summoned, and the points I expect to prove by them, I cannot consent to take upon myself the responsibility which may be imposed upon me, by subjecting the Government to a great expense and many gentlemen to much personal inconvenience, without explaining the causes and reasons which, in my opinion, impose upon me the necessity to do so.

I need not enlarge upon the reasons heretofore given why I think I have been unnecessarily called upon, against my own consent, to give testimony in this case. That measure has been adopted; its effect has been to bring on a trial of myself upon collateral points, in the most injurious form, surprising me by accusations and impeachments of my character, of which I could have had no previous notice.

Having been made a witness, I might have had less ground of complaint if I had only been required to defend my general character for veracity. But as the thing now stands I am *compelled* to defend it against particular allegations, the first notice of which has been from the mouths of the witnesses summoned against me. This, I think, was not demanded by any material fact in this case, and it surely can derive no justification from the rules of common law. If I mistake not it is a sound legal principle that a witness shall neither be compelled to discredit himself nor shall an adverse party be permitted to ask him a question with a view to discredit him.

Why I was forced to become a witness I neither knew nor could conjecture, until the committee did me the honor on last evening to state to me that it was in consequence of my having charged Mr. Crawford in one of my six specific statements with having suppressed the letter of the Receiver at Edwardsville, mentioned in my examination before the select committee of February, 1823, and with a view to ascertain what I knew upon that subject.

This I must insist upon is a very great misapprehension on the part of the committee, and a most injurious one to me if it shall be persevered in.

I do most postively disclaim ever having had, or now having, any intention to include that letter in the charge of suppression, submitted to the investigation of the committee by the House of Representatives.

It is not *reasonable* to suppose that I could have *intended* to impose upon myself an obligation to produce proof of the suppression of a particular letter, which the whole scope of my address, and every fair inference from it, showed I considered it as my misforturne not to be able to produce.

But it is not a fair inference from anything *expressed* in my address that I *intended* to include this letter in the charge of suppressions.

In page 13 of that address I say, "It could have been no object with me to have established an additional suppression upon him, for if time do not fail me it will be seen before I am done with this subject that I had in my possession proof, whose credibility could not be questioned, of his having suppressed, in a variety of other instances, letters enough, of a much more important character and delicate bearing, for any purpose that the utmost malignity could have contemplated as possible to be effected by such means."

Here, then, is a clear indication that in what I should thereafter say I did not *intend* to rely upon that letter, but others *much more important*, and whose credibility *could not be questioned*, evidently meaning those that *could be established by the documents furnished by himself.*

Turning to the charge itself, (see address, page 25,) it is found to be expressed in the following words, viz: "That he has in several instances withheld information and letters called for by the House, and which it was his duty to have communicated."

The specifications of this charge, after referring to a particular case only, commences in the following words, viz:

"But it also appears that he and his officers of the Treasury Department have not been able to find a great number of other letters, and even some of his own official ones when required by other calls of the House, or if they could be found they were suppressed. Of this the documents furnished by himself afford both abundant and conclusive proof. Many instances might be stated. For the sake of brevity I will allude to a few of them only."

Here, then, is the practical exposition of the *intention* indicated in the 13th page of my address, in regard to the suppressions on which I *intended* to rely. The suppressions referred to in the last above recited paragraph are expressly confined to those which could be proved *by the documents furnished by himself*, and of these *a few only* are specifically designated, and being all that I exhibited against the Secretary, must be *all* that I am bound to prove. They were deemed enough for my purpose, and more, therefore, were not *intended* to be included.

The publications under the signature of A. B., transmitted with my address, are alsc referred to for specifications; but these contain no reference to any suppressions but those which *the documents* establish.

Besides, the suppression of the Receiver's letter, according to the decision of the committee, which I am not disposed to contest, was a fact wholly immaterial, since the description which I gave of it in my examination in February, 1823, and the copy I produced to the committee, both prove that it was not one of those letters which the committee suppose was embraced by the call of the House upon Mr. Crawford.

For these and the reasons I have heretofore had the honor to submit to the committee, I not only think the testimony I am about to ask for ought not to be considered necessary in the present investigation, but that my own testimony and all that which has already been taken in regard to the publications of A. B. ought to be rejected. Understanding, however, that the committee intend to publish all the testimony that has been taken against me, and believing that its publication under the sanction of the committee will be calculated to do me essential injury and great injustice without further testimony on my part, I feel compelled to ask that Samuel D. Lockwood, esquire, Receiver at Edwardsville, and Thomas Lippincott, esquire, of the same place, and all the Senators of the United States, may be summoned; the two former to support my testimony, and the latter to give testimony to oppose that which has been given against me in relation to an alleged denial of my authorship of the A. B. publications; and I renew my application for the examination of Mr. Crawford.

NINIAN EDWARDS.

Remarks submitted by Mr. Forsyth.

When, on the 16th of June, a question was proposed to Colonel Benton, touching the general character of Ninian Edwards, with a view to show him unworthy of belief, the committee said that if that question was pressed, and the opposite party asked for a delay to enable him to procure testimony to defend his character, it would be granted, and as Mr. Cook, acting for Mr. Edwards, distinctly stated that he should want testimony from the western country, to avoid further delay the question was waived. The committee now say that certain papers brought from Edwardsville, to be used as evidence by Ninian Edwards, are not duly authenticated, and as they are *deemed by him important*, unless they are admitted as evidence time will be allowed to enable him to procure a proper authentication of them. With the same motive that prevented the question proposed to Colonel Benton from being pressed, a consent is now given that these papers should be received. But it is proper that the character of these papers, the motives for producing them, and all the testimony relating to them, should be examined.

The papers to which this consent applies are five in number, to each of which is attached an affidavit of Thomas Lippincott, taken before a justice of the peace, viz: A copy of a letter from Mr. Crawford to the Receiver of Edwardsville of the 6th of August, 1819. 2. A copy of a letter from Mr. Crawford, of the 1st of November, 1819, to the Receiver. 3. A copy of a paper which was folded in the letter of the 1st of November. 4. A copy of a paper dated the 12th October, 1819, neither directed nor signed, but filed away, or endorsed with these words, "Copy to the Treasury Department, October, 1819." 5. Copy of a letter of 22d October, 1819, signed by the Receiver of Edwardsville, and directed to the Secretary of the Treasury. The first and second of these papers were communicated to the committee by the Secretary. The others are not officially certified by the officer whose business and duty it is to authenticate copies of the papers which belong to his office. The affidavit of Lippincott has been preferred by Mr. Edwards to the official certificate; and he, it is presumed, was perfectly aware that such an affidavit was insufficient to make the copy to which it might be attached evidence. The testimony of Lippincott was preferred, also, to that of a person (Oswald Dunn) who preceded Mr. Edwards to Washington, and who might have testified, after examining the copies and originals, that the copies produced were copies of papers in the office of the Receiver of Edwardsville. This preference was obviously given that the affidavits might show in whose handwriting the papers in the office were written. The handwriting of each is shown by Lippincott, except the paper with the date of October 12, 1819. By the testimony of Ninian Edwards, given most reluctantly, it is now known that that paper is his own work, a fact obviously intended to be concealed, and to which concealment Lippincott lent himself if he was, as it is presumed he was, acquainted with Mr. Edwards' handwriting. Even were he not acquainted with it, it will be seen by the affidavits that this paper is the only one the handwriting of the original of which the affidavit attached to it does not go to ascertain. The original letter, of the 1st November, is said to be in the handwriting of Mr. Crawford; that of the 6th of August of a *clerk*, and signed by Mr. Crawford; the paper folded in the letter of the 1st of November, in the same handwriting as the letter of Mr. Crawford of the 6th of August; the letter signed by Mr. Stephenson of the 22d of October, in the handwriting of Mr. Stephenson. The explanation of this difference in the affidavit is found in the fact, disclosed by Mr. Edwards, that the paper from which that now offered was copied was the work of his own hand. The affidavit of Lippincott, that the copy offered is a true copy of that paper now on file, is contradicted by the testimony of Mr. Edwards. There is an underscoring in the copy, and in the original none. Mr. Edwards, although he never remembers to have seen the underscoring until he saw it before the committee, states that *before* the affidavit was affixed, he or Lippincott must have underscored a particular part of it; which underscoring, making emphatic a particular sentence, brought the copy somewhat nearer than the original to the description given by Mr. Edwards in his affidavit of 1823, of the letter of Mr. Stephenson. The oath of Mr. Edwards was, that the purpose of Mr. Stephenson in writing the letter was to enclose the publication of Mr. Edwards of the 13th of September, 1819, and that he (Mr. Edwards) prevailed on him to write it. The letter produced refers to the publication as enclosed, but does it incidentally, as a circumstance of no particular importance; and the agency Mr. Edwards alleged he had in procuring it to be written is not stated, nor is there any allusion to the advice he declares he gave to Mr. Stephenson to withhold all further deposits until he received the order of the Secretary. Mr. Edwards now states that this advice was given to prevent, not immediate, but future remote danger; while the paper produced by him as the copy of that letter, written by himself, states, as from the Receiver, that "he would not wish to risk the responsibility of making the deposits in the bank until after the 1st of January next, 1820, without your instructions, given upon a knowledge of the facts above disclosed;" of which facts, the course Mr. Edwards was disposed to pursue was one of the least important in his character. The peculiar manner in which the affidavit is drawn deserves notice. The paper now produced is intended to prove that Mr. Stephenson wrote the letter, in 1819, described by Mr. Edwards, and that he gave the advice he states he gave to Mr. Stephenson, and as presumptive evidence that his publication and this letter were sent to the Secretary of the Treasury. For these purposes it is necessary that it should appear that the original from which it is copied should have been always in the office of the Receiver since 1819, and was obviously preserved as an official document. While the others are in ordinary form, the affidavit of Lippincott, on this paper, is of studied and singular phraseology: "That the original was found by him on the files of official letters appertaining to and *now in* the Receiver's office at Edwardsville; a phraseology which implies that the deponent knew that the files of official letters in which he found the original paper, although belonging to, had been out of the Receiver's office; a fact totally destructive of all the presumptions arising from the finding of the paper on the files of the official letters in the office. This paper of the 12th of October, it is shown by Mr. Edwards, is not on the letter book of 1819, in which it would have been the duty of Mr. Stephenson to have recorded it if it had been sent to the Secretary of the Treasury. But there is something written on it by the Receiver. The affidavit is on this point, also, equivocal. The paper was found by the deponent on the files of official letters appertaining to and *now in* the Receiver's office at Edwardsville, and endorsed or filed in the handwriting of the Receiver of Public Money, as follows: "Copy to the Treasury Department, October, 1819." No punishment could be inflicted for this statement as false, if the paper is not endorsed, provided the alternative that is filed is true. It is filed if the paper was enclosed in a separate envelope with the words upon it in the Receiver's handwriting; but if the Receiver's handwriting is not on the paper itself, the only presumption in its favor arises from its being found among papers *appertaining to* and *now in* the office.

It is not necessary to pursue this inquiry further. The Secretary of the Treasury could have no

knowledge of the conversation or the acts of Mr. Edwards and Mr. Stephenson in Edwardsville, in 1819, nor has he expressed either belief or opinion respecting them. What was officially known to him he has communicated. For the correctness of that knowledge only is he solicitous. Nor would this scrutiny into the circumstances of the paper dated October 12, 1819, be made, if Mr. Edwards had contented himself with the production of it in explanation of his oath of 1823, and his justification of that part of it which depended upon his own knowledge. It is, however, now produced as presumptive evidence that the copy of it was received by the Secretary; and Mr. Edwards sought for the answer in the office of the Receiver, and has now sworn that he believes the letter of the Secretary of the 1st of November, 1819, is the letter written after the reception of that of the 12th of October, to direct the Receiver to continue the deposits in the Bank of Edwardsville. The letter of the 1st of November makes no allusion to such letter; it is not a direction to continue deposits; it is the determination of the Secretary that the course alleged in the letter of Lucy Stephenson of the 18th of September, (which letter it now appears was also the work of Mr. Edwards,) for the detention of the public moneys in the hands of the Receiver, did not authorize that detention.

Since Mr. Edwards has produced the paper purporting to be dated on the 12th of October, 1819, it has been shown that it was impossible that the letter of the 1st of November should have been the answer to it, or written in consequence of it. By the mail arrangements of 1819, prevailing until the 16th of November of that year, as shown by the testimony of Mr. Bradley before the committee, it required twenty days to transmit a letter from Washington to Edwardsville, and a longer time to transmit a letter from Edwardsville to Washington. The original accounts of the Postmaster of Edwardsville, taken from the Comptroller's Office, and of which an extract is before the committee, show that no mail left Edwardsville for Washington from the 9th of October until the 16th of that month. More than twenty days from the 16th of October reaches beyond the 4th of November. The letter of the 1st of November was, therefore, written before it was possible for the letter of the 12th of October, 1819, if such had been written at Edwardsville, to reach Washington. Admitting the impossibility that this should be otherwise, Mr. Edwards seeks to avoid the effect of this admission, by declaring, on oath, his belief that the letter of the 1st of November was not written or sent before that of the 12th of October was received. Either, therefore, the letter was fraudulently antedated, or retained until the arrival of that document. To find a colorable pretext for this belief, Mr. Edwards, as the committee will recollect, turned to the original letter of the Secretary of the Treasury, of the 1st of November, to the Cashier of the Bank of Edwardsville, brought by Mr. Edwards from that place, which enclosed a copy of the letter of the same date to the Receiver, in order to ascertain the post-mark upon it; and succeeded in persuading himself that there was the figure 8 in the post-mark. A clerk of the Post Office, Mr. Sweeny, was sent for by (Mr. Taylor) one of the committee, but Mr. Edwards declined examining him. Mr. Sweeny, however, was examined; and the post-mark was ascertained to be the 3d of a *month* which could not be distinguished. This post-mark, if of November, was on the original letter before the letter of the 12th of October could have reached Washington. On the 19th of June, after a deliberation of three days, Mr. Edwards amended his own testimony, and then declared that it was possible the letter of the 12th of October might have arrived here in time to be answered by one of the 1st of November, because it might have been carried by a private conveyance to Louisville, from whence it could have been brought by mail within the required time. In making this amendment to his former answer, Mr. Edwards appears to have forgotten how much he had previously said of the safety of the mail, and the improbability that anything committed to it should have miscarried; and that Mr. Stephenson could not have felt so much anxiety to despatch a paper which it had required Mr. Edwards' influence to prevail on him to write, as to seek unusual means of hurrying it on by a mode of conveyance never before or after used by him for the conveyance of his official letters to the Department.

Mr. Edwards, however, has asserted that Mr. Crawford's letter of the 20th of April, 1820, was possibly the answer to the one of the 12th of October, 1819. In making this assertion on oath, Mr. Edwards has not recollected the stress he lays upon the circumstance of the deposits having been withheld till the 31st of December, 1819, as proof that he had advised the Receiver to withhold the deposits; as evidence that the Receiver did write to Mr. Crawford the letter of the 12th of October, and that that letter was answered; that in consequence of that answer the large sum of $53,191 was paid into the bank. In laying this stress upon the withholding of the deposits as evidence that Mr. Stephenson was acting by his advice, he had forgotten that he knew (having written Lucy Stephenson's letter of the 18th of September, 1819,) that the deposits had been withheld for months before he gave the advice, of the giving of which that withholding is afterwards considered as satisfactory proof. Without weighing the ingenious suppositions made under oath, founded upon a paper not proved to have been seen by the Receiver, differing from his official directions, and yet probably influencing him to do what he did not do, withhold the deposits, it will be sufficiently apparent that a letter of the 20th of April, 1820, could not be the cause of deposits made in December, 1819, and January and February, 1820; in all which months, notwithstanding the advice Mr. Edwards has sworn he gave the Receiver, deposits were made by that officer, as appears by his accounts in the hands of the committee among the documents accompanying the Secretary's communication. The letter of the 20th of April is written, as appears on the face of it, in consequence of the deposits of public money having been partially made. In the Receiver's office at Edwardsville has been found no letter answering the description of Mr. Edwards in his testimony in 1823, or which could have been an answer to the paper of which the copy is now produced. Mr. Edwards has stated that he searched the office with the special object of discovering such a document, and that, except what he has produced, none such is to be found.

It is therefore respectfully submitted:

That the paper, in the handwriting of Mr. Edwards, found on the files of official letters appertaining to and *now in* the Receiver's office, is evidence only that Mr. Edwards wrote such a letter.

That it is not official, although filed in the handwriting of the Receiver, as it is not in his handwriting nor in that of any person employed in his office, and is not recorded in his letter book.

That there is no evidence that the Receiver ever carried or sent a copy of it from his office.

That such letter never has been received at the Treasury Department; that no answer is in the Treasury Department or Receiver's office at Edwardsville, or was ever written to such letter.

Mr. Edwards having declared in his last address to the committee, delivered on the 19th of June, that he had made no charge against the Secretary of suppressing the alleged correspondence with Mr. Stephenson, to which his oath of 1823 refers, it might appear superfluous to trouble the committee with these remarks. But on the very day that Mr. Edwards presented this disclaimer the alteration in his

testimony heretofore mentioned was made, and made, too, after the disclaimer was prepared and delivered. The conviction, therefore, is, that Mr. Edwards seeks to leave the stain of this charge on the Secretary, while he intends to avoid, if he can, the responsibility of having made it, and seeks to procure for his own testimony, which is the only testimony in support of it, a degree of respect to which it is not entitled. With this view of his intention it will not be deemed improper to examine what has been said and attempted by Mr. Edwards on the subject.

In 1823 Mr. Edwards declared on oath to the committee of Congress that he was very much surprised that this correspondence (meaning the alleged letter of Mr. Stephenson of the 12th of October, and the alleged answer) was not communicated by the Secretary under resolutions of the House of Representatives of the 9th of January and 12th of March, 1822, calling for certain correspondence between the Treasury Department and sundry banks.

In his address to the House of the 6th of April last he says, "Believing, as I call my God to witness I sincerely and confidently do, that Mr. Crawford did receive the letter mentioned in the above report, and that it is now in his possession, or has been purposely destroyed." In the same address he infers that if this letter was not answered, Mr. Crawford, being for some cause or other unwilling to acknowledge the receipt of it, "contrived to give the directions (to continue the deposits) under some other form or pretext than that of a direct answer to it."

In his replication presented to the committee since the adjournment of Congress whole pages are occupied by an argument to show that the alleged letter of the 12th of October was sent, was received, and was answered. All the officers in the Secretary's office were called as witnesses to prove that the letter had been received in 1819, or had been found since the Secretary's report of the 22d of March, 1824, and that the Secretary had purposely delayed making that report until Mr. Edwards was about to leave Washington. In all of which the testimony adduced was conclusive that neither the charge itself nor either of the incidents alleged in aggravation of it by Mr. Edwards was true.

Mr. Edwards argues, too, in his replication, that the Edwardsville Receiver's letter ought, according to Mr. Crawford's own view of the subject, to have been communicated to the House of Representatives under the before mentioned resolutions, because one other Receiver's letter (the Receiver at St. Louis) had been communicated with his report of the ——, omitting to remember that this was communicated under a call requiring all the correspondence in relation to the Bank of Missouri, which made it his duty to transmit all letters respecting that bank, from whomsoever received.

In his testimony now taken before the committee Mr. Edwards declares he believes that in 1819 the Secretary might have conceived the idea of concealing the letter of Mr. Stephenson, if it had been received, to screen himself from responsibility if the Bank of Edwardsville afterwards failed; an event which, although he did not anticipate, he might have apprehended. In the same testimony, when compelled to admit that a letter could not have arrived by mail from the 16th of October to the 1st of November, 1819, he added to that admission an insinuation, on oath, that the letter of the Secretary was antedated or retained until the arrival of the alleged letter of the 12th October, 1819. After the testimony of Mr. Sweeny was given, instead of disavowing this insinuation he was silent; and three days afterwards adds to that part of his testimony that from which it might be inferred that the letter of the 12th of October was sent by private conveyance to Louisville, and thence by mail to Washington.

All these declarations, and the publication of Mr. Edwards at Louisville, in which he asserts that he has the most irresistible proof that the Receiver at Edwardsville did write the letter mentioned in his examination, and that Mr. Crawford did write a letter to the Receiver directing him to continue the deposits in the Bank of Edwardsville, make it necessary that it should be distinctly brought before the committee. That Mr. Edwards, in different parts of his testimony, contradicts himself; that his testimony of 1823 does not agree with his testimony taken before the present committee; that his statements in his addresses to the House, and in his addresses to the committee, are contradictory to each other; that his statements now given on oath show that the impressions which his addresses were intended to make were, as he knew, unfounded; that he voluntarily declared, in the most emphatic manner, to different persons, that he was not the author of various publications against the Secretary, which he now acknowledges to have written; and finally, that he was, as admitted by himself, a party to a material alteration in a paper produced by himself, purporting to be a copy of a paper appertaining to and now in the Receiver's office at Edwardsville—an alteration, the obvious effect of which was to deceive the committee and the public as to the character of the original from which the copy was taken.

It is therefore respectfully submitted that nothing affecting the Secretary, and depending upon the oath of Mr. Edwards, can be taken as proved.

Hon. John Floyd, Chairman, &c.:

Unprepared, at present, to defend myself against the testimony of the Hon. Mr. Noble, by which I have been perfectly surprised, I have been compelled to look to a future period for that purpose. Lest, however, some erroneous inferences to my prejudice may be drawn from the want of a formal defence on this subject before the committee, I do most solemnly declare before *God* and my country that in the conversation which Mr. Noble states to have passed between him and myself, whensoever or wheresoever any part of it may have happened, he must, at least, have greatly misunderstood me, both in regard to the A. B. publications and to Mr. Crawford; and that if the conversation alluded to, or any part of it, happened, as he says it did, in his own room, it must have been after my nomination was confirmed by the Senate.

It will be recollected that Mr. Noble, disclaiming all *party* considerations, had professed to be my friend, and had taken "an active part" in favor of the confirmation of my nomination, of which he proves I was well apprised. It would, therefore, have been most extraordinary that I should have thought it necessary to have made such statements to him, by which nothing was to be gained, and that I should have totally forborne to make them to any other Senator.

Nor can it be considered less strange, if those statements were made to him during the pendency of my nomination, that he, with all his zeal in my favor, and acting in direct opposition to the wishes of his political friends, should never, either with a view to aid me or to justify himself, have given the slightest intimation of such conversation as he represents to have passed between us to any one of those gentlemen whom it was calculated to conciliate, and from whom opposition was expected.

As to the conversation he mentions in regard to Mr. Crawford, it alludes to some facts which happened before I became a member of Congress, and of which I had no knowledge until since the commencement of the present controversy.

The very professions of gratitude, which he says I made to him, would apply with much more force and propriety to a period after than before the confirmation of my nomination; and from the nature of the case they would seem to have been predicated upon a disinterestedness on his part, which was the more highly appreciated because it overlooked the circumstances of his friendship and my hostility to Mr. Crawford, which is at war with the whole statement he has made concerning my opinion of the conduct of that gentleman.

That Mr. Noble may have misunderstood me I will not attempt to gainsay; but, as I hope for future happiness, I never did intend to have expressed myself to him, or any other person, so as to have conveyed the opinions and sentiments which he has imputed to me; nor can I account by anything within my own knowledge for such great misapprehensions.

My object, however, is not now to present an argument upon the case, but simply to request the committee to accept of this as my denial of Mr. Noble's testimony, and to have it printed with my other communications to the committee.

NINIAN EDWARDS.

18TH CONGRESS.] **No. 713.** [2D SESSION.

SEVEN MILLIONS LOAN BY THE BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 15, 1824.

TREASURY DEPARTMENT, *December* 14, 1824.

SIR: In obedience to a resolution of the House of Representatives of the 12th of May, 1824, requiring the Secretary of the Treasury to ascertain and report to Congress the rate of interest at which the Bank of the United States will continue the loan of seven millions of dollars, I have the honor to state that the bank declines making any change in the terms on which that loan was originally made. Two letters from the President of that institution, exhibiting the views of the Directors on the subject, are herewith submitted.

I remain, with respect, your most obedient servant,

WM. H. CRAWFORD.

Hon. H. CLAY, *Speaker of the House of Representatives.*

BANK OF THE UNITED STATES, *December* 3, 1824.

SIR: I had the honor, on the 12th of July last, to acknowledge the receipt of your letter of the 9th of that month, enclosing a resolution of the House of Representatives, passed on the 12th of May last, by which the Secretary of the Treasury was directed to "ascertain and report to Congress at its next session the rate of interest at which the Bank of the United States will continue the United States loan of seven millions;" and requesting "that the reply of the Board might be communicated in time to be submitted to the House during the first week of the next session of Congress."

In conformity to this request, I have this day been instructed by the Board of Directors to inform you that, after a very deliberate and respectful examination of the subject, they do not deem it consistent with their duty to the institution committed to their charge to propose any variation of the terms on which this subscription to the capital of the bank was originally made on behalf of the United States.

I have the honor to be, very respectfully, yours,

N. BIDDLE, *President.*

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

BANK OF THE UNITED STATES, *December* 6, 1824.

SIR: In communicating the decision of the Board in relation to the rate of interest on the seven millions subscribed to the bank, I venture to add a few suggestions explanatory of their views, which you will, I am persuaded, duly appreciate, and can use in any manner of which you may deem them worthy.

The question proposed being simply at what rate of interest the loan would be continued, without any specific offer to change its terms, and without intimating any modification which would be more acceptable than its present form, the Board felt themselves constrained to confine their reply to a general expression of their unwillingness to vary its present situation. Should the subject be resumed it will naturally present for consideration the expediency of either proposing to the bank to commute the subscription, now redeemable at pleasure, into a more permanent stock, at a lower rate of interest, or paying it off from the proceeds of a new loan. To that inquiry the following observations may not be inapplicable.

The Government, in establishing by the charter its connexion with the bank, prescribed that its subscription to the capital should be "paid either in gold or silver coin, or in stock of the United States, bearing interest at the rate of five per centum per annum." The latter course, as being obviously for the interest of the Government, at a time when the six per cents were received in subscription at par, was naturally adopted, and this five per cent. stock given in exchange for shares in the bank, on which a much higher rate of dividend was anticipated. This choice was proportionally disadvantageous to the bank, and combined with the other engagements of the charter, the bonus of one million five hundred

thousand dollars, the assumption of the duties of the Loan Office, and the obligation to distribute, without charge, the public revenue, imposed on the institution at its commencement some inequality in the burdens of the connexion. For a time the early expectation of large dividends from the bank was realized, until its misfortunes compelled it to reduce them; but now, and for some years past, the dividends equal the interest on the subscription by the Government. The stock thus subscribed is "redeemable in any sums and at any periods which the Government shall deem fit," a phraseology which, though it certainly does not require, seemed to imply, and naturally suggested, the expectation that this reimbursement would be gradually effected from the surpluses of the revenue, whenever its abundance would furnish disposable means for that purpose. The contingency of a temporary reduction of the rate of interest, during which a new debt to others might be created to pay off the existing debt to the bank, was not anticipated, and the expediency of that measure, blended as it is with general views of the relation between that institution and the finances of the country, must, of course, be decided exclusively by those whom such considerations cannot escape. To them it is cheerfully left, with the single remark, which, unless outweighed by some decisive temptation to a change, should not be without its influence, that this stock procures to the Government an income equal to the sum which is paid on account of it, and that the shares of the bank for which it was exchanged bear a much higher value than the stock itself. Without enlarging on these topics it will be a more appropriate duty in those who are charged with the administration of the bank to suggest, as is now done, very respectfully, that it would probably benefit neither the bank nor the Government to vary the terms of the original subscription.

1st. In relation to the bank itself, the change from the present to a lower rate of interest is, of course, an obvious loss; but its remote effects, though not so apparent, would not be less disadvantageous. The true interests of the bank are inseparably connected with those of the community, whose general business, whose transactions and exchanges, it is at once its duty and its inclination to encourage and facilitate. When, by any concurrence of circumstances, that business, and with it the demand for banking accommodation, diminishes, the bank naturally seeks to place its funds, no longer required for that purpose, in investments, which, though yielding small profits, are readily convertible, and from which it can immemediately disengage them at any moment, when the reviving business of the community may demand their more active and useful employment. It would be alike injurious to that community and to the bank that any change in the circumstances of the country, that any of the various contingencies which might give fresh animation to commerce, should find the means of the institution absorbed in stocks from which it could not extricate them without loss to itself, and where it could not leave them without diminishing its usefulness to the public. The board, therefore, would see with reluctance so large a proportion of the original capital of the bank invested in a stock which, bearing a lower interest than has hitherto been known in the United States, would be the first to feel the depreciation attendant on an active demand for capital. On the other hand, to throw back on the bank such an amount of its capital, for which no employment in the necessary course of business could now be found, would either condemn it to the disadvantage of suffering its funds to remain useless and unproductive, or else expose it to the hazard of extending its loans; of which the first effect would be to stimulate into a distempered energy the spirit of speculation, and the last might be reaction, disastrous alike to the community and to the institution; nor—

2d. Is the advantage to the Government from any change either clear or important. This stock may now be redeemed in any portions and at any time which may be convenient, and the first excess of revenue may be applied to its reduction. To convert it into a stock bearing a lower rate of interest, yet still redeemable at pleasure, would be impracticable, as the only compensation which could be offered for the reduction of the interest must be found in the prolonged and fixed duration of the capital. It is, therefore, worthy of consideration whether it is not better to retain a five per cent. stock, reimbursable at pleasure, rather than convert it into a four and a half per cent. stock, irredeemable for years, and thus permanently added to the mass of the national debt.

Again: It is probable, from present appearances, that the surplus revenue of 1825 will, during the first and part of the second quarter, be absorbed in the reimbursement of the $7,652,815 49 of six per cents redeemable in that year, and that to redeem the nineteen millions of six per cents, payable on the 1st of January, 1826, it may be necessary to borrow eight or ten millions towards the close of 1825. If, then, the Government were, in addition to the five millions of four and a half per cents for which proposals are now issued, to open a new loan of seven millions, these would probably so absorb the floating capital of the country as to leave neither the means nor the disposition to make the necessary advances at that low rate of interest to extinguish the sixes reimbursable on the 1st of January, 1826. Would it not then be advisable to employ that disposable capital in the redemption of a six per cent. stock rather than to exhaust it in the exchange for a five per cent. stock?

The last consideration is, whether, in fact, any change of this stock could be so advantageous to the Government as its present form. It may be assumed that if these seven millions were repaid to the bank they could not be employed either usefully or profitably, and that the Government in its character of a stockholder would proportionably suffer in its interests. Now, these seven millions bear an interest of $350,000, but the Government, as proprietor of one-fifth of the bank, receives in the shape of dividends on its shares one-fifth of this sum, making the sum actually disbursed by the Government $280,000, which is only four per cent., so that, in fact, this stock is a four per cent. stock, redeemable at pleasure. Now, a four per cent. stock, redeemable at pleasure, would not be purchased by individuals at par. A four and a half per cent. stock thus redeemable could not be procured, nor even if it could would it be so advantageous to the Government as the present, which, though nominally five, is actually only four per cent. In short, it is believed that no four and a half per cent. loan could be obtained unless for a length of time which would render it less convenient to the Government than the terms on which the subscription now stands, uniting as it does the advantages of a low rate of interest with the privilege of immediate reimbursement.

Under these impressions, the Board deem it for the mutual advantage of both parties that the original subscription should remain in its present form; and more particularly they do not feel themselves at liberty to make any voluntary offer for its conversion into a stock bearing a different rate of interest.

You will readily perceive from the frankness and fullness of this explanation that its sole purpose is to present distinctly the views which have influenced the decision of the Board.

I have the honor to be, very respectfully, yours,

N. BIDDLE, *President.*

Hon. WILLIAM H. CRAWFORD, *Secretary of the Treasury.*

18TH CONGRESS.] No. 714. [2D SESSION.

LOSSES ON DUTY BONDS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 15, 1824.

TREASURY DEPARTMENT, *December* 14, 1824.

SIR: In obedience to a resolution of the House of Representatives of May 26, 1824, I have the honor to submit two statements from the Register of the Treasury, showing the annual and aggregate amount of bonds for duties which accrued upon the importation of foreign merchandise from March 3, 1789, to December 31, 1823, and the annual and aggregate amount of loss which has arisen by allowing the credits thereon authorized by law. By these it appears that the whole amount of duties which accrued during that period is $535,512,933 36, of which $8,032,693 99 are estimated to have been received in cash, and the remainder of $527,480,239 37 were taken on bond; that of the amount of bonds taken, $1,575,626 67 are stated to be lost, and $758,191 51 are considered doubtful. If the sum considered doubtful be added to that stated to be lost, the whole amount of loss during that entire period is only about 44¼ cents in each hundred dollars.

To require the prompt payment of duties would certainly prevent any loss in future; but it would probably diminish the amount of duties in a greater proportion than it has been diminished by the loss actually sustained under the credit system. It is also probable that the amount of duties would be diminished by shortening the credits, inasmuch as the length of the credit for the duties operates as an encouragement to importations. With a view, therefore, exclusively to the revenue, it is believed that no advantage would result from abolishing or curtailing the credits now given for duties.

But whatever motives there may be for allowing a credit for duties to our own citizens, no sufficient reason is perceived for continuing it to foreigners who are not domiciliated in the republic. A discrimination in this respect between citizens of the United States and others would tend to confine the commerce of the nation to its own citizens, and would aid in restraining the practice of shipping merchandise to this country upon consignment, for foreign account, which has hitherto been found to interfere with the interests of our own regular merchants.

I remain, with respect, your most obedient servant,

WM. H. CRAWFORD.

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

A statement of the bonds taken for duties on imported merchandise into the United States, from March 3, 1789, *to December* 31, 1823.

From March 3, 1789 to December 31,	1791	$6,396,812 05
	1792	4,864,003 55
	1793	6,499,468 63
	1794	8,459,557 25
	1795	10,995,919 68
	1796	12,392,449 62
	1797	12,673,979 93
	1798	11,231,152 39
	1799	15,023,173 40
	1800	15,763,723 04
	1801	20,285,480 48
	1802	14,620,485 93
	1803	14,051,366 29
	1804	19,590,293 17
	1805	21,965,468 97
	1806	24,453,208 22
	1807	25,148,025 15
	1808	10,502,569 98
	1809	10,683,070 06
	1810	15,039,331 06
	1811	9,732,655 07
	1812	14,158,175 73
	1813	7,092,574 54
	1814	4,177,859 83
	1815	37,479,999 47
	1816	32,337,474 59
	1817	21,802,067 29
	1818	25,472,422 74
	1819	21,025,727 04
	1820	16,342,346 81
	1821	15,023,032 65
	1822	20,979,046 58
	1823	21,217,318 34
Total		527,480,239 37

NOTE.—The principle on which this statement of the amount of bonds taken for duties on imported merchandise into the United States is formed is derived from the amount of duties on merchandise severally exhibited in the annual printed public accounts, the total amount of which during the period above stated is $535,512,933 36
From which deduct the estimated amount of cash payments, at 1½ per cent..... 8,032,693 99

Leaving the amount of bonds for duties, as exhibited in the statement, at.... 527,480,239 37

JOSEPH NOURSE, *Register of the Treasury.*

TREASURY DEPARTMENT, *Register's Office, December* 6, 1824.

Statement of the amount of losses sustained during the last thirty years upon bonds given for duties on imports, distinguishing the amount in each year: prepared in obedience to a resolution of the House of Representatives of the United States of May 26, 1824.

* The resolution of the House of Representatives calls for the losses on bonds during the last thirty years; the above statement, in fact, exhibits the whole loss since the 3d March, 1789, as there were no ascertained losses prior to the 1st January, 1794.

JOSEPH NOURSE, *Register of the Treasury.*

TREASURY DEPARTMENT, *Register's Office, November* 30, 1824.

18TH CONGRESS.] No. 715. [2D SESSION.

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE JANUARY 3, 1825.

TREASURY DEPARTMENT, *December* 31, 1824.

SIR: I have the honor to transmit a report prepared in obedience to the "Act supplementary to the act to establish the Treasury Department."

I have the honor to be, with great respect, sir, your obedient servant,

WM. H. CRAWFORD.

The PRESIDENT *of the Senate.*

REPORT.

In obedience to the directions of the "Act supplementary to the act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report:

1. OF THE PUBLIC REVENUE AND EXPENDITURE FOR THE YEARS 1823 AND 1824.

The net revenue which accrued from duties on imports and tonnage during the year 1823 amounted (see statement A) to			$17,008,570 80
The actual receipts into the Treasury during the year 1823 amounted to			20,540,666 26
Viz:			
Customs (statement A)		$19,088,433 44	
Public lands (statement D)		916,523 10	
Dividends on stock in the Bank of the United States		350,000 00	
Arrears of internal duties and direct taxes, and incidental receipts (E).		131,951 69	
Repayments of advances made in the War Department for services or supplies prior to July 1, 1816		53,758 03	
Making, with the balance in the Treasury on the 1st January, 1823, of			4,237,427 55
An aggregate of			24,778,093 81
The actual expenditures during the year 1823 amounted to (F)			15,314,171 00
Viz:			
Civil, diplomatic, and miscellaneous		2,022,093 99	
Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages, prior to January 1, 1817		5,258,294 77	
Naval service, including the gradual increase of the Navy		2,503,765 83	
Public debt		5,530,016 41	
Leaving a balance in the Treasury, on the 1st January, 1824, of			9,463,922 81
The actual receipts into the Treasury during the first three quarters of the year 1824 are estimated to have amounted to		19,630,893 96	
Viz:			
Customs	$13,372,268 80		
Public lands (statement G)	768,805 10		
Dividends on stock in the Bank of the United States	350,000 00		
Arrears of internal duties and direct taxes and incidental receipts (H)	97,321 37		
Repayments of advances made in the War Department for services or supplies prior to July 1, 1816	42,498 69		
Loan under act of May 24, 1824, for paying the awards under the Florida treaty	5,000,000 00		
And the actual receipts into the Treasury during the fourth quarter of the year, including the moiety of the loan of $5,000,000, authorized by the act of the 26th of May, 1824, for paying the 6 per cent. stock of 1812, are estimated at		7,350,000 00	
Making the total estimated receipts into the Treasury during the year 1824			26,980,893 96
And, with the balance in the Treasury on the 1st of January, 1824, forming an aggregate of			36,444,816 77
The expenditures during the first three quarters of the year 1824 are estimated to have amounted to (statement I)		$21,563,702 73	
Viz:			
Civil, diplomatic, and miscellaneous	$1,792,456 00		
Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages prior to January 1, 1817	4,548,374 49		
Naval service, including the gradual increase of the Navy	2,172,671 34		
Awards under the Florida treaty	4,775,671 99		
Public debt	8,274,528 91		
And the expenditures during the fourth quarter are estimated at		10,374,445 13	
Viz:			
Civil, diplomatic, and miscellaneous	$580,870 11		
Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages prior to January 1, 1817	765,346 35		
Naval service, including the gradual increase of the Navy	734,343 82		
Public debt	8,293,884 85		
Making the total estimated expenditure of the year 1824			31,938,147 86
And leaving in the Treasury, on the 1st of January, 1825, an estimated balance of			4,506,668 91

It is to be observed, however, that this balance is not to be considered as subject to appropriation, as there is about an equal amount of unsatisfied appropriations, which, though not called for in the year 1824, are necessary for the objects for which they were severally made, and which are, therefore, an existing charge upon the means of the Treasury.

2. OF THE PUBLIC DEBT.

The funded debt which was contracted before the year 1812, and which was unredeemed on the 1st of October, 1823, amounted (statement No. 1) to		$16,597,318 58
And that which was contracted subsequently to the 1st of January, 1812, and was unredeemed on the 1st of October, 1823, amounted (No. 2) to		73,854,545 45
Making the total amount of funded debt unredeemed on the 1st of October, 1823		90,451,864 03
In the fourth quarter of that year there was added in Treasury note six per cent. stock.		716 75
Making an aggregate of		90,452,580 78
And there was paid in the reimbursement of deferred six per cent. stock		274,565 88
Reducing the funded debt, on the 1st of January, 1824, (statement No. 2,) to		90,178,014 90
From that day to the 1st of October last there was added, in four and a half per cent. stock, under the act of May 24, 1824		5,000,000 00
Making an aggregate of		95,178,014 90
During the same period there was paid the residue of the deferred six per cent. stock	$357,546 26	
And in purchasing the seven per cent. stock	4,123,397 10	
Making together		4,480,943 36
And reducing the funded debt, on the 1st of October, 1824, (No. 3,) to		90,697,071 54
In the fourth quarter of the year it is estimated there will be added, in four and a half per cent. stock, under the act of May 26, 1824		2,500,000 00
Making an aggregate of		93,197,071 54
And during the same period it is estimated there will be paid for the redemption of the residue of the seven per cent. stock	4,483,093 17	
And of the exchanged six per cent. stock	2,668,974 99	
Making together		7,152,068 16
Which will reduce the funded debt unredeemed on the 1st of January, 1825, (including $7,000,000 five per cent. stock subscription to the Bank of the United States, for which the stock of the bank held by the Government is considered an equivalent,) to		86,045,003 38
The amount of Treasury notes outstanding on the 1st of October, 1824, is estimated (No. 4) at		19,756 00
And the amount of Mississippi stock unredeemed on that day, including awards not applied for, (No. 5,) at		14,016 53

By the preceding exhibition of the fiscal operations of the year it will be perceived that, if the expectations formed respecting the fourth quarter should be realized, the receipts will have exceeded the estimate presented at the last session of Congress by about $800,000. The only failure has been in the proceeds of the public lands, and that has been the result of a disappointment in regard to the relinquished lands; great portions of which were supposed to offer strong inducements to purchasers in their fertility and situation, and other circumstances. But, not only has the quantity sold been less than was anticipated, but owing, it is believed, in a great measure, to combinations of capitalists, by which actual settlers were deterred from competition, the price has not, with few exceptions, exceeded the minimum price fixed by law. It is to be observed, however, that the actual receipts from that source of revenue during the present year will exceed those of the preceding year; and it is estimated that those for the ensuing year will not be less.

The gross amount of duties on imports and tonnage, which accrued from the 1st of January to the 30th of September last, inclusive, is estimated at $19,000,000, and that of the whole year at $22,500,000. Of this sum, that portion which accrued in the first half of the year exceeds by about $630,000, and that in the three quarters by about $1,200,000, the portions which accrued in the corresponding quarters of the preceding year.

The debentures issued during the first three quarters of the present year amounted to $2,952,000, which is less by $460,000 than the amount issued during the corresponding period of the preceding year; and the amount of debentures outstanding on the 30th of September last, and chargeable upon the revenue of 1825, was $1,004,000, which is less by $401,000 than was, on the same day in 1823, chargeable upon the revenue of 1824.

The amount of bonds in suit on the 30th September last was $2,909,000, which is $92,000 more than was in suit on the same day of the preceding year. Deducting from the whole amount of duties outstanding on bonds and otherwise on the 30th of September last, the debentures actually chargeable upon them and the bonds in suit, it is estimated that the sum payable after the expiration of the present year will be about $12,200,000. This amount, however, is subject to debentures which may still be issued; but, as an allowance has already been made for those which are now chargeable upon it, no considerable deduction on that account is to be expected. A portion of the amount, also, is not payable until 1826;

but the residue, together with so much of the duties accruing in the fourth quarter of the present and in the whole of the next year as may be received during that year, will, after deducting the expenses of collection, constitute the receipts from the customs during the year 1825.

The productiveness of the customs, however, depends upon the state of the foreign commerce of the nation. It is estimated that in the year ending on the 30th of September last the value of domestic articles exported was $49,684,710, which exceeded by $2,529,302 the amount exported in the preceding year; and that the value of foreign articles exported was $25,248,782, which was less by $2,294,840 than the amount exported in the preceding year. The value of imports during the same period is estimated at $78,516,183, which exceeds the imports of the preceding year by $936,916.

For three years past the average annual value of imports has been $79,778,997; that of foreign articles exported $25,026,201; and that of domestic articles exported $48,904,732. The little fluctuation that has taken place in these years, and the improvement in the last year, may be regarded as indications that the commerce of the country is tending to a regular and sound state. If no extraordinary events should occur to interrupt it, it is reasonable to infer that there will be no material or unfavorable change in the ensuing year.

For the two years ending on the 31st December, 1823, the average annual gross amount of duties on imports was $23,227,835. This sum, upon the annual average value of the whole importations for the three years ending on the 30th of September, 1824, was 29.12 per cent.; and upon the average amount of importations, after deducting the exports of foreign articles, it was 42.42 per cent. For the same two years the average annual net amount of duties, including tonnage, &c., was $18,758,931; and, for the reasons already stated, it may be presumed that, independent of any influence which the new tariff may have upon the revenue, the amount which will be received into the Treasury from customs during the year 1825 will be about equal to that sum.

The operation of the new tariff upon the revenue cannot now be correctly estimated. On one important branch of imports, those from beyond the Cape of Good Hope, its provisions will not take effect until the 1st of January next. As it is only since the 1st of July last that it has been in operation in regard to other importations, and as the Collectors are allowed by law three months for rendering their accounts, the addition caused by the new tariff cannot, even for that portion of the imports and for one quarter of the year, be stated with perfect accuracy. It is believed, however, that the investigation which has been made with a view to that object affords data for estimating its effects with sufficient exactness for the present purpose. It has been found that, upon the whole importations (estimating their value at the rates adopted in forming the statistical report) in the three quarters of the year ending on the 30th of June, 1824, the gross amount of duties was 27.45 per cent.; and that, if the rates of the present tariff had been applied to the same importations, the duties would have amounted to 30.30 per cent., which is equal to an increase upon the amount of duties of 10.39 per cent. (statement K.) It also appears that, in eight of the principal ports of the United States, the rate of duties upon the whole amount of importations during the third quarter of the year 1823 was 28.36; and during the corresponding quarter of the year 1824 it was 30.98 per cent., (statement L.) But it is to be observed that in the third quarter of 1824 the importations from beyond the Cape of Good Hope were not subjected to the increased rates of the new tariff. These, it is estimated, would have made the rate of duties in that quarter 31.40 per cent., which is equal to an increase upon the amount of duties of 7.57 per cent. The new tariff may, perhaps, have some effect upon the importation of those articles which pay high rates of duty, and for which articles of a lower rate may be substituted. But, as the value of the imports depends more upon the ability of the importing country to pay than upon the amount of duty levied upon the articles imported, it is not probable that, under the present circumstances of the commerce of the United States, there will be any diminution in the aggregate. Upon the whole, therefore, it is believed that the revenue derived from imports will be increased by the operation of the new tariff in a ratio nearly equal to that in which it is estimated to have been increased during the third quarter of the present year in the ports above mentioned, or about 7½ per cent. This increase, however, will produce less augmentation in the actual receipts into the Treasury during the year 1825 than in subsequent years.

With these views of the subject, the receipts into the Treasury during the year 1825 are estimated as follows:

Customs	$20,000,000 00	
Lands	1,000,000 00	
Bank dividends	350,000 00	
Miscellaneous and incidental	150,000 00	
Making together	21,500,000 00	
And the residue of the loan authorized by the act of the 26th of May last	2,450,000 00	
Forming an aggregate of		$23,950,000 00

The expenditures of the year are estimated as follows:

Civil, diplomatic, and miscellaneaus	1,685,026 76	
Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st January, 1817	5,013,283 60	
Naval service, including the gradual increase of the navy	3,044,789 31	
Public debt, including a payment of $7,654,570 93 of principal	11,962,063 97	
Making together		21,705,163 64
Which will leave in the Treasury, on the 1st of January, 1826, after satisfying all the demands of the year 1825, a surplus estimated at		2,244,836 36

On the first of January, 1826, a large amount of debt incurred by the late war, viz: $19,000,000 of the 6 per cent. stock of the year 1813, will be redeemable. As it is not probable that the surplus means of the year 1826 will more than equal the amount of the sinking fund for that year, only $7,000,000 of that stock can be discharged out of the ordinary revenues of the year. On the 1st of January, 1827, the 6 per cents of 1814, another portion of the war debt, amounting to $13,000,000, will become redeemable, and in that year, also, it is probable that not more than $7,000,000 of the principal can be discharged. There will then remain in those two years $13,000,000, which cannot be paid out of the revenue of those years. In 1828 the amount of principal redeemable will probably not exceed the means of the Treasury. In the years 1829 and 1830 no part of the public debt is redeemable, and in 1831 less than $19,000. Policy would seem to suggest, with a view both to the convenience of the Government and the advantage of the community, that the excess of debt which cannot be discharged in 1826 and 1827 should be thrown in equal portions upon those years in which nothing is payable. For the present, however, it may be sufficient to confine such an arrangement to the excess of the year 1826. From the state of the money market and the high credit of the Government no doubt is entertained that the $12,000,000 required to provide for the excess of the debt on the 1st of January, 1826, may be borrowed at 5 per cent., reimbursable in in 1829 and 1830. And if such an arrangement is approved, it is respectfully proposed that authority be given by law for that purpose.

The same object might, perhaps, be accomplished by an exchange of the stock redeemable on the 1st of January, 1826, for a five per cent. stock redeemable in 1829 and 1830. But it is believed that better terms may be obtained by a loan. A proposal for a loan invites competition from all the moneyed capitalists, including the Bank of the United States; whereas an exchange of stock confines the demand for the new stock to the holders of the old stock, who constitute not only a small portion of the capitalists, but a portion interested in preventing the accomplishment of the exchange. Moreover, the experience of the Government during the last two years justifies the preference for a loan. In 1822 a law was passed authorizing an exchange of $26,000,000 of the seven per cents and of the six per cents of the years 1812, 1813, 1814, and 1815, for a five per cent. stock, redeemable in the years 1830, 1831, 1832, and 1833, and only $56,704 77 were exchanged; and under the act of the last session, authorizing an exchange of $15,000,000 of the six per cents of 1813, only $3,308,307 45 were exchanged.

Should the suggestion herein offered be adopted, for disposing of the excess of debt redeemable in 1826 and 1827, the amount of public debt redeemable in each year will be as follows:

In 1825, $7,654,570 93 of 6 per cents.
In 1826, 7,002,356 62 of 6 per cents.
In 1827, 7,001,437 63 of 6 per cents.
In 1828, 9,490,099 10 of 6 per cents.
In 1829, 6,000,000 00, proposed to be at 5 per cent.
In 1830, 6,000,000 00, proposed to be at 5 per cent.
In 1831, 6,018,901 59, proposed to be at 5 per cent.
In 1832, 6,018,900 72, of which $1,018,000 72 are at 5 per cent. and $5,000,000 at 4½ per cent.
In 1833, 6,673,055 31, all at 4½ per cent., except $18,901 59 at 5 per cent.
In 1834, 1,654,153 73, at 4½ per cent.
In 1835, 4,735,296 30, at 5 per cent.

This includes all the public debt of the United States, except $7,000,000 of five per cent. stock, subscribed to the capital of the Bank of the United States, and $13,296,231 45 of three per cents, both of which are payable at the pleasure of the Government. As, under the foregoing view of the debt, all that will be redeemable after the year 1828 will be at an interest of five per cent. or less, and as the five per cent. stock subscribed to the bank is reimbursable in such portions as the Government may please, any surpluses which may remain in 1829 and subsequent years, after discharging the debt redeemable and proposed to be made redeemable in those years, may be applied to the payment of that stock; or if it be deemed advisable to reserve any such surpluses for other objects, there is no doubt that a sum sufficient to pay off that stock may be obtained at 4½ per cent., or even at a lower rate of interest, reimbursable in 1834, in which year, it will be perceived, only a small sum is redeemable.

According to this exhibition of the subject, reckoning the principal and interest of the public debt until its extinction at about $111,000,000, independent of the stock subscribed to the bank, which may always be considered as offset by the Government shares in the bank, it will be perceived that, by allowing $10,000,000 annually, with an additional million in the first year, the whole of the public debt of the United States will be extinguished by the end of the year 1835.

In speaking of the public debt, it may be proper to notice the reduction that has been effected during the last eight years, both in the amount of principal and rate of interest. On the 1st of January, 1817, the whole debt of the United States was $123,491,965 16, of which $115,257,805 48 were funded, bearing an average interest of 5.56½ per cent. per annum. On the 1st of January next the whole debt will be $86,045,003 18, bearing an average interest of 5.23¼ per cent. per annum; which shows a reduction of $37,446,961 98 of principal, and of 0.33¼ per cent. in the average rate of interest.

It is also deemed proper to state that the loan of $5,000,000 for the payment of the awards under the Florida treaty, and the loan of $5,000,000 for paying the six per cent. stocks of 1812, both of which were authorized at the last session of Congress at 4½ per cent., have been taken by the Bank of the United States at par. The means of discharging the awards under the Florida treaty were required so soon after the authority was given to make the loan as not to leave time sufficient for receiving proposals from a distance, and the offer of the bank for the whole loan at par was accepted. For the subsequent loan various proposals were received, amounting in the whole, independently of that of the bank, to $2,554,586 37, at rates varying between par and 4½ per cent. premium, and forming an average premium of 0.97⅓ per cent. on the whole amount offered, as appears by statement M, herewith transmitted. The proposal of the bank was for the whole sum at par. Although the individual offers are apparently more favorable than that of the bank, yet taking into consideration that the Government is the proprietor of one-fifth of the capital of the bank, and that a portion of the means of the bank, equal to the amount of the loan, would otherwise have been unemployed, the offer of the bank at par was decidedly the most advantageous to the Government, being, as is explained in statement N, equal to an individual offer of 4¾ per cent. premium.

That during the progress of the redemption of the public debt a considerable amount may be applied, by a judicious management of the public revenue, to other than the ordinary objects of expenditure, is

apparent, as well from a retrospect of what has been done in the last eight years, as by a comparison between the probable receipts and expenditures in subsequent years.

For the eight years commencing on the 1st of January, 1817, the total means of the Treasury, including a balance on hand on that day of $22,033,519 19, and the sum of $16,336,747 34 since derived from loans, may be estimated at	$210,275,899 11
And the total expenditure at	205,769,230 20
Of this amount, nearly one-half will have been applied to the payment of the principal and interest of the public debt, viz	101,365,900 67
To the payment of claims under the Florida treaty	4,891,368 56
To the pensioners of the Revolution	9,400,000 00
To the erection of fortifications	4,200,000 00
To the increase of the Navy	6,000,000 00
And to the payment of demands arising out of the late war, not less than	4,500,000 00
Leaving for all other objects of expenditure, including the civil list, intercourse with foreign nations, Army and Navy, pensions, arming the militia, building of light-houses, extinction of Indian titles, and surveying of public lands, &c., &c., &c.	75,400,000 00
Which sum, divided among the eight years, is (per annum) about	9,425,000 00

It will be perceived that, excluding the loans, the annual average receipts in those years may be estimated at $21,700,000; and, upon the data already shown, the annual revenue in subsequent years may also be estimated at $21,500,000. Should no important change be made in the existing national establishments, the ordinary annual expenditures, exclusive of what may be required for the erection of fortifications and the increase of the Navy, may be estimated at about $18,500,000. Thus, after providing for the annual demands for the payment of the principal and interest of the public debt and for all the ordinary expenses of the Government, there will remain for the next eleven years an annual surplus of about $3,000,000, which, after the extinction of the debt in the year 1835, will receive an annual addition of the $10,000,000 now appropriated to the public debt; which surpluses may be applied to such objects, conducive to the common defence and general welfare of the nation, as may be within the constitutional powers of Congress, and as they, in their wisdom, may deem proper.

All which is respectfully submitted.

WM. H. CRAWFORD.

TREASURY DEPARTMENT, *December* 31, 1824.

A.

A statement exhibiting the amount of duties which accrued on merchandise, tonnage, passports, and clearances; of debentures issued on the exportation of foreign merchandise; of payments for drawback on domestic refined sugars and domestic distilled spirits, exported; of bounties and allowances on salted fish, and to vessels employed in the fisheries; of expenses of collection, and of payments made into the Treasury during the year ending on the 31*st day of December*, 1823.

Duties on—	
Merchandise	$22,376,752 25
Tonnage and light money	88,896 10
Passports and clearances	12,576 00
Debentures issued	4,552,665 70
Drawback on domestic refined sugar and domestic spirits	5,799 28
Bounties and allowances	187,644 58
Gross revenue	17,732,114 79
Expenses of collection	723,543 99
Net revenue	17,008,570 80
Payments made into the Treasury	19,088,433 44

B.

A statement exhibiting the value and quantities, respectively, of merchandise on which duties actually accrued during the year 1823, *(consisting of the difference between articles paying duty imported and those entitled to drawbacks re-exported;) and also of the net revenue which accrued that year from duties on merchandise, tonnage, passports, and clearances.*

Decrease	602,984 5.26 p. ct.			215,212 3.59 p. ct.			818,196 4.17 p. ct.				333,226 1.70 p. ct.	

NOTE.— It is to be observed that the amount of duties above stated as accruing in the third quarter 1824 is agreeably to the estimates rendered by the several Collectors at the above ports, and is not founded on the ascertained amount of duties secured, the returns of which are not yet received.

M.

Summary statement of proposals made by the Bank of the United States and others for the loan of five millions of dollars authorized by the act of the 26th of May, 1824.

By the bank, (upon the condition of receiving the entire loan,) at par	$5,000,000 00
By individuals:	
At par	1,004,000 00
At $0\frac{7}{8}$ per cent. advance	50,000 00
At 1 per cent. advance	60,000 00
At $1\frac{5}{100}$ per cent. advance	1,000,000 00
At $1\frac{1}{8}$ per cent. advance	10,000 00
At $1\frac{1}{4}$ per cent. advance	10,000 00
At $1\frac{3}{8}$ per cent. advance	10,000 00
At $1\frac{1}{2}$ per cent. advance	10,000 00
At 2 per cent. advance	50,000 00
At $2\frac{1}{2}$ per cent. advance	28,586 37
At 3 per cent. advance	30,000 00
At 4 per cent. advance	10,000 00
At $4\frac{1}{2}$ per cent. advance	200,000 00
Carried forward	2,472,586 37

Brought forward	$2,472,586 37
At such premium as may be fixed upon for the entire loan, not to exceed 5 per cent	20,000 00
In stock, on as favorable terms as the loan is taken, not exceeding 2 per cent. advance	30,000 00
At par, or if the whole loan is made at an advance, at such an advance at which it may be effected	32,000 00
Making an average premium of 97⅓ cents per cent. on	2,554,586 37

N.

Comparative statement showing the advantages offered to the Government by various rates of premium in contracting for the loan of five millions of dollars authorized by the act of the 26th May, 1824.

OFFERS BY INDIVIDUALS.

18TH CONGRESS.] **No. 716.** [2D SESSION.

ENTRIES FOR BENEFIT OF DRAWBACK OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1825.

The Committee of Ways and Means, to whom was referred a resolution of the House of Representatives of the twenty-eighth of December, instructing them "to inquire into the expediency of so modifying the act of Congress in relation to export entries, for the benefit of drawback, as to vest in the Secretary of the Treasury a discretion to grant relief in cases of unintentional non-conformity with the existing provisions of the said act," reported:

That by the act of Congress entitled "An act to regulate the collection of duties on imports and tonnage," passed the 2d of March, 1799, a drawback, as prescribed by law, is allowed and paid on all goods, wares, and merchandise, imported into the United States, whereupon the duties shall have been

paid, or secured to be paid, as, within twelve calendar months, after payment made or security given, shall be exported to any foreign port or place, subject to the exceptions and restrictions provided by the said act.

That in order to entitle the exporter of any such goods, wares, or merchandise to the benefit of the said drawback, it is required of him, previous to his putting or landing the same on board of any ship or vessel for exportation, to give twenty-four hours' notice, at least, to the Collector of the district, of his intention to export, and make an entry, in writing, of the particulars thereof, in the form prescribed by the act.

By the same law, the exporter is required, previous to the clearance of the vessel, or *within ten days after such clearance*, to make oath that the goods noticed for exportation are truly intended to be exported to the place whereof notice shall have been given, and are not intended to be relanded within the United States.

He is further required, before he can obtain a certificate or debenture for the amount of the drawback, to give bond, before the clearance of the vessel in which the goods are laden, *or within ten days after such clearance*, with one or more sureties, to the satisfaction of the Collector, in double the amount of the certificate or debenture to be issued; conditioned that the said goods or any part thereof shall not be relanded in any part of the United States, and that he shall, within a given time, produce the proofs prescribed by the law of the actual landing of the merchandise at the foreign port.

By an act passed the 18th of April, 1820, the period of *twenty days from the date of the clearance of the vessel* is allowed for taking the oath and completing the entry for the benefit of drawback.

The trade thus intended to be encouraged by the system of drawback is one of great importance to the merchants of the United States. It is nevertheless liable to many frauds, and the laws have therefore guarded it by the formalities already alluded to, and many other, to be found in the foregoing act.

As general provisions, they have a salutary tendency, and could not be dispensed with; but cases of hardship, arising from neglect or casual omission, in which there is neither intentional nor actual fraud, frequently occur, for which it is but just that some remedy should be provided. It is known to the committee that in this, as in any other branches of the import system, such cases are constantly happening.

The instances of most frequent occurrence are those in which the exporter has accidentally neglected to take the oath and give the bond required by the act of 1792, within the period of twenty days after the clearance of the vessel.

This omission may be occasioned by the sickness of the exporter, by his ignorance of the precise provisions of the law, by inattention, no doubt, in some cases, or by the multiplicity of his commercial concerns, or by unavoidable accident, or from many other causes of a similar character, without any intention to evade the law or defraud the revenue.

If, from any cause, however innocent or accidental, the exporter neglect to complete the entry within the twenty days, as the law now stands, he could not be permitted to do so, though he should attend at the custom-house for that purpose a few hours after the expiration of that period.

In such case he would lose the benefit of the drawback and be without relief but by an application to Congress for a special law; a remedy expensive both to the Government and the individual.

As well from their own knowledge of the cases heretofore presented to this House as from information derived from the most authentic sources, the committee are of opinion that the evils of the present system are productive of great hardship and embarrassment to the merchants of the United States, and that it would be expedient to vest the power of relieving all such casual omissions in some other department of the Government, where it might be exercised with equal safety to the revenue.

The great policy of the drawback system is to encourage the navigation and carrying trade of the country, and therefore it refunds to the merchant the duties paid upon foreign merchandise imported into the United States when exported to a foreign port within the period allowed by law. If the merchandise be identically the same upon which the duties have been paid, and if it be actually landed in the foreign port conformable to the entry, the object of the law is substantially complied with, and it would comport neither with the spirit of the law nor the character of the Government to deny the merchant in an individual case the benefit of a debenture for an accidental non-compliance with those formalities designed only to accomplish what he had actually done.

The impost system is doubtless exposed in all its parts to numerous evasions, and therefore its provisions are rigorous and severe; but in almost every other instance of innocent or unintentional violation of the revenue laws a full discretion is vested in the Secretary of the Treasury, or the Collector of the port, to grant relief.

The duty of presenting a true manifest of an inward cargo on the arrival of a vessel from a foreign port is strictly enjoined, and the omission of a single article is made highly penal; but where the Collector is satisfied that the omission was unintentional and not fraudulent he is authorized to dispense with the penalty by allowing a port entry.

All fines, forfeitures, and penalties arising under the impost laws may be remitted in the discretion of the Secretary of the Treasury to any amount and upon any terms.

In the collection law provisions for the system of appraisement and the ascertainment of ad valorem duties a similar authority to relieve against accidental or unintentional breaches of its provisions is vested in the Secretary of the Treasury, and, in some instances, in the Collector of the port.

And in the law of 1792, establishing and regulating the drawback system, where the certificates and regular proofs of the landing of the merchandise in a foreign port cannot be produced within the time prescribed by law, the Comptroller is authorized, upon receiving a satisfactory explanation of the failure, to extend the time or even to cancel the bond, upon the ground of secondary proof.

The accidental or unintentional omission to take the oath and give the bond within the prescribed period are the only casualties for which some summary relief is not provided; and when the object and character of these formalities are considered, the failure to provide such remedy must be supposed to have proceeded rather from inadvertance than design.

As has been already remarked, the failure to comply with these formalities within the prescribed time, may have been caused as well by the multiplicity of business in the custom-house as by the inattention of the merchant; the main objects of the law may have been faithfully promoted, the exporter may have tendered himself ready a few hours after the expiration of the twenty days to complete his entry, and yet no remedy short of the burdensome and expensive application to Congress is afforded, while the higher power of dispensing with the proof of an actual landing in the foreign port and of cancelling the export bond is vested in the Comptroller of the Treasury.

The committee are of opinion that this is an evil embarrassing to the merchant and in nowise advantageous to the Government, for which a more summary remedy should be provided.

They do not propose to dispense with either of the formalities required by the impost act, nor to enlarge the time within which they should be ordinarily complied with, but recommend merely, where the failure to do so within that time has been the effect of innocent causes, and without any intention to defraud the Government, that the Secretary of the Treasury should be empowered to authorize the entry to be completed afterwards, where the failure shall be satisfactorily explained.

And for this purpose they report a bill.

18TH CONGRESS.] No. 717. [2D SESSION.

AMOUNT OF DRAWBACK ON EXPORTS IN 1821, 1822, AND 1823.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 12, 1825.

TREASURY DEPARTMENT, *January* 11, 1825.

SIR: In obedience to a resolution of the House of Representatives of the 3d of March, 1797, I have the honor to transmit a statement exhibiting the amount of drawback payable on merchandise exported from the United States during the years 1821, 1822, and 1823, compared with the amount of duties which accrued on the same, respectively.

I have the honor to be, with great respect, your obedient servant,

WM. H. CRAWFORD.

Hon. SPEAKER *of the House of Representatives.*

Statement exhibiting the amount of drawback payable on merchandise exported from the United States during the years ending on the 31st day of December, 1821, 1822, *and* 1823, *compared with the amount of duties which accrued on the same respectively.*

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, January* 4, 1825.

18TH CONGRESS.] No. 718. [2D SESSION.

LOAN OF TWELVE MILLIONS OF DOLLARS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 12, 1825.

The Committee of Ways and Means, to whom has been referred the "report from the Secretary of the Treasury on the state of the finances" of the 31st of December last, reported:

That, in considering so much of the said report as relates to the public debt of the United States, it appears that, on the 1st day of January, 1826, there will be redeemable of the six per cent. stock of 1813 $19,000,000, and that the ordinary revenues of the year will not be adequate to the reimbursement of more than $7,000,000, leaving an excess of $12,000,000 to be provided for.

The whole amount of the public debt, including the loan of $5,000,000 at 4½ per cent., authorized by the act of the 26th of May last, is found to be $88,545,003 38. Of this sum, $2,500,000 of the last mentioned loan not having been actually paid to the United States could not be regularly included in the estimate of the Secretary of the Treasury at the close of the last year; but must, nevertheless, be considered as part of the debt with a view to future years.

This sum of $88,545,003 38 is redeemable as follows:

In 1825,	$7,654,570 93	of six per cent.
In 1826,	19,002,356 62	six per cent. of 1813.
In 1827,	13,001,437 63	six per cent. of 1814.
In 1828,	9,490,099 10	six per cent.
In 1831,	18,901 59	
In 1832,	6,673,900 72	of which $1,018,000 72 are at 5 per cent., and $5,000,000 at 4½ per cent.
In 1833,	6,673,055 31	all at 4½ per cent. except $18,901 59 at 5 per cent.
In 1834,	1,654,153 73	at 4½ per cent.
In 1835,	4,735,296 30	at 5 per cent.
	7,000,000 00	at pleasure, being the subscription to the capital of the Bank of the United States at 5 per cent.
	13,296,231 45	at pleasure, being the 3 per cent.
	88,545,003 38	

By this statement it appears that, in the years 1829 and 1830, no part of the public debt will be reimbursable, excepting the *seven millions* to the bank and the *three per cents.;* but, as these bear a less interest than that portion of the six per cents of 1813 redeemable on the 1st of January, 1826, and which cannot, for the want of means, be reimbursed before the years 1829 and 1830, it is believed to be advisable to provide for that portion by a new stock at a reduced rate of interest, and payable at those periods.

The committee, therefore, recommend a new loan or an exchange to the amount of $12,000,000, at a rate of interest not exceeding 4½ per cent., reimbursable in equal portions in the years 1829 and 1830; and for that purpose report a bill.

18TH CONGRESS.] No. 719. [2D SESSION.

AMOUNT OF DUTIES ON IMPORTATIONS FOR THREE QUARTERS TO JUNE 30, 1824.

COMMUNICATED TO THE SENATE JANUARY 17, 1825.

To the Senate of the United States:

Agreeably to a resolution of the Senate of the 19th of May last, requesting the President to cause to be laid before the Senate a report "showing the amount of duties which shall have accrued on importations into the United States for the three quarters of a year ending June 30, 1824, also the amount of duties which would have accrued on the same importations at such higher rates of duty as may be imposed by any act of the present session of Congress," I herewith transmit a report from the Secretary of the Treasury, which contains the information required.

JAMES MONROE.

JANUARY 18, 1825.

TREASURY DEPARTMENT, *January* 5, 1825.

SIR: In obedience to your reference to this Department of a resolution of the Senate of May 19, 1824, requesting the President of the United States to cause a report from the Secretary of the Treasury to be

laid before the Senate at the commencement of the next session of Congress, "showing the amount of duties which shall have accrued on importations into the United States for the three quarters of a year ending June 30, 1824, also the amount of duties which would have accrued on the same importations at such higher rates of duty as may be imposed by any act of the present session of Congress," I have the honor to submit a statement from the Register of the Treasury, which contains the information required by the resolution.

I have the honor to be, with great respect, sir, your obedient servant,

WM. H. CRAWFORD.

The PRESIDENT *of the United States.*

Statement showing the amount of duties which have accrued on importations into the United States for the three quarters of a year ending June 30, 1824; *also the amount of duties which would have accrued on the same importations at such higher rates of duty as have been imposed by the act of May* 22, 1824, *entitled "An act to amend the several acts imposing duties on imports."*

			16,191,413	.....	17,873,209	1,681,796

Schedule of articles not enumerated, which, under the former tariff, paid an ad valorem rate of duty, at the several rates stated herein, viz:

SEVEN AND A HALF PER CENT.

Acid, muriatic.
Acid, nitric.
Acid, sulphuric.
Annatto.
Dyeing drugs, and materials for composing dye—
  Argol,
  Berries, yellow,
  Cochineal,
  Cream of tartar,
  Crude tartar,
  Cudbear,
  Curcuma,
  Galls,
  Madders,
  Paints used mainly for this purpose,
  Rocou,
  Safflower,
  Tumeric,
  Woad,
  Wine lees,
  Sumach.
Gum, Arabic.
Gum, Senegal.
Laces of silk or thread—Alençon, Brussels, blond, tulle.
Lace veils and shawls.
Paste work.
Saltpetre.
Verdigris.
Vitriol, blue.
Watches of all kinds and parts of watches.

FIFTEEN PER CENT.

Acid, acetic.
Acid, benzoic.
Arrack, cherry rum, noyeau, ratafia, and other liqueurs.
Bark, alcornoque.
Battledores.
Beef, dried, smoked, or jerked.
Black, Frankfort.
Black, ivory.
Black, lamp.
Blacking.
Bone, whale, and manufactures of.
Books, printed, charts, drawings, maps, engravings, etchings, pamphlets, music, paintings.
Bricks and building stones, tiles, and slates.
Butter.
Catgut.
Cayenne pepper.
Cement, Roman.
Chemical salts and preparations.
Chestnuts and cocoa nuts, and shells of ditto; also, all fruits not preserved in brandy or sugar.
Clocks.
Colors, water, for painting, chalk, white, red, crayons, and all other paints not used as dyeing drugs.
Coral.
Copal, and varnishes of all kinds.
Corks, manufactured.
Down and feathers of all kinds, for beds.
Drugs, medicinal, of all kinds, minerals, barks, gums, oils, resins, roots, and plants, and their tinctures.
Elephants' teeth and ivory of all kinds manufactured therefrom, or from bone.
Enamel.
Essences and essential oils not used as perfumes.
Fire crackers.
Fish, herring or salmon, smoked.
Flints.
Flour, grain, and pulse of all kinds, malt, bran, starch.
Furs, dressed.
Ginger.
Ginseng.
Gold-leaf.
Gunny bags.
Hair, horse.
Hair cloth and seating.
Hair powder.

Hams, pork, lard, sausages, meats, and reindeers' tongues, and fish sounds.
Honey.
Hops.
Horns, horn plates and tips, and lanthorn leaves, manufactured or not.
India rubber.
Ink of all kinds.
Iron, old.
Isinglass.
Jewelry, mock, if not gilt or plated.
Jostick.
Leaves of trees of all kinds, unwrought.
Lents.
Lime.
Lint.
Licorice.
Macaroni.
Madras handkerchiefs of the bark of a tree.
Marble, and manufactures of marble, and of alabaster, plaster, or porphyry.
Mercury, crude, and in its preparations.
Mica or talc.
Millstones.
Mother of pearl
Muffs and tippets.
Oakum.
Oiled cloth, not floor cloth.
Oils, animal, and all expressed and essential, not used as perfumes.
Onions, potatoes, and all other vegetables.
Ores, metallic, minerals, metals, and their oxides.
Oysters.
Pipes, of clay.
Pots, blue.
Pongees.
Pounce.
Prunella shoes.
Pumice.
Quills.
Rice.
Rouge.
Sago and tapioca.
Seeds, garden.
Snuff-boxes, of paper, tortoise-shell, horn, or wood, or ivory lined with tortoise-shell.
Soy.
Sponge.
Stones, American grind, hones and oil, rotten and touch, and whet-stones.
Sirop.
Time-pieces.
Tobacco, unmanufactured.
Toys not under other rates.
Turtles, live.
Tortoise-shell, and manufactures of.
Vermicelli.
Vinegar.
Vitriol, white.
Wax, bees'.
Wax, sealing.
Wax, shoemakers'.

TWENTY PER CENT.

Blue, Prussian.
Buckles of all kinds.
Button-moulds.
Buttons of mother of pearl.
Gilt wares of all kinds.
Hardware, not specified.
Japanned ware.
Lead, and manufactures of.
Loadstone.
Plated ware.
Pins.
Printing types.
Quadrants, sextants, hour-glasses, telescopes, kaleidoscopes.
Snuff-boxes, of tin.
Trusses.

TWENTY-FIVE PER CENT.

Cashmere shawls and gown patterns.
Coach and harness furniture.
Plated saddlery and harness.
Silver plated wares.
Toys, of copper chiefly.

THIRTY PER CENT.

Almond paste.
Anchovies and sardines.
Artificial flowers.
Balsam, medicinal.
Balsam, cosmetic.
Baskets and basket carriages.
Bellows.
Brandied fruits.
Brooms.
Brushes.
Cabinet ware and chairs.
Canes and walking-sticks.
Capers.
Carraway, oil of.
Cards, visiting.
Carpeting and mats of straw or flag.
Cariages of all descriptions.
Cashmere gowns, ready made.
Clothing, ready made, and Guernsey frocks.
Cloths, painted floor.
Confectionary and sweetmeats, in brandy and sugar.
Cosmetics and washes.
Cut-glass.
Dolls, dressed or undressed.
Drawing pencils.
Essential oils and essences used as perfumes, and perfumery and pomatums.
Fans.
Feathers, ornamental.
Harps, hautboys, and other musical instruments, principally of wood.
Hobby-horses.
Leather, and all articles whereof leather is the article of chief value; laced boots, gloves, harness, bridles, and saddles.
Millinery of all kinds, and head-dresses and ostrich feathers.
Mustard.
Sallad oil.
Paint brushes.
Paper hangings.
Parasols and umbrellas, and frames for ditto.
Parchment and vellum.
Pasteboard.
Pickles.
Pocket-books.
Rules, of wood.
Snuff-boxes of wood of any kind.
Straw plait.
Tamarinds.
Tinctures, odoriferous, not medicinal.
Toys, of wood chiefly.
Wafers.
Whips.
Wood, all manufactures of.

JOSEPH NOURSE, *Register of the Treasury.*

TREASURY DEPARTMENT, *Register's Office, December* 30, 1824.

18TH CONGRESS.] No. 720. [2D SESSION.

STOCK UNDER THE ACT OF MAY 24, 1824, FOR A LOAN OF FIVE MILLIONS OF DOLLARS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 17, 1825.

To the House of Representatives of the United States:

In compliance with a resolution of the House of Representatives of the 28th ultimo, "requesting the President to inform the House what terms were offered by applicants for the stock created by the act of the 24th of May last, and by whom such terms were offered," I herewith transmit a report from the Secretary of the Treasury, with accompanying papers, which contain the information called for.

JAMES MONROE.

WASHINGTON, *January* 17, 1825.

TREASURY DEPARTMENT, *January* 5, 1825.

SIR: In obedience to your reference to this Department of a resolution of the House of Representatives of the 28th ultimo, "requesting the President to inform the House what terms were offered by applicants for the stock created by the act of the 24th of May last, and by whom such terms were offered," I have the honor to report, that the awards to the payment of which the proceeds of that stock were to be applied were payable so short a time after the power was given to make the loan that proposals were not invited by public notice, and that no individual offers for the stock were made. The only proposal offered was the Bank of the United States, which was for the whole amount at par, and which was accepted by the President, as appears by the accompanying papers. These contain all the information called for by the resolution, and in the possession of this Department.

I have the honor to be, with great respect, sir, your obedient servant,

WM. H. CRAWFORD.

The PRESIDENT *of the United States.*

SENATE CHAMBER, *May* 26, 1824.

MY DEAR SIR: I am informed that you wish an expression of opinion from me, whether the interest of the United States could be better promoted than by making a sale to the Bank of the United States of the stock to be created to provide for the awards of the Commissioners under the treaty with Spain, at an interest of 4½ per cent. per annum; in consequence of which I with readiness state to you that I doubt if it would be practicable to obtain the loan at a lower rate of interest from any other source, and that, if to this be added the incidental interest which the United States have in the bank from the ownership of one-fifth of its capital, there can, in my mind, be no question but it must be more for the advantage of the Government to make the negotiation with the bank than in any other way.

In giving this opinion you will allow me further to state that such an arrangement would greatly accommodate the claimants under the treaty, in whose favor awards have been rendered by the Commissioners, and that I am personally included among this number.

With great respect, your obedient servant,

J. LLOYD.

N. BIDDLE, Esq.

HOUSE OF REPRESENTATIVES, *May* 26.

MY DEAR SIR: In consequence of your inquiry this morning I beg leave to say that, on the discussion of the bill for paying the Spanish awards in the House of Representatives, it seemed to be the opinion of a great majority that the treaty stipulated for payment upon making of the awards. That was the ground on which a motion to postpone the bill to the next session was successfully opposed. It is, I believe, the universal expectation of the claimants and their agents to receive their money as soon as the awards are made.

With very great respect, yours,

D. WEBSTER.

N. BIDDLE, Esq., *President of the United States Bank.*

MEMORANDUM.

The Bank of the United States offers to lend to the Government five millions of dollars, at four and one-half per cent., reimbursable after the 1st of January, 1832, say seven and a half years.

These terms are more advantageous than could be offered by any other person, for this reason: the Government is proprietor of one-fifth of the capital of the bank. It has, therefore, seven millions of

dollars of its funds, which the bank is managing to the best advantage it can, but which, in the present state of business throughout the country, and the great amount of rival capital seeking investment in private loans, it cannot employ safely and profitably to the full extent of which they are susceptible; and as, without diminishing in the least its discounts, the bank is able to take the loan, the interest gained by it is so much clear profit to the bank and the Government.

The amount of that profit may be thus estimated:

The bank capital consists of shares	350,000
But as the bank, in the course of its dealings, has received in pledges to it, for bad debts, 37,889 shares, which are now transferred to it, and on which it retains the dividends, these pledges operate in fact as a reduction to that amount of its capital. Deduct these shares	37,889
And the efficient capital will actually consist of shares	312,111

Now, the number of shares owned by the Government is	70,000	
The whole interest on the five millions, at 4½ per cent., then, being	$225,000	
The number of shares among which this profit is to be divided	312,111	
Of which the Government owns	70,000	
The proportion of these $225,000 which will be received on these shares by the Government will be, of course	$50,462	
The consequence is that, although the Government nominally pays		$225,000
It receives back in the shape of dividends		50,462
So that, in fact, it pays for the five millions only		174,538

That is, a fraction under 3½ per cent., which would be $175,000.

No individual and no other company could take it at that rate.

No individual and no other company could lend five millions at an interest of $225,000, and then repay every six months $25,231 of that interest.

Again, these dividends of $50,462 would, during the seven and a half years' continuance of the loan, amount to $378,465, a sum equivalent to a premium, which no one in the present state of the moneyed concerns of the country could offer, being an actual bonus of $6\frac{4}{10}$ per cent.

N. BIDDLE.

WASHINGTON, *May* 26, 1824.

WASHINGTON, *May* 26, 1824.

SIR: I have the honor to offer, on the part of the Bank of the United States, to purchase the stock, to the amount of five millions of dollars, which you are authorized to issue by the act of Congress, to provide for the awards of the Commissioners under the treaty with Spain; the rate of purchase to be one hundred dollars in money for every one hundred dollars of stock, bearing an interest of four and a half per cent. per annum, payable quarter-yearly; the money to be placed to the credit of the United States at the bank in Philadelphia on the 8th day of June next, and the stock to bear interest from that day.

I have the honor to be, very respectfully, yours,

N. BIDDLE, *President of the Bank of the United States.*

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

The proposition made by Nicholas Biddle, President of the Bank of the United States, is accepted, and the Secretary of the Treasury is hereby instructed to take the necessary measures to carry it into effect.

JAMES MONROE.

18TH CONGRESS.] **No. 721.** [2D SESSION.

REMISSION OF DUTIES ON GOODS TAKEN BY THE ENEMY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 18, 1825.

The Committee of Ways and Means, to whom was referred the petition of Paul Chase, praying to be relieved from the payment of a balance of three thousand two hundred dollars, with expenses due to the United States, on judgments recovered in the Federal Court for the District of Georgia, against Paul Chase and his security, Samuel Clark, have had the same under consideration, and report:

That the petitioner was, prior to and during the late war with Great Britain, engaged in mercantile operations in the town and port of St. Mary's, in the State of Georgia; that at the time said town was

taken possession of by the British forces under the command of Admiral Cockburn, the petitioner had in possession in his store in said town a large amount of foreign merchandise, which he had then recently imported into the United States, for the duties on which he had given bonds at the custom-house, with Samuel Clark security, on which bonds judgments were subsequently recovered. That the petitioner had volunteered to defend the country against the invasion by the said British forces, and thus rendered himself personally obnoxious to the enemy; that his absence from the town of St. Mary's at the time it was entered by the enemy (being then in the service of the United States) deprived him of the opportunity he would otherwise have had of removing said merchandise to a place of security; and that said merchandise, a large amount of which remained in the original packages, was plundered from the store of the petitioner, shipped by the enemy, and carried out of the United States. The petitioner therefore prays relief from the payment of the balance due on said judgments, which he alleges is equal to the amount of duties on the merchandise thus carried off by the enemy.

The committee are of opinion that the object of the Government in laying duties on foreign merchandise imported into the United States is to raise a revenue for the support of Government, on foreign merchandise actually consumed within the United States. They cannot, therefore, conceive why the unfortunate petitioner, who lost the whole amount of merchandise for the duties on which said judgments now exist against him, should not be entitled to the relief prayed for, when, by provisions of your revenue laws, the more fortunate and (perhaps) less patriotic merchant who reships an equal amount of merchandise, with promising prospects of profit, is entitled to the benefit of drawback to an amount equal to the amount of relief prayed for, especially as the merchandise plundered from the petitioner was reshipped by the enemy and carried out of the United States, and as the loss of the petitioner was probably induced by his hostility to the enemy. The committee are aware that the benefit of drawback is allowed with a view to the encouragement of commerce. As the merchandise in question was carried out of the United States by the enemy the petitioner is not entitled to relief on that ground, for as much as such reshipment did not tend to the encouragement of commerce, yet as the act of the Government (over which the petitioner had no control) induced those relations with Great Britain which led to the capture and loss of said merchandise and deprived the petitioner of the opportunity of exporting said merchandise to the encouragement of commerce and with a view to the benefit of drawback, no argument can be drawn thence opposed to the relief prayed for, because the petitioner would have had and might have used the privilege of claiming the benefit of drawback but for such capture and loss.

On a full view of all the circumstances connected with this case, the committee are of opinion that the relief prayed for ought to be granted, especially if the petitioner's loss was occasioned by his hostility and opposition to the enemy, which the committee think probable.

The committee therefore report a bill.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The petition of Paul Chase respectfully showeth: That your petitioner was, previous to and during the late war with Great Britain, doing business as a merchant at St. Mary's, in the State of Georgia, and in the habit of importing various kinds of merchandise at said port, all of which was duly entered at the custom-house, by which means your petitioner became indebted to the United States in a sum of more than $10,000 for duties on goods so imported. That your petitioner was so engaged in trade when the southern part of the State of Georgia was invaded by the enemy, at which time your petitioner entered as a volunteer under the command of Colonel Scott, having his store and property then in it in charge of a person in his employment. When the enemy took possession of the town of St. Mary's your petitioner's store was, in common with others who were at the time absent, rifled of its contents and the property carried off by the enemy.

Your petitioner further sets forth that the enemy took from his store upwards of $10,000 value in goods, $7,000 value of which was in the original packages, as imported, and on which he had secured the duties by giving bonds for the amount at the custom-house.

Your petitioner applied to the Treasury Department, setting forth the circumstances of his case and praying to be relieved from the payment of the duties on the goods taken by the enemy and an extension of time on the payment of the duties really due; to that petition your petitioner never received an answer. A short time after your petitioner was informed by William Davies, Esq., District Attorney for the State of Georgia, that he had taken judgments on all the bonds by order of Alexander J. Dallas, Esq., and unless they were paid he must proceed to the sale of your petitioner's remaining little property. Your petitioner, being unable to pay, from the loss of his property, was obliged to submit to the sale and consequent sacrifice of his property, which the depression of commerce had so reduced in value that your petitioner's property was sacrificed for less than half its cost. In consequence of these circumstances your petitioner's property was found insufficient to pay the bonds. Your petitioner's property being thus taken, he concluded he would be permitted to pursue his business and maintain his family by his exertion and industry, without any impediment being thrown in the way by the United States Government. Your petitioner has the painful necessity to state that he has lately received information from Mr. Samuel Clark, of St. Mary's, that all his property has been levied on by the marshal and is to be sold to satisfy those judgments as security on my bonds.

Your petitioner therefore prays that your honorable body will take his case into their consideration and grant him relief from the payment of the remaining $3,200, together with the expenses that may accrue, which is scarcely the amount of duties on the goods taken by the enemy which were in the original packages as imported, and as in duty bound your petitioner will ever pray.

PAUL CHASE.

STATE OF LOUISIANA, *City of New Orleans.*

Be it known that on the 22d day of November, in the year 1823, before me, Greenbury Ridgely Stringer, notary public in and for the city of New Orleans, duly commissioned, personally came and

appeared Paul Chase, to me, notary, well known, who, at his own request, having been by me, notary, duly sworn according to law, did depose that the facts stated and set forth in the foregoing petition subscribed by him are true in every particular. In faith whereof I grant these presents under my signature and seal of office the day and year aforesaid.

G. R. STRINGER, *Notary Public.*

GEORGIA, *Camden County, ss.*

Personally appeared Captain Charles Deshon, who, being duly sworn, doth depose and say that in the latter part of the year 1814, and early in the year 1815, he resided in the town of St. Mary's, State and county aforesaid; that his business at said time frequently caused his being in the store of Captain Paul Chase, at said St. Mary's; that this deponent resided in said St. Mary's during the occupation of it by the British forces under the command of Admiral Cockburn, in January, 1815; that at the time said forces took possession of said St. Mary's said Chase had had in his store a large amount of foreign merchandise which he then had recently imported from Amelia Island, and which merchandise was plundered from his store by said British forces and by them shipped and sent out of this country; and that the store of said Chase, during the occupation of said St. Mary's by said British forces, was used by the main guard of said forces.

CHARLES DESHON.

Sworn to before me this 20th of November, 1823.

M. H. HEBBARD, *J. P.*

GEORGIA, *Camden County, ss.*

Personally appeared Joseph Dorr, who, being duly sworn, doth depose and say that he has resided in the town of St. Mary's, State and county aforesaid, for the last twenty-eight years past; that he resided in said St. Mary's in January, 1815, when the British forces under the command of Admiral Cockburn took possession of said St. Mary's, and that he continued in said town during the occupation thereof by said forces; that at the time when said forces took possession of said town Captain Paul Chase had in his store in said town a large amount of foreign merchandise, which said Chase had then recently imported from Amelia Island, and which merchandise was plundered from his store by said British forces and by them shipped and sent out of this country in January, 1815, and that the store of Chase, during the occupation of said St. Mary's by said British forces, was used by the main guard of said forces.

JOSEPH DORR.

Sworn to before me this 20th of November, 1823.

M. H. HEBBARD, *J. P.*

GEORGIA, CAMDEN COUNTY, *town of St. Mary's, November* 21, 1823.

I do hereby certify that M. H. Hebbard is one of the justices of the peace for the county of Camden and State aforesaid, and that the foregoing are his proper signatures.

WILLIAM GIBSON,
One of the Justices of the Inferior Court of the County and State aforesaid, and Intendant of the town of St. Mary's.

STATE OF GEORGIA, *Camden County.*

Personally appeared before William Gibson, Esq., Intendant of the town of St. Mary's, John Boog, who, being duly and solemnly sworn, sayeth, that in the month of December, 1814, he was in the store of Captain Paul Chase, in St. Mary's, where he saw a large quantity of bale goods, which he was informed, and verily believes, was recently imported from Fernandina, in East Florida; and that on the 13th of January, 1815, the British forces took possession of St. Mary's; that on the following day he, the deponent, was taken prisoner, when he saw the store of Captain Chase occupied by the main guard of the British troops, having, as he understood and believes, been first plundered of its contents by the enemy.

JOHN BOOG.

Sworn to this 10th of December, 1823, before me.

WILLIAM GIBSON, *Intendant.*

STATE OF GEORGIA, *Camden County.*

Personally appeared Whipple Aldrick, who, being duly sworn, doth depose and say that he was a resident of the town of St. Mary's, Georgia, at the time said place was taken possession of by the British

in January, 1815; that the day after the arrival of their troops they took possession of the stores generally in said town, and among the number was the store of Captain Paul Chase, which they entered, and either that day or the day thereafter took therefrom some boxes, the value of which I could not declare, neither do I know the amount of property which was in the store at the time, but believe they (the British under the immediate command of Captain Jackson) took all that the store contained, let it be more or less, and they retained possession of said store until they evacuated the place.

WHIPPLE ALDRICK.

Sworn to before me this 13th of December, 1823.

M. H. HEBBARD, *J. P.*

STATE OF GEORGIA, *Camden County.*

I do hereby certify that in the years 1814 and 1815 I had command of a company of the militia of this State, being the company of the 29th district; that during said period of time Captain Paul Chase, merchant of St. Mary's, State and county aforesaid, volunteered his services in said company and served in the same under my command.

WILLIAM MICKLIN.

ST. MARY'S, *December* 22, 1823.

18TH CONGRESS.] No. 722. [2D SESSION.

TRANSACTIONS OF THE BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 21, 1825.

TREASURY DEPARTMENT, *January* 20, 1825.

SIR: In obedience to a resolution of the House of Representatives of the 17th instant, I have the honor to transmit the statements (twelve in number) which have been received at this Department from the Bank of the United States, embracing the transactions of that institution for the year 1824.

I have the honor to be, with great respect, sir, your obedient servant,

WM. H. CRAWFORD.

Hon. SPEAKER *of the House of Representatives.*

UNCLAIMED DIVIDENDS ON PUBLIC STOCK SINCE THE ESTABLISHMENT OF THE GOVERNMENT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 25, 1825.

TREASURY DEPARTMENT, *January* 20, 1825.

SIR: In obedience to a resolution of the House of Representatives of the 16th of December last, directing the Secretary of the Treasury to lay before the House a statement of the unclaimed dividends on the public stock since the establishment of the present Government, I have the honor to submit a statement containing the information required.

I have the honor to be your obedient servant,

WM. H. CRAWFORD.

Hon. H. CLAY, *Speaker of the House of Representatives.*

TREASURY DEPARTMENT, *Register's Office, January* 19, 1825.

SIR: I have the honor to transmit "an account of the dividends on the public stock, since the establishment of the present Government," which remained "unclaimed" on the 1st January, 1825.

Most respectfully, your obedient, humble servant,

JOSEPH NOURSE, *Register.*

Hon. WILLIAM H. CRAWFORD, *Secretary of the Treasury.*

An account of the dividends on the public stock, since the establishment of the present Government, which remained "unclaimed" on the 1st of January, 1825.

January 1, 1825. Amount of dividends payable at the Treasury, of those which had accrued at the several Loan Offices, and which, not having been applied for within nine months after they became payable, were returned as unclaimed.....	$226,845 89
	226,845 89
January 1, 1825. Cash in the hands of the Cashier of the Branch Bank at Washington, for payment of dividends returned unclaimed from the several Loan Offices.....	26,823 01
Amount of unclaimed Loan Office dividends, being so much retained *in* and *payable at the Treasury on application of the stockholders*	200,022 88
	226,845 89

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, January* 19, 1825.

18TH CONGRESS.] No. 724. [2D SESSION.

SMUGGLING ON THE NORTHWESTERN FRONTIER.

COMMUNICATED TO THE SENATE JANUARY 28, 1825.

TREASURY DEPARTMENT, *January* 20, 1825.

SIR: In reply to your letter, enclosing a resolution of the Senate directing the Committee on Finance to inquire what measures are necessary to prevent smuggling on the northwestern frontier of the United States, I have the honor to enclose a report from the First Comptroller of the Treasury containing the correspondence of that officer with certain Collectors on that frontier.

The seizures made in those districts are generally of small value, and frequently do not more than pay the costs of prosecution; so that the officers of the customs are usually not benefitted by them. I enclose a letter from the Collector of Oswegatchie, which affords an illustration of this opinion, and also the draught of a bill which was prepared by that officer with a view to a remedy. I do not know that any better remedy can be suggested.

I have the honor to be, with great respect, sir, your obedient servant,

WM. H. CRAWFORD.

Hon. SAMUEL SMITH, *Chairman of the Committee on Finance, Senate.*

TREASURY DEPARTMENT, *Comptroller's Office, January* 5, 1825.

SIR: In compliance with your directions in relation to the enclosed resolution of the Senate of the United States, which instructs the Committee on Finance to inquire into the expediency of providing for the more effectual protection of the revenue on the frontiers of the United States, I have the honor to transmit herewith copies of the correspondence of this Department on the subject of seizures and violation of the revenue laws in some of the frontier districts of the United States.

With great respect, I have the honor to be your obedient servant,

JOS. ANDERSON, *Comptroller.*

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

DISTRICT OF OSWEGATCHIE, *Ogdensburg, January* 10, 1823.

SIR: I have thought it to be a duty which I owed as well to the Government as to myself to inform you of what has transpired during the last year in relation to forfeitures of goods imported into this district in violation of the laws, and respectfully to submit to the consideration of the Department whether the law has been properly regarded by its officers; if so, to suggest some amendments which I cannot but think would, in their operation, essentially aid the revenue and promote the ends of justice.

During the period above mentioned six or seven separate seizures were made by myself and the other officers of the district, which, on being reported, from time to time, to the District Attorney, were all included in five separate libels. No claim was interposed in any of the cases, and condemnation ensued of course. On a sale by the Marshal, at public auction, of the articles so seized, the aggregate avails were found to be $319 04. On calling, not long since, upon the District Clerk to receive the moiety which, by the act of March 3, 1815, the Collector is entitled to receive to his own use, and to the use of the Inspectors and informers, I was informed the amount of sales did not equal the costs of prosecution in the several cases, and that the deficiency, which would probably be about forty dollars, would be charged to my account, the costs in each case being about *ninety* dollars.

The first question which presents itself seems to be, whether, by the provisions of the 5th section of the aforesaid act, the moiety vests in the Collector upon the seizure of the goods, and if it does, whether he can be divested thereof for the purpose of paying the costs of prosecution; and, also, whether he can be made liable for costs not met by the amount of sales? I have the honor to request an opinion on this subject, rendered the more interesting to me as I have advanced to indigent informers a considerable portion of their share, which I have been compelled to lose. I beg, sir, to state that, in my opinion, the law in relation to seizures of small amount is extremely defective, and the proceedings unnecessarily tedious and expensive; and that, as I perceive that a bill is before Congress in which proper provisions might, probably, be inserted with convenience, I hope I shall be pardoned for the liberty that I have taken of enclosing herewith my hasty ideas in the form of a sketch of a bill.

It appears to me that no danger to the revenue could result from the proposed alteration of the law in the cases contemplated, and I am satisfied that the operation of the amendments would, on the contrary, aid the revenue to the amount of from one to two hundred thousand dollars annually, which is now unnecessarily expended in costs.

I have the honor to be, with the highest regard, your very obedient servant,

AARON HACKLEY, JR.

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

COLLECTOR'S OFFICE, *District of Champlain, Plattsburg, February* 20, 1819.

SIR: I have the honor to acknowledge the reception of your letter dated the 8th instant, recommending "the utmost vigilance in detecting the frauds which are stated to be practised on board of steamboats," and accompanied with a copy of a statement transmitted to your Department from Troy, in date of the 28th ultimo.

I have been convinced, since thirty months, of the inefficacy of the regulations maintained in relation to steamboats on Lake Champlain; my remonstrances on that subject to the former Collector of Vermont have had no effect, and in order, as it appeared, to remove all interference on my part, he placed an Inspector on board, and the act of the 3d day of March, 1817, was passed—an act granting privileges to those vehicles, repugnant, in my opinion, to some of the fundamental principles of the revenue laws, and injurious to the revenue. I readily believe that frauds against the revenue are committed on board these boats. The present Collector of Vermont (Mr. Fisk) has himself informed me that several whole hogsheads of rum have been passed fraudulently last summer, being covered with the fire-wood for the use of the engine; and that in one instance, on information, he sent his deputy to accompany the boat to White Hall, and seized one hogshead of rum which was found so concealed.

The fact is, sir, that these boats are not searched; too much reliance is placed on the faculties of the officer of the customs stationed on board, and accompanying the vessel from the office at Alburgh to Burlington; indeed, it is impossible that a man alone could examine, with effect, those unwieldly boats where there are so many places of concealment, for when he has visited one place, the articles to be smuggled may be removed to the same place before visited. A slight examination of some of the trunks of the passengers takes place, and there generally ends.

Should I direct a search of these steamboats when an Inspector of Vermont is on board it would be deemed oppression, and would also offend, as I have formerly experienced, the Collector of Vermont, who would consider such a step as intended to distrust the faithfulness of his officer and the propriety of his own measures.

The stewards of these steamboats have every chance they can wish for to defraud the revenue, and

no doubt they improve it. The masters of the steamboats do not insert in their manifests, on their return from Canada, his sea stores, nor in the manifests of their cargo on their way to Canada; the stores of the stewards, I believe, are never inquired for; they may, therefore, have any number of small casks filled with liquors brought from Canada, and dispose of them at White Hall, and do the same every trip. You may think, sir, that it is my duty to see these irregularities rectified; but give me leave to repeat that these boats are kept and have been placed under the control of the officers of Vermont, and that they enter at that custom-house. There is, sir, but the old practice, which, in my opinion, will answer the object aimed at; it is, that the two Collectors should agree that the officers and men of both districts, stationed near each other at a narrow part of the lake, two miles on our side of the frontier line, should unite in examining thoroughly and faithfully these boats and baggage on their return from Canada, which, if done, I have no hesitation to say, will soon put a stop to the smuggling complained of, and the sea stores ought also to be limited to the exigencies of the voyage. But, sir, permit me to observe that any measures calculated to put these boats under proper regulations should be as specifically as possible recommended strongly to the Collectors on this lake. Mr. Fisk is a good man, and means to do his duty well; he is also my friend, but he feels a delicacy in deviating from measures which have been adopted by his predecessor.

I have the honor to be, very respectfully, sir, your most obedient servant,

PETER SAILLY.

Hon. W. H. CRAWFORD, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *Comptroller's Office, March* 18, 1819.

SIR: It having been intimated to the Treasury that there are strong grounds for suspecting the steamboats on Lake Champlain to be concerned in smuggling, I consider it my duty to call your immediate attention to the subject, and to request that energetic measures may be adopted to prevent a repetition of the abuses alluded to.

It has been suggested that it might have a salutary effect if officers from your district and the district of Champlain were stationed near each other at a narrow part of the lake, about two miles from the frontier line, with directions to unite in a thorough and strict examination of the steamboats and the baggage of the passengers on their return from Canada.

You will therefore be pleased to make arrangements with the Collector of the district of Champlain as to the course proper to be pursued under those circumstances.

The 45th section of the collection law of 1799 points out the course to be observed with respect to the sea stores, and the 46th section with respect to the baggage of passengers. The Collector of Champlain has received similar instructions.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

JAMES FISK, Esq., *Collector, Vermont.*

TREASURY DEPARTMENT, *Comptroller's Office, March* 18, 1819.

SIR: The Secretary of the Treasury having referred to me your letter of the 20th ultimo, instructions on the subject-matter of it were immediately given to the Collector for the district of Vermont, a copy of which instructions is enclosed for your information.

You will be pleased to co-operate with him in devising such means as will be likely to counteract the illicit practices to which you have alluded.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

PETER SAILLY, Esq., *Collector, Champlain.*

CUSTOM-HOUSE, *District of Oswegatchie, August* 18, 1819.

SIR: Several of the innkeepers in this district have, as they could find opportunity, smuggled liquors for the use of their houses. A misunderstanding happening among them, one engaged as an assistant has informed against one of the smugglers, which has so alarmed the rest that they have all come forward and offered to report, under oath, what they have smuggled, and pay the duties. Not considering myself authorized to compromise any breach of the law, I make this appeal, respectfully soliciting your instructions, believing myself it would be more for the public interest to make a compromise with all of them by accepting the entries and receiving the duties. I have forwarded to the District Attorney, in a number of instances, the names of persons subjected to penalties, requesting prosecutions might be commenced against them. In very few instances suits were *commenced*, but not a solitary one has been brought to final judgment, and should I take the same course with those now referred to, the result would probably be the same. I am further induced to make this application in consideration of the respectable standing of the party complained of, who is Captain Lyttle, late of the rifle corps, who did himself and country so much credit by his gallant services on the Niagara frontier in the late war. Besides, the informer is not the most creditable. Having been concerned in smuggling himself, he is not induced from any principle of respect for the laws in preferring the complaint, but from malice towards Captain Lyttle, whom he has threatened to ruin. Indeed, he has made himself so obnoxious by his conduct that a prosecution on his information would not be popular, and it would be difficult to get witnesses to go 150 miles to attend

the court. I believe Captain Lyttle to have been ignorant of the penalties of the law, although he must have known it was against the law to smuggle, and degraded himself in doing it. But he supposed (for which he can claim no merit) that could he evade the vigilance of the custom-house officers no after consequences could ensue. I have reason to suppose and believe that this exposure will be attended with happy consequences, and should a compromise be recommended, I think it would have a better effect than to prosecute. The smugglers, finding the hazard to be so great, will be deterred from making any attempts in future. I shall wait your instructions, and then act as you direct.

Very respectfully, your obedient servant,

ALEXANDER RICHARDS.

Hon. Wm. H. Crawford, *Secretary of the Treasury.*

Treasury Department, *Comptroller's Office, September* 1, 1819.

Sir: The Secretary of the Treasury has referred to me your letter of the 18th ultimo, stating that several of the innkeepers of your district had smuggled liquors for the use of their houses; that a person engaged as an assistant among them had informed against one of the smugglers, which so alarmed the rest that they came forward and offered to report, under oath, what they had smuggled, and pay the duties; but, not considering yourself authorized to make a compromise in the case of a breach of the laws, you request instructions from this Department, believing it would be for the interest of the public to make the compromise.

In reply, I have to observe that the officers of the Treasury do not consider themselves possessed of the power to make such a commutation; and, even if they did, I should very much question the policy of exercising it in cases similar to these under consideration.

Such a course, instead of diminishing, would, I apprehend, have a tendency to increase the evil.

I have, therefore, to request that you will seize and libel every article which you can ascertain to have been smuggled, and prosecute (without regard to persons) for the penalties which have been incurred by the unlawful procedure.

As you state that there is but one witness in the cases, it would be well to endeavor to obtain another.

It may be proper to add that those persons who may be disposed to pay their fines without a prosecution may be permitted to do so.

Respectfully,

JOS. ANDERSON, *Comptroller.*

Alexander Richards, Esq.

Extract of a letter from John Grant, jr., Deputy Collector for the District of Oswego, dated November 5, 1823.

"During Elliott's service he seized one vessel, the *Marietta*, which I have reported to the District Attorney for libelling. She had been employed in petty smuggling, and in making voyages to Canada, when under a license. She was seized at the eastern extremity of our district, and I was under the necessity of employing two special Inspectors for the purpose of navigating her to this port. These were John Bugee and Henry Manwaring, whose accounts are in the bills of Inspectors. Two other vessels have been reported, which will be seized as soon as an opportunity offers."

Port of Ogdensburg, *January* 16, 1824.

Sir: About a year ago I had the honor to enclose to the Secretary of the Treasury the sketch of a bill similar to the one which I now take the liberty to enclose to you, which liberty I pray you to pardon. The session being limited was then, probably, too far advanced to have insured attention to the subject, had the amendment proposed met the approbation of the honorable the Secretary. Persuaded myself of the beneficial operation of such a bill, as it regards both the Treasury and the officers of the customs, I have hoped that during the recess it might have attracted the attention of the Department, and if approved, have been recommended to the consideration of either the Committee of Ways and Means or that of Commerce.

In the pressure of more weighty concerns, during the lamented illness of the Secretary, this comparatively unimportant matter has probably escaped his notice.

During the summer I had an opportunity of conversing with Mr. Cambreleng, of the Committee of Ways and Means, who was pleased to approve of the alteration proposed in the law, and to promise to consult with you in relation to it.

Most of the seizures made on this frontier, and, I presume, many of those made in the western States and on the seaboard, are of small amount, and in ninety-nine out of a hundred cases no claim is preferred. It appears to me, and such also is the view of other Collectors in this quarter, that in these small cases there is no necessity of going through the tedious and dilatory forms of monition, libel, condemnation, and sale by the Marshal. The taxable costs in each case are about ninety dollars—a sum frequently exceeding the avails of the article sold, and the deficiency of avails to meet the costs is charged to the Collector, who has generally been at considerable expense in making the seizure, and has, perhaps, made advances to informers.

The costs in any case intended to be embraced in the proposed bill would not exceed ten, and in most cases would not reach five dollars, creating a saving to the Treasury which, I believe, would not fall

short of fifty thousand dollars annually now expended in unnecessary costs. Allow me to add that the subordinate officers of the customs are much disheartened, after undergoing the fatigue, the trouble, and sometimes the peril of making these seizures, to find, at last, instead of a division of the avails being made between the Government and them, that the whole proceeds are consumed by the costs of prosecution.

Permit me to solicit your indulgence for the liberty I have taken in asking your attention to the above subject.

I embrace this occasion to inquire of you whether, under your instructions of the 26th of September last, I am to permit persons travelling from Canada into the United States, with their own sleighs or carriages and horses, with their own personal baggage only, and with the intention, as far as can be ascertained, of returning, to pass without the payment of duties; and whether those carrying freight, either for themselves or others, are or are not subject to duty. I have never permitted horses, brought from Canada "for the importer's own use," to be so imported without subjecting them to duty, whether "intended to be taken back" or not; and such have been my instructions to the Inspectors, which I believe have been faithfully observed.

I have the honor to remain, with the highest respect, your very obedient servant,

AARON HACKLEY, *Collector.*

Hon. JOSEPH ANDERSON, *First Comptroller of the Treasury.*

TREASURY DEPARTMENT, *Comptroller's Office, February* 24, 1824.

SIR: The enclosed sketch of a bill, which was forwarded to this Department by Mr. Hackley, Collector of the Customs for the district of Oswegatchie, is respectfully submitted to you for such a disposition of it as you may think proper to make.

With great respect, I have the honor to be, your obedient servant,

JOS. ANDERSON, *Comptroller.*

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

Extract from a letter of Nathan Sage, Esq., Collector for the District of Oswego, dated April 22, 1824.

"I have kept one of them, Mr. Southworth, in employ, not only in my own district, but also in the neighboring districts, and even in Canada. The accounts rendered in his favor, as an Inspector, will not by any means cover my advances to him, although (in my own opinion at least) his services have been greater than those of any three Inspectors who have been employed on this frontier for the year past. Through his exertions I have been enabled to detect several vessels which have been more or less employed in violating the revenue laws for years past, and have also ascertained several acts of smuggling committed by some of the most responsible men in this and a neighboring district, whom I have never been able to detect before, although I have been long satisfied that they were daily accumulating large fortunes by their constant and successful violation of the revenue laws. In the letter acompanying the returns from this office for the last quarter of 1823, Mr. Anderson was advised that we were preparing to seize some vessels then laid up for the winter, and also to commence some suits for penalties as soon as the testimony could be arranged.

"Anxious, however, to avoid all prosecutions that might be trifling in themselves, or which might possibly terminate unfavorably, I sent my deputy to the United States Attorney, at Utica, for the purpose of submitting the facts, together with the testimony, to him, and to be governed by his decision. After an examination of the subject, Mr. Beardsley, the United States Attorney, authorized and sanctioned the seizure of five vessels and the prosecution of eight suits for penalties. In consequence of this opinion, one of the vessels (the Laura) of Genesee river has been seized; the others not being in the habit of frequenting our district, arrangements have been made with Colonel Esseltyne, the Collector at Cape Vincent, to seize them in his district whenever an opportunity shall offer. The amount of penalties, which we have every reason to believe we shall recover, will be some four or five thousand dollars. Writs have already been issued, returnable in May term *ensuing;* and when returned, a detailed account of the whole will be forwarded to Mr. Anderson. For all this I am chiefly indebted to the exertions of Mr. Southworth. In the abstract of Inspector's bill for the quarter ending the 31st March instant, the name of John Bugee will be found as an Inspector, whose employment as such was not sanctioned by the Secretary. He was employed twice, on different wages, in cases of such emergency that time did not permit my requesting the Secretary's approbation, and he was not designed for any further services than those charged in his account."

Extract of a letter from John Grant, jr., Deputy Collector for the District of Oswego, dated October 20, 1824.

"In a communication addressed to Mr. Anderson under date of April 22 last, I had the honor of informing him that, from the exertions of D. H. Southworth, one of our Inspectors, we had detected several vessels which had been long suspected of being smugglers, and should seize them as soon as circumstances would permit; that we had also detected several gentlemen residing in this and the neighboring districts, some of whom were well known to have accumulated handsome fortunes by smuggling, (but who had hitherto conducted all their concerns of this description so ingeniously as to avoid all penal prosecutions,) against whom we should commence suits as soon as possible. I have now the honor of informing Mr. Anderson that, at the last term of the United States Court in this district, the

schooner Sandy Creek was condemned, (the Marietta and Clarissa having been condemned the term previous,) and thirteen suits for the recovery of penalties tried, in all of which we obtained judgments, amounting in the aggregate, exclusive of costs, to $3,790. Two of the most important remain to be tried, having been put over by the defendants through the indulgence of the Judge. A more detailed account of the suits will, I presume, be furnished Mr. Anderson by Mr. Beardsley, the United States Attorney.

"I would close this communication by reporting to Mr. Anderson the seizure of the steamboat Ontario, made a few days since by some of our officers, in the district of Sackett's Harbor, which has produced an uncommon degree of excitement. We do not charge either the owners or master of this vessel so much with smuggling as we do with rendering facilities to others to smuggle in the character of passengers. It has long been customary for this steamboat, both in the river Niagara and St. Lawrence, in her trips between Niagara and Ogdensburg, and frequently in the Kingston channel, to receive passengers from the Canada shore, with their trunks and baggage, and in many cases to send her own boats after them and bring them with their trunks on board, (while sailing under a license,) and afterwards land them at different places on our own shore, without ever reporting the facts to any custom-house officer; a practice which, if permitted, would furnish to smugglers all the security and protection they could wish. Our only object in making the seizure was to stop this practice, a thing which we found impossible in any other way."

18TH CONGRESS.] **No. 725.** [2D SESSION.

ASSAYS OF FOREIGN COINS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 28, 1825.

TREASURY DEPARTMENT, *January* 27, 1825.

SIR: In pursuance of the act entitled "An act regulating the currency within the United States of the gold coins of Great Britain, France, Spain, and Portugal, and the crowns of France, and five franc pieces," passed the 29th day of April, 1816, I have the honor to transmit herewith a report of the Director of the Mint, giving the result of sundry assays made in pursuance of instructions from this Department.

I have the honor to be your most obedient servant,

WM. H. CRAWFORD.

Hon. HENRY CLAY, *Speaker of the House of Representatives.*

MINT OF THE UNITED STATES, *Philadelphia, January* 21, 1825.

SIR: Conformably to your general instructions addressed to this office, I have caused assays to be made of the foreign coins current by law in the United States, and now communicate the result.

The report of the assays exhibits the following proportions of pure gold and pure silver contained in the aforesaid coins, respectively:

Gold coins.

Of Great Britain, 22 carats, or 22 parts pure gold in 24.
Of Portugal, 21 carats, $3\frac{15}{18}$ grains, or $21\frac{23}{24}$ parts pure gold in 24.
Of France, 21 carats, $2\frac{1}{2}$ grains, or $21\frac{6}{8}$ parts pure gold in 24.
Of Spain, 20 carats, 3 grains, or $20\frac{3}{4}$ parts pure gold in 24.

Silver coins.

Crowns of France, 10 ounces, 18 pennyweights, 12 grains pure silver in 12 ounces.
Five franc pieces, 10 ounces, 16 pennyweights, 12 grains pure silver in 12 ounces.
Spanish dollars, 10 ounces, 16 pennyweights pure silver in 12 ounces.

The gold assays were made of proportional parts of three pieces, and the silver assays of proportional parts of five pieces, of the latest dates procurable of the several coins assayed.

The standard of the gold coins of the United States being eleven parts fine and one part alloy, or 22 parts pure gold in 24, and the eagle of ten dollars containing, as by law established, 270 grains of standard gold, the following intrinsic values of the foreign gold coins now current, according to the standard of the United States, are severally derived from the above assays thereof:

Standard United States, 100 cents for 27 grains, or $88\frac{89}{100}$ cents per pennyweight.
Coins of Great Britain, 100 cents for 27 grains, or $88\frac{89}{100}$ cents per pennyweight.
Coins of Portugal, 100 cents for $27\frac{3}{100}$ grains, or $88\frac{83}{100}$ cents per pennyweight.
Coins of France, 100 cents for $27\frac{47}{100}$ grains, or $87\frac{97}{100}$ cents per pennyweight.
Coins of Spain, 100 cents for $28\frac{63}{100}$ grains, or $83\frac{84}{100}$ cents per pennyweight.

On comparing these results with preceding assays of foreign coins, it will be observed that the gold coins of Great Britain are uniformly of the standard of the United States; that those of Portugal, though

they approach the same standard very nearly, are, strictly, inferior; and that those of France and Spain are always decidedly inferior. It will also be observed that the values severally assigned to those coins by the act of March 23, 1823, under which they have a qualified currency, being made receivable in payments on account of public lands, agree very nearly with the average of all the assays thereof hitherto made.

The standard of the silver coins of the United States being 10 ounces, 14 pennyweights, $4\frac{5}{13}$ grains of pure silver in 12 ounces, and the dollar of one hundred cents, containing, as by law established, 416 grains of standard silver, the following intrinsic values of the foreign silver coins now current, according to the standard of the United States, are severally derived from the above assays thereof:

Standard United States,	$115\frac{38}{100}$ cents per ounce.
Crown of France,	$117\frac{74}{100}$ cents per ounce.
Five franc pieces,	$116\frac{63}{100}$ cents per ounce.
Spanish dollars,	$116\frac{37}{100}$ cents per ounce.

The ordinary weight of the French crown now in circulation, as appears from the average of those received and weighed recently at the Mint, is 18 pennyweights, $13\frac{1}{4}$ grains; their intrinsic value, therefore, is $109\frac{1}{2}$ cents.

The ordinary weight of the five franc piece, as appears from the average of those recently weighed at the Mint, is 16 pennyweights, the intrinsic value corresponding to which is 93 cents 3 mills.

The intrinsic value of the Spanish dollar may be estimated at 100 cents 6 mills, the weight thereof being generally 415 grains, as assumed in the several acts of Congress making it a legal tender.

I am, with great respect, your obedient servant,

SAM. MOORE.

Hon. Wm. H. Crawford, *Secretary of the Treasury.*

18th Congress.] **No. 726.** [2d Session.

OPERATIONS OF THE MINT IN 1824.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 5, 1825.

To the House of Representatives of the United States:

I herewith transmit a report from the Director of the Mint of the United States, showing the operations of that institution for the last year.

JAMES MONROE.

Washington, *February* 2, 1825.

Mint of the United States, *Philadelphia, January* 1, 1825.

Sir: I have the honor to lay before you a report of the operations of the Mint during the past year.

From the statement of the Treasurer, herewith transmitted, it appears that the coinage executed within the above period has amounted to $1,858,297, consisting of 4,786,894 pieces of coin, viz:

Of gold	19,940	pieces, amounting to.....	$93,200
Of silver	3,504,954	pieces, amounting to.....	1,752,477
Of copper	1,262,000	pieces, amounting to.....	12,620
	4,786,894		1,858,297

Deposits of gold have been for the last three years inconsiderable. While gold bullion is in demand at a premium on its standard value, for the purpose of exportation as a remittance, instead of bills at the current exchange, no adequate inducement exists to bring it to the Mint, if its value can be otherwise satisfactorily ascertained. It is obvious that, if coined and issued under such circumstances, it cannot be retained in circulation.

Of the gold coined within the year, about five per cent. was received from North Carolina, thirty-five from Africa, and fifty from South America and the West Indies. The remainder, about ten per cent., is of uncertain origin.

Of silver, the receipt has been abundant throughout the year. The amount now in the vaults of the Mint exceeds $300,000, and no failure of the supply is at present anticipated. A large portion of this supply comes directly from Mexico, South America, and the West Indies, in various forms of unwrought bullion, in plate, and in coins not admitted into our currency. But the principal deposits are made in foreign coins by the banks, especially the Bank of the United States, about $1,200,000 having been received from that institution within the past year.

The amount of copper, coined and uncoined, the property of the United States, now at the Mint, is about $25,000. The issue of cents within the year has amounted to $15,475, on which a profit has accrued of nearly $4,500, as will be more particularly specified in the usual return made by the Treasurer on that subject.

The aggregate profit heretofore realized on the coinage of copper having amply refunded the amount ordinarily invested on behalf of the Government in the purchase of that article, the profit now derived from the annual issue of cents, which is regularly paid into the Treasury of the United States, is an effective reimbursement of so much of the amount expended under the appropriation of the year for the support of the Mint.

Copper coins being transported at the expense and risk of the Government to all parts of the United States, the knowledge of this facility, as it is more generally diffused, may be expected to increase the demand for them. Care is taken that this demand shall always be promptly satisfied.

No material interruption has occurred within the year to the ordinary business of the Mint. Though the retirement from office and closely following decease of my excellent predecessor marked this period, the assiduous care of highly qualified officers, long associated with him, preserved unimpaired the progress of its operations. The present report exhibits an amount of coinage inferior by only a minute difference to that of the year 1820, hitherto the most productive in the records of the establishment.

I have the honor to be, with great respect, your obedient servant,

SAM. MOORE.

The PRESIDENT *of the United States.*

Statement of the coins struck at the Mint of the United States from January 1 *to December* 31, 1824.

Coins.	Half eagles.	Quarter eagles.	Half dollars.	Cents.	Total.
Gold coins	17,340	2,600	....	.....	$93,200 00

MINT OF THE UNITED STATES, *Treasurer's Office, Philadelphia, December* 31, 1824.

JAMES RUSH.

18TH CONGRESS.] **No. 727.** [2D SESSION.

SINKING FUND FOR PAYMENT OF THE PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 7, 1825.

REPORT.

The Commissioners of the Sinking Fund respectfully report to Congress:

That the measures which have been authorized by the Board subsequent to the last report of the 6th of February, 1824, as far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the fourth day of the present month, and in the statements therein referred to, which are herewith transmitted and prayed to be received as a part of this report.

JOHN GAILLARD, *President of the Senate pro tem.*
JOHN QUINCY ADAMS, *Secretary of State.*
WM. H. CRAWFORD, *Secretary of the Treasury.*

WASHINGTON, *February* 5, 1825.

TREASURY DEPARTMENT, *February* 4, 1825.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That the sums disbursed from the Treasury during the year 1823, on account of the principal and interest of the public debt, amounted, as per the last annual report, to.. $5,531,171 58

To which add for interest on debts recovered from Commissioners of Loans out of office 148 07

5,531,319 65

And deduct the amount of a repayment in that year..... 1,365 72

Leaves the amount to be accounted for in this report..... $5,529,953 93

There was applied for the payment of a sum short provided on account of the public debt prior to the 1st of January, 1823, as per statement B, annexed to the last annual report		$27,620 18
There was applied during the year 1823, towards the payment of the principal and interest of the public debt, as ascertained by accounts rendered to this Department, as per annexed statement A, the sum of	$5,617,741 25	
As follows:		
In the reimbursement of the principal of the deferred stock	601,560 32	
In the reimbursement of the principal of the Mississippi stock	5,477 07	
In payment of certain parts of the domestic debt	294 42	
	607,331 81	
The interest which accrued in the year 1823 amounted to	5,010,409 44	
	5,617,741 25	
Of this sum there was short provided, consisting of unclaimed dividends not applied for by the proprietors, as per annexed statement B	115,407 50	
		5,502,333 75
		5,529,953 93

That during the year 1824 the following disbursements were made by the Treasury, on account of the principal and interest of the public debt:

On account of the interest of the debt and reimbursement of the deferred stock	$5,301,104 19
Redemption of the seven per cent. stock	8,647,611 54
Redemption of the exchanged six per cent. stock of 1812	2,612,435 69
Reimbursement of the Mississippi stock	7,242 34
Making, together, as appears by statement C, the sum of	16,568,393 76

Which disbursements were made from the appropriation of ten millions of dollars for the year 1824, and will be accounted for in the next annual report, in conformity to accounts which shall then have been rendered to this Department. In the mean time, the manner in which the said sum has been applied is estimated as follows:

There is estimated to have been applied to the deficiency at the end of the year 1823, as per statement B		$115,407 50
Add per statement D, in the reimbursement of the deferred stock		357,544 91
In the purchase and redemption of the seven per cent. stock		8,597,309 35
In the redemption of the exchanged six per cent. stock of 1812		2,612,435 69
In the reimbursement of the Mississippi stock		7,242 34
		11,689,939 79
In the payment of the interest on the debt, and premium on the purchase of seven per cent. stock under the act of the 22d of January, 1824:		
The interest for 1824 is estimated at	$4,906,602 07	
The premium paid on seven per cent. stock purchased between January 22 and June 30, 1824, as per accounts settled at the Treasury, amounted to	50,302 19	
	4,956,904 26	
Deduct this sum, short provided, per estimate E	78,450 29	
		4,878,453 97
		16,568,393 76

A statement (F) is annexed which exhibits the annual appropriation remaining unapplied on the 1st of January, 1825, and a statement, marked G, of the funded debt on the 1st of January, 1825.

All which is respectfully submitted.

WM. H. CRAWFORD.

A.

Statement of the application during the year 1823 *of the funds provided for the payment of the principal and interest of the public debt.*

I. Payments on account of the principal of the public debt:

1. Reimbursement of the deferred stock	$601,560 32	
2. Reimbursement of the Mississippi stock	5,477 07	
3. In payment of certain parts of the domestic debt	294 42	
		$607,331 81
II. Payments on account of the interest:		
The interest for the year 1823, as per accounts settled at the Treasury, amounted to		5,010,409 44
		5,617,741 25

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, February* 3, 1825.

B.

Statement of the provision made before the 1st January, 1824, for payment of the principal and interest of the public debt.

The demands to be satisfied on the 1st of January, 1824, were as follows:

1. Dividends payable by Commissioners of Loans, including dividends due on that day, and exclusive of dividends no longer demandable at their offices	$1,525,462 31	
2. Unclaimed dividends from the Loan Offices, payable at the Treasury, beyond the amount advanced for their payment	232,622 01	
3. Balance due the late agents in London, per Treasury settlement No. 43,824	1,474 44	
		$1,759,558 76

The funds provided to satisfy the demands were as follows:

1. Cash in the hands of Commissioners of Loans applicable to dividends.	1,528,153 45	
2. Cash advanced for Treasury dividends over the amount payable	12,060 07	
3. Cash paid for bills on account of the debt which were protested for non-payment and not yet repaid, as per note A to statement B, which accompanied the report of 7th of February, 1822	103,937 74	
		1,644,151 26
Short provided		115,407 50

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, February* 3, 1825.

18TH CONGRESS.] **No. 728.** [2D SESSION.

DISCRIMINATING DUTIES AND CREDITS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 21, 1825.

Mr. MCLANE, of Delaware, from the Committee of Ways and Means, to whom has been referred a resolution instructing them to inquire whether any, and if any what, provision ought to be made by law to discriminate between importations made by citizens of the United States and others, and whether it is or is not expedient to repeal all laws allowing credits for duties upon merchandise imported by aliens or on foreign account, reported:

That it would, in their opinion, be inexpedient at this time to repeal all laws allowing credits for duties upon merchandise imported by aliens or on foreign accounts. That though such a measure may not be prohibited by the strict letter of existing treaties, it would nevertheless conflict with the spirit and general design of those treaties, and beget a system of discrimination which the liberal policy of most commercial nations is aiming to abolish, and which, in the opinion of the committee, would be extremely prejudicial to the fiscal and commercial interests of the United States.

The committee are also of opinion that it would be wise and expedient to make provision by law to discriminate between importations made by citizens of the United States and others.

It would afford the best means of information of our various commercial interests, and enable the Government ultimately to ascertain the comparative benefit or loss between American and foreign importations.

Such a regulation is altogether practicable, and would impose no material additional burden upon the officers of the customs, and the committee therefore report a bill.

18TH CONGRESS.] **No. 729.** [2D SESSION.

RELATIVE TO CHANGE IN MODE OF ISSUING DEBENTURES OF DRAWBACK OF DUTIES.

COMMUNICATED TO THE SENATE FEBRUARY 25, 1825.

TREASURY DEPARTMENT, *February* 22, 1825.

SIR: In obedience to a resolution of the Senate dated the 25th of January last, I have the honor to transmit a report of the Collector of the district and port of New York. In the opinions and views therein presented I entirely concur.

I have the honor to be, with great respect, your most obedient servant,

WM. H. CRAWFORD.

The PRESIDENT OF THE SENATE.

NEW YORK, *February* 11, 1825.

SIR: I have received the memorial* of the New York Chamber of Commerce to the Senate and House of Representatives, and transmitted by you for my special report.

I have read the memorial with attention, and agree with the memorialists that the drawback of duties

* This memorial was not returned to the Senate with this report.

on the exportation of foreign merchandise is of great advantage to the shipping and mercantile interests of this city. In an office where the business is so complicated and various as that in the Collector's of this port, it cannot be supposed but that some little delay must necessarily take place. And it is not surprising that men so enterprising and active as our merchants, who are pushing to the utmost extent the employment of their funds, should occasionally complain of the unavoidable delay in the execution of their debenture certificates. I am not, however, aware that any extraordinary delay exists at present which should have called forth the memorial. I admit that we are about two months behind with the debentures; one month can scarcely be avoided at any time while the existing laws remain in force, allowing the exporter twenty days after the clearance to make the oath and give the exportation bond.

The export trade, as the memorialists truly state, has increased within the last few years almost beyond calculation, and the duties incident to the Collector's office have proportionably increased. Would the department proposed by the memorialists, if organized, prevent the delay or give any facility to the issuing of the debentures? I think not, but would add much to the responsibility of the Collector and increase very essentially the labor incident to the duties of his office. Should the department recommended be created, it would be necessary that it should be furnished by the importers with an entry of the merchandise, and by the inspectors, weighers, gaugers and measurers with their returns, both inward and outward, which would increase the labor fifty per cent. on importation entries. The duties inwards are nearly ten times as much as the drawbacks, and it can be easily ascertained whether the public would derive any benefit from the proposed experiment. Should it be suggested that the new department might have the use of the entries made in the Collector's office, I would urge in reply, should that be allowed, it would render it almost impossible for the Collector to make out his accounts of the import revenue.

I cannot admit that any branch of the business in the Collector's office is neglected, or that each does not receive all possible attention. Attention is given to the drawbacks on exports as well as to the collection of the revenue arising from imports and tonnage.

The division of responsibility in monied concerns seldom results in any good. But should the department recommended be organized, I would ask whether, instead of dividing the responsibility it would not increase that of the Collector, by rendering him liable for the acts of the head of the new department. And in what way can the creation of the contemplated department relieve the Collector from any of his arduous duties; he would still be under the necessity of examining the same papers relating to merchandise entitled to drawback before he could sign the debentures or make his return to the Treasury that he has now to examine, and the same delay would unavoidably take place. In my own judgment the greater number of co-ordinate or independent departments created in the collection of the customs the greater will be the delay, embarrassment, labor, and expense.

To that part of the memorial which complains of the accommodations in the custom-house, I beg leave to state that it is entirely incorrect.

Previous to the last summer there may have been grounds for this complaint. But during the past summer I caused the second story of the front building of the custom-house to be thrown into one room, which is about fifty feet square, placing the counters and desks in such manner as to form a large hollow square for the persons transacting business. The room and arrangements have been acknowledged by all persons visiting the custom-house, except the memorialists, to be sufficiently capacious and every way convenient.

Since the opening of the trade to Mexico and South America generally the exportation of assorted cargoes with the benefit of drawback has greatly increased. We have several times received from a single shipper, in one vessel, eighty, ninety, and to one hundred entries for drawbacks, he having purchased as many packages of goods as would entitle him to a debenture of fifty dollars or thereabouts of duties on importation, and for each entry three debentures generally become necessary to meet the several terms of credit of the duties on importation.

During the last month I have placed four additional clerks in my office, who, together with several others besides those usually employed, are now progressing with the calculations of the drawbacks, which I expect shortly to get up as near as is practicable to keep them. The extension of time for bonding and making the oath of exportation after clearance of the vessel has tended to cause many omissions. Was the exporter required to have his drawback entries of goods subject to *ad valorem* duties made complete, and all of his entries for drawback signed and dated when lodged at the custom-house, and the bond and exportation oath made within ten days thereafter, it would add much to the facility of preparing the debentures. And I think another salutary provision might be made, when the drawback of duties on exportation did not exceed one hundred dollars, by requiring only one debenture and payment at the most extended time allowed by law for the credit of the duties on importation. This alteration would not only materially lessen our labor but lessen the chance of many errors. The terms of credit allowed by law for duties on importation of merchandise are various. From the West Indies six and nine months; from Europe eight, ten, and twelve months; and from other places eight, ten and eighteen months. The merchandise thus imported may be retained nearly twelve months and then exported with the benefit of drawback, and by this it will appear that duties may be paid months before the goods are exported. Merchants are in the habit of selling their merchandise at custom-house measure, weight, or gauge, with custom-house tare, and frequently resell it several times with the benefit of drawback, and sometimes at what is termed "short price," or in other words the seller to receive the debenture in part payment. When this is the case the parties apply to the weigher, gauger, or measurer for a private return, which the law does not permit them to make. Application is next made to the clerks in the custom-house for a sight or a copy of the return, with a request to be informed the amount of the drawback, and desire to have the debentures immediately that they may settle their purchase or sale, and all this frequently happens before they have given the bond and made the exportation oath. There is one part of the drawback system which the memorialists have not noticed, though by far the most troublesome and attended with the most labor in making the certificates. I refer to the transportation overland and coastwise of merchandise entitled to drawback. This, perhaps, is the most laborious and at the same time the most loosely attended to of any in all the ports of exportation.

Should my suggested alterations be deemed worthy of attention I think some good might result from their adoption.

The public business occasionally calls the Collector from his office, and when absent it is impossible for his deputy to attend to the duties of both offices. And in case of the sickness of the Collector or his deputy it is impossible for one to attend to the duties of both. The business incident to the Collector's

office having also so rapidly increased for the last three or four years as to render it highly proper and necessary to allow him another deputy. This would in some measure relieve the Collector from the more minute details of his office and enable him to give a more general superintendence to the whole department of the customs. And I will add that, in my opinion, should an additional deputy be appointed it would tend to remedy more effectually the evil complained of than the creation of a new executive department, and would also be far less expensive to the Government. I would take the liberty of also suggesting that in case the proposed department should be organized it would become necessary to make some provision for the payment of its officer and clerks other than those already provided for the payment of the Collector, Naval Officer, and Surveyor.

I am, respectfully, your obedient servant,

JONATHAN THOMPSON, *Collector.*

Hon. William H. Crawford, *Secretary of the Treasury, Washington.*

18th Congress.] **No. 730.** [2d Session.

DRAWBACK ON SPIRITS AND WINE IN CASKS NOT LESS THAN FIFTEEN GALLONS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 25, 1825.

Mr. Cambreleng, from the Committee of Ways and Means, to whom was referred a resolution of the House of Representatives of the 24th January, instructing them "to inquire into the expediency of permitting a drawback to be paid on foreign brandy and wine when re-exported to any place in *Mexico, Guatemala,* or *South America,* in casks of not less than fifteen gallons," reported:

That it would not be expedient, were it even in conformity with the stipulations of our existing treaties with foreign nations, to adopt a commercial measure limited in its operation to particular countries. A general measure of the character contemplated in the resolution would interfere with a very necessary regulation extending to every description of merchandise exported with the benefit of drawback, which requires that the same shall be exported in the identical packages or casks in which it was imported, unless so damaged as to make it necessary to substitute new packages or casks.

The committee are, however, sensible of the necessity and advantage of extending every facility to the carrying trade, and they are particularly disposed to enlarge our commerce with the American States. They are aware that in the trade to these countries it is necessary that wines and spirits should be exported in casks of small size to facilitate their transportation into the interior. The best remedy for the inconvenience now existing appears to be to remove any restriction which may be imposed by our laws as to the size of the casks in which wines or spirits may be imported. If such restriction be removed, it is probable the sagacity of those engaged in the trade will very soon furnish our markets with wines and spirits in casks of a capacity suited to every foreign market.

With regard to wines, the committee are not aware of any restriction as to the size of the casks. They may be imported and exported in casks of any description; trade must be left to its own expedients to correct the evil if any exists. It is otherwise with foreign distilled spirits.

By the act of March 2, 1799, the importation, by sea, of distilled spirits is prohibited in casks of a capacity less than ninety gallons; while this restriction continues, we must limit if not deprive ourselves altogether of a very profitable branch of trade with the American States; it will, of necessity, continue to be a direct trade between Europe and those States in which we shall have little if any share. There are other reasons why this restriction should be removed; whatever may have been the motive for its adoption, it has been found, in practice, more inconvenient than useful. Many vessels have been seized and detained for an innocent violation of this prohibitory regulation; while as a measure to guard against frauds on our revenue it would seem to be wholly abortive; we might with equal propriety prescribe by law the capacity of packages for every description of merchandise. The committee therefore report a bill authorizing the importation of foreign distilled spirits in casks of a capacity not less than fifteen gallons.

18th Congress.] **No. 731.** [2d Session.

OPERATIONS OF THE MINT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 25, 1825.

Treasury Department, *February* 23, 1825.

Sir: I have the honor to transmit herewith three statements, marked A, B, C, which have been prepared by the Comptroller of the Treasury pursuant to the 7th section of an act of Congress, passed on the 2d of April, 1792, entitled "An act establishing a Mint and regulating the coins of the United States."

These statements contain all the information relative to the transactions of the Mint which the settlements made at the Treasury afford.

I have the honor to be, very respectfully, your obedient servant,

WM. H. CRAWFORD.

Hon. H. CLAY, *Speaker of the House of Representatives.*

A.

Statement exhibiting the balance of the gold and silver bullion remaining in the hands of the officers of the Mint on the 31st December, 1823; the amount deposited from January 1 to December 31, 1824; the different species of coins made and paid on account of deposits; allowances for wastage, and the balance remaining in the hands of the officers of the Mint on the 31st of December, 1824, to be accounted for on a future settlement, viz:

Comptroller's Office, *February* 22, 1825.

19TH CONGRESS.] No. 732. [1ST SESSION.

STATE OF THE FINANCES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 22, 1825.

TREASURY DEPARTMENT, *December* 22, 1825.

SIR: I have the honor to transmit a report, prepared in obedience to the "Act supplementary to the act to establish the Treasury Department."

I have the honor to be, with great respect, sir, your obedient servant,

RICHARD RUSH.

The Hon. SPEAKER *of the House of Representatives.*

REPORT.

In obedience to the directions of the "Act supplementary to the act entitled an act to establish the Treasury Department," passed on the 10th of May, 1800, the Secretary of the Treasury has the honor to submit to Congress the following report:

1. OF THE PUBLIC REVENUE AND EXPENDITURE OF THE YEARS 1824 AND 1825.

There being no direct taxes of any kind, duties of excise, or other internal duties in operation under the authority of the United States, the public revenue, by their existing laws, arises almost entirely from duties upon foreign merchandise imported, and upon tonnage, and from the sale of the public lands. There are other branches from which small and occasional receipts are derived, as dividends on bank stock, the Post Office, arrearages of taxes due under former laws, and other incidental payments, the aggregate of which, whether from temporary or permanent sources, is inconsiderable, as will appear by statements annexed to this report, where all are recapitulated.

The receipts from the Post Office, indeed, have, of late years, exceeded a million of dollars annually; but this sum, exhausted for the most part in defraying the expenses of that extensive and useful establishment, performs, in this manner, the highest purposes of revenue, by contributing to the intercourse, the trade, and the prosperity of the country.

The net revenue which accrued from duties on imports and tonnage during the year 1824 amounted (see statement A) to		$20,385,430 42
The actual receipts into the Treasury, from all sources, during the year 1824, amounted (including the loan of five millions, at four and one-half per cent. interest, to discharge Florida claims,) to		24,381,212 79
Viz:		
Customs, (statement A)	$17,878,325 71	
Public lands, (statement D)	984,418 15	
Dividends on stock in the Bank of the United States, arrears of internal duties and direct taxes, and incidental receipts, (statement E)	472,987 04	
Repayments of advances made in the War Department, for services and supplies, prior to July 1, 1816	45,481 89	
Loan made under the act of the 24th of May, 1824, "to provide for the awards of the Commissioners under the treaty with Spain,"	5,000,000 00	
Making, with the balance in the Treasury on the 1st of January, 1824, of		9,463,922 81
An aggregate of		33,845,135 60
The regular and permanent expenditures of the United States divide themselves into two principal branches: First, the sums authorized by law for defraying the whole expenses of the Government, domestic and foreign, civil, military, and naval; second, those provided for the payment of the interest and principal of the public debt.		
The actual expenditures of the nation, on all accounts, during the year 1824, amounted (statement F) to		31,898,538 47
Viz:		
Civil, diplomatic, and miscellaneous	$7,155,308 81	
Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st of January, 1817	5,270,254 34	
Naval service, including the gradual increase of the Navy	2,904,581 56	
Public debt	16,568,393 76	
Leaving a balance in the Treasury on the 1st of January, 1825, of		1,946,597 13

The difference between this balance and that stated in the last annual report from the Treasury is reconciled by the facts that the balance last year was given as an estimated balance, subject to correction

by actual settlement afterwards, and that it included the moiety of the loan of five millions under the act of May 26, 1824, which was not paid into the Treasury until after the 1st of January.

The actual receipts into the Treasury during the first three quarters of the year 1825 are estimated to have amounted to.....		$21,681,444 56	
Viz:			
Customs.....	$15,196,397 00		
Public lands, (statement G).....	976,902 67		
Dividends on stock in the Bank of the United States	367,500 00		
Arrears of internal duties and direct taxes and incidental receipts, (statement H).....	98,886 29		
Repayments of advances made in the War Department for services or supplies prior to July 1, 1816.....	41,758 60		
Loan under the act of May 26, 1824.....	5,000,000 00		
And the actual receipts into the Treasury during the fourth quarter of the year are estimated at.....		5,100,000 00	
Making the total estimated receipts into the Treasury during the year 1825.....			$26,781,444 56
And, with the balance in the Treasury on the 31st December, 1824, of.....			1,946,597 13
An aggregate of.....			28,728,041 69
The expenditures during the first three quarters of the year 1825 are estimated to have amounted (statement I) to.....		$20,190,979 91	
Viz:			
Civil, diplomatic, and miscellaneous.....	$2,098,525 16		
Military service, including fortifications, ordnance, Indian Department, revolutionary and military pensions, arming the militia, and arrearages prior to January 1, 1817.....	4,890,310 59		
Naval service, including the gradual increase of the Navy.....	2,127,156 37		
Public debt.....	11,074,987 79		
And the expenditures during the fourth quarter are estimated at....		3,253,000 00	
Viz:			
Civil, diplomatic, and miscellaneous.....	$445,000 00		
Military service, including fortifications, ordnance, Indian Department, revolutionary and military pensions, arming the militia, and arrearages prior to January 1, 1817.....	960,000 00		
Naval service, including the gradual increase of the Navy.....	820,000 00		
Public debt.....	1,028,000 00		
Making the total estimated expenditure of the year 1825.....			23,443,979 91
And leaving in the Treasury on the 1st of January, 1826, an estimated balance of.....			5,284,061 78

Should the expectations formed respecting the receipts in the fourth quarter be realized, the amount of receipts for the whole year will have exceeded the estimate presented by the Treasury at the last session of Congress by about $500,000.

It is to be remarked, that of the above estimated balance of $5,284,061 78 the sum of $3,500,000 is not subject to appropriation, being the estimated amount that will remain on the 31st of December next unsatisfied of appropriations heretofore made. These appropriations, being necessary for the objects for which they were severally made, are still an existing charge upon the means of the Treasury.

Of the residuary balance of $1,784,061 78, it is proper distinctly to state that about one million cannot be counted upon in any estimate of effective funds for the public service. It is made up of debts due from various banks whose notes were received by the Government during the suspension of specie payments, or which were heretofore used as banks of deposit—debts of which the recovery must, in regard to a large part, be doubtful, and, in any case, slow. It may be proper to add that the permanent deposits, generally, made in State banks, have recently been withdrawn, or put in train to be so; the public exigencies which rendered it necessary to make them, in common with those on which the losses above mentioned are likely to occur, no longer existing. Such portions of the deposits as may still remain in any of these institutions will be further withdrawn, as circumstances may render just and expedient, until these operations are closed; nor will they be renewed where it may be avoidable.

It may be proper, also, to state that directions have lately been issued to all the Receivers and Collectors of the Public Revenue not to receive, in any payments made to them, bank notes of any of the State banks of less amount than five dollars. In discountenancing a species of paper circulation deemed to be objectionable, reference was had to the authority and example of Congress upon this point, as seen in the prohibition to the Bank of the United States, and to the banks existing in the District of Columbia, against issuing notes of a lower denomination. To guard against all inconvenience to individuals from the adoption of this measure by the Treasury, especially in the districts where the public lands are sold, an adequate previous notice was directed to precede its enforcement.

2. OF THE PUBLIC DEBT.

The total amount of funded debt, due on the 1st of October, 1825, (statement No. 3,) was	$80,985,537 72
Of the above amount, the only portion remaining unpaid, of the revolutionary debt, is the 3 per cents, amounting to $13,296,231 45. This sum and the subscription of seven millions in the Bank of the United States, at five per cent., (the United States holding an equal amount in the shares of that institution,) are redeemable at the pleasure of the Government, making together	20,296,231 45
The residue of the public debt, contracted subsequently to the 1st of January, 1812, and amounting to $60,689,306 27, exists in the following portions, and is redeemable at the following periods, viz:	
In 1826, being the residue unpaid of loans made in 1813	16,270,797 24
In 1827, being the residue unpaid of loans made in 1814	13,096,542 90
In 1828, being the residue unpaid of loans made in 1815	9,490,099 10
The stock of the foregoing portions of the debt is all at 6 per cent.	
In 1829, stock at 4½ per cent., being the moiety of 6 per cent. stock of 1813, exchanged under the act of Congress of March 3, 1825	792,569 44
In 1830, stock at 4½ per cent., being the other moiety exchanged as last above stated	792,569 44
In 1831, stock at 5 per cent.; this is one-third of the sum of $56,704 77, issued in exchange for the 6 per cents of 1813, 1814, and 1815, subscribed under the act of the 20th of April, 1822	18,901 59
In 1832, stock at 5 per cent., being one other third part of the sum subscribed as last above stated	18,901 59
In 1832, stock at 4½ per cent., borrowed of the Bank of the United States, one half to pay the Florida claims, the other half to pay off the 6 per cent. of 1812, under the act of Congress of May 26, 1824	10,000,000 00
In 1832, stock at 5 per cent., under the act of Congress of May 15, 1820	999,999 13
In 1833, stock at 5 per cent., being the remaining third, subscribed under the act of April 20, 1822	18,901 59
In 1833, stock at 4½ per cent., being one moiety of the amount subscribed in exchange for 6 per cent. stock of 1813, under the act of May 26, 1824	2,227,363 97
In 1834, stock at 4½ per cent., being the other moiety subscribed as last above stated	2,227,363 98
In 1835, stock at 5 per cent., being the amount issued under the act of Congress of March 3, 1821	4,735,296 30
Total redeemable at the period specified	60,689,306 27
Total redeemable at the pleasure of the Government	20,296,231 45
Total amount of funded debt on the 1st day of October, 1825	80,985,537 72

The amount of Treasury notes outstanding on the 1st of October, 1825, is estimated (No. 4) at $16,600.

And the amount of Mississippi stock unredeemed on that day, including awards not applied for, (No. 5,) at $7,850 17.

The foregoing recapitulation exhibits the precise amount of the public debt now due, as well as the different periods at which, by the terms of the several loans under which it was contracted, the United States are at liberty to pay it off. Of the sum of $11,074,987 79, mentioned under the head of expenditures for 1825 as having been paid off in that year, $7,727,052 19 were on account of the principal of the debt, and the remainder on account of interest during the first three quarters of the year. Nearly the whole of the principal thus paid was outstanding at an interest of six per cent. Looking to the above recapitulation, it appears that in the years 1826 and 1827 a larger amount of debt becomes redeemable than it will fall within the ordinary surplus means of the Government to pay in the course of those years, viz: a sum exceeding sixteen millions in the former and thirteen millions in the latter year. Both these portions of the debt are also at an interest of six per cent. In 1828 the amount redeemable is at a point which it may be hoped the stated means of the Treasury for that year will reach; the ability to pay off increasing as the process of reduction advances, both by the increasing means of the nation and the annual liberation of interest on the amount of debt reduced. But in the year 1829 only a very small amount becomes redeemable, viz: less than one million, and in the year 1830 a sum no larger.

At the period of the last annual report from the Treasury no portion of the debt became redeemable in either of those years; and, with a view to a more equal diffusion of payments, as well as to effect a saving in interest, it was recommended that the excess of debt which could not, by the ordinary resources of the Treasury, be discharged in 1826 and 1827, the debt redeemable in the former year, then standing at $19,000,000, should be thrown in equal portions upon the years 1829 and 1830. To carry this recommendation into effect, so far as applied to the year 1826, a loan of twelve millions was recommended, at five per cent.—one half to be redeemable in 1829, the other half in 1830; the entire twelve millions being intended to constitute a fund with which, in conjunction with the annual surplus means of the Treasury, to pay off the nineteen millions redeemable in 1826. The principle of the recommendation was adopted by Congress, but not its precise terms. An act was passed on the 3d of March, 1825, authorizing an exchange of stock to the amount of twelve millions of dollars, at 4½ per cent., for a stock of like amount at 6 per cent., the latter being so much of the stock of 1813 as was intended by the act to be redeemed. The act also authorized a loan to the same amount, and at the same rate of interest, to accomplish the same object; both modes not to be pursued if either succeeded. The new stock of 4½ per cent., whether proceeding from the exchange or the loan, was, by the terms of the act, to be subject to redemption in 1829 and 1830 in equal portions. The proper measures were taken to execute this act, but have prevailed only to a limited extent.

The operation of exchange which was first resorted to took effect to the amount of $1,585,138 88, and this sum, divided into equal parts, forms the two sums that now stand in the general table of the debt as redeemable in the years 1829 and 1830, whilst they have also served to diminish by so much

the six per cent. stock of 1813. Proposals for a loan for the residue of the sum wanted were next issued, but no offers were received. The causes of the failure, it may be presumed, were the low rate of interest and short periods of redemption held out by the act, in conjunction with an activity in the commercial and manufacturing operations of the country, affording higher inducements to the investment of capital. This mode of dealing with the debt, whereby, through the instrumentality of new loans, stock at a high interest is converted into a stock at a reduced interest, and whereby, also, the extinguishment of the principal is made to fall in payments as nearly equal as may be throughout a given number of years, is evidently advantageous to the public, since it not only lessens the national expenditure, on account of interest, but guards against the possible accumulation of money in the Treasury in years when it might remain inactive towards the progressive reduction of the debt. As it is a mode fully sanctioned by Congress heretofore, it is respectfully recommended, on this occasion, that an act be passed, at an early day of the session, giving authority to borrow nine millions of dollars at an interest not exceeding five per cent., redeemable in equal portions in 1829 and 1830, in order that the Treasury may be enabled to pay off, in 1826, the entire remaining amount of the six per cent. stock of 1813, redeemable in that year. Nine millions, with the disposable means which the Treasury will probably have at command in 1826, it is believed, will form a sum commensurate with this object. Five per cent. is named as the maximum of interest, and, considering the short period of redemption, it is not probable that the loan could be obtained at a lower rate. The contingencies of the money market might, indeed, produce more favorable offers; but these are not to be counted upon with any approach to that certainty which should form the basis of such a financial operation.

Should the act in question be passed, it is further respectfully recommended that, in the event of the loan being obtained under it, authority be given to issue to the holders of the stock under the 3d of March last, exchanged stock equal to the amount of the subscription before stated, viz: $1,585,138 88, bearing the same rate of interest as that which may be issued under the act proposed. The two acts will have had precisely the same object. The second, should it succeed, will only have consummated an operation which will date its inception from the first. It is therefore considered that it will belong to a proper estimate of good faith to place the stockholders under both acts upon a footing of equality. Those who were willing to accede to the terms of the Government at an early day in this transaction should not be left in a worse situation than those who may have held back in the hope of better offers. Let all be treated alike. It is thus that the Government will exalt itself before the nation. It is thus that, substituting an expanded justice for the mere letter of a bargain, it will be likely to invite still larger confidence in future. It is thus that it will ultimately be the gainer by that connexion invariably subsisting between the permanent interest of every Government, and its standing of unimpeachable and spontaneous equity in the eyes of the public creditor.

Should an act for the loan of five millions be passed, a considerable surplus of the debt at 6 per cent. will still remain to be provided for the service of 1827. More than thirteen millions of the stock of 1814 becoming redeemable in 1827, the whole cannot be redeemed in that year but with the aid of a loan. A loan of six millions would be sufficient, in all probability, for this purpose, and is accordingly recommended. The interest not to exceed five per cent., and the amount to be also subject to redemption in 1829 and 1830 in equal portions. The effect of the two loans recommended, which it would be most desirable to authorize in distinct acts, would, it is believed, be to enable the Government to redeem the whole of the 6 per cent. stock of 1813 and 1814 in the course of 1826 and 1827. It would also throw upon each of the years 1829 and 1830 an amount of debt equal to about eight millions and a half, instead of less than one million, according to the distribution as at present existing. The only remaining stock of six per cent. would then be that of 1815, in amount under nine millions and a half, redeemable in 1828. Should no unforeseen expenditures arise, and a proper economy be kept up in the public administration, it may reasonably be hoped, as before intimated, that the surplus revenue at the disposal of the Treasury in 1828 will be equal to the reimbursement of that sum. After 1830 the whole amount of debt, on the results herein assumed, would stand at about forty millions; full one-half of which will be redeemable at the pleasure of the Government. No portion of it will be at an interest exceeding five per cent., whilst the principal part will be at a rate still lower. With these views of the public debt, so encouraging in their bearing upon its speedy, certain, and regular extinguishment, it is not deemed necessary to recommend, at present, any other measures in relation to it than the two loans described.

3. OF THE ESTIMATE OF THE PUBLIC REVENUE AND EXPENDITURE FOR 1826.

The public revenue is derived in an amount so preponderating from foreign commerce that the state of the latter is always to be chiefly looked to in every prospective view of the national income. As the internal business of the country has worn a character of activity and increase during the present year, so has also its foreign trade by that close connexion which subsists between them. The exports for the year ending on the 30th of September last, have exceeded ninety-two millions of dollars. The imports have exceeded ninety-one millions. Of the exports, upwards of sixty-six millions were of domestic and the remainder of foreign productions.

Of the imports, upwards of eighty-six millions were in American vessels. Of the exports, upwards of eighty-one millions. Considering that the vessels of those foreign nations with which the United States have the most extensive commercial intercourse are now placed upon a footing of equality as to duties and charges of whatever kind in our ports with the vessels of the United States, this heavy excess of American tonnage is a signal proof of the flourishing state of our navigation. It may serve to show how the efficient protection extended to it by the early laws of Congress succeeded in establishing it in a manner to meet and overcome all competition. Before the era of those laws it is known how this great interest languished; how little able it proved, before the auxiliary hand of Government was stretched out, to support itself against the established superiority and overwhelming competition which it had to face in the world.

The foregoing amount of exports exceeds by about seventeen millions of dollars the average amount for the three years preceding. The imports exceed by about eleven millions the same average. Whilst this large excess of exports during the past year arises chiefly from the produce of the soil, it is satisfactory to know that domestic manufactures have lent their contribution. Of the latter there have been exported to the value of between five and six millions of dollars; this is an excess of eight hundred thousand dollars over those exported in 1824, and of more than two millions of dollars over those

exported in 1823. The progressive increase in this branch of industry is naturally ascribable to the new tariff.

The effects of the tariff upon the course of our foreign trade in other respects have as yet been but very partially disclosed. More time must elapse before such a body of successive facts can be presented under it as may lay a foundation for confident conclusions. The law itself, by the terms of its enactment, has not yet come into full operation in all its parts; and the returns in possession of the Treasury are not yet complete, even for the short period during which its principal provisions have had any efficacy. One thing seems apparent, that its effect, up to the present period, has not been to diminish the general aggregate of the foreign trade of the country. In estimating the value of the importations for the last year it is probable that even an increase will be found to have taken place in some articles on which the duties were raised, as in fabrics of cotton, and in several articles composed of iron, whilst in other articles of this last material, as well as some articles composed of wool, a decrease will be observable. But a fact challenges notice, that can scarcely have been without its operation upon our importations during the commercial year just closed: it is the extensive changes that were announced in March last in the tariff of Great Britain. The trade of that country exerts such an influence upon the trade of other countries that any important alterations in the former must always be likely to affect, to a greater or less extent, the markets of Europe and of the commercial world. The larger admission into England, which the above changes authorized, of the commodities of other countries, heretofore positively or virtually excluded for ages from her ports, must have affected the prices of a portion, at least, of those commodities by the prospect of a new vent thus suddenly opened to them. This is known to have been the case in regard to some commodities, the duties upon which were lowered by the British tariff; which commodities are, also, amongst those imported from Europe into the United States. It is presumable that it may have been the case in regard to others less distinctly known. Hence, the additional value of foreign merchandise imported into the United States during the past year cannot, in all cases, be taken as the true measure of an additional quantity, the laws of the United States requiring the value of foreign articles to be fixed at the port of exportation, and at the time of exportation. These changes in the British laws of trade, operating simultaneously with the new tariff at its commencement, increases the difficulty of ascertaining at this juncture the exact effects of the latter, even for a single year, upon the course of the foreign trade of the United States.

The importations for the year being so large, and the provisions of the new tariff mainly attaching to them, a corresponding amount of revenue will arise from this source during the year. Accordingly, the gross amount of duties accruing upon imports and tonnage from the 1st of January to the 30th of September last is estimated at twenty-five millions five hundred thousand dollars. The gross amount that will probably accrue for the whole year is estimated at thirty-one millions. Should this amount prove to be correct, it will exceed by six millions of dollars the amount which has accrued during any one year since the excessive importations that immediately followed the war, viz: those of 1815 and 1816.

In estimating the clear revenue that may be expected to arise from the duties of the year, the amount of them to be drawn back on exportations of a portion of the articles on which they have accrued, the losses that may happen, and the expenses of collection, are all to be taken into consideration. The duties secured by bond during one year are chiefly payable in the year that follows. A portion is payable in the same year; but this is generally counterbalanced by the portion that also becomes payable in the next year on the importations of that year. It will be more than counterbalanced if the importations prove greater, and will not be met if they prove less. Debenture certificates for payment of drawback being demandable at any time within a year after the importation of the articles intended to be exported, the number and amount of them chargeable upon the accruing duties of the year can never be accurately foreknown.

The debentures issued during the first three quarters of the present year amounted to $4,489,710 29. This is more by $1,537,710 99 than those issued during the corresponding period of the preceding year. The amount of those outstanding on the 30th of September last, and chargeable upon the revenue of 1826, was $1,858,315 64, which is more by $854,313 64 than was chargeable on the same day, in 1824, upon the revenue of 1825.

The amount of duty bonds in suit on the 30th of September last was $2,987,347 22, which is $92,791 98 more than was in suit on the same day in the year preceding.

Deducing from the foregoing statements the conclusion and probabilities that may at present seem warrantable, the receipts for 1826 are estimated as follows, viz:

From customs	$24,000,000 00
From public lands	1,000,000 00
From bank dividends	385,000 00
From miscellaneous and incidental receipts	115,000 00
Making an aggregate of	$25,500,000 00

The expenditures of the year are estimated as follows, viz:

Civil, miscellaneous, and diplomatic	2,032,454 66	
Military service, including fortifications, ordnance, Indian department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st of January, 1817	5,525,662 55	
Naval service, including the gradual increase of the Navy	3,026,612 81	
Public debt	10,000,000 00	
Making together		20,584,730 02
Which will leave in the Treasury on the 31st December, 1826, after satisfying all the demands of that year, a surplus, estimated at		4,915,269 98

If the remark be entitled to any attention, that the recent alterations in the British laws of trade have affected the importations into the United States during the existing year, by increasing their ad valorem amount, it ought not to create surprise if the value of importations in 1826 should fall below

those of 1825, because, admitting that those laws served, on their first promulgation, to enhance the price of certain enumerated commodities in the markets of Europe, it is not probable that this effect of them will be either extensive or permanent. One of their main provisions is known to consist in a reduction of the duties upon a list of articles manufactured in the different countries of Europe as well as in Britain. But the most important articles of this list were already so thoroughly established in the manufactories of Britain as to be beyond the reach of competition from abroad. Hence, the privilege of introducing them there, and especially to any large extent, (meaning for consumption in Britain, without here alluding to her warehousing system,) must prove, in the end, to be nominal rather than real. Among the list are seen fabrics of woolen, of cotton, of linen, of hardware; and the new scale of duties is to have added to them in every case the amount of any internal excise duty previously existing, or which may at any time afterwards be imposed upon the same articles when manufactured in England. The forecast of that country, in all that relates to the interests of her manufactures, justifies the belief that she will not fail to conciliate the continued protection of them with whatever other abrogations she may ingraft upon her commercial code, either in relation to other nations of the world, or to her own dependencies in whatever part of it.

It has been seen how largely the exportation of our own manufactures during the past year has exceeded the exportations of the two years preceding. It may be added that in no previous year since the foundation of the Government has the exportation of American manufactures reached an amount at all approaching to that of 1825. This is known from official documents as far back as 1803, and no doubt can be entertained of its being true for the remainder of the period. This fact, in conjunction with the increasing consumption of these manufactures at home, and not less of their improving quality, gives gratifying assurance of the progress of this most important branch of the national industry. It may be considered as marking the commencement of an epoch in the national resources, since an intimate connexion is believed to exist between the full encouragement and success of domestic manufactures and the wealth, the power, and the happiness of the country. The United States would, it is thought, overlook what is due to the essential interests of their agriculture, which can never reach the full point of prosperity but under the constant and various demand of the home market; of their foreign commerce, which can never expand to its full limit of activity, or reap its full measure of riches, but with the aids of an active home trade, and of an export trade enhanced in its value by being diversified in its objects; of the exuberance of their soil, yielding the best materials for so many of the fabrics which conduce to the wants, the comforts, and the refinements of the social state; of the industry, the enterprise, the frugality of their people; of the unrivalled equality of their laws, which, interdicting exclusive rights and monopolies, invites the most energetic exertions of every individual in the field of competition; and, finally, of the advantages flowing from the absence of pecuniary exactions, by the hand of Government, upon the internal products and labor of the country, if they do not vigorously uphold the manufactures of the country, now, for the first time, appearing to be upon the eve of striking root. It is a commencement that deserves every seasonable improvement. The territorial size and fertility of a country depend upon nature or upon accident. Both the one and the other may exist upon the largest scale, but in vain, if a provident Government do not second these gifts, whilst nations destitute of them, and struggling against positive obstacles of nature, are seen to arrive, through the wisdom of their policy, at the heights of prosperity and renown. To give perfection to the industry of a country rich in the gifts of nature, and blessed in the beneficence of its Government; to draw out its obvious resources, and seek constantly for new ones, ever ready to unfold themselves to diligent inquiry, urged on by adequate motives; to augment the number and variety of occupations for its inhabitants; to hold out to every degree of labor, and to every modification of skill, its appropriate object and inducement; these rank among the highest ends of legislation. To organize the whole labor of a country; to entice into the widest ranges its mechanical and intellectual capabilities, instead of suffering them to slumber; to call forth, whenever bidden, latent ingenuity, giving to effort activity, and to emulation ardor; to create employment for the greatest amount of numbers, by adapting it to the diversified faculties, propensities, and situations of men, so that every particle of ability, every shade of genius, may come into requisition, is, in other words, to lift up the condition of a country, to increase its fiscal energy, to multiply the means and sources of its opulence, to imbue it with the elements of general as well as lasting strength and prosperity. It is in the destiny of nations that the highest points of advancement are not to be arrived at but through the complicated yet harmonious action of these elements. That extensive and flourishing manufactures, with the train of useful arts allied to them, tend to propel nations in this onward course, is a maxim believed to be enforced by the best lights of experience, and to be of peculiar application to the United States under the present circumstances of their interior and external condition. By a flourishing state of manufactures we shall see rising up a new class of capitalists, rivalling, in the extent and usefulnes of their operations, and in the amount of their gains, the wealthiest of our merchants; spreading, too, by the education and habits for which their pursuits when largely conducted make a call, useful knowledge and science wherever those pursuits concentre. By a flourishing state of manufactures we shall see the gains of the merchant augmented even in his trade of imports, since, for every foreign fabric excluded from consumption by the ultimate use of the rival fabric at home, other fabrics will find their way to us, consumption having no limits but the ability to buy, and this ability invariably increasing as home manufactures assume variety and attain perfection. It is then that they create and diffuse wealth by what is the only true foundation of it in a nation, the universal, subdivided, and successful industry of the people. It is then that they make a call for an abundant circulating medium by quickening the operations of purchase and sale. It is then that they attract the precious metals to a country, and, beyond any other power of retention, keep them there. By numerous manufactures we shall see agriculture, the first pillar in the State, stand firm; for when they shall have raised up new capitalists, who so sure to maintain profitable dealing with them as the owner of the soil? For the treasures that cover its surface and that lie beneath it he is then sure to find a market both regular and growing, whatever the political or mercantile vicissitudes at a distance, and as sure to buy at cheap rates the fabrics that he wants, cheapness being the necessary consequence of full competition among a powerful class of artisans at home. By numerous manufactures, in fine, we shall see reared up in the State that additional pillar which, standing in the middle, is indispensable to the stability of the other two; for the State must be in a false position, lying perpetually at the mercy of extrinsic events, when reposing only upon foreign commerce and agriculture. The great intermediate interest, strengthening and upholding both the others, is manufactures. When to the complete establishment of these the internal improvement of the country shall have been superadded, the farmer of the United States cannot but perceive that the measure of his prosperity is made potentially full. Discouraging distances between

himself and his customers exist no longer. Through the wisdom of art the obstacles of nature disappear. He sees combined with the advantages of a country of almost boundless extent and capacity of production the facilities of a quick intercourse, which compensate to small countries the want of these advantages. He sees time anticipated in the effective augmentation of our numbers, for, as with machinery in manufactures, so with canals and good highways, they change the relative weakness of thin and scattered into the activity and power of a condensed population, thereby exemplifying the highest wisdom of legislation; the noblest works of Government, guided by the intelligence and stimulated by the energy of freedom.

In giving these opinions in favor of domestic manufactures, it is known that other opinions exist on this subject, claiming the support of distinguished names both at home and abroad. For these opinions, as they have from time to time been witnessed in the discussions of the legislative hall at home, the utmost deference is felt. Nevertheless, it is deemed proper to communicate with candor those contained in this report, deliberately weighed as they have been, and uttered as they also are, under the obligations of official duty. In the submission of plans for the improvement of the public revenue, none occur more likely to prove salutary than those that look to the fostering of manufactures, under the truth that in the multiplied productions of nature and art in a country, the result of industry and skill everywhere diffused, lie the best and only foundations of finance. When the people of a country are universally and profitably employed, the aggregate of individual becomes the surest measure of national prosperity; and revenue for the public occasions will always be at hand, under whatever forms the Government may deem it most expedient and least burdensome to call it forth. The facts of the world are on the side of these opinions, it being incontestable that nations which have reached the most imposing heights of physical and intellectual power are those in which manufactures have been the most numerous, and arrived at the greatest perfection. It is more applicable to add that this perfection, amongst the nations where it has been most conspicuous, has been achieved through the most comprehensive and vigorous protection afforded to this kind of industry—a protection persevered in throughout ages, and never given up whilst its objects remained unaccomplished. The speculative economists of Europe are in opposition to the experience that surrounds them, and not less frequently to each other and to themselves, when they would hold up to any one nation the asserted benefits of an opposite system. "France," says one of her most celebrated writers of this class, (but who knows how to reconcile the enlightened ideas of free trade with those first duties that every nation owes to itself,) "is, probably, indebted for the beauty of her silk and woolen manufactures to the wise encouragement of that administration which advanced to the manufacturers two thousand francs for every loom at work." The same writer, (Say,) whilst describing the condition of some of the provinces of that country, and which, as he says, wanted nothing but towns to bring them into high cultivation, adds, "that hopeless, indeed, would be their situation were France to adopt the system which recommends the purchase of manufactures from foreign countries with the raw produce of domestic agriculture." France still adheres, in the midst of riches and power, to the practice on which these sentiments are founded. Nor is the example of Britain, up to this very moment, less absolute or less instructive. The prohibitions, the bounties, the high duties, the penalties, by force of which, throughout a long tract of time, the manufactures of that country have gained so much excellence, never, in anywise, abated until, by the recent avowals of her statesmen, high in intelligence, as authority, British fabrics were not merely certain to continue the supply, immense as it is known to be, of the home demand, but to find their way, in a proportion far greater than those from any other country, into all the markets of the world. The United States, with a combination of natural and political advantages as transcendent in number as degree, have before them these and other examples; the lights of co-existent nations; the amplest demonstrations of experience for building up their manufactures; and by that vigilant legislative assistance, without which they have never been known in any country to establish themselves in large or durable pre-eminence. Nor has this policy been found to interfere with an abundant foreign commerce in the wealthiest and most industrious nations. It has, on the contrary, carried its bounds still further, since every nation, by its habits and position, will always command superior facilities for excelling in certain branches of labor and art, which it therefore chiefly cherishes, leaving to other nations the opportunity of excelling in other branches, or of running the career of beneficial rivalry in the same; by which system the artificial productions of the world are augmented and improved, and the fields of traffic, through the increasing desires and varying tastes of mankind, as opulence and civilization make new advances, more and more extended and enriched. If the nations of Europe, whose industry and interchanges move in circles geographically proximate to each other, have yet adopted this policy, or have fallen back in their prosperity by the fact of its absence; if those nations that have adopted it are still seen to keep to it, or have only swerved from it after its ends have been attained, by stronger reason should the United States act upon it. Their remoteness from all the chief sources of supply of manufactured articles forms the additional motive, not to invoke that which might be drawn from the burdens, and even exclusions, still in full existence in other countries against some of their primary productions. That a populous and independent nation, a nation civilized since the moment of its existence, and whose institutions, by their essential principle, tend to accelerate it in the career of intellectual and social, as already they have conferred upon it political eminence, should have continued, as long as the United States have done, to derive from a distance, to be computed only by the space of oceans, so many of the fabrics which conduce to the necessary or tasteful accommodations of life, if not without precedent, has, perhaps, not before existed in the case of any other nation upon the same extensive scale. Without adverting to the contingencies which may diminish or cut off this supply from remote hemispheres, the very deterioration to which time, and more frequently casualty, expose no inconsiderable portion of these fabrics before the natural and intended uses of them can be exhausted, and where the skill that made is too often alone competent to renovate or repair, becomes, by so much, a dead loss to the capital of the importer or consumer, and consequently to that of the nation. The amount of it would go far, it is believed, towards forming a fund for encouraging the equally perfect fabrication at home of most of the articles of foreign origin, consigned, by the cause alluded to, to premature inutility or destruction. Besides the advantages of manufactures for home use, the present moment is deemed to be peculiarly auspicious, not to say urgent, for fostering them, from the situation and circumstances of the rest of the world. An era has arrived, upon which after ages are to look back as to a point in the commercial destinies of mankind. The colonial system is fast falling to pieces: over immense regions it is totally gone, involving the certainty of changes both in the channels and the objects of trade, as vast as they will be various. The family of nations has been extended; new continents, new oceans, are opened to independent intercourse, to a just and equal participation in the benefits of which

the United States cannot but be alive. These benefits they can scarcely derive to the full and proper extent but by giving themselves to the large fabrication of those works of art for which their climate, their productions, and the skill and capital of which their citizens are already in possession, especially qualify them. The course of their export trade for the last two years, as stated in this report, is an encouraging omen of their ability and aptitude to enter this new and great field of competition. Not to follow up such beginnings by timely and judicious measures, might be to let opportunities pass not always to be recalled. Whilst nations, shut out by their limited territory from agricultural products as the basis of foreign trade, have yet pushed the latter to its furthest limits by manufacture alone as that basis, it is the favored lot of the United States to superadd to the extent and riches of their soil a state of social advancement and an amount of town population already equal to the most extensive and varied operations of manufacturing industry. Not to found establishments by which this species of profitable industry may take life and spread over the land, would, it is believed, be to forget alike what is due to the best interests of agriculture on the one hand, and to the further enlargement of our commercial power upon the other.

In expressing the convictions embraced in the foregoing remarks, it is not intended to close them by recommending any general revision of the tariff as fixed by the act of Congress of the 22d May, 1824. But it is deemed proper, under cover of them, respectfully to submit the expediency of effectually increasing the existing duties upon all manufactures of cotton *of a fine quality.*

The facilities and inducements to the fabrication of cottons of every description in the United States are so great that the most beneficial consequences may be anticipated from the full establishment of this manufacture in all its finer branches, in like manner as, by the protection already afforded to cotton fabrics in the coarser branches, we have seen these latter established with advantages so manifold and decided. And should we establish completely the former also, such is the quantity in which we produce the raw material of this prominent manufacture of modern times, and, what is still more important, such is its quality, that there is no cause for apprehending that our immense exportations of it abroad will stop; on the contrary, it may be expected that they will go on progressively increasing.

Concurrently with this recommendation for an augmentation of duties on all cotton manufactures of fine quality, it is deemed advisable to submit also the expediency of lowering, to a small extent, the duties at present existing upon teas, upon coffee, and upon cocoa.

These articles, especially the two former, are of such large consumption in the United States as to take rank among the necessaries of life. They go to make up a part of the daily beverage of the poor as well as the rich, and should, therefore, not be pressed upon too heavily by the hand of taxation in any form; the less as they trench upon no rival production at home. Their more enlarged consumption would tend to increase, in corresponding proportion, the demand for sugar, thereby fostering a valuable production of some of our own States. The more widely, also, the habit of their use can be extended, the greater, it is believed, would be the prospect of seeing lessened the consumption of ardent spirits, so baneful in their effects upon the industry, the health, and the morals of the community. Under these views alone, regarding their connexion with the public prosperity and individual happiness, any temporary or partial loss to the revenue that might result from an adoption of this last recommendation ought to be considered as compensated. It is not, however, certain that such loss would result, from the increased demand that might be expected to grow up for these articles, by a reduction of the present impositions upon them. As regards teas, it may be added, as an additional motive to the recommendation, that, under the present duties, there is reason to apprehend some falling off, ultimately, in our China trade, from the late laws and regulations of Britain, bearing upon this important article of merchandise. The interests of a valuable portion of our foreign trade, therefore, and of our shipping, appear to be at stake in fixing the duties upon teas of all kinds at rates somewhat lower than as at present established.

All which is respectfully submitted.

RICHARD RUSH.

TREASURY DEPARTMENT, *December* 22, 1825.

A.

A statement exhibiting the amount of duties which accrued on merchandise, tonnage, passports, and clearances; of debentures issued on the exportation of foreign merchandise; of payments for drawback on domestic distilled spirits and domestic refined sugar exported; of bounties on salted fish exported; of allowances to vessels employed in the fisheries; of expenses of collection; and of payments made into the Treasury during the year ending on the 31st day of December, 1824.

Duties on merchandise	$25,494,628 55
Duties on tonnage, &c.	126,516 44
Duties on passports and clearances	10,986 00
Debentures issued	4,277,923 74
Drawback on domestic distilled spirits and domestic refined sugar	1,973 48
Bounties and allowances	214,870 88
Gross revenue	21,137,362 89
Expenses of collection	751,932 47
Net revenue	20,385,430 42
Payments made into the Treasury	17,878,325 71

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, December* 21, 1825.

[Statement B, giving the details of the revenue from customs in 1824, will be furnished by the 30th instant; and C, relating to the tonnage employed in foreign trade, will accompany it.]

Lands sold and moneys received for lands from the 1st of January, 1824, to the 31st of December, 1824, and of payments made into the Treasury during the same period on account of public lands.

OFFICES.	Lands sold in 1824.	AMOUNT RECEIVED.			EXPENSES.		
		Amount received for lands in 1824.	Amount received in 1824 for lands sold prior to the 1st of July, 1820.	Total amount receiv'd in 1824.	Incidental expenses, including salaries and commissions.	Repayments made to individuals for lands erroneously sold.	Payments made into the Treasury.

E.

Statement of the moneys received into the Treasury from all other sources than customs and public lands during the year 1824.

Dividends on stock in the Bank of the United States	$350,000 00	
From arrears of old direct tax of 1798	5,203 50	
new direct tax	998 46	
new internal revenue	34,663 37	
Fees on letters patent	6,270 00	
Cents coined at the Mint	15,475 00	
Passage money of American seamen returned	10 00	
Surplus emoluments of officers of the customs	31,490 56	
Interest on balances due by the Bank of Elkton to the United States	2,085 33	
Received under the act to abolish the United States trading establishment	22,519 20	
Moneys previously advanced on account of prisoners of war	3,708 62	
Ditto military pensions	563 00	
		$122,987 04
Balances of advances made to the War Department, repaid under the 3d section of the act of May 1, 1820	45,481 89	
Loan of five millions of dollars, at 4½ per cent., to provide for the awards under the Spanish treaty	5,000,000 00	
		5,518,468 93

Amount paid into the Treasury in the first two quarters of 1825	$725,440 17
Amount paid into the Treasury in the third quarter of 1825	251,462 50
Total amount paid into the Treasury in three quarters of 1825	976,902 67

* N. B.—The extensive operations at Cahaba, Alabama, under the relief law of 1824, have unavoidably delayed the transmission of their returns from that office up to the period of this statement. It is presumable that about $100,000 was received at that office during the six months embraced in the above statement.

GEORGE GRAHAM.

TREASURY DEPARTMENT, GENERAL LAND OFFICE, *November* 1, 1825.

H.

Statement of moneys received into the Treasury, from all sources other than customs and public lands, from January 1 to September 30, 1825.

American tonnage in foreign trade	845,758
Foreign tonnage in foreign trade	90,666
Total tonnage employed in the foreign trade of the United States	936,424

Proportion of foreign tonnage to the whole amount of tonnage employed in the foreign trade of the United States, 9.6 to 100.

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, March* 8, 1826.

19TH CONGRESS.] No. 733. [1ST SESSION.

DESCRIPTION OF AND DUTY ON IMPORTED WINES.

COMMUNICATED TO THE SENATE JANUARY 3, 1826.

TREASURY DEPARTMENT, *December* 30, 1825.

SIR: In obedience to a resolution of the Senate of the 27th instant, directing the Secretary of the Treasury to cause to be laid before the Senate a statement showing the aggregate quantity of each description of wines which have been annually imported into the United States since the year 1800, and the rates of duty that have been payable on them respectively, I have the honor to transmit herewith a letter from the Register of the Treasury, accompanied by a statement, which presents the information called for.

I have the honor to remain, with great respect, your obedient servant,

RICHARD RUSH.

The PRESIDENT *of the Senate.*

TREASURY DEPARTMENT, *Register's Office, December* 29, 1825.

SIR: I have the honor to transmit herewith a statement showing the aggregate quantity of each description of wines which have been annually imported into the United States since the year 1800, and the rates of duty that have been payable on them respectively.

I have the honor to be, sir, your obedient servant,

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, December* 29, 1825.

JOSEPH NOURSE, *Register.*

19TH CONGRESS.] No. 734. [1ST SESSION.

REMISSION OF DUTIES ON GOODS IMPORTED INTO CASTINE, IN MAINE, WHILST IN POSSESSION OF THE ENEMY DURING THE WAR OF 1812-'15.

COMMUNICATED TO THE SENATE JANUARY 23, 1826.

Mr. SMITH, from the Committee on Finance, to whom was referred the memorial of Henry Rice and others, made the following report:

That the port of Castine was taken possession of by the enemy during the late war and held until the peace; that during that period a considerable quantity of British goods had been introduced, and the duties imposed by the British authorities paid thereon; that, on the restoration of that port, the Collector returned and exacted bonds for the usual duties on such goods, as if the same had been regularly imported into a place held by the United States; most of those bonds were paid; on one a suit was brought, and, whilst pending before the Supreme Court, a memorial was presented to the House of Representatives, and referred to the Committee of Ways and Means, who declined to act until a decision should be had in the court; a judgment having been obtained in favor of the defendants, the memorial was again presented, and the Committee of Ways and Means reported a bill in favor of the memorialists; the House amended the bill so as to include only those persons who were presumed to be inhabitants or purchasers from those who had resided at Castine whilst in possession of the enemy, and added a proviso to the bill, to wit: "*Provided*, That it shall be proved to the satisfaction of the Secretary of the Treasury that the claimants named in the bill were residents of Castine, or Bucksport, or purchasers from residents of the goods on which the duties have been imposed." The bill, thus amended, passed both Houses on the 11th day of April, 1820.

The memorialists, at the next session, prayed payment for those persons who had not been included in that act, and continued their application until an act passed, on the 19th May, 1824, in favor of the persons named therein; but it so happened that the names of the present claimants were not included, and they now pray that similar justice may be granted to them as has been granted to all the others similarly situated. The committee think that the prayer of the memorialists ought to be granted.

The committee further report, that, soon after the decision of the Supreme Court, the Secretary of the Treasury released all the unpaid bonds given at Castine, to the amount of $27,581 50, the bond of an American citizen, and $7,955 06, given by R. Hasbuck, a British subject.

Eastport had continued in possession of the enemy until it was surrendered under the treaty of Ghent. Whilst possessed by the British authorities, and under the expectation of its surrender, the Collector requested instruction as to the following question from the Treasury Department: Question. "On the restoration of the island shall the Collector take possession of all merchandise of foreign growth, produce, and manufacture, and detain the same until the customary duties are paid, or secured to be paid?" The Attorney General answered in the negative.

It appears by a document submitted, that when New Orleans was delivered to the United States no duties were exacted on the goods in that city at the period when it was received by the United States.

The committee do not perceive that the residence of the importer or owner of the goods can vary the law in the case. The decision of the Supreme Court is, "that duties could not be legally exacted upon any part of these goods by the United States," and it is presumed that those persons who voluntarily submitted to the authority of the custom-house officers should not be placed in a worse situation than others who refused to comply with the requisition of the Collector.

19TH CONGRESS.] No. 735. [1ST SESSION.

REDUCTION OF DUTY ON DRIED FISH.

COMMUNICATED TO THE SENATE JANUARY 25, 1826.

Mr. LLOYD, from the Committee on Commerce, to whom was referred the petition of certain merchants of Baltimore, praying that the present duty of one dollar per quintal on imported dried fish may be repealed, and that a duty of fifteen cents per quintal may be imposed in lieu thereof, made the following report:

That the memorialists aver the proposed reduction of duty would promote the agricultural, manufacturing, and commercial interests of the country.

That the present duty operates as a prohibition of the importation of the articles from foreign countries.

That by a recent act of Parliament a market has been opened in the British North American colonies for our foreign and domestic manufactures to a great extent, and to secure the benefits of the new trade, as well as to extend the present one, in breadstuffs, we must enable these colonies to make payment in their products, of which dried fish is an important article; but the principal benefits, the memorialists state, they apprehend will result from the fact that South America requires a particular kind of fish, which can be procured from Newfoundland and Nova Scotia, but which cannot be obtained,

except in small quantities, and of an inferior quality, from our own fisheries, owing to a different manner of curing, and to the colonists having the advantage of contiguity to the fishing grounds, and to the large permanent establishments they have on shore, to which the fish are carried as soon as caught, and cured in a better manner than those of the United States, which must be transported to a greater distance.

In reference to which reasons for the reduction of duties asked for, and the effect they believe would flow from acceding to it, the committee remark:

That the fisheries on the coast and on the banks of Newfoundland were, from a very early period after the first settlement of the country, considered as objects of great national importance, and worthy of the particular attention both of the British and American Governments, as is evidenced by the numerous laws passed for their protection, and from the employment, antecedently to the Revolution, in the State of Massachusetts alone, of twenty-eight thousand tons of shipping, and from four to five thousand seamen in this pursuit.

That a continued and active vigilance to guard against an interference from foreign participation or competition still marks the policy of the British Government in reference to the fisheries, which she encourages by bounties, and fortifies by prohibitions, confiscations, and severe penalties.

The Government of the United States, also impressed with the importance of this interest in a national point of view, immediately after it came into operation, imposed, in July, 1789, a duty of fifty cents per quintal on foreign caught and dried fish imported into the United States, which, in 1804, was continued without drawback; and being still found inadequate for the purpose intended, that of countervailing foreign importations, in April, 1816, the duty was raised to the present rate, of one dollar per quintal, on the same condition. The principal object of the imposition of this duty, the committee confidently presumed, was the protection and support of the Bank and coast fisheries of the United States, which cannot but be considered an invaluable branch of the national resources, whether viewed in relation to the hardy, intrepid, and skilful seamen it produces, and who, in the hour of danger, have ever been found ready promptly to rally under the standard of their country, and to contribute a large proportion of those who, in time of war, have manned the public and private armed vessels of the United States, and, in periods of peace, have furnished a prolific nursery and school for the most effective and useful seamen employed in its mercantile navigation; or whether considered in relation to one of the most important staples it creates for the commerce of the northern and eastern part of the Union; or the amount it adds to the national wealth, literally drawn from the depths of the sea; to the encouragement it affords to all classes connected with ship building; and to the draughts it makes upon the agricultural interest for the subsistence of the seamen engaged in the fisheries, and that of their numerous families on shore, while absent themselves on their hardy and perilous occupation on the ocean

That, from the protection given by the duties before mentioned, the fisheries have, in some degree, extended with the growth and expanding interests of the United States, will be apparent from the statements accompanying the present report; yet it will also be seen that this increase has occurred in a very moderate degree, giving only an addition of one-tenth in nineteen years, and having, from 1823 to 1824, actually diminished more than 1,000 tons, furnishing conclusive evidence that the protection afforded is not more than sufficient to accomplish its object; for, although there is now a considerable tonnage, and eight or ten thousand seamen probably employed in this bold and laborious pursuit, in which the summer storm and winter tempest are fearlessly and cheerfully encountered, yet there is reason to believe, from the information of those most conversant with the fisheries, that it is an occupation of a very limited and restricted profit—an impression which is corroborated by the less improved situation of the fishing towns than those of almost any other on the seaboard; from the small general increase of the tonnage engaged in them for the last eighteen years; from its actual and recent diminution; and from the memorial recently presented to the Senate from the ancient town of Marblehead, one of the largest fishing towns in the Union, in which it is stated that during that period the number of vessels engaged in this their principal employment has decreased more than a fourth part, there having been, in 1807, one hundred and seven, and now only eighty vessels engaged in the fisheries from that port.

The committee further remark, that it is undoubtedly true that the British fishermen, from their proximity to the large establishments of Newfoundland, and to the shores of New Brunswick and Nova Scotia, the coast of Labrador, and the islands at the mouth of the St. Lawrence, all of them adjacent to the fishing grounds, have superior advantages in preparing their fish for market over the fishermen of the United States; but the existence of this advantage, the committee apprehend, should form an additional, and, as they believe, powerful inducement to continue, if not to extend, the protection given to our own fishermen, when coming into competition with those of a nation whose local positions give to it already superior advantages in this branch of business; and that, as it is to be presumed, for the supply of the South American markets, which, however, have been too recently opened to enable the committee to form any definite opinion as to their extent or importance for the article in question, fish may be cured by the fishermen of the United States in the manner that is wanted, although at present to be obtained but in small quantities, the dictate of national policy would seem to be, to endeavor, by additional inducements, to lead to the production of the quality and quantity required, rather than to lesson the incentives to it which at present exist.

And the committee take leave further to remark, that although Great Britain, wearied of her restrictive policy, when, perhaps, no longer necessary for her purposes, may have partially abandoned a system which she has cherished for ages, and of which her statesmen have heretofore, for a long course of years, boasted as a monument of her wisdom, and a material source of her commercial wealth and maritime greatness, and has opened certain enumerated ports in her colonies, and authorized a trade with them from the United States, the committee are not aware, that, in time of peace, any great advantage is to be derived to the commerce of the United States from making British colonial ports places of entrepot for the warehousing and transhipment of merchandise received from or to be imported into the United States, when it could, probably, be both brought and carried, without a resort to them, directly to its ultimate destination, with less cost and greater benefit; more especially when such ports are subject to occlusion without their previous knowledge or concurrence, as is recently demonstrated to be the case with regard to Halifax, in Nova Scotia.

And the experiment, the committee also conceive, yet remains to be made to ascertain how far the articles admitted, for colonial consumption, from the United States into the British colonies, at higher rates of duty imposed on their importation than when received from the mother country or the British possessions in America, and when burdened with an export duty which cannot be constitutionally coun-

tervailed, and other onerous colonial exactions, will admit of sufficient benefit to entitle the trade thus opened to be considered as meriting peculiar favor or indulgence, or one of great interest to the United States.

But, however this may be, no adequate inducement, as the committee believe, exists to give a premium on the industry of British fishermen, at the expense of those of the United States, by the comparatively free admission of the fish caught and cured by them into the ports of the United States, in depression and counteraction of the praiseworthy enterprise and exertions of a highly useful class of our own fellow-citizens; while a policy of this character is so far from being reciprocated on the part of Great Britain, that, in all the acts of Parliament which the committee have at command, relative to the fisheries, or in which an incidental reference is had to them, foreign caught dried fish neither is nor has been, at a trifling or heavy rate of duties, admitted into British ports, but has been, and still is, expressly and specifically prohibited from an entry or admission into the British dominions on any terms whatever; and so strenuously is the prohibition enforced, that forfeiture immediately attaches to the importation; the vessel carrying it into port is also condemned; and any person evading the law is, in addition to the loss of the property attempted to be landed, subject to a fine of an hundred pounds, and in default of payment of the penalty, is to be committed to the common jail, there to remain twelve months, without bail or mainprize.

From all which considerations, the committee are of opinion that the reduction of the duty asked for would materially injure a highly valuable interest of the United States for a contingent and uncertain benefit, depressing an important auxiliary of our naval and mercantile marine to the encouragement, in addition to the local advantages already possessed, of an alien, rival, and, under events which would not be unprecedented, a hostile competitor, and which the committee consider is not called for by any principle of national comity or reciprocity; and they therefore report—

That the prayer of the petition ought *not* to be granted.

MEMORIAL OF THE MERCHANTS OF BALTIMORE.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The undersigned ask leave to represent that, in their opinion, the agricultural, manufacturing, and commercial interests of the country will be promoted by an alteration in the present duty on imported dried fish, and respectfully offer the following reasons:

The present duty of one dollar per quintal is equal to an ad valorem duty of fifty, and in some cases seventy-five per cent., and operates as an entire prohibition of the article. A recent act of Parliament has opened a market in the British North American colonies for our domestic and foreign manufactures to a great extent; and, to secure to us the benefit of this new trade, as well as to extend the present one in breadstuffs, we must enable those colonies to make payments in their products, of which dried fish is an important article.

But the principal benefit, we apprehend, will result from the fact that South America requires a particular kind of dried fish, which can be obtained from Newfoundland and Nova Scotia, but which cannot be obtained except in small quantities, and of an inferior quality, from our own fisheries. The different manner of curing them constitutes the difference in British and American fish, and the colonists have the advantage of our fishermen in this respect by reason of their contiguity to the fishing grounds. They have large and permanent establishments for curing fish on shore, to which their fish are carried as soon as caught, lightly salted, and soon dried; while our fish are heavily salted and stowed in vessels until a large quantity is taken, when they are carried on shore, at some convenient place, and cured by the vessels' crews, or are brought home for that purpose; and, being thus heavily salted for preservation, they will not bear the voyage to South America without injury, and are unsalable when at market.

From these considerations we are brought to the conclusion that a reduction of the duty to fifteen cents per quintal will subserve the interests of the country.

BALTIMORE, *November* 18, 1825.

19TH CONGRESS.] **No. 736.** [1ST SESSION.

TRADE WITH CHINA.

COMMUNICATED TO THE SENATE FEBRUARY 6, 1826.

Mr. SMITH, as Chairman of the Committee on Finance, laid on the table the following documents, in relation to the finances of the United States, which were ordered to be printed:

Extract of a letter from ——, dated New York, January 18, 1826.

"I much regret my avocations have been such as to have caused tardiness in furnishing the documents spoken of, relating to the trade to China, and which I submit for the inspection of your friend in the Senate of the United States.

"These papers show the individual trade from this port with Canton of Thomas H. Smith, Esq., for the years 1824 and 1825, as well as information touching the trade generally, necessary to be laid before the enlightened individual you named to me.

"The document A exhibits the exports in the year 1824, by which will be seen the error generally entertained of believing that the China trade is carried on by the exclusive export of specie. As domestic as well as foreign merchandise comprise nearly one-half the amount of the exhibit, and the paper B, showing the exports of 1825, confirms the former statement, and proves the increasing exports to very large extent of *manufactures*, and especially so of *cotton goods*, and that, whenever *raw cotton* can be purchased in this country at *ten cents* per pound, it will become an article of export of large extent to China, as, at that price, it will compete with the cotton of Bengal carried thither by the British East India Company, shipments of cotton have often been made from the United States to Canton, and has turned to good account.

"In the statement D is exhibited the *average* cost of *teas* at Canton from the year 1817 to 1825 inclusive, reduced to cents per pound for each and every grade of tea, which may be of service, as a condensed view of the same, whenever Congress deliberates upon the propriety of reducing the present duties.

"The statement E is a condensed view of the importations into Canada during the last year, by the East India Company, of teas, per the ships *Moffat* and *Juliana*, and which shows the quantity of each grade of tea is more than double the amount of consumption of all the British colonies on this continent yearly, and plainly indicates an intention which *let be nameless;* and in a more particular manner, since information has arrived in this country that *two other ships of equal burden* are now on their way from China, to the same destination, by order of the above named company. On reviewing the number of pounds of tea imported into Canada by those ships, and the *population* of the provinces not over 300,000 persons, and those in part not tea-drinkers, being the descendants of Frenchmen, it may fairly be inferred a motive exists on the part of the Government of Great Britain, other than the real consumption of their colonies. This is further exemplified by the rate of duties charged on introduction into Canada, viz:

"On Imperial and Gunpowder	6*d.*, or 10	cents per pound.
"Hyson tea	6*d.*, or 10	" "
"Young Hyson	6*d.*, or 10	" "
"Other green teas	4*d.*, or 6$\frac{2}{3}$	" "
"Souchong and Congo	4*d.*, or 6$\frac{2}{3}$	" "
"Bohea, black	2*d.*, or 3$\frac{1}{3}$	" "

"I also hand you a statement of the trade of the East India Company with China (marked F) for one year, (the latest I now have by me,) by which your friend will perceive that the company carried on the trade that year without introducing a dollar of specie into China; and the probability is, that we, of this country, may arrive hereafter at the same end, should our Government, by wise measures, enable the American merchant to compete upon fair grounds with the East India Company. By the late tariff *China silks* are subjected to a discriminating duty of five per cent. over the duty charged on British and other manufactured silks, and the reason enforced for doing so was the want of reciprocity in the trade between this country and China, and which is controverted by the statement B, herewith. I would here remark, that the English Government, seeing this discriminating duty laid, it immediately reduced the duty of *export* and *import* on manufactured and *raw silk*, with a view of supplying this country with manufactures upon as cheap terms as silks could be imported from China; and the plan will succeed, unless Congress revokes some of their high duties, as articles of silk are now importing from London (usually obtained at Canton) at cheaper prices than can be obtained at the latter place. One other remark, permit me further to make, which is the fact, that the East India Company, on finding the duty reduced on raw silk, immediately despatched advices to Canton and purchased up all the raw silk to be obtained; the result was, consequently, a rise in all silk manufactures to prices that prevented purchases for this market that would permit a saving to the importer, and therefore curtailed importations into the American market.

"It may not be known to your friend, but which is a fact, that the house of Messrs. Perkins & Co., and that of *Archer*, of Philadelphia, connected with *Browns*, of Liverpool, Jones, Oakford & Co., of Philadelphia, all carry on their trade with China without the aid of specie, (in the main,) and, by dealing in British manufactured goods, and in quicksilver, opium, lead, &c., from Europe. These houses, and T. H. Smith, carry on seven-eighths of the China trade, which will show how limited the amount of specie is, compared with the merchandise now shipped to China.

"Should the duties on teas not be reduced fifty per cent. generally, and the duty on silks equalized with those from Europe, we may expect to receive our supplies through the instrumentality of the East India Company.

"The paper G I consider very important, inasmuch as it exhibits, at one view, the *capital centered* in China, on American account, from the year 1804 to 1824, (returns not having arrived of 1825,) the *imports* and *exports* at China to the United States, to the Sandwich Islands, to South America, and with Europe, for the past year; the entire trade for the past year being $6,567,969."

The foreign articles are estimated at prices with the debenture deducted, 1824.

Six years since very few manufactured articles found their way from the United States to Canton; but since the trade has become better understood the traffic in them has become great; and, should a liberal and enlightened policy be adopted by the Government, the American trade would stand on a better footing at Canton than that of the East India Company.

Specie	1,110,300 00		

It has occurred, in the course of a few years, that *raw cotton* has been exported to China, and I have myself sent 1,500 bales in one year to Canton; and whenever the article may be afforded here at *ten cents per pound*, the same will go to Canton in preference to specie, as at that price a profit would be realized.

Per proxy, THOMAS H. SMITH.
CHAS. HENRY HALL.

The object of this paper is to show that the Chinese trade, in the exports from this country, is not confined wholly to *specie*, as was declared in Congress at the time of revising the tariff on silk goods, and which opinion *prevailed*, and led to the laying on of a discriminating duty of five per cent., and which, if continued, will destroy the trade in manufactured China silks; especially so, since England has taken off the *import* and *export* duties on *raw silk*, which causes the East India Company to make large purchases of the same at Canton.

For the particulars of wines, spirits, and teas, see statements marked A, B, and C.

Coffee, previous to the 30th June, 1812, paid a duty of five cents per pound; after that time, and until June 30, 1816, a duty of ten cents; from that period to the present, a duty of five cents.

Teas, 1809.—The drawback payable this year exceeded the duties which actually accrued.

Cocoa, 1809.—Same remarks applicable. To the 30th June, 1812, paid a duty of two cents per pound; from that time to the 30th of June, 1816, four cents per pound; from that period, two cents per pound.

Indigo, 1809-'10.—Same remarks applicable. To the 30th June, 1812, paid a duty of 25 cents per pound; from that time to 30th June, 1816, 50 cents; and from that period, 15 cents per pound.

Olive oil, in casks, previous to the year 1816, paid an ad valorem rate of duty; 12½ per cent. previous to the 1st July, 1812; from that to March 3, 1815, a duty of 27½ per cent. ad valorem; and from that time to the 30th June, 1816, a duty of 25 per cent. ad valorem. It now pays a specific duty of 25 cents per gallon.

Salt.—The act of the 10th of August, 1790, laid a duty of 12 cents per bushel on this article. The act of the 8th of July laid an additional duty of eight cents, making 20 cents per bushel. The act of the 7th of May, 1800, continues in force for ten years from the 3d March, 1800. The act of the 3d of March, 1807, repeals the act of the 8th July, 1797, and declared salt imported after the 31st of December, 1807, to be free of duty. The act of the 29th of July, 1813, lays a duty on salt imported of 20 cents per bushel, which duty it is now subject to under the act of 27th April, 1816.

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, January* 28, 1826.

	1,530,741 75	969,185 76	14,685 23	755,915 15	719,080 00	46,238 82	5,447 72

Extract of a letter from Henry A. S. Dearborn, Collector of the Customs at Boston, dated January 6, 1826.

"Would it not be well to lower the duties on teas, and have but two rates: one for *Blacks* and the other for Greens? I believe the rate could be so averaged as to render such a system favorable to the importers and the Government, while it would preclude the chance of evasion, as is now possible; for the line between 'Bohea' and the 'other Blacks' it is often difficult to draw, as is that between 'other Green' and Hyson up to 'Imperial.'"

Custom-House, *Boston, January* 17, 1826.

Much Esteemed Sir: In conformity to your request, I will endeavor to answer the various queries which you have done me the honor to submit. Two ships belonging to the East India Company—the Maffit, of 800 tons, and the Juliana, of 600—arrived at Quebec, last summer, from Canton, laden with teas. The duties, I have understood, were *two and a half* per cent. on their cost, while in the United States they are above *one hundred per cent.* The importers set them up at auction at fixed prices, which were regulated by those in Boston, New York, and Philadelphia, believing that this would secure to them the supply of the whole consumption of the two Canadas. The sales in August were as follows:

	s.	d.
Bohea, averaged	1	10
Congo	2	11
Souchong	1st. 2*s.* 10*d.* 2d.	
Hyson Skin	3 1 to..	3 2
Young Hyson		4 10
Hyson		5 1
Pecco	7*s.* to..	7 8

Conditions of sale.—The teas were to be paid for on delivery, and were to be taken away by the 22d of November, every buyer depositing forty shillings for each chest, and twenty for each box. Teas remaining unpaid for after the 22d of November, the deposit money forfeited, and the sale void.

The prices at which a second lot of 4,000 chests was put up, on the 22d of August, were as follows:

	s.	d.
Hyson Skin, in boxes	3	1
Hyson Skin, in chests	3	0
Souchong	3	1
Young Hyson, in chests	4	7
Young Hyson, in boxes	4	8
Young Hyson, superior quality	5	0
Twankay	3	1
Hyson	5	0
Pecco	4	4
Congo	2	10
Bohea	1	7

As twenty shillings of the Canada currency are equal to 400 cents of that of the United States, you will perceive that the prices quadrated with those for which teas sold in our cities at the same time.

So long as the East India Company shall be content to limit their importations to the *wants* of the Canadas, it will be their interest to regulate the prices, as nearly as possible, to those in the United States; for if they are put up *higher*, the teas will not be purchased, but be smuggled *from* the United States, and thus operate injuriously to the importers. But if it should be ascertained that large quantities could be *successfully smuggled* into the United States, the importers may lower the prices to facilitate the sale of a much greater quantity than to meet the whole consumption of the colonies.

Having information that the two above-named ships were expected at Quebec, and believing that attempts would be made to send some of the tea here, from the low rate of duty there paid, measures were immediately taken to detect and prevent such a traffic; but as yet no instance of smuggling has

come to my knowledge. Still, it is not improbable that, on the northern line of frontier, teas may have been clandestinely introduced, and rumors to that effect have reached some of our merchants, who believe that, in *succeeding years*, frauds on the revenue, to a considerable extent, may be apprehended.

The East India Company were requested to send teas direct to Canada, and great facilities were granted to that gigantic monopoly, to prevent their being sent from the United States illicitly, which has been the case to a vast amount, and when that evil is checked, the battery may be, in *retaliation*, turned upon us. If, however, there is nothing to be feared from that quarter, it is expedient to lessen the present rate of duties, as tea has become a necessary of life throughout the whole country, and would be very generally substituted for coffee and other succedaneums if the price was not so high, nearly half of which is in consequence of the duties. The increased consumption, and consequent increase of importation, by a lower rate of duty, would make the amount of revenue about the same.

In a former letter I gave my reasons for establishing but two rates of duty; and if all Black teas paid 18½ cents, and all Green teas 34 cents per pound, the revenue would be the same it has been at the present rate of duty. But if it should be concluded to be proper to lower the duties on teas, the Blacks might be put at 15 and the Greens at 28. This would reduce the aggregate present duties over 20 per cent.

As to wines, the duties are not only generally too high, but very unequal on wines of the same value coming from different places. For instance, most of the wines of France pay but 15 cents, while those of Portugal, of as inferior a quality, pay 50 cents per gallon. There is no reason why all the wines of the Rhine, or middle part of Europe, Portugal, Spain, the Italian States, not named in the tariff, and all other places, should not be at as low a rate as those of France, and such parts of the Mediterranean, Levant, and Archipelago, and other countries, as are subjected to but 15 cents per gallon when imported in casks.

The duty of 50 cents, you name for Madeira, may also be imposed on Burgundy, Champagne, Madeira, and Tokay, and the other as follows:

Sherry, Marsala, or Sicily Madeira; Teneriffe, or Pico, also called Pico Madeira; Lisbon and Port, 25 cents. All other wines, when imported in casks, 12 cents, and when in bottles, 25 cents per gallon.

The increased consumption, in consequence of the reduced cost, will augment the importation more than sufficient to make up the loss of revenue by the diminution of the rates of duty. Besides, if wines can be introduced at low prices, they will be soon very generally drank as substitutes for ardent spirits, and thus have a most salutary moral effect.

Whether it is politic to reduce the duty on coffee I cannot, with confidence, determine. The price is so fluctuating in that article that it is difficult to ascertain whether the effect would be such as to afford it to the consumer, who it is intended to benefit, at a lower rate, taking a series of years, than has hitherto been the case under the present tariff. If the duty on tea is lowered, will it not be best to wait and ascertain the effect before the experiment is made of altering the duty on coffee? It is with deference that I hazard this opinion.

Permit me to draw your attention to the duties on sugar. There is great difficulty in classing them to ascertain what is "brown" and what "white clayed," under the tariff, as from "brown clayed" to "white clayed" the shades, as you well know, are infinite, and where to separate them, and say which should pay three cents and which four cents per pound, is impossible, so as to make the distinction palpable, known, and uniform in all the ports of importation. If the duty was averaged, and *all sugars*, other than loaf or lump, subjected to the same rate, or "*all clayed*" to form one class, and "*all unclayed*," or raw, another, it would at once obviate the difficulty. The *clayed* may be put at 3½, and the *unclayed*, or *raw*, at 2½, which would make the amount of duty rather more than at the present rates and classification.

These remarks on sugars are merely intimations.

I have the honor to be, with the highest esteem, your most obedient servant,

H. A. S. DEARBORN.

Hon. Samuel Smith.

Extract of a letter from ———, dated Boston, December 29, 1825.

"The subject on which you wrote to me is too interesting to reply fully without mature reflection. It is one interesting to me individually, as well as one of a community in which I feel great interest. The policy pursued by the East India Company, in throwing a supply of teas into Canada much beyond the wants of that colony, must be obvious. It is well known to the directors that for some years past both Upper and Lower Canada, with Nova Scotia, have been supplied with teas from the United States by illicit means, and that the only way of preventing the introduction from this side the border would be to make a direct importation. The quantity imported is thought by those best informed on the subject to be much beyond the wants of Canada. The surplus will doubtless find its way to the States bordering upon the British possessions. To you I need not express my doubts of the practicability of preventing the introduction of valuable goods into our country upon so extensive a frontier line as that which divides the two countries. An army of douaniers would be necessary to do this effectually. The article need not be kept in the original package, which would lead to detection, but will find its way in all forms and shapes, and very much to the prejudice of the importer of the United States, direct from Canton. About 15,000 quarter chests of teas, principally Twankay, corresponding nearly to our Hyson Skin, were imported the present year by the East India Company into Canada. Their wants may be, at the extent, 10,000 quarter chests; the excess must, of course, find its way into our territory. From the manner in which all business is done by companies, it is probable the East India Company pay more for their teas at the market from whence they come than we pay in China; but the difference in duty between them and us is infinite. From the best information I can get, I am led to believe the average duty on the teas imported in the East India Company's ships is about four pence per pound; how this compares with the duty levied here under the present tariff you can perceive. It so happens that I can give you *facts* in place of *speculation*, in answer to your inquiry as to the cost of tea in China.

"Within a week two of our ships, the Nautilus and Duxbury, have arrived at this port, direct from Canton; they bring Imperial and Gunpowder, (which are nearly of the same quality, and subject to the same duty) Hyson, Souchong, and Congo teas. The Imperial and Gunpowder cost forty-two cents per pound, and pay fifty cents per pound duty, about 120 per cent. on the cost; Hyson costs thirty-seven cents per pound, and pays forty cents, or 110 per cent. on the cost; Souchong, fifteen and a half cents, and pays

twenty-five cents per pound, about 162 per cent. on the cost; and Congo about the same, say 170 per cent. Young Hyson is a favorite tea in this country, and although we have none in the above vessels, we have imported large quantities annually, which we have sent direct from China to Europe. The teas we have usually bought cost thirty and thirty-two cents per pound, although we have bought many thousand chests at twenty-four and twenty-six cents. Those teas, when imported here, pay forty cents per pound; and if we call the cost twenty-five cents, they pay as duty here 160 per cent. on the cost. Hyson Skin teas we have had shipped here from Canton as low as eighteen cents per pound; the usual price may be called twenty-one cents; they pay twenty-eight cents duty, or 133⅓ per cent. on cost. There are some other teas imported, but those mentioned compose the cargoes generally imported into this country. From the foregoing it would seem that although the first cost of the teas of the East India Company may be more originally, yet, that the difference between seven or eight cents per pound and what we pay enables the British importer to carry on the trade to our destruction, provided my premises are correct, that they will find their way into this country. As respects my establishment, we have made but few importations direct for some years past, having preferred the European market rather than to contend with our heavy duty, when nearly as good gross prices can be obtained abroad, and sales subject to much less duty. Our importation of teas for some years past has been from ten to twenty thousand quarter chests annually, which have been sold in Holland and Hamburg principally. There has been a strong prejudice existing against the China trade in this country, under the idea that specie was necessarily exported to procure cargoes from China. So far from this is the fact, *in our case*, that, although our importations have averaged more than a million of dollars annually, for several years, in the products of China, of which silks and nankins form a considerable portion, we have not shipped a Spanish dollar for the past *three years to China*. Our funds arise from the export of opium from Turkey, British goods from Great Britain, lead and quicksilver from Gibraltar, and the same articles, on a large scale, from Trieste.

"The funds placed in those several countries arise either from merchandise shipped from China or this country, and bills of exchange; and I have great pleasure in stating that, with a view to ascertain the value and to give a chance of comparing our cottons with those of Great Britain, (I mean the sheetings and shirtings,) I have shipped considerable quantities of those manufactured here to China, Manila, Java, and to different ports in the Mediterranean, in Europe, as well as to Smyrna, Turkey. As far as we have returns we are satisfied we can compete with the manufactures of Great Britain in the more gross cotton fabrics. That there are dollars exported by many in the trade we are aware, but that the trade cannot be prosecuted successfully with specie alone recent events may be quoted as striking examples."

"My importations in the vessels now discharging cost about six hundred thousand dollars, about one-tenth part of which is in teas in small packages and calculated for *exportation* to the West Indies, Mediterranean, and French markets, nor do I believe that any considerable portion of them will remain in this country. The other parts of the cargo are composed of silks, nankins, spices, &c., which are also suited to foreign markets, and will be principally exported. I am decidedly of opinion that there would be a much greater quantity of goods of all sorts come into our ports did they, upon exportation, drawback the *whole duty*. Being once landed, many of them would be sold for home use, and this portion would, in my opinion, contribute more to the public treasury than does the per centum retained in the custom-house upon re-exportation. The heavy duty on nankins may be necessary for the encouragement of our cotton fabrics, but that there would be more revenue from silks was the duty lighter I have no doubt. My own importations are confined principally to such goods as can be exported with advantage to the West Indies, South America, the Brazils, and Mediterranean, as China silks cannot be imported for home sale to advantage under the discriminating duty between the goods which come from Europe and those which come from beyond the Cape of Good Hope. Great Britain, seeing this discrimination between silks from India and Europe, reduced the duty on raw silk from 5*s*. 6*d*. sterling per pound to six pence, and thus enables her manufacturers to drive us out of the market. Even France, with the aid of the discrimination, cannot carry on the silk trade to advantage, and our importers from thence complain of losing money in the trade. I omitted to mention that China cargoes are composed at times, and extensively too, of articles the growth of our country. Ginseng is sent to a great amount. Furs frequently make a component part of cargoes; and should cottons get down to ten or eleven cents, the China market would take off a great amount in them.

"I have thus told you a long story, and fear you will repent, from the length of my reply, of having made the inquiry of me. You may remember that some years since I had the pleasure to correspond with you in relation to the tea duty. I then thought, as I do now, that all black teas should pay the same duty. That there have been large importations of teas, other than Bohea, introduced under that name into the country I have good reason to believe. The duty on Bohea is twelve cents, that of all other black teas twenty-five cents. Our population has become too nice to drink Bohea tea, and but very little real Bohea tea comes to market. I have imported none for six or seven years past. The best way of preventing this fraud upon the revenue is, in my opinion, to put all black teas on the same footing and tax them alike. Although Hyson tea costs more than Young Hyson, yet, as the taste of the people is in favor of the latter, I think they should pay the same duty. Imperial and Gunpowder, being more articles of use by the luxurious, should be made to pay more than other teas, I have no doubt. What that should be, according to my ideas, as well as the duty on other teas, shall be the subject of another letter."

BOSTON, *December* 30, 1825.

DEAR SIR: I had the pleasure yesterday, and, as I promised, and at your request, I venture to suggest for your consideration the alteration below as the duty on teas:

Imperial and Gunpowder, which now pay	50	40
Hyson, Young Hyson, and Chulau	40	30
All other Green teas	28	22
Black teas, including Bohea	12 & 25	18
	143	110

By the present tariff the average on tea is 35¾ cents per pound. By the tariff I propose, 27½; which is about 23 per cent. reduction. I am persuaded that, at the above rate of duty, as much or more duty would accrue to Government.

The above is suggested independently of the call there is upon the Government to so lower the duty as to prevent the China East India Company from supplying our market with teas, they paying 8 cents per pound, and, at the reduced rate I propose, we paying 27 cents. I have found leisure, during a stormy day, to write to Mr. Lloyd on the subject of teas, though I may have omitted some of the suggestions made to you in my letter of yesterday.

Respectfully, your obedient servant,

T. H. PERKINS.

Hon. SAMUEL SMITH.

CUSTOM-HOUSE, *Lubec, January* 5, 1826.

DEAR SIR: I received your letter of the 21st ultimo on the evening of the 30th, in which you propose the following inquiries, viz:

1. Will not the act of Parliament of July 5, 1825, make the North American Provinces a depot from whence their teas will be smuggled into the United States?
2. What measures can be adopted to prevent it?
3. What are now the relative prices of teas between your port and the Provinces?
4. Should the duties on tea be diminished, and to what amount?
5. If the privilege of the East India Company should materially reduce the price of teas in the Provinces below ours, can any effectual method be devised to prevent their being smuggled, and what?

The subject of your letter is one on which I have been heretofore led to think considerably, in consequence of a former act of Parliament relative to supplying the British Provinces with tea direct from China; and when I was in Washington, last winter, I submitted to the Hon. Mr. Crawford, by his particular request, a written statement, touching the danger of smuggling teas into the United States in consequence of that act, in which I expressed my belief that no such danger existed.

Having, since the reception of your letter, carefully perused the act of Parliament to which you allude, and having, as fully as the time would permit, considered its probable effect, I feel prepared to answer your several inquiries with as much confidence as should, perhaps, be expressed on a subject which is necessarily involved in such a degree of uncertainty as belongs to all calculations with regard to future events. I will also add, that, for your greater satisfaction, as soon as I received your letter, I lost no time in making application to a number of individuals of the first standing for respectability and intelligence, requesting them to favor me with the information which they possessed touching the subject in question, and their views and opinions relating thereunto. Their several statements, in detail, I take the liberty to enclose.

With regard to the first inquiry, it is my conviction and belief that the aforesaid act of Parliament will not make the British Provinces a depot from whence teas will be smuggled into the United States.

An answer to the second question seems to be rendered unnecessary, in consequence of the reply which I have given to the first.

To the third question I reply, that Souchong tea, the only kind used in New Brunswick and Nova Scotia, is worth seventy-five cents by the chest, on the English side, and sixty cents, or thereabouts, on the American side. It is sometimes sold for cash, at fifty-five cents per pound.

In answer to the fourth question, I feel free to express my full persuasion that the interests of trade and the safety of the revenue will not require the duty on tea to be diminished. It is even doubtful whether a small reduction of duty would lower the price, and whether the trade itself would be benefitted if the duty should be reduced. If, however, it should be considered an object so to alter the duty as to effect a decided reduction of the price, in order to make the article come cheaper to the citizens of the United States, agreeable to the recommendation of the Hon. Secretary of the Treasury, this reduction must produce one beneficial effect, namely, it would lessen the temptation to defraud the revenue by means of debentures.

The fifth inquiry may be answered by observing, that the best means of preventing the smuggling of tea into the United States from the British Provinces, should the project ever be attempted, would be the same which are required at the present moment to prevent the smuggling of rum and other articles on the frontiers. Indeed, I may add that the protection of the revenue and the interests of the honest trader loudly demand the immediate adoption of these measures.

The first measure which I beg leave, with great confidence, to recommend, is an act requiring the entering and clearing of all coasting vessels, in all cases whatsoever, when arriving at or departing from a frontier district.

With equal confidence may also be urged the passage of a law such as passed the Senate the last session in relation to small seizures. It now requires an expense of more than sixty dollars to procure the condemnation of a seizure amounting to the value of no more than five dollars in cases where no defence is set up.

Justice and policy require that a remedy be applied without delay to this intolerable evil—an evil equally deleterious to the revenue as it is unjust to the officers of the customs.

Some further provisions are also necessary, relative to the marking of tea chests, and to prevent the use of false certificates, and to cause the present laws in relation thereunto to be more strictly observed. This precaution, at present, relates exclusively to debenture teas, which, under the pretence of being actually exported, are often relanded in the United States duty free, the debenture bonds being cancelled on the production of forged certificates. I may add, indeed, as a matter of great importance, that the laws in relation to debentures require to be better guarded, to prevent extensive and wholesale frauds on the revenue.

Very respectfully, I have the honor to remain, dear sir, your obedient servant,

STEPHEN THACHER.

Hon. JOHN HOLMES.

PORTLAND, *December* 29, 1825.

DEAR SIR: I duly received your letter of the 21st instant, making some inquiries in relation to the probable effect that the importation of teas into the British American colonies, free of duty, may have on our revenue, and on the importers of the article into the United States; what measures can be adopted to prevent the article from being smuggled into the States, and whether the duties on teas should be diminished.

The importation of teas into the British American colonies, free of duties, will of course diminish the price of the article in the colonies; but it is believed that teas cannot be deposited there, and then sold at prices that will make it an object for the unprincipled part of the community to purchase for the purpose of smuggling into the United States.

Should attempts be made to smuggle those teas into the United States, it will require more particular inspection by the officers of the cutters, and by other officers of the customs, of vessels and boats from the colonies, and from our frontier districts; possibly it may be necessary for further restrictions to the coasting trade, making it incumbent on the masters of vessels bound to and from the frontier district, either with or without cargoes, to clear and enter at the custom-houses; and it may also require an act of Congress making it penal on all vessels found hovering on the coast, particularly off the frontier district.

The price of teas, say Souchong, now the most generally used, is, with us, about 53 cents, and at St. John's, New Brunswick, is about 75 cents per pound. Teas have declined in the price at St. John's, and, should they be imported into the colonies free of duties, we believe the price will further decline, but not so low as to affect materially the regular importations from the East Indies into the United States, but will stop the smuggling of the article into the colonies from the United States, formerly carried on to a very considerable extent.

Changes in the tariff often embarrass both the importer and the dealers in the articles on which the duties are altered; on this, as well as on other accounts, it would be desirable that no alteration be made, unless very urgent necessity require it.

The British, by making their colonies depots for teas free of duty, will not, in my opinion, require a change in our tariff, with a view to protect our merchants in their East India trade; as the smuggling into the United States from the colonies cannot be so successfully prosecuted as to prejudice the fair dealers in the article. I therefore believe that it will not be necessary to diminish the duties on teas.

I am just informed by a gentleman from Montreal, a merchant doing business there, that the prices of teas were something higher at this time at Montreal than in the United States, and that, in his opinion, they could not be imported and sold there at prices that would make it an object to smuggle them into the United States.

I am, respectfully, sir, your obedient servant,

ISAAC ILSLEY.

Hon. JOHN HOLMES, *Senator in Congress, Washington City.*

19TH CONGRESS.] **No. 737.** [1ST SESSION.

RESTITUTION OF PROPERTY FORFEITED UNDER THE NON-IMPORTATION ACT.

COMMUNICATED TO THE SENATE FEBRUARY 6, 1826.

Mr. SMITH, from the Committee on Finance, to whom was referred the memorial of William Dixon and James Dickson, reported:

That William Dixon, a British subject, and James Dickson, a citizen of the United States, lately co-partners, and trading at Liverpool, under the firm of William Dickson & Co., and in Savannah, under the firm of James Dickson & Co., state in their memorial—

That in the month of July, 1812, after the repeal of the British orders in council, and with the fullest confidence that thereupon the restrictive measures of the United States would instantly cease, and a free and amicable commercial intercourse between the two countries be restored, a confidence which was encouraged and sustained by the opinions and representations of the public agents of the United States in Great Britain, most of the American houses there made large shipments of goods to the United States. That, among others, the house of William Dixon & Co. shipped to the house of James Dickson & Co. an invoice of goods, amounting to £21,547 16*s.* 7*d.* sterling. That the said shipment was an investment of the proceeds of produce before that time consigned by the house in Savannah to the house in Liverpool, was less in amount than the share or interest of James Dickson in the joint funds of the concern, which were then in England, and was intended as a transfer of the funds really belonging to James Dickson from England to the United States. That, at the time of the said shipment, the house in Liverpool was very largely indebted to the house in Savannah, and the debts of the concern in the United States, for which, during the continuance of hostilities, James Dickson was alone responsible, amounted to upwards of £12,000 sterling.

That the said goods were shipped in the American ship Thomas Gibbons, and that the said vessel proceeding directly for the port of her destination, off Tybee island, within a few hours' sail of said port, was captured by the privateer Atas as prize of war, carried into Savannah, and there libelled by the captors. That on entering the said port the Thomas Gibbons and her cargo were also libelled by the Collector of Savannah for an alleged breach of the non-importation act. That the Collector was willing to relinquish the vessel and cargo to the owners on their giving bonds to be subject to such legislative

or judicial proceedings as the Government should subsequently direct against all property so situated which the owners were willing to give, but that this measure was objected to by the captors on the ground that the property was prize of war, and consequently that no bonds were given.

That the libel of the captors was subsequently dismissed, on appeal, by the Supreme Court of the United States. That such proceedings were had on the libel of the Collector that one moiety of the goods was delivered to James Dickson, while the other moiety was retained by the officers and ultimately condemned for a breach of the non-importation act—the right to petition the Secretary of the Treasury having been denied to William Dixon by the District Judge.

The petitioners state that their case is a solitary one. That other aliens having goods on board of the same vessel have had the forfeitures of such goods remitted. It is shown to the committee that the Supreme Court of the United States dismissed the libel of the captors, declaring that the shipment appeared to have been made in *good faith* and under *a reasonable presumption* that the repeal of the orders in council would produce a suspension of hostilities, and, consequently, that the merchandise on board, whether *American* or *British* property, was equally protected from capture, and that the same Court have also decided that the municipal forfeiture under the non-intercourse act was absorbed in the more general operation of the laws of war.

It is strongly urged by the memorialists that, even considering this as enemy's property found within the United States during the war, still, as it was brought in in good faith and under the protection of the authorities of the United States, they were at least entitled to a reasonable time for its removal, and that if such allowance had not been given, yet it could not have been subjected to forfeiture but by express statutory regulation. That the treaty of 1794 with Great Britain allowed twelve months for this purpose, and that the act of 1798, concerning alien enemies, contains provisions which are similar in principle; that, although laws may change and treaties terminate, humanity does, and national hospitality ought to, remain the same.

It is, moreover, urged by the American partner that from the state of the accounts, of which proof is furnished, that these goods were, in equity and in fact, on their arrival in the United States, his sole property, and that he ought to be considered in the light of an American citizen, who in good faith and on the earliest knowledge of the war was withdrawing his property from the enemy's country. That no law forbade the formation of a partnership with a British subject in time of peace. That, as by the terms of the said partnership all losses were to be equally divided, whatever is inflicted on one is sustained also by the other; and that if a portion of this property is to be forfeited because of the interest of William Dixon in the concern, James Dickson is deprived of that protection which is afforded to every other American citizen, and is punished for an act which was neither forbidden by the laws nor inconsistent with the policy of the United States.

That this shipment, known to be American property, was not subjected to forfeiture in Great Britain, and was protected by the separate acts of that Government and of this in its transit across the ocean; that, having been spared by his enemies, it was seized by his friends, and this, too, after they (the latter) had held out to it a delusive protection.

The committee forbear to recapitulate the various other strong grounds which are urged by the petitioners who appeal to the justice and liberality of Congress and to the honor of the nation for a restitution of the proceeds of this property, or at least of that part of it which passed into the Treasury of the United States.

The committee have considered the petition and documents. They think, in perfect accordance with the Supreme Court, that the shipment of the petitioners was made in good faith, with the strongest presumption, founded on the repeal of the orders in council and fortified by the opinion of the United States agent, that the non-importation act would cease and that peace would be restored. Concurring in opinion with the Supreme Court, the committee do not consider that this property was liable to forfeiture under the non-importation act, nor as prize of war, nor under the general belligerent rights of war. They consider it as having been confided to the honor and taken under the protection of the United States; and they believe that, on the state of facts made out by the petitioners, it was entitled to that protection on the soundest principles of law and the most obvious dictates of policy. They regret that the rule uniformly adopted prevents them from advising a full restitution of the property, and therefore find themselves compelled to limit their recommendation to the restoration of the amount paid into the Treasury; for which purpose they report a bill.

19TH CONGRESS.] No. 738. [1ST SESSION.

CHANGE OF REVENUE LAWS IN FAVOR OF SPANISH PORTS IN NORTH AND SOUTH AMERICA.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 6, 1826.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the New York Chamber of Commerce respectfully represents:

That the trade which has for some years past and is now carried on from different parts of the United States to the Spanish ports in North and South America, especially on this side of the continent, is of immense importance to the commerce, navigation, manufactures, and revenue of the Union, and that it moreover has the happy tendency to promote feelings of friendship and good understanding between nations who have emancipated themselves from European subjection, who have adopted free institutions of government, and who have in some essential points of view a common interest.

This trade is carried on to a considerable extent with assorted cargoes, composed partly of articles

which are imported from foreign countries into this country, and which our laws permit to be exported with the benefit of drawback; partly of goods manufactured in the United States, and partly of the growth of our soil and the production of our fisheries. It appears to be essential to the existence of this trade that shipments to Spanish ports on the eastern side of this continent should consist of a great variety of articles. The absence of almost every kind of manufactory there, the location of their settlements, and the nature of their country demand it. Those ports which border on the sea are principally low and unhealthy; the large cities and the great mass of population are to be found in the interior, and can be approached only by roads leading over high mountains, and which rarely admit the use of carriages; their supplies are therefore, to a considerable degree, transported on the backs of mules and in small and light packages. The vicinity of some of these countries to the United States and the facilities afforded by our export laws have, together with the activity and enterprise of our merchants, hitherto given us a decided advantage in this important branch of commerce. The distance is less; smaller and cheaper vessels can be used than would answer for a direct trade with Europe; and cargoes may easily be made up in our ports adapted to the wants of the Spanish inhabitants, and sold to them on moderate terms, as the import duties are principally returned on goods exported to foreign countries.

The advantages which have been derived from our export laws, and vicinity to many of the Spanish ports, in the prosecution of this great branch of American trade, have not escaped the notice of other nations. They seem particularly to have attracted the attention of the British Government; and the very able and sagacious ministers who now compose its administration appear not only to have formed a high estimate of the value of this commerce and a strong desire to participate in it more fully than they have hitherto done, but even a hope to withdraw it from us and cause it to centre in their own hands.

During the last session of the British Parliament a law was passed "to regulate the trade of the British possessions abroad," materially altering the colonial system so long established and so tenaciously adhered to by that Government. It is not necessary to the object of your memorialists to notice any part of that law or its numerous provisions, excepting those parts which appear calculated to affect the American trade to Spanish ports; and they do not notice these with a spirit of enmity or censure. That nation has an undoubted right to alter its commercial regulations at its pleasure, and to invite to its ports a trade which has been enjoyed by others. If this is done by an abandonment of restrictions and an increased freedom of commercial law, the effect can be countervailed on the part of other nations by a policy still more liberal and enlightened.

This law establishes a number of free warehousing ports in the British colonies, among which is the port of Kingston, in Jamaica. It empowers the King to add to the number of these ports, and authorizes the importation into them of every article which can legally be imported from any foreign country, and enacts that they be warehoused without the payment of duty, and that they may be exported within two years, subject only to warehouse rent; and it further authorizes the proprietor of warehoused goods, under the direction of the Collector or Controller, "to sort, separate, and pack, and repack any such goods, and to make such lawful alterations therein and arrangements and assortments thereof as may be necessary for the preservation of such goods, or in order to the sale, shipment, or legal disposal of the same." The law also contains a table of goods the importation of which is restricted or prohibited from foreign countries; the number is few, and consists principally of such articles as may be advantageously imported from Great Britain.

Your memorialists particularly entreat the attention of your honorable body to the prominent points embraced by this law:

1. It declares that Kingston, a port peculiarly convenient for the Spanish trade, shall be a free warehousing port.

2. That all goods which may be legally imported may be warehoused free of duty.

3. That all such goods may be exported at any time within two years after being warehoused, free of expense, excepting rent; and the Collector and Controller are authorized to allow further time if they shall see fit.

4. And to make up assortments suitable for a market, it allows packages to be separated, and goods to be sorted and put into other packages.

The facilities which these regulations will give to the British commerce with the Spanish ports are so great that the effect cannot but be injurious to the commerce which we have prosecuted with them, unless they are met at the outset by regulations on our part which will give further facilities to the export trade of the United States.

In order to preserve unimpaired so important a branch of our foreign commerce, and one so intimately connected with the great interests of the nation, your memorialists are of opinion that several alterations ought to be made in the laws regulating imports and exports, and which they believe will, if adopted, give facilities to the exporters from this country equal to those which, by the new regulations of the British Government, are given to the subjects who export from free warehousing ports, and enable our citizens in future to compete on equal terms in a trade which they have heretofore enjoyed with so much benefit to the country and themselves.

The alterations which your memorialists respectfully recommend are the following:

1. That the benefit of drawback be extended to two years.

2. That only one per cent. of the duties on goods exported be retained.

3. That debentures be issued where the duty on goods exported is twenty dollars and upwards.

4. That the importation of spirituous liquors be permitted in casks of the capacity of not less than fifteen gallons.

5. That spirituous liquors imported in such casks as the law authorizes, and deposited in the public stores, may be drawn into smaller vessels and exported for the benefit of drawback, under such regulations as may be deemed safe to the revenue.

And your memorialists, as in duty bound, will ever pray.

By order of the New York Chamber of Commerce.

W. BAYARD, *President.*

Attest:

JNO. PINTARD, *Secretary.*

NEW YORK, *February* 2, 1326.

19TH CONGRESS.] No. 739. [1ST SESSION.

ON THE STATE OF THE FINANCES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 6, 1826.

Mr. McLANE, of Delaware, from the Committee of Ways and Means, to whom has been referred the report of the Secretary of the Treasury, of December 22, 1825, on the state of the finances, submitted the following report:

That they have considered the said report of the Secretary of the Treasury, and also the state of the public debt, and the expenditures, with a view as well to ascertain the means of the Treasury as the best mode of applying those means to the payment of the public debt.

Of the public debt, besides the three per cent. stock, amounting to $13,296,231 41, and the subscription of $7,000,000, in the Bank of the United States, redeemable at the pleasure of the Government, there will be reimbursable at any time after December 31, 1825, $16,270,797 24; December 31, 1826, $13,096,542 90; December 31, 1827, $9,490,099 10 of the six per cents.

Of these sums, the attention of the committee has been particularly called by the annual report to the debt reimbursable in 1826, amounting to	$16,270,797 24
Add that reimbursable in 1827, amounting to	13,096,542 90
Making together	29,367,340 14

The amount applicable to this debt consists, first, of the annual appropriation to the Sinking Fund, of $10,000,000, and, second, of such surplus as is authorized by the act of March 3, 1817, to be applied to the same object, and may be stated, for the present purpose, as follows:

1. The annual appropriation to the Sinking Fund of	$10,000,000 00
From this must be deducted the amount required for the interest on the public debt, according to the practice ordinarily adopted at the Treasury, which, upon the supposition that the residue of the loan of seven and a half millions, of 1813, amounting to $5,035,549 16, may be paid off by the 1st day of July, 1826, and of which it is believed there can be no doubt, will amount to the sum of	3,940,659 31
Leaving of the $10,000,000, applicable to the principal of the debt, the sum of	6,059,340 69

By the fourth section of the act of March 3, 1817, entitled "An act to provide for the redemption of the public debt," it is enacted as follows:

"That after the year 1817, whenever there shall be at any time after an adjournment of Congress, in any year, a surplus of money in the Treasury, above the sums appropriated for the service of such year, the payment of which to the Commissioners of the Sinking Fund will yet leave in the Treasury, at the end of the year, a balance equal to two millions of dollars, then such surplus shall be, and the same is hereby, appropriated to the Sinking Fund, to be paid at such times as the situation of the Treasury will best permit, and shall be applied, by the Commissioners thereof, to the purchase or redemption of the public debt."

The committee consider this section as authorizing the application to the Sinking Fund of only such surplus as may remain beyond the actual appropriations, and which, though not paid in the year for which they were granted, are liable to be demanded at any time within two years after the appropriations respectively. In this view, the balances of unexpended appropriations cannot be considered as any part of the means of the Treasury applicable to the *public debt*. Therefore, though the sum of $3,500,000, being the balances of unexpended appropriations of 1825, was in the Treasury on the 1st of January, 1826, it will probably be expended in the course of the year; and though the like sum should remain in the Treasury on the 1st of January, 1827, yet, being of the appropriations of 1826, would, for that reason, be inapplicable to the Sinking Fund, under the section already recited.

In ascertaining the amount of the surplus which upon these principles may be applied to the Sinking Fund in the year 1826, there must be deducted from the sum stated by the annual report to be in the Treasury on the 1st of January, 1826, amounting to $5,284,061 78

1. The balances of unexpended appropriations	$3,500,000 00	
2. The unavailable funds	1,000,000 00	
		4,500,000 00
Leaving in the Treasury on the 1st of January, 1826, a surplus of		784,061 78

To this sum must be added—

1. The amount of the annual appropriation to the Sinking Fund applicable to the principal of debt, as above shown, amounting to	6,059,341 69
2. The surplus estimated by the Secretary of the Treasury to be in the Treasury on the 31st of December, 1826, after deducting the $2,000,000 reserved by the act of 1817	2,915,269 98
Making an aggregate, applicable to the principal of the public debt during the year 1826, of	9,758,673 45
Which being deducted from the amount of debt reimbursable in that year of	16,270,797 24
Leaves a balance of that debt unpaid of	6,512,123 79

Which is less by about $2,487,876 21 than the estimate of the Secretary of the Treasury.

Upon similar principles of calculation, the surplus applicable to the $13,096,542 90 reimbursable in 1827 may be shown as follows:

From the annual appropriation to the Sinking Fund of		$10,000,000 00
Deduct the amount requisite for the interest of the debt not paid in 1826, being		3,658,406 46
Leaves of the same fund applicable to the principal of the debt the sum of		6,341,593 54
To which must be added the surplus estimated by the Secretary of the Treasury to be in the Treasury on the 31st of December, 1827, of		4,915,269 98
Making together		11,256,863 52
Which sum being deducted from the debt redeemable in 1827 of		13,096,542 90
Leaves of that debt a balance of		1,839,679 38
Which is less by $4,160,330 62 than that estimated by the Secretary of the Treasury; in other words, from the amount of debt reimbursable in 1826 and 1827 of		29,267,340 14
Deduct, as exhibited by the committee—		
1. The surplus in the Treasury on the 1st of January, 1826	$784,061 78	
For 1826.—2. The amount of Sinking Fund applicable to the principal	6,059,341 69	
3. Surplus in the Treasury under law of 1817	2,915,269 98	
For 1827.—1. Amount of Sinking Fund applicable to principal	6,341,593 54	
2. Surplus in the Treasury under law of 1817	4,915,269 98	
Amounting together to		21,015,836 97
And there will remain a balance of those two years, for which the means of the Treasury for the same years are inadequate, of		8,351,803 17
The estimate of the Secretary of the Treasury shows a balance of the debt of the year 1826 of		9,000,000 00
And of the year 1827 of		6,000,000 00
Making together		15,000,000 00
Being more than that exhibited by the committee of		6,648,196 83

This difference arises, it is presumed, by the committee having added to the annual appropriation of the Sinking Fund the surplus, pursuant to the law of 1817.

For whatever balance of the debt that may remain in the years 1826 and 1827, to the payment whereof in those years the means of the Treasury may be inadequate, the Secretary recommends a loan of $9,000,000 in 1826, and of $6,000,000 in 1827, at a rate of interest not exceeding five per cent., reimbursable in equal roportions in the years 1829 and 1830; and the inducement to this arrangement on the part of the Government would be any saving which might be made in the difference of interest between the rate of five and six per cent.

If the estimate submitted by the committee be correct, the saving to the Government would scarcely justify any attempt, in the present embarrassed state of the money market, to change the stock to the prejudice of the stockholders.

But for the purpose of a more satisfactory illustration of the subject, the subsequent remarks of this report will take the assumption of the Secretary of the Treasury to be correct, and will suppose that, if it be expedient to authorize a loan or exchange, it should be for $9,000,000 in the year 1826, and $6,000,000 in the year 1827.

A similar recommendation was heretofore made and partially adopted by Congress in the several acts of 1820, 1822, 1824, and 1825.

At those periods the state of the Treasury and of the public debt were different; the saving to the Government was an object of greater importance, the inducement to the stockholders more flattering, and the probability of effecting a loan or exchange upon the terms proposed more reasonable. The committee have considered the subject in reference to the existing state of things with all the respect due to the head of the Treasury Department.

This proposition of a loan or exchange of stock, bearing an interest of five per centum, proceeds upon the supposition that the character of the several loans by which the six per cent. stocks have been created does not admit of partial payments, and that no part of one loan can be paid until the means of the Treasury are adequate to pay the whole; that, by this means, the debt may be distributed more equally in those years in which, upon this principle, no loan is reimbursable; that it would lessen the amount of expenditure on account of interest, and guard against the possible accumulation of money in the Treasury in those years in which it has been supposed it could not be applied to the reduction of the debt.

Frequent changes in the public stocks, affecting their value and character, are, in general, inexpedient; to be justified principally by the financial exigencies of the country, and a great reduction in the value of money.

Though the present state of the national finances may not be adequate to the entire discharge of the public debt as soon as the Government shall acquire the right to redeem it, a new loan would not substantially vary their condition by continuing the same debt in a different form and at a less rate of interest. The nature of the stipulation for a period before which the stock cannot be redeemed is for the advantage of the creditor. The right of the Government is, to pay it at any time at its pleasure after that period; so that, in fact, the debt is not due until it is the pleasure of the Government to discharge it. In this situation are all the existing six per cents; and as long as the terms of these stocks remain unchanged, the time of payment is limited, after the respective periods of their reimbursement, only by the convenience of the Treasury, and may be paid in any one year, or in more years than one, according to the pleasure of the United States. The advantage of throwing any portion of the debt upon any particular year, by a new loan, would not be nominal merely, or even convenient to the Government; but, as the

period of reimbursement would necessarily be prolonged, in order to reduce the rate of interest, the United States would have less discretion in this respect than they now have.

From the best information the committee have been able to acquire, the present is believed to be an unfavorable time to exchange stock, or to procure new loans on reasonable terms. The embarrassments in the money market, both in the United States and Europe, are of a very serious character, and likely to increase, rather than diminish, for some time to come. If the act of the last session, in a comparatively prosperous state of the country, failed of its object, it is not probable that an addition of one half per cent. in the rate of interest would, in the present condition of things, produce a better result. The committee do not believe a loan or exchange could be effected at an interest of five per centum, redeemable in 1829 and 1830; and a loan at an interest of five and a half per centum would be productive of little, if any, advantage.

If these stocks cannot be partially paid, or if no part of a loan can be reimbursed until the means of the Treasury are adequate to discharge the whole, then the inconvenience of an accumulation of money in the Treasury will exist, and there will be an advantage in a new loan or exchange of stock, bearing a reduced rate of interest, redeemable at those periods when the means of the Treasury may be beneficially applied. But, in the opinion of the committee, partial payments of any part or the whole of the six per cent. stocks are admissible and expedient.

The right of paying off the whole or any part of these stocks, at the pleasure of the Government, at any time after they become reimbursable, is expressly reserved by the several acts of Congress and the proposals by which the subscriptions were authorized; the proposals for the loans of 1813 varying from the others only in requiring that in any reimbursement of such loan the whole stock owned by any one individual on the last day of December, 1825, shall be paid.

In the instance of the converted or exchanged six per cent. stock of 1807, the expedient of partial payments was resorted to in the years 1809, 1810, 1811, and 1812, and the portions to be paid were designated by lottery, in the manner stated in the memorandum from the office of the Register, marked A, herewith submitted.

The various modes of paying off the public debt, reimbursable at the pleasure of the Government, may be stated as follows:

1. By paying the whole of any loan whenever the means of the Treasury may be adequate to its entire discharge.

This operation would necessarily lead to the accumulation of large sums in the Treasury, increase the expenditure on account of interest, and is the mode ordinarily adopted.

2. By a new loan or exchange of stock reimbursable at a period sufficiently remote to make it advantageous to the lender to reduce the interest.

3. By applying the means of the Treasury, including the surplus appropriated by the act of the 3d of March, 1817, at the end of each quarter, to the payment of so much of the debt as can be discharged by such surplus, and as shall be designated at the Treasury by lottery or otherwise.

In the opinion of the committee there can be no doubt that all the six per cent. stocks of the United States may be redeemed by either of the above modes in the course of the year 1829, and by either the first or third mode sooner than by the second, especially as by the terms of the new loan the stock thereby created could not be reimbursed before January 1, 1830.

The particular operation of these several modes, as it respects the state of the finances, of the public debt, and the time and manner of its redemption, will be exhibited in the following statements, correspondingly numbered.

In each of these statements the surplus in the Treasury, of 1826, is taken to be $5,000,000, instead of $4,915,269 98, as estimated by the Secretary, which, though they believe it will be more, the committee assume for the present, for the sake of round numbers.

Although all calculations extended so much in detail are more or less liable to numerical error, it is believed that those contained in this report are not so inaccurate as materially to vary the results which they present.

No. 1.

Statement showing the periods at which the six per cents may be redeemed, supposing the means of the Treasury applicable to the payment of the public debt to be the same during the years 1827, 1828, *and* 1829, *as estimated by the Secretary of the Treasury for the year* 1826; *also the amount of interest paid quarterly during such redemption; and likewise the balance in the Treasury at the close of each quarter. In this statement, as well as in the statement No.* 2, *the means of the Treasury are not applied to the payment of a portion of any loan then reimbursable, but are reserved until they are adequate to the reimbursement of the whole of such loan, leaving about two millions of dollars in the Treasury.*

According to the last annual report of the Secretary of the Treasury, the balance in the Treasury on the 1st of January, 1826, was estimated at	$5,284,061 78	
Of which there would be required for unsatisfied appropriations.....	3,500,000 00	
Leaving a surplus of.....	1,784,061 78	
Of this surplus, however, he estimated as not effective about.....	1,000,000 00	
Leaving a surplus available for 1826 of.....		$784,061 78
This sum, together with the sum estimated by the Secretary in the expenditures of the year 1826, as the expenditure on account of the public debt, (viz: $10,000,000,) and together with the amount of the surplus revenue of that year, (viz: $4,915,269 98, say $5,000,000,) will therefore be considered as the amount applicable to the public debt. For the first quarter of the year 1826 may accordingly be added one-fourth of the sum estimated by the Secretary as the expenditure for the debt, being.....		2,500,000 00
And one-fourth of the estimated surplus of the year.....		1,250,000 00
Making the amount disposable for the debt on the 1st of April, 1826.....		4,534,061 78
From which deduct one quarter's interest, payable on that day.....		1,022,931 82
And there will remain a balance towards the next quarter of.....		3,511,129 96

Brought forward	$3,511,129 96
For the second quarter of the year 1826 may be added, as in the first quarter	3,750,000 00
Making the amount disposable for the debt on the 1st of July, 1826	7,261,129 96
From which deduct one quarter's interest, payable on that day, of	1,022,931 82
And there will remain a balance of	6,238,198 14
Consequently, on the 1st of July, 1826, may be redeemed of the six per cents of 1813 the residue of the seven and a half million loan, amounting to	5,035,599 16
Leaving a balance towards the next quarter of	1,202,598 98
For the third quarter of 1826 may be added, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of October, 1826	4,952,598 98
From which deduct one quarter's interest, payable on that day	947,397 84
And there will remain a balance towards the next quarter of	4,005,201 14
For the fourth quarter of 1826 may be added, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of January, 1827	7,755,201 14
From which deduct one quarter's interest, payable on that day	947,397 84
And there will remain a balance towards the next quarter of	6,807,803 30
For the first quarter of 1827 may be added, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of April, 1827	10,557,803 30
From which deduct one quarter's interest, payable on that day	947,397 84
And there will remain a balance towards the next quarter of	9,610,405 46
For the second quarter of 1827 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of July, 1827	13,360,405 46
From which deduct one quarter's interest, payable on that day	947,307 84
And there will remain a balance of	12,413,007 62
Consequently, on the 1st of July, 1827, may be redeemed of the six per cents of 1813 the residue of the sixteen million loan, amounting to	11,235,198 08
Leaving a balance towards the next quarter of	1,177,809 54
For the third quarter of 1827 add, as before	3,750,000 00
Making the amount disposable for the debt on the first of October, 1827	4,927,809 54
From which deduct one quarter's interest, payable on that day	778,869 87
Leaving a balance towards the next quarter of	4,148,939 67
For the fourth quarter of 1827 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of January, 1828	7,898,939 67
From which deduct one quarter's interest, payable on that day	778,869 87
Leaving a balance towards the next quarter of	7,120,069 80
For the first quarter of 1828 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of April, 1828	10,870,069 80
From which deduct one quarter's interest, payable on that day	778,869 87
Leaving a balance towards the next quarter of	10,091,199 93
For the second quarter of 1828 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of July, 1828	13,841,199 93
From which deduct one quarter's interest, payable on that day	778,869 87
Leaving a balance towards the next quarter of	13,062,330 06
For the third quarter of 1828 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of October, 1828	16,812,330 06
From which deduct one quarter's interest, payable on that day	778,869 87
And there will remain a balance of	16,033,460 19
Consequently, on the 1st of October, 1828, may be redeemed the six per cents of 1814, amounting to	13,096,542 90
Leaving a balance towards the next quarter of	2,936,917 29
For the fourth quarter of 1828 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of January, 1829	6,686,917 29
From which deduct one quarter's interest, payable on that day	582,421 72
Leaving a balance towards the next quarter of	6,104,495 57

Brought forward	$6,104,495 57
For the first quarter of 1829 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of April, 1829	9,854,495 57
From which deduct one quarter's interest, payable on that day	582,421 72
Leaving a balance towards the next quarter of	9,272,073 85
For the second quarter of 1829 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of July, 1829	13,022,073 85
From which deduct one quarter's interest, payable on that day	582,421 72
And there will remain a balance of	12,439,652 13
Consequently, on the 1st of July, 1829, may be redeemed the six per cents of 1815, amounting to	9,490,099 10
Leaving a balance in the Treasury, after redeeming all the six per cents, of	2,949,553 03
But to furnish means for a comparison hereafter to be made, it is proper to continue this calculation to the 1st of January, 1830; therefore—	
For the third quarter of 1829 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of October, 1829	9,699,553 03
From which deduct one quarter's interest, payable on that day	440,070 23
Leaving a balance towards the next quarter of	6,259,482 80
For the fourth quarter of 1829 add, as before	3,750,000 00
Making the amount disposable for the debt on the 1st of January, 1830	10,009,482 80
From which deduct one quarter's interest, payable on that day	440,070 23
And there will remain a balance on the 1st of January, 1830, of	9,569,412 57

RECAPITULATION.

According to the foregoing calculations, the 6 per cents will be redeemed as follows:

On the 1st of July, 1826, 6 per cents of 1813, (7½-million loan,) redeemable January 1, 1826,	$5,035,599 16
On the 1st of July, 1827, 6 per cents of 1813, (16-million loan,) redeemable January 1, 1826,	11,235,198 08
On the 1st of October, 1828, 6 per cents of 1814, redeemable January 1, 1827	13,096,542 90
On the 1st of July, 1829, 6 per cents of 1815, redeemable January 1, 1828	9,490,099 10

The interest paid on the public debt during the period embraced in these calculations will be as follows:

On the 1st of April, 1826	$1,022,931 82
July, 1826	1,022,931 82
October, 1826	947,397 84
January, 1827	947,397 84
April, 1827	947,397 84
July, 1827	947,397 84
October, 1827	778,869 87
January, 1828	778,869 87
April, 1828	778,869 87
July, 1828	778,869 87
October, 1828	778,869 87
January, 1829	582,421 72
April, 1829	582,421 72
July, 1829	582,421 72
October, 1829	440,070 23
January, 1830	440,070 23
Making a total of	12,357,209 97

The balances in the Treasury at the same periods will be as follows:

On the 1st of April, 1826	$3,511,129 96
July, 1826	1,202,598 98
October, 1826	4,005,201 14
January, 1827	6,807,803 30
April, 1827	9,610,405 46
July, 1827	1,177,809 54
October, 1827	4,148,939 67
January, 1828	7,120,069 80
April, 1828	10,091,199 93
July, 1828	13,062,330 06
October, 1828	2,936,917 29
January, 1829	6,104,495 57
April, 1829	9,272,073 85
July, 1829	2,949,553 03
October, 1829	6,259,482 80
January, 1830	9,569,412 57

No. 2.

Statement showing the periods at which the 6 per cents will be redeemed, supposing a loan or exchange at five per cent. to the amount of $9,000,000 *to be made for those of* 1813, *and a loan or exchange of* $6,000,000 *for those of* 1814, *according to the recommendation of the Secretary of the Treasury; and supposing, also, the means of the Treasury applicable to the payment of the public debt be the same during the years* 1827, 1828, *and* 1829, *as estimated by the Secretary for the year* 1826; *also the amount of interest paid quarterly during the redemption of the 6 per cents and of the 5 per cents exchanged for them; and, likewise, the balance in the Treasury at the close of each quarter during that period.*

The surplus in the Treasury on the 1st of January, 1826, is estimated by the Secretary at	$784,061 78
According to the data assumed in the former calculation, the means disposable for the debt in the first quarter of 1826, in addition to this surplus, will be—	
One-fourth of the sum estimated to be expended on the debt during the year 1826 being..	2,500,000 00
And one-fourth of the estimated surplus of the year, say	1,250,000 00
Making the total amount disposable for the debt on the 1st of April, 1826	4,534,061 78
From which deduct one quarter's interest, payable on that day	1,022,931 82
Leaving a balance towards the next quarter of	3,511,129 96
For the second quarter of 1826 add, as heretofore, one-fourth of the sum allotted for the debt, and one-fourth of the surplus	3,750,000 00
Making the amount disposable for the debt on the 1st of July, 1826	7,261,129 96
From which deduct one quarter's interest, payable on that day	1,022,931 82
Leaving a balance of	6,238,198 14
To which add this sum, proposed to be borrowed on that day, at 5 per cent.*	9,000,000 00
Making an increased balance on the 1st of July, 1826.	15,238,198 14
Consequently, on that day, the residue of the 16-million loan (6 per cent. of 1813) may be redeemed, amounting to	11,235,198 08
Leaving a balance towards the next quarter of	4,003,000 06
For the third quarter of 1826 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of October, 1826	7,753,000 06
From which deduct one quarter's interest, payable on that day	966,903 85
Leaving a balance of	6,786,096 21
Consequently, on that day, the residue of the 7½-million loan (6 per cents of 1813) may be redeemed, amounting to	5,035,599 16
Leaving a balance towards the next quarter of	1,750,497 05
For the fourth quarter of 1826 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of January, 1827	5,500,497 05
From which deduct one quarter's interest, payable on that day	891,369 86
Leaving a balance towards the next quarter of	4,609,127 19
For the first quarter of 1827 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of April, 1827	8,359,127 19
From which deduct one quarter's interest, payable on that day	891,369 86
Leaving a balance towards the next quarter of	7,467,757 33
For the second quarter of 1827 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of July, 1827	11,217,757 33
From which deduct one quarter's interest, payable on that day	891,369 86
Leaving a balance towards the next quarter of	10,326,387 47
To which add this sum, proposed to be borrowed that day, at 5 per cent.*	6,000,000 00
Making an increased balance on the 1st of July, 1827, of	16,326,387 47
Consequently, on that day, the 6 per cents of 1814 may be redeemed, amounting to	13,096,542 90
Leaving a balance towards the next quarter of	3,229,844 57
For the third quarter of 1827 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of October, 1827	6,979,844 57
From which deduct one quarter's interest, payable on that day	769,921 72
Leaving a balance towards the next quarter of	6,209,922 85
For the fourth quarter of 1827 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of January, 1828	9,959,922 85

*NOTE.—The time at which these sums are here supposed to be borrowed is the time at which they may be most advantageously applied.

Brought forward	$9,959,922 85
From which deduct one quarter's interest, payable on that day	769,921 72
Leaving a balance towards the next quarter of	9,190,001 13
For the first quarter of 1828 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of April, 1828	12,940,001 13
From which deduct one quarter's interest, payable on that day	769,921 72
Leaving a balance of	12,170,079 41
Consequently, on that day, the 6 per cents of 1815 may be redeemed, amounting to	9,490,099 10
Leaving a balance towards the next quarter of	2,679,980 31
For the second quarter of 1828 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of July, 1828	6,429,980 31
From which deduct one quarter's interest, payable on that day	627,570 23
Leaving a balance towards the next quarter of	5,802,410 08
For the third quarter of 1828 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of October, 1828	9,552,410 08
From which deduct one quarter's interest, payable on that day	627,570 23
Leaving a balance towards the next quarter of	8,924,839 85
For the fourth quarter of 1828 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of January, 1829	12,674,839 85
From which deduct one quarter's interest, payable on that day	627,570 23
Leaving a balance of	12,047,269 62
Consequently, on that day, one-half of the $9,000,000 borrowed on the 1st of July, 1826, and one-half of the $6,000,000 borrowed on the 1st of July, 1827, may be redeemed, amounting to	7,500,000 00
Leaving a balance towards the next quarter of	4,547,269 62
For the first quarter of 1829 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of April, 1829	8,297,269 62
From which deduct one quarter's interest, payable on that day	533,820 23
Leaving a balance towards the next quarter of	7,763,449 39
For the second quarter of 1829 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of July, 1829	11,513,449 39
From which deduct one quarter's interest, payable on that day	533,820 23
Leaving a balance towards the next quarter of	10,979,629 16
For the third quarter of 1829 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of October, 1829	14,729,629 16
From which deduct one quarter's interest, payable on that day	533,820 23
Leaving a balance towards the next quarter of	14,195,808 93
For the fourth quarter of 1829 add, as heretofore	3,750,000 00
Making the amount disposable for the debt on the 1st of January, 1830	17,945,808 93
From which deduct one quarter's interest, due that day	533,820 23
Leaving a balance of	17,411,988 70
Consequently, on that day, the remaining half of the sums borrowed on the 1st of July, 1826, and 1st of July, 1827, may be redeemed, amounting to	7,500,000 00
Leaving a balance on the 1st of January, 1830, of	9,911,988 70

RECAPITULATION.

According to the foregoing calculations the six per cents will be redeemed as follows:

On the 1st of July, 1826, six per cents of 1813, (sixteen million loan,) redeemable 1st January, 1826	$11,235,198 08
On the 1st of October, 1826, six per cents of 1813, (seven and a half million loan,) redeemable 1st January, 1826	5,035,599 16
On the 1st of July, 1827, six per cents of 1814, redeemable 1st January, 1827	13,096,542 90
On the 1st of April, 1828, six per cents of 1815, redeemable 1st January, 1828	9,490,099 10
	38,857,439 24

The interest paid on the public debt during the period embraced in the foregoing calculations will be as follows:

On the 1st of April,	1826	$1,022,931 82
July,	1826	1,022,931 82
October,	1826	966,903 85
January,	1827	891,369 86
April,	1827	891,369 86
July,	1827	891,369 86
October,	1827	762,991 72
January,	1828	769,921 72
April,	1828	769,921 72
July,	1828	627,570 23
October,	1828	627,570 23
January,	1829	627,570 23
April,	1829	533,820 23
July,	1829	533,820 23
October,	1829	533,820 23
January,	1830	533,820 23
Making a total of		12,014,633 84

The balances in the Treasury at the same periods will be as follows:

On the 1st of April,	1826	$3,511,129 96
July,	1826	4,003,000 06
October,	1826	1,750,497 05
January,	1827	4,609,127 19
April,	1827	7,467,757 33
July,	1827	3,229,844 57
October,	1827	6,209,922 85
January,	1828	9,190,001 13
April,	1828	2,679,980 31
July,	1828	5,802,410 08
October,	1828	8,924,839 85
January,	1829	4,547,269 62
April,	1829	7,763,449 39
July,	1829	10,979,629 16
October,	1829	14,195,808 93
January,	1830	9,911,988 70

No. 3.

Statement showing the periods at which the 6 *per cents will be redeemed, supposing the means of the Treasury applicable to the payment of the public debt be the same during the years* 1827, 1828, *and* 1829, *as estimated by the Secretary for the year* 1826, *and supposing that at the close of each quarter the surplus then in the Treasury, over and above two millions of dollars, be applied to the redemption of that stock, according to the act of March* 3, 1817; *and showing also the amount of interest paid quarterly during the redemption, and to January* 1, 1830.

According to the estimate of the Secretary, the available surplus in the Treasury on the 1st of January, 1826, was	$784,061 78
And, according to the data assumed in the former calculation, the means disposable for the debt in the first half year of 1826, in addition to this surplus, will be—	
One-half of the sum estimated to be expended for the debt during the year 1826, being	5,000,000 00
And one-half of the estimated surplus of the year, (in round numbers, $5,000,000,) being	2,500,000 00
Making the total amount disposable for the debt on the 1st of July, 1826	8,284,061 78
From which deduct this sum, which is to be reserved in the Treasury	2,000,000 00
Leaving a balance to be applied to the debt of	6,284,061 78
From which deduct one half year's interest, payable on that day, (July 1, 1826)	2,045,863 64
Leaving a balance to be applied to the principal on that day of	4,238,198 14
On that day, therefore, may be redeemed of the 6 per cents of 1813, (16-million loan)	4,238,198 08
Leaving towards the next quarter	6
For the third quarter of 1826 add, as heretofore	3,750,000 00
Making the sum applicable on the 1st of October, 1826	3,750,000 06
From which deduct one quarter's interest payable on that day	959,358 85
Leaving a balance to be applied to the principal on that day of	2,790,641 21
On that day, therefore, may be redeemed of the 6 per cents of 1813 (16-million loan) the further sum of	2,790,600 00
Leaving towards the next quarter	41 21

Brought forward.....	$41 21
For the fourth quarter of 1826 add, as before	3,750,000 00
Making the sum applicable on the 1st of January, 1827.....	3,750,041 21
From which deduct one quarter's interest, payable on that day	917,499 85
Leaving a balance to be applied to the principal on that day of.....	2,832,541 36
On that day, therefore, may be redeemed of the 6 per cents of 1813 (16-million loan) the further sum of	2,832,500 00
Leaving towards the next quarter.....	41 36
For the first quarter of 1827 add, as heretofore	3,750,000 00
Making the sum applicable on the 1st of April, 1827	3,750,041 36
From which deduct one quarter's interest, payable on that day.....	875,012 35
Leaving a balance to be applied to the principal on that day of	2,875,029 01
On that day, therefore, may be redeemed the residue of the 16-million loan, (6 per cents of 1813,) being	1,373,900 00
Which will still leave a balance applicable to the principal of.....	1,501,129 01
On that day, therefore, may also be redeemed of the 6 per cents of 1813, (7½-million loan)	1,501,100 00
Leaving towards the next quarter.....	29 01
For the second quarter of 1827 add, as heretofore	3,750,000 00
Making the sum applicable on the 1st of July, 1827.....	3,750,029 01
From which deduct one quarter's interest, payable on that day.....	831,887 35
Leaving a balance to be applied to the principal on that day of.....	2,918,141 66
On that day, therefore, may be redeemed a further portion of the 6 per cents of 1813, (7½-million loan,) of.....	2,918,100 00
Leaving towards the next quarter.....	41 66
For the third quarter of 1827 add, as heretofore.....	3,750,000 00
Making the sum applicable on the 1st of October, 1827.....	3,750,041 66
From which deduct one quarter's interest, payable on that day.....	788,115 85
Leaving a balance to be applied to the principal of	2,961,925 81
On that day, therefore, may be redeemed the residue of the seven and a half million loan, (6 per cents of 1813).....	616,399 16
Which will still leave a balance applicable to the principal of	2,345,526 65
On that day, therefore, may also be redeemed of the 6 per cents of 1814	2,345,500 00
Leaving towards the next quarter.....	26 65
For the fourth quarter of 1827 add, as heretofore.....	3,750,000 00
Making the sum applicable on the 1st of January, 1828	3,750,026 65
From which deduct one quarter's interest, payable on that day.....	743,687 35
Leaving a balance to be applied to the principal of	3,006,339 30
On that day, therefore, may be redeemed a further portion of the 6 per cents of 1814, of.	3,006,300 00
Leaving towards the next quarter.....	39 30
For the first quarter of 1828 add, as heretofore	3,750,000 00
Making the sum applicable on the 1st of April, 1828.....	3,750,039 30
From which deduct one quarter's interest, payable on that day.....	698,592 85
Leaving a balance to be applied to the principal of	3,051,446 45
On that day, therefore, may be redeemed a further portion of the 6 per cents of 1814, of.	3,051,442 90
Leaving towards the next quarter.....	3 55
For the second quarter of 1828 add, as heretofore	3,750,000 00
Making the sum applicable on the 1st of July, 1828	3,750,003 55
From which deduct one quarter's interest, payable on that day.....	652,821 22
Leaving a balance to be applied to the principal of	3,097,182 33
On that day, therefore, may be redeemed a further portion of the 6 per cents of 1814, of.	3,097,100 00
Leaving towards the next quarter.....	82 33
For the third quarter of 1828 add, as heretofore	3,750,000 00
Making the sum applicable on the 1st of October, 1828.....	3,750,082 33
From which deduct one quarter's interest, payable on that day.....	606,364 72
Leaving a balance to be applied to the principal of	3,143,717 61

Brought forward		$3,143,717 61
On that day, therefore, the residue of the 6 per cents of 1814 may be redeemed, amounting to		1,596,200 00
Which will still leave a balance applicable to the payment of principal of		1,547,517 61
On that day, therefore, may also be redeemed of the 6 per cents of 1815		1,547,500 00
Leaving towards the next quarter		18 61
For the fourth quarter of 1828 add, as heretofore		3,750,000 00
Making the sum applicable on the 1st of January, 1829		3,750,018 61
From which deduct one quarter's interest, payable on that day		559,209 22
Leaving a balance to be applied to the principal		3,190,809 39
On that day, therefore, may be redeemed of the 6 per cents of 1815 a further portion of		3,190,800 00
Leaving towards the next quarter		9 39
For the first quarter of 1829 add, as heretofore		3,750,000 00
Making the sum applicable on the 1st of April, 1829		3,750,009 39
From which deduct one quarter's interest, payable on that day		511,347 22
Leaving a balance to be applied to the principal		3,238,662 17
On that day, therefore, may be redeemed of the 6 per cents of 1815 a further portion of		3,238,600 00
Leaving towards the next quarter		62 17
For the second quarter of 1829 add, as heretofore		3,750,000 00
Making the sum applicable on the 1st of July, 1829		3,750,062 17
From which deduct one quarter's interest, payable on that day		462,768 22
Leaving a balance to be applied to the principal		3,287,292 95
On that day, therefore, may be redeemed the residue of the 6 per cents of 1815, being		1,513,199 10
Leaving a balance of		1,774,093 85
To which add this sum, heretofore reserved		2,000,000 00
Making a balance in the Treasury on the 1st of July, 1829, after redeeming all the 6 per cent. stocks, of		3,774,093 85
To furnish the means for a comparison hereafter to be made, however, it is proper to continue this calculation to the 1st of January, 1830.		
For the third quarter of 1829, therefore, add, as heretofore		3,750,000 00
Making the sum applicable on the 1st of October, 1829		7,524,093 85
From which deduct one quarter's interest, payable on that day		440,070 23
Leaving a balance of		7,084,023 62
For the fourth quarter of 1829 add, as heretofore		3,750,000 00
Making the sum applicable on the 1st of January, 1830		10,834,023 62
From which deduct one quarter's interest, payable on that day		440,070 23
Leaving a balance in the Treasury on the 1st of January, 1830, of		10,393,943 39

RECAPITULATION.

According to the foregoing calculation the 6 per cents will be redeemed as follows:

Of the 6 per cents of 1813, (sixteen million loan,) on the 1st of July, 1826	$4,238,198 08	
Of the same, on the 1st of October, 1826	2,790,600 00	
Of the same, 1st of January, 1827	2,832,500 00	
Of the same, 1st of April, 1827	1,373,900 00	
		$11,235,198 08
Of the 6 per cents of 1813, (seven and a half million loan,) on the 1st of April, 1827	1,501,100 00	
Of the same, 1st of July, 1827	2,918,100 00	
Of the same, 1st of October, 1827	616,399 16	
		5,035,599 16
Of the 6 per cents of 1814, on the 1st of October, 1827	2,345,500 00	
Of the same, 1st of January, 1828	3,006,300 00	
Of the same, 1st of April, 1828	3,051,442 90	
Of the same, 1st of July, 1828	3,097,100 00	
Of the same, 1st of October, 1828	1,596,200 00	
		13,096,542 90
Of the 6 per cents of 1815, on the 1st of October, 1828	1,547,500 00	
Of the same, 1st of January, 1829	3,190,800 00	
Of the same, 1st of April, 1829	3,238,600,00	
Of the same, 1st of July, 1829	1,513,199 10	
		9,490,099 10

And the interest, which will be paid quarterly, on the public debt during the same period and to the 1st of January, 1830, will be as follows:

On the 1st of July,	1826	$2,045,863 64
October,	1826	959,358 85
January,	1827	917,499 85
April,	1827	875,012 35
July,	1827	831,887 35
October,	1827	788,115 85
January,	1828	743,687 35
April,	1828	698,592 85
July,	1828	652,821 22
October,	1828	606,364 72
January,	1829	559,209 22
April,	1829	511,347 22
July,	1829	462,768 22
		10,652,528 69
October,	1829	440,070 23
January,	1830	440,070 23
Total		11,532,669 15

The balances in the Treasury at the same periods will be as follows:

On the 1st of July,	1826	$2,000,000 06
October,	1826	2,000,041 21
January,	1827	2,000,041 36
April,	1827	2,000,029 01
July,	1827	2,000,041 66
October,	1827	2,000,026 65
January,	1828	2,000,039 30
April,	1828	2,000,003 55
July,	1828	2,000,082 33
October,	1828	2,000,018 61
January,	1829	2,000,009 39
April,	1829	2,000,052 17
July,	1829	3,774,093 85
October,	1829	7,084,023 62
January,	1830	10,393,943 39

From these statements it results—

That, by adopting either of the modes suggested, all the *six per cents* may be reimbursed before and in the year 1829.

And that, by adopting the mode pursued in number *one* or in number *two*, they may be reimbursed earlier than by embracing the proposition of a new loan or exchange; which, therefore, could be recommended only by an increased saving to the Government.

But from these statements it also results—

That, by adopting the scheme of a loan or exchange—the course illustrated in the statement No. 2—the gain over the course pursued in No. 1 will be $342,576 12.

That, by adopting the mode of partial payments, or the quarterly application of the Sinking Fund and surplus means to the debt—the course illustrated in No. 3—the gain will be as follows:

Over the course pursued in No. 1	$824,540 82
And over that pursued in No. 2	481,934 69

It will be perceived that these results are reached by deducting the balances of unexpended appropriations from the means of the Treasury, and also leaving in the Treasury at the end of each year the sum of $2,000,000, required by the act of March 3, 1817.

The illustrations in statement No. 2 proceed also upon the supposition that a loan or exchange may be effected at a rate of interest not exceeding five per centum; of which, as has been already remarked, there is little probability.

The particular object of the foregoing statements and calculations being to show the operation of various modes of paying off the six per cents becoming reimbursable in 1826, 1827, and 1828, in those years and 1829, no notice has been taken of other portions of the public debt which may be redeemed during the period embraced by those calculations.

It will be perceived, however, that there are balances which may be so applied, and that there are portions of the debt redeemable at that period, viz:

The five per cents subscribed to the Bank of the United States may be paid of in any portions that may be convenient to the Treasury, amounting to	$7,000,000 00
And the exchanged four and a half per cents of 1825:	
Redeemable on 1st January, 1829	792,569 44
Redeemable on 1st January, 1830	792,569 44
Making together	8,585,138 88

If the scheme of partial or quarter payments—the course pursued in statement No. 3—be adopted, $5,524,000 of this amount may be redeemed on *the 1st of October*, 1829, *and the residue on the 1st of January*, 1830.

If the plan of a loan or exchange—the course pursued in statement No. 2—be adopted, the first sum, viz: the $7,000,000, and the second sum, viz: $792,569 44, may be paid off on the 1st of July, 1829; leaving the last sum, viz: $792,569 44, to be paid off on the 1st of April, 1830.

If the course pursued in statement No. 1 be adopted, $4,792,569 44 may be paid off on the 1st of October, 1829, and $3,000,000 on the 1st of January, 1830; leaving also $792,569 44 to be paid off on the 1st of April, 1830.

Hence it will be seen that, by applying the surplus means to the redemption of these stocks, the gain to be derived from pursuing each course will be varied, and, instead of the results presented above, the total gain will be—

Of No. 2 over No. 1	$438,997 53
Of No. 3 over No. 1	806,095 82
And of No. 3 over No. 2	367,098 29

But these calculations are founded upon the amount of the annual receipts and expenditures, as estimated in the report of the Secretary of the Treasury, and on the supposition that the annual appropriation of $500,000 for the gradual increase of the Navy will be continued during the years 1827, 1828, and 1829. If these receipts should be more or less; or if the sum for the gradual increase of the Navy be withheld after the term at present limited by law, which the committee do not contemplate; or if Congress should think proper to authorize extraordinary appropriations towards internal improvements or other objects, the results before presented will be proportionably varied. It will, therefore, depend upon the wisdom of Congress to realize or disappoint these results, according to their views of the expediency of redeeming the whole debt, presented in this report on the 1st of January, 1830, of promoting objects of internal improvement, and providing for the exigencies of the nation.

Further appropriations during the session of Congress must be necessarily anticipated, and if kept within a reasonable limit will not materially vary the foregoing results.

It is believed that the receipts from the impost and sale of public lands will exceed the estimate of the Secretary of the Treasury from one million to one million and a half annually, and that an excess of appropriation to that amount in each year would not disappoint the anticipation in this report.

Should this be erroneous, and it be deemed expedient to redeem the whole amount of debt in this report, including the subscription to the Bank of the United States, on the 1st of January, 1830, and to postpone the application of the national means to objects of internal improvement until that period, Congress may safely add to the standing expenditure one million of dollars in each session, and still accomplish that object.

Supposing, then, the receipts to be the same as estimated by the Secretary of the Treasury, and that there be added to the annual expenditure the sum of $1,000,000, and that $1,000,000 less be applied annually to the debt, all the six per cent. stocks, amounting to $38,857,439 24 may be redeemed previous to and on the 1st day of October, 1829; leaving a balance on the 1st of January, 1830, of $5,992,275 02 to be applied to the stock subscribed to the Bank of the United States.

If Congress should think proper to exceed the estimated expenditure two millions of dollars annually instead of one, which the committee suppose would be the largest justifiable excess, still the six per cent. stock may all be paid before and on the 1st day of October, 1829, though no part of the other debt can be paid on the 1st of January, 1830.

If the excess be annually $1,000,000, and the surplus means to be applied quarterly to the discharge of the debt, the ultimate gain would stand thus:

Number 2 will gain over number 1	$737,575 59
Number 3 will gain over number 1	1,162,425 53
and over number 2	424,849 94

All which is particularly explained and exemplified in the statement herewith submitted, annexed to this report, and marked B.

It will then be apparent that, by adopting the mode of partial payments of the six per cent. stocks, and applying the surplus quarterly, the debt will be more speedily reimbursed, and with an increased saving; will be more equally and beneficially distributed in different years, according to the convenience of the Government; the expenditure on account of interest will be lessened, and all possible accumulation of money in the Treasury effectually guarded against.

If such an operation for the redemption of the public debt be not expressly indicated by the words of the act of March 3, 1817, it is, in the opinion of the committee, clearly pointed out by the scope and policy of that law. It did not propose to wait to the end of a single year, or more years than one, for the whole of a loan to fall due, when it authorized and directed the application of the surplus *at any time*, after an adjournment of Congress, to the "purchase and redemption of the public debt." And the committee perceive no mode so well calculated to give activity to the spirit and provisions of that act as that of quarterly payments.

The operation, it is believed, will not be less beneficial to the stockholders than to the Government; for the more gradually the public debt be reduced, the less will be the influence upon the money market, and the facilities of a more favorable re-investment of the money. The payment of $16,000,000 of debt on a single day could not fail, by making money more plenty, to depress the rate of interest, and consequently increase the difficulties of a profitable re-investment; while gradual payments of three or even more millions in each quarter would not be materially felt.

Under circumstances, therefore, in which the Government is under no obligation to pay the public debt at any precise time, but is at liberty, and perhaps bound in duty, to discharge it with the greatest advantage to the state of the finances, without producing unnecessary inconvenience to the creditor, and giving due weight to the considerations already presented, the committee do not feel themselves authorized to recommend a loan or exchange. They recommend, on the contrary, that the finances of the nation should be judiciously cherished; the public expenditures regulated by a wise and liberal economy, and the surplus means gradually applied in each ensuing quarter of the year to the redemption of such portions of the debt to which they may be adequate.

The committee deem it unnecessary to recommend any particular mode of carrying this scheme into operation, preferring to leave it to be regulated by the convenience and capacity of the Treasury.

It might be accomplished, in relation to all the six per cents, except the $16,000,000 of 1813, by partial payments from time to time of each certificate, and upon the principle of distribution among the several Loan Offices; but as the terms of that loan require all the stock owned by any one individual at a given period to be paid, it would perhaps be best, for the sake of uniformity, to adopt some mode applicable alike to all the debt. In this way, the owners whose stock could be paid at the end of any one ensuing quarter might be designated by lottery, to be drawn at the Treasury on the last day of a preceding quarter, and notice given accordingly for three months of such intended payment on the day therein to be named.

The conclusion which the committee have reached in this report makes it unnecessary for them to consider in detail the expediency of the further recommendation in the report of the Secretary of the

Treasury, to place stockholders who exchanged, under the law of the last session, upon an equality with the terms of a new loan.

These stockholders have voluntarily made their contract with the Government for the equivalent prescribed by the law in postponing the redemption of that stock; this equivalent is rather increased by the scheme of redemption of the six per cents now proposed by the committee, and no reason is perceived for recommending an alteration in their condition. No other could be made, it is presumed, than to reinstate the stock to one bearing an interest of six per cent., which might subject it to an earlier reimbursement; and as it is fairly to be inferred that the exchange was not made without satisfactory evidence with the individual creditor that it was his interest to make it, and without reference to the views or circumstances of others, or the extent to which it might prevail, it is believed there would be no propriety in annulling the arrangement.

All which is respectfully submitted.

A.—*Memorandum of stocks of the United States which have been reimbursed by partial payments, viz:*

Exchanged and converted 6 per cent. stock created per act of February 11, 1807; amount.	$7,853,114 20
Of these stocks there was reimbursed in 1809, by drawing lots for sundry numbers of certificates until they amounted to	2,242,218 24
In 1810 by the same mode	3,751,125 26
In 1811 by the same mode	1,294,452 29
In 1812 by the same mode	565,318 41
	7,853,114 20

After the drawings were completed, the numbers to be reimbursed at each period were advertised for six months previously to their being paid off. It is to be observed, however, that in addition to the progressive numbers which were given to the certificates at each Loan Office, beginning with number one, there was a set of permanent numbers assigned to each office; that each certificate had one of these numbers; that the Agents and Commissioners of Loans were directed to make a return of the permanent numbers issued by them, respectively, to the Treasury; and that the amount of each permanent number so returned was never changed, (the subdivisions by assignments having the same permanent number,) so that when the Treasury decided upon reimbursing a part of the said stock, and having in its possession the permanent number and amount of each certificate originally issued, just so many were drawn as it was deemed expedient at one time to pay off.

The Louisiana stock was reimbursed by instalments agreeably to the terms of the convention and law, one half in 1818, one fourth in 1819, and the residue in 1820, without calling in the certificates till the last payment; but upon the presentation of a certificate for assignment, after the first or second instalments were paid, a new certificate was made out in the name of the assignee for the residue; to those acquainted with the transactions relative to the payments on the certificates of the Louisiana debt, it would be apparent that those which were dated prior to the day which had been fixed for the payment of the instalments, and which remained outstanding subsequently to those payments, would be *less in value* by one-half or three-fourths of the sum expressed in the said certificates.

NOTE.—By the act of February 11, 1807, *at least six months' public notice* of the intended reimbursement was expressly required, but the several acts of Congress authorizing the present six per cents require only "*reasonable notice.*"

B.

Supposing the sum which may be applied annually to the public debt to be one million of dollars less in each year than the sum assumed in the former statements, the result will be as follows:

1. According to the mode exhibited in statement No. 1, the six per cents will be reimbursed thus:

On the 1st October, 1826, 6 per cents of 1813 (7½-million loan)	$5,035,599 16
1st October, 1827, 6 per cents of 1813 (16-million loan)	11,235,198 08
1st January, 1829, 6 per cents of 1814	13,096,542 90
1st January, 1830, 6 per cents of 1815	9,490,099 10

The interest paid on the debt will be—

On the 1st April, 1826	$1,022,931 82	On the 1st April, 1828	$778,869 87
1st July	1,022,931 82	1st July	778,869 87
1st October	1,022,931 82	1st October	778,869 87
1st January, 1827	947,397 84	1st January, 1829	778,869 87
1st April	947,397 84	1st April	582,421 72
1st July	947,397 84	1st July	582,421 72
1st October	947,397 84	1st October	582,421 72
1st January, 1828	778,869 87	1st January, 1830	582,421 72
		Total	13,082,423 05

And the balances in the Treasury will be—

On the 1st April, 1826	$3,261,129 96	On the 1st April, 1828	$7,597,137 98
1st July	5,738,198 14	1st July	10,318,268 11
1st October	3,179,667 16	1st October	13,039,398 24
1st January, 1827	5,732,269 32	1st January, 1829	2,663,985 47
1st April	8,284,871 48	1st April	5,581,563 75
1st July	10,837,473 64	1st July	8,499,142 03
1st October	2,154,877 72	1st October	11,416,720 31
1st January, 1828	4,876,007 85	1st January, 1830	4,844,199 49

2. According to the mode exhibited in statement No. 2, the six per cents will be reimbursed thus:

On the 1st July,	1826, 6 per cents of 1813 (16-million loan)	$11,235,198 08
1st January,	1827, 6 per cents of 1813 (7½-million loan)	5,035,599 16
1st October,	1827, 6 per cents of 1814	13,096,542 90
1st July,	1828, 6 per cents of 1815	9,490,099 10

And, as being most advantageous, the loans proposed by the Secretary, redeemable in 1829 and 1830, to be made as follows: the $9,000,000, for 1826, on the 1st July, 1826; and the $6,000,000, for 1827, on the 1st October, 1827.

The interest paid on the debt will be—

On the 1st April, 1826	$1,022,931 82	On the 1st April, 1828	$769,921 72
1st July	1,022,931 82	1st July	769,921 72
1st October	966,903 85	1st October	627,527 23
1st January, 1827	966,903 85	1st January, 1829	627,570 23
1st April	891,369 86	1st April	533,820 23
1st July	891,369 86	1st July	533,820 23
1st October	891,369 86	1st October	533,820 23
1st January, 1828	769,921 72	1st January, 1830	533,820 23
		Total	12,353,947 46

And the balances in the Treasury will be—

On the 1st April, 1826	$3,261,129 96	On the 1st April, 1828	$9,723,097 28
1st July	5,738,198 14	1st July	12,453,175 56
1st October	6,036,096 21	1st October	5,835,506 23
1st January, 1827	8,569,192 36	1st January, 1829	8,707,936 00
1st April	6,142,223 34	1st April	4,174,115 77
1st July	8,750,853 48	1st July	7,140,295 54
1st October	11,359,483 62	1st October	10,106,475 31
1st January, 1828	6,993,019 00	1st January, 1830	5,572,655 08

3. According to the mode exhibited in statement No. 3, the six per cents will be reimbursed thus:

On the 1st July, 1826, of the six per cents of 1813 (16-million loan)	$3,738,198 08	
1st October ... do ... do ... do	2,533,100 00	
1st January, 1827 ... do ... do ... do	2,571,100 00	
1st April ... do ... do ... do	2,392,800 00	
		$11,235,198 08
1st July ... do ... do ... (7½-million loan)	2,862,500 00	
1st October ... do ... do ... do	2,173,099 16	
		5,035,599 16
1st January, 1828, of the six per cents of 1814	3,236,642 90	
1st April ... do ... do	2,769,600 00	
1st July ... do ... do	2,811,300 00	
1st October ... do ... do	2,853,300 00	
1st January, 1829 ... do ... do	1,425,700 00	
		13,096,542 90
1st January, 1829, of the six per cents of 1815	1,470,500 00	
1st April ... do ... do	2,939,700 00	
1st July ... do ... do	2,983,700 00	
1st October ... do ... do	2,096,199 10	
		9,490,099 10

The interest paid on the debt will be—

On the 1st April, 1826	$1,022,931 82	On the 1st April, 1828	$730,320 22
1st July	1,022,931 82	1st July	688,776 22
1st October	966,858 85	1st October	646,606 72
1st January, 1827	928,862 35	1st January, 1829	603,807 22

19TH CONGRESS.] No. 740. [1ST SESSION.

SINKING FUND FOR THE PAYMENT OF THE PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 8, 1826.

The Commissioners of the Sinking Fund respectfully report to Congress:

That the measures which have been authorized by the Board subsequent to the last report of February 5, 1825, as far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the 4th day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

J. C. CALHOUN,
Vice President.
J. MARSHALL,
Chief Justice of the U. S.
RICHARD RUSH,
Secretary of the Treasury.
WM. WIRT,
Attorney General of the U. S.

WASHINGTON, *February* 6, 1826.

TREASURY DEPARTMENT, *February* 4, 1826.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That the sums disbursed from the Treasury during the year 1824, on account of the principal and interest of the public debt, amounted, as per the last annual report, to..... $16,568,393 76

And have been accounted for in the following manner, viz:

There was applied for the payment of a sum short provided, on account of the public debt, prior to the 1st of January, 1824, as per statement B, annexed to the last annual report,		115,407 50
And there was applied, during the year 1824, towards the payment of the principal and interest of the public debt, as ascertained by accounts rendered to this Department, as per annexed statement A, the sum of	$16,541,382 04	
Viz:		
In the reimbursement of the deferred stock.....	353,844 30	
In the redemption of the seven per cent. stock.....	8,598,309 35	
In the redemption of the exchanged six per cent. stock.....	2,612,435 69	
In the reimbursement of the Mississippi stock.....	7,242 34	
	11,571,831 68	
The interest which accrued for the year 1824 amounted to	4,920,248 17	
And the premium on seven per cent. stock purchased to	49,302 19	
	16,541,382 04	
Of this sum there was short provided, consisting of unclaimed dividends not applied for by the proprietors, as per annexed statement B.....	88,395 78	
		16,452,986 26
		16,568,393 76

That during the year 1825, the following disbursements were made by the Treasury on account of the principal and interest of the public debt:

On account of the interest of the debt	$4,373,277 40
On account of the redemption of the Treasury note stock.....	1,479,374 82
On account of the redemption of the seven per cent. stock.....	2,125 60
On account of the redemption of the exchanged six per cent. stock	56,539 30
On account of the redemption of the six per cent. stock of 1812.....	6,187,006 84
On account of the reimbursement of the Mississippi stock	1,524 02
On account of the reimbursement of Treasury notes	2,001 49
On account of certain parts of the domestic debt.....	15 31
Making together, as appears by statement C, the sum of.....	12,101,864 78

Which disbursements were made from the appropriation of $10,000,000 for the year 1825, and from the unexpended balance of the appropriations for previous years, and will be accounted for in the next annual report, in conformity to the accounts which shall then have been rendered to this Department. In the meantime, the manner in which the said sum has been applied is estimated as follows:

There is estimated to have been applied to the deficiency at the end of the year 1824, as per statement B.....		$88,395 78
In the reimbursement of the principal of the public debt, as per statement E.....		7,728,575 70
And on account of the interest on the debt, viz:		
The interest for 1825, including $11 68 paid in that year for premium on seven per cent. stock purchased in 1824, is estimated at	$4,381,746 96	
Of this sum there is estimated to have been short provided, as per estimate F.....	96,853 66	
		4,284,893 30
		12,101,864 78

A statement G is annexed, which exhibits the state of the annual appropriation on account of the debt on the 1st of January, 1826, and a statement, marked H, of the funded debt on the same day.

All which is respectfully submitted.

RICHARD RUSH.

A.

Statement of the application, during the year 1824, *of the funds provided for the payment of the principal and interest of the public debt.*

I. PAYMENTS ON ACCOUNT OF THE PRINCIPAL OF THE PUBLIC DEBT.

1. Reimbursement of the deferred stock	$353,844 30	
2. Redemption of the seven per cent. stock	8,598,309 35	
3. Redemption of the exchanged six per cent. stock	2,612,435 69	
4. Reimbursement of Mississippi stock	7,242 54	
		$11,571,831 68

II. PAYMENTS ON ACCOUNT OF THE INTEREST AND FOR PREMIUM OF STOCK PURCHASED.

1. The interest for the year 1824, as per accounts settled at the Treasury, amounted to	4,920,248 17	
2. Premium of the purchase of seven per cent. stock under the act of January 22, 1824	49,302 19	
		4,969,550 36
		16,541,382 04

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, February* 1, 1826.

B.

Statement of the provision made before January 1, 1825, *for the payment of the principal and interest of the public debt.*

The demands to be satisfied on the 1st of January, 1825, were as follows:

1. Dividends payable by the Commissioners of Loans, including dividends due on that day, and exclusive of dividends no longer demandable at their offices	$1,252,498 06	
2. Unclaimed dividends from the Loan Offices, payable at the Treasury, beyond the amount advanced for their payment	204,968 63	
3. Balance due the late agents in London, per Treasury settlement, No. 43,824	1,474 44	
		$1,458,941 13

The funds provided to satisfy these demands were as follows:

1. Cash in the hands of Commissioners of Loans, applicable to dividends	$1,256,618 39	
2. Cash advanced for Treasury dividends over the amount payable	9,989 22	
3. Cash paid for bills of exchange on account of the debt, which were protested for non-payment and not yet repaid, as per note A to statement B, which accompanied the report of the Commissioners of the Sinking Fund of the 7th of February, 1822	103,937 74	
		1,370,545 35
Short provided		88,395 78

JOSEPH NOURSE, *Register.*

19TH CONGRESS.] No. 741. [1ST SESSION.

EXTENSION OF TIME FOR BENEFIT OF DRAWBACK OF DUTIES ON EXPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 15, 1826.

TREASURY DEPARTMENT, *February* 14, 1826.

SIR: I have the honor to enclose herewith a report upon the subject of enlarging the time within which merchandise may be exported with benefit of drawback from one to two years; prepared in obedience to a resolution of the House of Representatives, passed on the 2d of March, 1825.

I have the honor to remain, with the highest respect, your obedient servant,

RICHARD RUSH.

Hon. SPEAKER *of the House of Representatives of the United States.*

REPORT.

In obedience to the order of the House of Representatives, the Secretary of the Treasury has had under consideration the resolution of the House, adopted at the second session of the eighteenth Congress, March 2, 1825, directing him to report at the present session of Congress "whether any, and if any, what, effect would be produced upon the revenue and commerce and navigation of the United States by extending the time within which merchandise may be exported with the benefit of debenture from one to two years, and what amount of duties ought to be retained to repay the disbursements of the Treasury upon this branch of trade; and also whether any additional Government storehouses will be necessary if the system of deposit now applicable to wines, teas, and distilled spirits should be extended to merchandise of every description;" and has given to the same every attention that the recent period at which it came to his hands would allow.

Before the duties of the Department had devolved upon him a circular letter was addressed to the Collectors of the ports requesting such information as they might possess on the subject of the above resolution, with their opinion and views of the effect which the adoption of the measure to which it points would be likely to produce. It was not until a day immediately preceding the session of Congress that some of the answers to this circular arrived, and others are still to be received; nor does the Secretary find himself able to command during the session those opportunities of investigating fully the whole subject embraced by the resolution which, at seasons when the calls upon his official time were less constant and pressing, might have been open to him. Nevertheless, he does not feel at liberty to delay the report any longer, though conscious that it will be offered in a shape less satisfactory than, under other circumstances, he might have been permitted to hope. Without more apology he will proceed to state the conclusions to which he has arrived under the several heads of the resolution; and,

I. *As to the effect of the measure contemplated upon the public revenue.*

It is not believed that the measure would produce any unfavorable operation upon the public revenue. The standard of revenue would still be consumption. It is the capacity of the country to purchase and use dutiable merchandise brought into it from foreign countries that will give the true standard of the impost revenue. The amount of consumption depending upon the wants of the country and its ability to buy, and the latter being always more or less affected by price, it is scarcely to be imagined that increased importations could ever have a tendency to diminish consumption. It might rather be supposed that the tendency would lie the other way, though in this instance no such effect ought to be anticipated from the proposed measure, since the new door that would be opened to exportation would be commensurate with the increased importations. But, although increased consumption is neither the object nor ought to be looked to as an immediate effect of the measure, it might, to a certain extent, follow as an incidental and ultimate effect from the augmented amount and variety of imports that would be accumulated in the country. This would sometimes, it may be presumed, afford facilities and inducements to larger purchases of foreign articles than would otherwise be made, and at prices suited both to the buyer and the seller. Nor is there reason to think that any increase of danger to the interests of the home manufacturer would be the result, so far as the projected measure is concerned, but the contrary. For at present, when from any causes a larger supply of foreign articles is brought into the country than its wants for the year demand, which from the nature of trade will occasionally take place in this as in all importing countries, the excess is thrown upon the market at irregular and reduced prices. Hence, an increased consumption is forced upon the country, whilst the importer and the home manufacturer become alike the sufferers. But, by the measure proposed, the enlarged period of exportation would serve to carry off this excess, to give it a new vent, to multiply the channels through which, instead of injury to the country, a profitable commerce at a distance might open to its merchants, and wealth be brought back to its lap. If it be said that, by the forced consumption alluded to, the revenue nevertheless gains, since the duties must be paid upon all foreign articles thrown, through whatever causes or in whatever disproportionate quantities, upon the country, the answer obviously is, that the revenue of a country never can be usefully or permanently benefitted by what produces extensive loss and ruin to individuals. Such a principle would be wholly unsound, and cannot be admitted in any wise system of policy or finance. All operations of purchase and sale must rest upon a foundation of permanent advantage to both buyer and seller, or the trade of the country in which they take place cannot ultimately prosper.

The conclusion that seems to follow from the foregoing considerations is, that the impost revenue would not, at all events, be injuriously affected by the measure in question. Some temporary inconvenience might be expected to flow from it at first in the further uncertainties that would be thrown over the annual anticipations of the amount of revenue from this source; but it is not conceived that this would constitute any serious objection.

The amount of debenture bonds issued within the year on exportations under the present system can never be precisely foreknown, and an estimate at the commencement of the year of their prospective or future amount can be formed only by taking into view their amount on the importations of one or more years that are passed. The same rule of calculation would soon come to be applicable under a change of system that enlarged the time of exportation to two years, and with the same approaches to certainty in the result. The remote future would be brought by the revolution of a few years to within the range of a vision as distinct as that which now applies to the nearer future.

II. *The effect of the measure upon the commerce and navigation of the United States.*

It is believed that the effect of the measure upon the commerce and navigation of the United States would be decidedly beneficial. That commerce flourishes in proportion as it is free is a principle that requires no demonstration. The experience of all nations gives attestation to its soundness, and whatever may have been the dissentient voices to it in other times, they appear no longer to be heard. The only restriction upon this principle is to be found in that which makes it secondary in practice to the safeguard of the internal industry of a country in those essential branches of labor and art for which its productions and its other capacities especially fit it, and without the establishment and success of which the full point of national wealth and independence never can be reached. In no nation distinguished by its riches and power, and invited by its resources into the pursuit of manufacturing industry, has the freedom of commerce ever been seen to commence until this species of industry was first, in point of fact, essentially secured. Beyond the limit of this cardinal policy, all nations, where the principles of commerce are understood, seem to be acquiescing more and more in the wisdom of casting off its shackles. Nations in which these essential branches of industry have not yet been successfully reared up are manifestly not upon an equal footing with those contemporaneous nations in which they are seen already to exist and flourish; as the fact of their complete establishment, whatever diversity of theory there may be as to the causes by which it was brought about, is a preponderating, overwhelming advantage, against which no unassisted exertions, however strenuous, no counter efforts of ingenuous or resolute industry, however they may be stamped in the abstract by an equipollent virtue, can hope to prevail. A true discrimination thence perceives that a nation in the first of these predicaments is in a situation to require adventitious aid to its home industry precisely at the moment that one in the second feels itself able to relax in this policy, or dispense with it altogether; whilst both profess equal homage to the abstract maxims that inculcate the benefits of a free trade in every species of manufacture, differing only in the point of time and relative maturity when they begin to act upon them—a difference, however, so decisive as to change all parallel in their respective situations into contrast.

A general reference to these principles is deemed to belong to a proper estimate of the branch of the resolution under consideration, as the belief that the measure contemplated by it will benefit the commerce and navigation of the United States is held in full conjunction with the belief that it will trench upon no interest within their own borders. It cannot, in fact, benefit these great branches of external industry without at the same time giving activity to all the operations of internal industry to those of the mechanic, the manufacturer, the laborer, the agriculturist. To ship building, this first of manufactures, the most extensive, the most useful, the most enriching of all others, and which, in the United States, through the co-operating influence of early legislative assistance, now flourishes in a manner to meet the competition of the world—divested of that assistance to this great manufacture, which links to itself so many other

profitable occupations in a country, the measure will have a natural tendency to impart a fresh spring. The nation has already derived advantages too manifold and signal from this magnificent branch of labor and art not to avail itself of every occasion that may give promise of enlarging the capacity and orbit of its action. Its connexion is too intimate with the national advancement and history, under views the most animating and the most imposing; with its riches, its commercial power, and prosperity, and, looking beyond objects merely commercial, with the foundations of its defence and the memorials of its glory, not to deserve every further aid which can be bestowed upon it. Not, however, such aid as it once required and received. It is that portion of our industry which may now safely be left to itself, with no other anxiety than to see it unrestrained by whatever may tend to confine within limits its full ability to an active, enterprising, and universal range. Fostered at the era of its infancy, it now sees itself at a point of vigor and strength adequate to self-support, and willing to rely upon its own intrinsic means for wider extension. It has, in short, emphatically placed the United States in the front rank of competition for the carrying trade of the world; and all that they now ask of other nations is, that navigation should be as exempt from regulation, as unfettered in all respects, as they themselves, by laws already in existence, have declared their policy and their wish that it should be; laws which only wait the assent of other commercial States to become, as far as the example of the United States can operate, universal throughout the commercial world. Here is the equal ground upon which we avow our readiness and our desire to meet other nations. Being, as regards it, at a point of maturity as far advanced as that on which they stand from the first moment that we reached it, we proclaimed to them our principles of reciprocity, of which our practice is the earnest.

Upon the advantages of the carrying trade it is not necessary to dwell. If, by this trade alone, some nations have been raised to a high pitch of prosperity, those nations whose circumstances open to them at the same time other great avenues of public wealth—who, to a capacity to succeed as carriers upon the ocean, superadd the resources of an abundant agriculture and the means of extensive manufactures—may entertain justifiable expectations of ascending to a far higher and more lasting pitch of commercial pre-eminence and distinction. Nations that have all these sources of advancement and exaltation in prospect to them do not make the most of their condition if they fail to take advantage of all. Already the United States employ an immense tonnage in the exportation of their own productions, and in bringing back to their own ports the productions of other countries. A very large portion of their tonnage is also engaged in exporting from the United States the commodities of other countries previously imported, and in transporting from country to country foreign articles not previously brought here, which sufficiently attest to what extent their merchant ships continue to perform the part of carriers whilst peace reigns in almost every sea. In how much greater a degree they were thus employed during the prevalence of wars in Europe; how their ships, though subjected to so severe a measure of belligerent rapine and cupidity; how the sailors who navigated them, though falling in like manner under the scourge of belligerent injustice and ferocity; how the wealth of individuals and of the nation continued, notwithstanding these obstacles and deductions, to multiply under the effects of this universal carrying trade, is well known. In part it arose from causes that were transitory, and in part from those that are inherent in this nation. The consideration of the latter gives new importance to the proposal before the House, by showing how its policy is coupled with the well authenticated characteristics of our mercantile marine—characteristics that constantly and earnestly deserve every further expansion and development. By adopting the proposal; by holding out fit inducements to the importation of greater quantities of foreign merchandise, as a consequence of allowing it to remain in the country under the privilege of a prolonged time for exportation, the presumption is well warranted that our merchant ships would soon be much more largely employed than they have ever yet been in times of peace in carrying to other nations those surplus imports brought into our own. It would give new wings to this branch of commerce, bearing it more extensively to every corner of the world. It would cause it to seek and to find markets hitherto untried, thus adding new trophies to our mercantile flag. If it be said that, although the *time* for exportation be prolonged, the *fact* of exportation would still be most likely to fall within the period now allowed by law, since the term of credit on the duty bond will generally determine the time of exportation—it being an object with the importer to obtain the amount of his drawback for the purpose of paying his duty bond—and since, also, his capital lies dead in the warehouse, subject to expenses and risks until exportation, the answer is, that the merchant ought to be left to his own option as to the time. He will be sure to fix upon the appropriate and judicious moment better than others can do it for him. The maxim of letting individuals alone has, in such case, its proper application. It has generally its proper application under systems that are flourishing and free; whilst to suppose its universal application, subject to no control, to no modification, amidst all the diversified and complicated interests of opulent and populous communities, would be to forget the great purposes for which government and laws are instituted, and especially in States that are the most flourishing and the most free. That some exportations of foreign merchandise which, by our laws as they now stand, are under the necessity of being made within the year to obtain the drawback, do, in point of fact, take place after the expiration of the year, and consequently lose the drawback, is certain; though to what precise amount is less accurately known, as the drawback is also lost by the packages being broken. If they take place to any amount after the year, it goes to show that the state of the markets abroad, or of all such as could fall within the compass of the exporter's advices, was not such as to justify an earlier exportation. This is motive enough to ask for an extension of the time, seeing that one year is too circumscribed a limit to answer all the calculations and vicissitudes of widely extended commercial operations. It will readily occur to any mind that exigencies may sometimes exist in trade when a merchant with foreign merchandise upon his hands may be wholly at a loss what destination to give it up to the last moment of the existing year, when, by retaining it for exportation even a few months longer, with the right of still drawing back the duty he may have paid upon it, unexpected and advantageous markets may burst upon him. It is evident that, as the time is enlarged, so will also be the horizon of his prospects and his capacity to improve them.

In all ages of the world commercial States that have flourished most conspicuously have been those which have most freely admitted the merchandise of other States to their ports, thence to be exported whithersoever the markets of the world may invite it. When this accumulation of foreign merchandise from all quarters in the ports of any one country is seen to concur with a multitude of wares under all the varieties of utility and beauty manufactured in that country, and the whole are laid open to exportation with the fewest restraints and at the least cost, then it is that we behold the true principle of commercial empire. A nation whose productive industry spreads itself over this wide surface; whose warehouses are filled with the products of nature and art from all other climes, and not less with those

of its own—the congregated assemblage waiting only the wants of mankind in every region for exportation to meet those wants—such a nation sees its commerce resting on foundations at once stable and splendid, realizing all that can be projected or achieved in commercial influence and sway. If the ships of such a nation be its own carriers, a numerous body of seamen and all the concomitants of naval strength follow in the train of its commerce. The riches of the world concentrate in such a nation, and its power ascends to a height that is proportionate to its riches. Not agriculture alone, not manufactures alone, not commerce alone, but the union of all, the copious treasures of all, make up its riches and power. Both are perpetually augmented by the industry that flourishes upon either element—by the streams that are drawn from either. Anticipations resting on the deduction of effects from their natural and visible causes justify the belief that the United States are destined to such a station amongst the nations of the globe—justify the belief that their foreign commerce will assume a range and mount up to a height commensurate with all the other great interests that will be tributary to it. The belief is rigorously justified by the consideration of the exhaustless resources of their territory—resources for the future supply of their own workshops and looms, as well as those of foreign nations; by their immense seacoast, the whole within favorable latitudes; by the number, position, and security of their ports, the general facility of access to them, and their exemption from vexatious regulations as against the ships that visit them; by an internal navigation, which, through the wonders of art already or soon to be achieved, has rendered the half of that portion of the continent which they occupy but as one great island; its side upon the ocean shadowed by the canvas of a richly freighted coasting trade, whilst all the currents of nature in its vast and majestic interior waters are stemmed by steam; by the maritime propensities of their inhabitants, so many of whom seem native to the sea, reaping from early time, and still reaping, their sole harvests from its depths; above all, by their free and popular form of government, the parent of industry and art, of an adventurous, intelligent, and persevering enterprise among the people, fitting them for all occupations because affording security and protection to all. The enlightened principles upon which the commercial code of the United States is founded, and to which it may be supposed they will continue to adhere, will serve to corroborate these anticipations—to give still more confidence to these their intrinsic prospects of an enlarged commercial dominion. Other nations have already, in part, taken example from these principles; and it will be the true interest of the United States, no less than their just pride, to give them in their home statutes and in their treaties and compacts with foreign Powers further extension as a return of reciprocity—real, not nominal reciprocity, shall await them. It is then that their warehouses and quays, their estuaries, their bays, their rivers, may be expected to display the mingled productions and wealth of every civilized region, all combining to swell the measure of their own prosperity; to enhance the value and example of their beneficent and liberal institutions, as well of commerce as of government, the primary fountain of it all. The commercial States of Italy of the middle ages are present to the memory in this connexion. It was to their ports, being the depots of foreign merchandise, the marts of all other nations, that these States owed their opulence and power; that Venice made Europe and the East subservient to her mercantile renown and grandeur. From the same cause it proceeded that Holland, not longer ago than the middle of the seventeenth century, saw her tonnage reach an amount transcending that of all Europe put together; whilst the overflow of her riches sought investment in loans to foreign Governments in an aggregate sum of more than five hundred millions of dollars. These are examples not unworthy to be recalled, because they are those of free States, and because there is nothing in the circumstances of the immediate times to deprive them of a proper applicability. The well understood principles of commerce are the same now as then, and it is but the more fit that the United States should look to these examples, since it is evident that other modern nations, desirous of pushing further the bounds of their commercial power and aggrandizement, are shaping their policy upon them in anticipation of like results. There is another light in which they become instructive. They serve to show how much remains to be done by the United States before they gain that pitch of commercial exaltation towards which they have so many motives and so many means for advancing. Their past commercial success, signal as it has been for the circle of time within which it has been confined, must be viewed but as a starting point in the career that is before them. It is yet below what has been effected by smaller States of far inferior resources.

The measure which the resolution projects recommends itself to the favorable consideration of the House by the peculiar *time* at which it comes forward. The moment is believed to have arrived when the United States are called upon by irresistible appeals to their highest commercial interests to give new and enlarged scope to all their commercial operations. The moment is believed to be at hand when it has become their highest commercial policy to secure to themselves, as far as just laws and exertions can give them opportunities of doing so, the means of supplying, to a greater extent than any or all other nations, the entire markets of the American hemisphere with every product for which their wants can possibly make a demand. This is so far from being too much to hope, that it is conceived that it must become the fact if the proper means be not pretermitted, or if, which is not to be supposed, other nations be not placed on a better footing in those markets. Has it been seen that States in Europe, and those small ones, have heretofore, by a wise direction of their policy, alternately been the commercial emporiums of Europe? And may not the United States, at this marked juncture in commercial affairs, form to themselves the expectation of becoming the great emporium of commerce for America? Shall their national seniority upon this great continent; shall their merchant ships of such ample number and unsurpassed excellence; shall their merchants, enlightened by a familiar acquaintance with the principles and the facts of commerce in every region; shall their mariners, trained to every sea, and little accustomed to give way in any field of emulation; shall the relative proximity of their ports to this whole scene of competition; shall all these go for nothing? It is not to be supposed, and will not be witnessed. It cannot be doubted but that the United States would have possessed decisive advantages over Europe in the competition of supply to the markets in question, if their own manufacturing industry were at this day flourishing at all points, and in high perfection. As this is not its present condition, or only to a limited extent, to which extent the truth of the assertion will be fully realized, it remains for them to engage in the work of supplying these markets with the manufactures of other nations with whatever advantages their policy may enable them to command, in the hope that the day will be hastening when their own manufactures will take the place of those of Europe in this external destination of them. Already they do so in cotton manufactures of an important description. Already they do so to some extent in these same manufactures, even in the distant markets of China: facts full of instructions and encouragement. Of the latter there is ample evidence, however, until lately, it might have been calculated to strike with surprise.

The measure under consideration would immediately open the way for disseminating foreign com-

modities from our ports to every quarter that might prove most attractive to it. It would enable the merchant of the United States to import and keep on hand a much larger stock than he can do at present. His stock would be distinguished by greater variety as well as greater amount. He would feel less trammelled in his orders to his foreign correspondent, and have less to apprehend from an overstock of goods arriving to his hands at a season of unfavorable markets at home. If it be said that the temptation to over-trade would be thrown before him, it must be answered, as before, that he will be the best guardian of his own interests. It is not improbable but that, for the first year or two after so large an augmentation of the right to export with benefit of drawback, over-trading would take place; but this new branch of trade, like all others, would soon find its level, and the evil its cure. By the privilege of keeping the foreign merchandise which he had imported for two years instead of one, the merchant could not fail to be better enabled to adapt his operations to the exigencies of commercial transactions. He would be better enabled to institute his inquiries and await their results before taking his steps; he would be better enabled to avoid depressed markets, and to take advantage of those that were rising; he would, in fine, be provided with double means, by the effect of double time, of adapting himself to all those circumstances, whether of a political, mercantile, or individual nature, that govern or influence the calculations and plans of men in trade. It is understood that the merchant of the United States, in all the principal towns, can obtain information of the state of the markets in South America, even those on the shores of the Pacific, at periods far earlier than the merchant of Europe; so that he may thus be able to undersell or anticipate the merchant of Europe in these markets, though carrying thither the wares of Europe. But to do this, besides the confidence he must feel in the cheapness and skill with which his vessel can be navigated, he must have every opportunity that can be afforded him towards making up assorted cargoes, that his adventure may always adapt itself, both in quantity and kind, to the precise existing state of the market to which he destines it. The larger and more diversified his stock of merchandise, and the longer he is privileged to keep it on hand, to the more advantage can he make this assortment; and it is an advantage from which the merchant of Europe, whilst his operations proceed only from Europe, is cut off. So sensible is Great Britain of the importance of these assorted cargoes for the markets of this continent, and so alive to the interests of her commercial, as for ages she has been to those of her manufacturing industry, that she has already extended to the ports of one or more of her West India islands the benefit of her warehousing system, in like manner as it exists in her ports in England. The evident avowed purpose of this measure is to meet the competition of the United States; and it gives additional weight to the argument for increasing the time within which foreign merchandise should be allowed to be exported under the right of drawback from their ports.

Though the well-founded hope of largely supplying the markets of all South America and of Mexico with foreign commodities be the primary, it is not the only motive to the expediency of altering our law in the manner proposed. On every part of continental America south of the United States we know that the old colonial system of restriction and monopoly is fallen and crushed. What this system was is well known to the United States, for they, too, in their time, had it. It was a system that struck down liberty; that manacled commerce; that regarded America as only intended to toil for the wealth and luxury of Europe; that chained down every description of industry throughout her vast borders not suited to the purposes of Europe; that set itself against the natural progress of civilization in this whole hemisphere, by a rigorous prohibition of all manufactures and the arts. Such was this system. On its ruins in South America, where it flourished with a force more aggravated and baleful, have arisen independent nations, vigorous from youth and from freedom. Its shackles are also fast dropping off, by the force of circumstances, from the fertile and rich islands that crowd the American seas. To be ready to take advantage of the complete independence of trade in all or any of these islands, when that day may arrive to them, either by the voluntary relaxations of the parent authority, or through any other causes, is then a further inducement to the alteration proposed. Nor do its recommendations end here. Leaving out of view all probability, however rational, as to future but untried results, it is believed that the alteration would be beneficial, regarding only the experience of the past. Not to build upon the valuable trade to South America and Mexico, or upon that to the American archipelago, not heretofore enjoyed, or enjoyed but partially, supposing that the markets of neither the one nor the other were free to the United States, their export of foreign merchandise has still been at all times a trade so important, the offspring of their ever-active mercantile marine, as to deserve every practicable enlargement of its ancient fields. What is it that this marine has been performing in only the old and customary lines of trade? It carries the cloths of two great navigating States, of England and of Holland, to China; the silks of France, of China, of the British East Indies, with the linens of Germany, of France, or of the Low Countries, to the islands of the West Indies, to the countries of the Mediterranean, and to other parts of Europe; dyewoods to supply the manufactories of nearly all Europe; copper and tin to the ports of France, to China, and to the Manilla islands; cotton piece goods to the West Indies; teas to Holland, to the Hanse Towns, to Germany, and to France; coffee and sugars and spices to the same countries, to Russia, to Denmark, and to Sweden; worsted and stuff goods to the Dutch East Indies. These are but samples of the extent and variety of this trade, manifesting the capabilities of the United States for its past prosecution in seas the most distant, to countries the most widely separated. In 1824 it exceeded in value twenty millions of dollars, aside from all exportations to Spanish South America and to Mexico. Independently, therefore, of the ports of these new and rising States—ports, however, in which our flag meets that equal reception to have been expected from the interest with which we watched their dawning, and the acclamation with which we hailed their established fortunes, and as between which, therefore, and our own ports, our hopes have naturally gone forth for a full measure of mutually beneficial commercial dealing—there is quite enough to engage for this branch of trade the most favorable legislation of Congress. It is due to the success we have had in it heretofore to loosen the bands which serve in any degree to cramp it; so that, with well-found ships as its vehicles, honorable gain as its object, and the world as its market, it may be seen how much higher this success can be carried—be fairly determined whether it can or cannot meet all other nations in the competition. Whilst repudiating for ourselves all claim to special favors, we must not be insensible to, by failing to improve, the transcendent advantages which nature and Providence have placed before us. Amongst these, most especially to be ranked at the present juncture, is that of the physical position assigned to us upon the globe. Besides the ascendancy which this, in conjunction with the existing amount and perfection of our mercantile marine, is calculated to give us over the chief commercial operations of this continent, a vista is opened by the recent emancipation of the latter from European thraldom to a new era in Oriental trade. Amongst the consequences bound up in this great event, that of increasing to the United States the commercial if not the geographical facilities

of intercourse with China and the East Indies may safely be looked to as one. Placed at a middle point between Asia and Europe, with some of their ports stretching almost to the Southern Atlantic, others opening on the Gulf of Mexico, whilst new ones may be expected to rise up even upon their maritime border at the remote west—the coast of the Pacific—it may reasonably be believed that they will become largely the connecting link of trade between the new Republics and the East, besides greatly extending through these increased facilities the trade with the East, more properly their own, and that also which consists in carrying the productions of the East to Europe. The enterprising and experienced navigators of the United States, already familiar with all the coasts and islands of the Asiatic seas, will not be slow to avail themselves of every new opening to traffic with regions so enriching—regions exhaustless from their fertility and the population with which they teem; that have swelled the tide of wealth to ancient Kingdoms and Empires, as to modern Venice, Portugal, and England; their own wealth seeming to be perpetual, the foundations of it still continuing to exist as they were originally laid, as well in the costly and exquisite fabrications of art, ever distinguishing those regions, as in their immense natural riches. If the channels of intercourse with the Oriental world were once through the interior seas and gulfs of Asia, and afterwards round the southern promontory of Africa, there is nothing unreasonable in the belief that the next great change—a change springing out of the force of natural no less than political causes—will be through this continent; at all events, that new and inviting channels to this intercourse are destined to run in this direction. Under every prospective and future view, therefore, of the resolution submitted to the House; under every anticipation of its effect, whether immmediate and certain, or probable, though more remote, it is believed that that effect upon the commerce and navigation of the United States will be propitious, and that the present moment is that at which a wise forecast recommends it to the highest degree of favor and attention. There are epochs in nations that form great and fundamental divisions in their history—moral, political, and commercial. The discovery of this continent itself was scarcely followed by greater results upon the condition of nations than may be expected to flow in due time from its emancipation from Europe; a reflection with at least a sufficient semblance of truth to heighten our conception of the true tone and character of the commercial measures proper to be put in train by the United States in connexion with a political revolution so awakening, so momentous.

It has been assumed that the measure under consideration would benefit the merchants and manufacturers of foreign countries at the expense of those of the United States. This assumption is held to be entirely without foundation. If it be meant that the foreign merchant residing in the United States would be chiefly benefitted, the answer is plain: it is, that the measure would not change the relative situation as between such merchant and the merchant of the United States. Each would possess all the same rights and opportunities that he possessed previously to the measure; and the most that can be said is, that each might be able to apply these rights and opportunities to a more extended surface of mercantile operations. If the sphere of importation be augmented to the one, so would it be to the other; and in like manner that of exportation; so that they would stand towards each other precisely as they did before. If it be meant that foreign merchants living abroad and foreign manufacturers would be benefitted by it, to the injury of those of the United States, the assumption is held to be no less fallacious. The foreign merchant and the foreign manufacturer might, indeed, receive benefit; but the error consists in supposing that this would bring with it any injurious recoil upon the home merchant or the home manufacturer. Upon neither could it thus operate, as it contemplates no increased consumption of foreign manufactures in the United States, but only an extension of their external trade. If by this foreigners reaped advantage, so also would our own citizens. The day has passed when it was supposed that any one commercial nation was to be made to prosper most eminently in proportion as it could most successfully drain and impoverish other nations with which it maintained commercial dealings. The reverse is known to be true—commercial nations flourishing most, as they flourish mutually. The advantage to the foreign manufacturer from the measure proposed would be, that it would tend to increase the orders sent to him from his correspondents in the United States. The advantage to the merchant of the United States would be, that he would be the importer of these increased orders, and, in almost every instance, in his own ships. He would afterwards transport them in his own ships to other countries, with improved opportunities of falling upon good markets. The manufacturer of the United States would receive no injury, for the increased orders would not be imported for consumption but for exportation. The consumption of foreign articles in the country would stand at the same point as before. The manufacturer would even reap his advantage in the general advantage; in the new streams of wealth that an enlarged and successful carrying trade might be expected to pour into the country. He would find new demands growing up for the products of his labor and skill, as the ability to buy them increased. At the same time the protecting duty, which in part shields them at present, would remain as it is without diminution. It cannot be too constantly kept in mind that all the great interests of a nation flourish most as they flourish together. If the principle be true in reference to foreign nations in their intercourse with each other, it must come home with much more force to the different parts and interests of the same country, each of which will attain its highest prosperity as all move in one grand harmonious circle.

III. *What amount of duties ought to be retained to repay the disbursements of the Treasury upon this trade, and will any additional Government storehouses be necessary if the system of deposit now applicable to wines, teas, and distilled spirits, should be extended to merchandise of every description?*

Some difficulty has been experienced in arriving at definite opinions upon this part of the resolution. It belongs, in part, to detail rather than to those more enlarged and universal principles of commerce supposed to be applicable to its other branches, and sufficient materials have not yet been obtained upon which to found, under all its bearings, exact conclusions. The only materials are those furnished by the Collectors in their answers to the circular letter before mentioned. These answers, fifteen in number, it has been thought proper to subjoin to this report, that the House may be put in possession of all the lights at present before the Department upon the subject. They will at the same time serve to make known the view of these officers on the object of the resolution generally, to which it will be perceived that some of them are opposed. As regards the amount of duty to be retained, they differ in opinion widely, some saying that it should be five per cent., or even more; some that it will not be necessary to make any addition to the present amount. The latter opinion is believed to be the most sound. The present amount of duty retained is two and a half per cent., which perhaps is high. It is more than is retained by the regulations of Holland, or those of England, on the same branch of trade. One of the

means of converting the ports of a country into a depot of foreign merchandise is to burden it as little as possible with charges of any kind. It is here no question of duties on goods to be consumed, but on those not to be consumed; such a duty should be kept at the lowest point in a commercial country to comport with the desire of witnessing an abundant and profitable transit trade through its ports.

As to additional storehouses. This is a part of the subject full of importance, because to be looked upon as an indispensable concomitant of the measure in projection. It therefore deserves a more particular consideration.

The system of deposit applicable, under the existing laws, to wines, teas, and distilled spirits, is as follows: First, as to teas: In general, all duties on goods imported must be paid or secured before a permit can be granted for landing them. But, with regard to tea, the sixty-second section of the collection law of March 2, 1799, provides that it shall be at the option of the importer either to secure the duties on the same terms and stipulation as on other goods, or to give his bond to the Collector in double the amount of the duties, with condition for the payment of them in two years. This bond is to be accepted by the Collector *without surety* upon the following terms, that is to say: the teas must be deposited, at the expense and risk of the importer, in a storehouse to be agreed upon between the importer and an inspector, upon which storehouse the inspector must cause two locks to be affixed, the key of one to be kept by the importer and of the other by the inspector, whose duty it shall be to give his attendance at proper times for the purpose of delivering the teas; but no delivery shall be made without a permit from the Collector and Naval Officer. In order to the obtaining of this permit, the duties must first be paid or secured by the importer giving bond, with surety, in double the amount of duties upon the teas to be delivered, with condition for the payment of them in four months if they shall not exceed one hundred dollars; in eight months, if they shall be above that sum, but not exceed five hundred; and in twelve months, if above five hundred: provided that the time given for the payment of the duties shall not be such as in any case to extend the credit for them beyond the term of two years. These are the essential provisions relating to the deposit of teas. It may be proper to remark that, although a credit of two years is given for the payment of the duties upon them, they must, to be entitled to a drawback of the duties, be exported within one year, there being no exception whatever to this part of the law as it now stands.

The provisions that affect wines and distilled spirits are found in the act of the 20th of April, 1818, and are substantially the same with these that apply to teas, except that the utmost term of credit upon them is limited to twelve months. There is a further provision in regard to these articles not made applicable to teas, the mention of which belongs to the consideration of the warehousing system. It is, that no drawback shall be allowed of the duties paid upon them, unless the articles themselves shall have been deposited in public or other stores in manner as prescribed by the act last recited, and have been there kept from the time of landing them to that of their shipment.

Should the system under which teas, wines, and spirits are deposited, as above described, be extended to merchandise of every description, it is believed that additional Government storehouses would become imperiously necessary. They are respectfully conceived to be necessary now. Under the present system the public storehouses, meaning such as alone deserve the name from having been built by the United States and belonging to the United States, are scarcely sufficient in any of the large towns to contain more than a fourth part of the merchandise required to be stored. In some of the large towns the proportion is believed to be less. The remainder consist of private stores belonging to the importer himself, or hired by him and made public for the occasion under the provisions of the acts above recited. These stores are, in point of fact, generally selected altogether by the importer, though the concurrence of an officer of the customs is required and nominally obtained. They lie scattered over all parts of the town, often at distances remote and inconvenient, in its alleys, its by-places; being, too, almost always unsafe, whether as regards danger from depredation or from fire. They are seldom constructed with the requisite facilities for stowing merchandise in the first instance, or for inspecting, counting, and otherwise having necessary access to it afterwards. There is an unseemliness as well as an insecurity in such a state of things that must meet disapprobation.

It is probable that warehouses far better than the majority of those now selected by the importers might be had on lease, and on reasonable terms, by the Government, in the large towns, in situations neither too remote nor too much dispersed. These might answer until a sufficient number of new ones could be erected; and the extent of the latter, with all the particulars that should enter into their plan, would probably be better ascertained by the temporary use of those that were rented. In the meantime suitable sites might be purchased with due deliberation and economy. In this manner the system proposed might be made to supersede gradually that which exists, and a double advantage would be derived from so cautious a mode of proceeding; for, if the extension of the right of drawback from one to two years was not found, after the proper trial, to bring with it those advantages to the commerce of the country which are presupposed, it could be given up without the Government having been subjected to any considerable expense, and to none that would be lasting; and if it did realize the anticipations that are favorable to it, its effects during a few years would best indicate, under the lights of experience, the establishments for which it would make a call both in kind and degree. A commerce which yields an annual revenue of more than twenty millions of dollars is entitled to a provision out of the public coffers for the machinery necessary to the safety and convenience of its operations, and in an especial manner those by which its rich earnings are transferred to the public coffers. It is well entitled to those local accommodations, those fixed and permanent establishments in our ports, required by its present extent and value, without dwelling upon its inevitable future scope and grandeur—required, not merely for the sake of due convenience and promptitude in transacting the business of commerce upon a large scale, but as appropriate and indispensable safeguards to the revenue. In the city of New York, where so great an amount of this revenue is collected, there is an almost total want of those safe and suitable places of deposit for merchandise—those edifices, those durable establishments of any kind that might serve to mark it as the great commercial emporium which it is. The consequence is not only that business is transacted there at constant inconvenience, but that the revenue is as constantly exposed to hazards. Losses have already occurred there from this cause, and the late heavy losses at Philadelphia are an impressive admonition of the necessity of radical reforms in the warehousing system. If this system is to be expanded, as an adoption of the measure embraced by the resolution would expand it, it cannot be expected that it can be brought into full, advantageous, or safe operation, with only the stinted appendages upon which it has hitherto relied. Ample warehouses ought to be built by the United States, and as secure as ample, in all the principal ports, for in these alone would the transit trade chiefly centre. They should be in one or more blocks, within a convenient distance from the custom-

house, of the most solid materials, and fire-proof. All of them, it is conceived, ought to be placed under the superintendence of a competent, trustworthy person as storekeeper, subject to the control of the Collector of the Customs, who should be authorized to employ assistant storekeepers and porters as might be found necessary. By such arrangements the importer might always have ready access to his merchandise, without any right to a key of his own, which the system should exclude. The proper details for conducting the business of those establishments so as to conciliate in all respects the just convenience of the importer with the interests of the public revenue, might, it is believed, be without difficulty arranged. An equitable rate of storage should be charged on the goods deposited, by which the Government might count upon receiving a proper interest upon the sums necessarily laid out in the erection of the buildings. Thus, whilst the merchant was accommodated in his daily business, the revenue protected, and the valuable merchandise entering our ports from all parts of the world put into receptacles better adapted to it, the Government would not be likely to lose; but, on the contrary, to reap in the end those real savings so often the fruits of a wise and liberal expenditure in the beginning. From the number of these new warehouses that would be required, and their necessary cost, it might not be expedient, nor would it be indispensably necessary, to build them all at once.

Until public warehouses could be erected which would all offer equal security, it is conceived that care ought to be observed in selecting from amongst those now in use such stores as, both by their position and structure, are relatively the most secure for the deposit of all merchandise which, either by its own nature, from being in small parcels, or from the amount of duty charged upon it, holds out the most facilities, or the most temptation, to attempt its fraudulent removal. The warehousing system of England, as adopted, not at a former day, but in conjunction with the recent reduction of the British tariff, divides all goods imported into the country into two classes. In the first are comprehended those which pay the highest duties, and of the consumption of which in England there is the greatest danger. Such goods are liable to be kept in stores of a particular description, being either in docks or surrounded by walls; or they may be assigned to any special stores to be designated by three Lords of the Treasury. Goods so stored, and in this special mode of storing them will be recognized the vigilance with which the interests of home manufactures in that country are ever guarded, have afterwards the advantage of being exempted from re-weighing and liability to such allowance for deficiencies as it had been customary to subject them to.

Under the supposition that it might lessen the number of public stores which it would be otherwise necessary to build, as well as with a view to other objects, one of the Collectors proposes that on the importation of all dutiable merchandise such proportion of each invoice as would secure the duty on the whole should be deposited in the exclusive custody of the custom-house, and the remainder be delivered forthwith to the importer, on receiving his own bond, without surety, for the duty. It may be remarked upon this that the importer has already the option of pursuing this course under the present law, and that the practical operation of it must at last be limited by the amount of dutiable merchandise consumed in the country, even if the practice should go to the full extent which the law permits. As there is known to be a deficiency of public warehouses even as the law now stands, it is hence impossible to avoid the conclusion that on increased importations, not with a view to increased consumption, but as a basis for larger exportations and a more extended carrying trade, a much greater number would become necessary. Some increase of the subordinate officers of the customs would, doubtless, also be necessary, with the increased duties and labors which the meditated change would devolve on them.

All which is respectfully submitted.

RICHARD RUSH.

TREASURY DEPARTMENT, *February* 13, 1826.

No. 1.

CUSTOM-HOUSE, *Bath, Maine, August* 26, 1825.

SIR: I received a letter from the Treasury Department on the 23d of April last, enclosing a copy of the resolution of the House of Representatives of March 2, 1825, authorizing inquiries into the effect consequent on an extension of time within which merchandise may be exported with the benefit of drawback from one to two years, &c., requesting any information I possess on that subject, with an opinion as to the effect which would be produced by the adoption of the proposed measure on our navigation and commerce. The inquiry seems naturally to divide itself into three particulars, viz: 1st. What effect would be produced by the proposed extension of time from one to two years on the interest of the country? 2d. What amount of duties ought to be retained to repay the disbursements of the Treasury on that branch of trade? And, 3d. What additional number of Government stores would be necessary? As to the first proposition, I think there can scarcely be a reasonable doubt but the extension of the time from one to two years, within which almost all articles of merchandise may be exported with benefit of drawback, would operate beneficially to the great interest of the United States, provided the law be well guarded to prevent fraud, and the officers intelligent and vigilant in the discharge of their several duties. The measure would operate as a loan to men of business and enterprise, because it would enable them to extend their commerce and carrying trade with foreign nations, particularly on long voyages to the South American States and shores of the Pacific Ocean, giving additional inducement to enterprise. Our merchants could employ more vessels, not only to transport a larger quantity of foreign merchandise, but of our own produce and manufactures, *cheaper*, which would have an effect on the *quantity* exported, if not on the *price*.

It would increase the number of seamen, as well as promote the interest of the mechanic, manufacturer, and farmer; it would not operate injuriously to the revenue, for, to say the least, it would not lessen the home consumption of foreign merchandise, but rather increase it; all which would continue to pay duties, and the redundant quantity would be exported.

As to the second particular, I have given it all the attention which my own observation has enabled me to make, and also by comparing notes with many intelligent, practical men.

If the duties retained by the Government and the allowance made on the quantity of the articles of merchandise now allowed to be exported with benefit of drawback are sufficient to meet the expense from

the Treasury, other articles might be permitted to be exported in the same ratio; but I think no increase ought to be made on any of those articles which are exported within the first year if there is an extension of time; but, should the importer think it for his interest to keep them on hand more than one year, let the addition not exceed the interest on the amount of duties on the article so kept on hand the second year.

When the importation is first made, all the articles, as is now the case, ought to be weighed, gauged, and measured, so that the amount of duties may be inserted in the bond.

When it is considered that the importer has storage to pay, capital lying idle, insurance from one-half to five-eighths per cent. per annum, the loss on spirits and wine by evaporation, about three per cent.; on molasses, by leakage, about the same; on sugar and salt, from two to five per cent., by draining, the first year, and about half as much the second year; on tea and coffee one per cent., and the risk, loss, and deterioration borne by the importer, he would have every inducement to export when there was the smallest chance of success, and none to keep his merchandise in the store but necessity.

Finally, on the subject of Government stores, I am of opinion that the one now hired by the Government, or perhaps one larger, which might be obtained for about a hundred dollars per annum, would be sufficient at this port for many years to come; provided the present law continues for having gross and heavy articles placed in stores of the merchants under two locks.

I conceive there is little or no risk in this case, where the importer who signs the store bond is a responsible man. Where there is doubt of this, and of the insecurity of pad-locks, the property would be placed in the Government store, exclusively under the control of the custom-house.

I have the honor to be, with great respect, your obedient, humble servant,

MARK L. HILL.

Hon. Richard Rush, *Secretary of the Treasury.*

No. 2.

Collector's Office, *District of Portland and Falmouth, July* 7, 1825.

Sir: I duly received your letter of the 23d of April last, requesting that I would favor you with such information as I might possess on the subject of a resolution of the House of Representatives, passed the 2d of March, 1825, and with my opinion and views of the effect which the adoption of the measure referred to in the resolution would have on the revenue, commerce, and navigation of the United States.

A great proportion of the foreign commerce of this district, with the navigation employed, is with the West Indies; and the imports from thence principally molasses, a small part of which is stored by the importers; this course of trade consequently limits my information on the subject of the resolution. I will, however, proceed to give my views of the subject.

By extending the time within which merchandise may be exported with benefit of drawback from one to two years, would, in many cases, induce merchants to increase their importations beyond the usual consumption of our country, with the view of exporting the surplus under title of drawback within the time limited; foreign commerce would, of course, be increased, and the navigation be employed to more advantage. The extension of time would not materially affect the revenue; the demand for home consumption of the commodities on which duties are paid will remain the same as under the present restriction, and the surplusage only will be exported; the quantity of foreign merchandise exported, not entitled to debenture, being very inconsiderable under the present limitation of time.

If the system of deposit now applicable to wines, teas, and distilled spirits, should be extended to merchandise of every description, it will occasion considerable additional expense for Government storehouses, particularly in districts where Government now has no storehouses, as is the case at this port, where the expense would be to the whole extent of stores necessary for the deposit of goods.

The amount of duties to be retained on goods exported, entitled to drawback, to repay the disbursements of the Treasury upon that branch of the trade, should be from one-half to one per cent. in addition to the sums retained under the present revenue laws.

I have the honor to be, with great respect, sir, your obedient servant,

ISAAC ILSLEY.

Hon. Samuel L. Southard, *Acting Secretary of the Treasury, Washington.*

No. 3.

Custom-House, Collector's Office, *District of Portsmouth, May* 5, 1825.

Sir: I have the honor to acknowledge the receipt of your letter of the 23d ultimo, with a copy of a resolution of the House of Representatives of the 2d of March, requiring the Secretary of the Treasury to report at the next session of Congress whether any, and, if any, what, effect would be produced upon the revenue, commerce, and navigation of the United States by extending the time within which merchandise may be exported with the benefit of debenture from one to two years, and what amount of duties ought to be retained to repay the disbursements of the Treasury upon that branch of trade; and also, whether any additional Government storehouse will be necessary, if the system of deposit now applicable to wines, teas, and distilled spirits should be extended to merchandise of every description. To the first inquiry, it may be answered, that the revenue is presumed to be paid by the consumer, or on the quantity consumed; that the use and consumption of foreign articles in any country is generally in proportion to its means of procuring them. The quantity consumed will, therefore, depend in some measure on the price; the price again depends materially on the quantity imported; which will be regulated not more, perhaps, by the actual demand which may exist at the time, than by a view of all those circumstances which may be calculated upon to affect the price, either at home or abroad, within the time in which it

must either be re-exported to save the drawback, or be retained exclusively for home consumption. The *time*, therefore, in which it may be exported with the benefit of the drawback will have an important bearing on the calculations of the merchant. If the time should be extended from one to two years, the importation of many articles for which there is not always a regular demand will be increased, as well as of others for which there is a regular demand, but which at the time may be so depressed as not to warrant their importation except with a view to distant operations. I am fully of opinion that if the revenue should not (as I think it will) be increased by the extension of the time in which merchandise may be exported with the benefit of drawback, that it will not be diminished. If a longer time was allowed for the exportation, capital would be invested abroad to a much greater extent in such articles as are to be purchased below the cost of production with a view to their rise, which, under such circumstances, may generally be calculated upon with safety; and although these articles might be imported with a particular view to re-exportation, a variety of circumstances within the period of two years would operate to throw a portion of them into circulation at home, to the increase of the revenue. To the navigation and commerce of the country the advantage would be just in proportion to the increase of trade which may grow out of this measure, which, it is the opinion of some of our best-informed merchants, will be considerable. With regard to the amount of duties which ought to be retained to repay the disbursements of the Treasury on this branch of trade, it may be observed that the amount of these disbursements will not be increased by an extension of the time in which merchandise may be exported with the benefit of drawback, unless there should also be an extension of the time allowed for the payment of the duties; but, on the contrary, if the duties are paid before the merchandise *is re-exported*, the Government will save the interest, or at least have the use of the money from the time the duties are paid until fifteen days after the goods are exported. But it appears a sufficient sum has *not heretofore been retained*, and cannot be, under existing laws, to repay those disbursements. The calculation I make is from the gross revenue of the year 1823; from which it appears that the expense of collection in that year amounted to 3.22 per cent.; the amount retained of the duties on merchandise exported in that year averaged 2.77 per cent.; being less than the expense of collection by .45 per cent. There are some particular articles on which the expense is much greater than the general average. Russia bar iron, for instance, pays $1 12½ per cwt.; the expense of weighing inwards and outwards is 6 per cent. per cwt.; Collector's commission will probably average 1 per cent.; all other expenses estimated at 1 per cent.—equal to 8 per cent.; being a fraction over 7 per cent. of the duties, or 4½ per cent. more than is retained.

The duty on 100 bushels of salt is $20.

The expense of measuring inwards for duty and outwards for debenture is.....	$1 50
Collector's commission, estimated to average 1 per cent.....	20
	1 70

Equal to 8.5 per cent., or 6 per cent. more than is retained of the duties. An average of 3 per cent., with the specific amount retained on spirits, (which in the year referred to appears to have averaged about .27 per cent. on the whole amount of debentures,) would probably be sufficient to defray the disbursements of the Treasury on this branch of trade. But as salt, iron, hemp, and other bulky articles, on which the expense of collection is the greatest, are also the articles which give the greatest employment to our navigation, I am of opinion that it would be better policy to increase the per centage generally, so as to meet the disbursements of the Treasury, than to retain any specific amount on those articles. The expense of keeping goods in deposit is borne by the importers. The stores and warehouses used by them for this purpose are generally selected with a view to their local situation, their safety, and the convenience of lading and unlading their vessels. Those stores, when approved of by the Surveyor and perfectly secured, become *public stores*, and remain so without any charge on the revenue while any property remains in them on which the duties have not been paid or secured according to law. I am not aware, therefore, that any additional Government storehouses will be necessary, if the system of deposit, now applicable to wines, teas, and distilled spirits, should be extended to every description of merchandise.

With perfect respect, I have the honor to be, sir, your most obedient servant,

TIMOTHY UPHAM, *Collector.*

Hon. Samuel L. Southard, *Acting Secretary of the Treasury.*

No. 4.

Collector's Office, *Salem, May* 6, 1825.

Sir: Your letter of the 23d ultimo, covering a resolve of the House of Representatives of March 2, 1825, was duly received. I think that no inconvenience would arise to the Government in adopting the proposed alteration in the time—from one to two years—and that the storeroom in this district would be amply sufficient. The goods imported into this district for many years have been about nineteen-twentieths sold for consumption or exported within twelve months. The sums now retained from the duties, I think, would meet all the expenses of the Government.

I am, sir, very respectfully, your obedient servant,

W. W. OLIVER.

Hon. Samuel L. Southard, *Acting Secretary of the Treasury.*

No. 5.

Custom-House, *Boston, October* 26, 1825.

Sir: In conformity to instructions from the Treasury Department, of the 23d of April last, I have the honor to submit the following answers to, and opinions upon, the queries contained in the resolution of Congress, contained therein. 1st. Warehouse system of Great Britain. As the *warehousing* system

of Great Britain has not been attempted in this country in its *full extent*, and only partially in any manner, and our merchants having ever obtained a credit on the duties, with the advantage of receiving the goods immediately into their possession, the system of placing in the *public stores* and receiving the cash for the duties when delivered, as is the case in England, would not only be troublesome and vexatious, but have a direct tendency to exclude all our merchants but the *large capitalists* from the business of importation. Hitherto the liberal policy of the Government has encouraged *individual* enterprise, and enabled *every* industrious and honest citizen to enter the lucrative field of commerce on equal terms with the richest merchant; for the credit on the duties not only enables them to meet those governmental exactions without embarrassment, but operates as a *direct loan*, to the amount of the duties, to the importer. To this generous and politic system may be mainly attributable the successful and rapid increase of our commerce and navigation. They have, in truth, been "*let alone*," and I doubt the propriety of removing any of the present facilities for transacting business, or creating any new embarrassments to the adventurous career of those citizens concerned in commerce and navigation. 2d. The present system of storing teas, wines, and spirits. If the system contemplated by Congress by the resolution was only the extension of the same privileges to all goods, wares, and merchandise, as have been granted to teas, wines, and spirits, then a different view is to be taken of the subject.

With the privilege now allowed of making use of *private stores* for the deposit of teas, wines, and spirits, it is often difficult to find such as are sufficiently secure for the purpose, while it occasions great trouble, expense, and vexation to the importers and the officers of the customs. This plan would not do for other goods; the vast number, variety, smallness, and value of the packages, and their liability to be injured by frequent removals, damp or leaky buildings, besides the risk of loss by fire and by embezzlement, without the possibility of detection, the vast increased number of officers which would be requisite to attend to their being stored and delivered, and the consequent confusion in all the accounts, forbid the experiment. 3d. Public stores for all kinds of goods. If the *public stores* are to be used, the number must be great, and the expense of erection or purchase, without that for their superintendence, will require an immense expenditure, which could not be refunded, or the interest on the sum invested and annually incurred, without extremely onerous retensions of the duties on the goods exported for drawback, which would operate *directly* against this important branch of the carrying trade of the country, which now, and ever has been, of incalculable benefit to the United States.

From these considerations, I do not believe it will be expedient to make any change in the present mode of securing the duties and suffering goods to be exported for debenture. I should have sooner sent an answer, but having referred the resolution to some of our most intelligent merchants for their written opinions, I awaited their reception, which have not yet been realized, but verbally they have expressed strong doubts of making the change contemplated.

With the highest respect, your most obedient servant,

H. A. S. DEARBORN, *Collector.*

Hon. R. RUSH.

No. 6.

COLLECTOR'S OFFICE, *Providence, June* 7, 1825.

SIR: Your letter of the 23d of April, with a copy of a resolution of the House of Representatives, was duly received.

In reply, I have the honor to state that no additional Government storehouses will be necessary in this port, if the system of deposit now applicable to wines, teas, and distilled spirits, should be extended to merchandise of every description, provided the importers have the privilege now exercised with respect to teas, &c., and of storing them in their own or other private stores, satisfactory to the custom-house.

On the subject of extending the time within which merchandise may be exported with benefit of debenture, I have conversed with several of the first merchants here, and we coincide in opinion that, in the case of teas, it would be advantageous to commerce and navigation, and could not be injurious to the revenue, if one year from the time of removal from deposit were allowed, provided, however, that this period did not extend beyond two years from the time of importation; and that this time would be sufficient as to other merchandise. We also think that a general extension of the system of deposit would be beneficial to commerce and navigation, and not injurious to the revenue. I would respectfully suggest, in case the system of deposit be extended, that a uniform credit, from the time of removal from deposit, be established as to all merchandise deposited. When goods are taken from deposit, there seems to be no reason for a variety of credit, and the operation at the custom-house would be much simplified by its being uniform. I would also suggest that no credit extend beyond twelve months, and that the last term of credit on importations from places elsewhere than in Europe and the West Indies, &c., be reduced from eighteen to twelve months.

I have the honor to be, sir, very respectfully, your obedient servant,

THOMAS COLES, *Collector.*

Hon. SAMUEL L. SOUTHARD, *Acting Secretary of the Treasury.*

No. 7.

DISTRICT AND PORT OF NEWPORT, *Collector's Office, July* 7, 1825.

SIR: As to comply properly with the requirements of your letter of April 23, 1825, and the resolution of the House of Representatives of March 2, 1825, a view of the subjects embraced by them ought to be taken from a more commanding position than mine is, I beg leave to decline answering the questions propounded, excepting that relative to additional Government storehouses, to which my answer is, that if the system of deposit, now applicable to wines, teas, and distilled spirits, be extended to merchandise of

every description, it will probably be necessary to erect in this port so many stores as would cost from $100,000 to $150,000, there not being a Government store in the port, and only one belonging to an individual which may be denominated fire-proof, nor, in truth, many in any respect well calculated for the safe deposit of goods.

Most respectfully, sir, your obedient servant,

CHRIST. ELLERY, *Collector.*

Hon. SAMUEL L. SOUTHARD, *Acting Secretary of the Treasury.*

No. 8.

CUSTOM-HOUSE, COLLECTOR'S OFFICE, *New York, November* 20, 1825.

SIR: The letter of the Acting Secretary of the Treasury of the 23d of April last was received, relative to a resolution of the House of Representatives of the 2d of March, requesting information, together with my opinion and views, of the effect which the adoption of the measures referred to in the said resolution would have on the revenue, commerce, and navigation of the United States.

In answer, I state that I have read and considered the resolution in its different objects and bearings, and am of opinion that, if carried into effect, it would prove injurious to the revenue. The collection act of March 2, 1799, with few exceptions, is well calculated for the purpose of collecting the revenue, and for the allowance of drawback of duties on exportation. The existing laws provide credits, with sufficient securities, for the payment of duties on importation, and which operates in this port as a capital to our merchants equal to one-half of the gross revenue. They also permit bonds to be taken without surety on a deposit of a part of the merchandise as a security for the payment of the duties; they also permit all the merchandise to be deposited nine months without entry; they also permit a general bond, without surety, to be taken for duties on spirits and wines for twelve months, and the merchandise deposited in private stores under the locks of the Surveyor; they also permit a general bond, without surety, to be taken for duties on teas for two years, and the merchandise deposited in private stores under the locks of the Surveyor. The last two provisions may be considered as a very loose and an uncertain security for the revenue. Formerly there was said to have been a loss here for about $140,000 on a deposit of teas. When I entered upon the duties of the office there were upwards of $80,000 duties on teas, for which no special bond, with sureties, had been taken, and very little, and, in cases, no teas remaining in store as a collateral security; the duties, however, have since been paid. Within the present year a hundred casks of wine were deposited in a private store under the lock of the Surveyor, (under general bond,) and some weeks after, when a special entry and bond, with sureties, had been given for the duties, the officer, on going to make a delivery of the wine, found only one-fifth of the quantity remaining, the other having been previously removed. If the system proposed in the resolution be adopted, it will greatly and unnecessarily increase the responsibility of the officers of the collection of the revenue, require a great increase of officers and clerks, and additional expenses, and it would be almost impracticable to render the quarterly accounts with accuracy. The system of warehousing goods of foreign manufacture for drawback, under the proposed resolution, will principally benefit foreign manufacturers or their agents here. In England the warehousing of foreign goods not permitted for consumption is allowed for twelve months, under a general bond, without surety. But it must be recollected that the duties on all goods for home consumption are there paid in cash previous to their delivery. We have already, the present year, taken upwards of 30,000 bonds for duties. In relation to an extension of the time of allowing drawbacks on importation, I am of opinion it would be detrimental to the revenue, and be the means of introducing confusion into the accounts, diminishing the revenue, and increase the duties and responsibility of the officers, without any material benefit to the merchant or the Government. The debentures issued from this office have been from eight to eleven thousand a year. I therefore cannot recommend the adoption of the plan proposed in the resolution, but, on the contrary, give it as my opinion that the ad valorem rate of duties should be simplified, viz: that all goods, wares, or merchandise now subject, on importation, to the payment of duties ad valorem, shall, from and after ——, be subject to the payment of a duty of say not less than 25 nor more than 30 per cent. ad valorem, in lieu of the present rates, excepting all such articles which are now subject to the payment of a duty of 12½ per cent. ad valorem; and also excepting such articles as are enumerated in the fourth and fifth specifications in the first section of the act amending the several acts for imposing duties on imports, passed the 22d day of May, 1824; retaining the present addition of 10 and 20 per cent. the square yard duty on cotton goods, and also the present duty on cotton yarns, threads, and twists; and that all debentures, where the drawback does not exceed $100, be made payable at the last period of credit allowed on importation, excepting where the duties have been paid in cash without discount. And I would further recommend that all merchandise imported after the —— shall be consigned, in the bills of lading and the captain's manifest, to some person or persons, and not to order, under a penalty of $——. My reasons are, first, in relation to the ad valorem duties, that the proposed change would probably add something to the revenue and greatly facilitate the collection of it, and not injure our agriculture and manufactures. And as to the second, the change would give facility to the issuing of debentures, lessen the chance of errors and responsibility by diminishing their numbers, without injury to the merchant. In relation to goods consigned to order, as the bill of lading answers for any one, it has been the cause of most of our losses within the last four or five years. I would also take the liberty of recommending the passage of a law providing that, in case any teas or other merchandise deposited under the provisions of the collection act of March 2, 1799, or any other act, shall be embezzled, or fraudulently concealed, or removed from any store or place wherein they shall have been deposited, they shall be forfeited, and the person or persons so embezzling, concealing, or removing the same, or aiding or assisting therein, shall be liable to the same pains and penalties as if such teas or other merchandise had been fraudulently unshipped or landed without payment of duty; and that every Collector, Naval Officer, and Surveyor, or other person specially appointed by either of them, or any officer of the customs, may search for, seize, and secure any such goods, wares, or merchandise, as in other cases, and shall in all cases have the same protection against the suits or demands of claimants as are given by the existing

laws. Many other subjects might with propriety be submitted to your consideration, but will be deferred to a future occasion.

With great respect, I am your obedient servant,

JONATHAN THOMPSON, *Collector.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

No. 9.

COLLECTOR'S OFFICE, *Philadelphia, June* 28, 1825.

SIR: In your letter of the 23d of April, enclosing a resolution of the House of Representatives in Congress, of the 2d of March, you request such information as I possess on the subject, and my opinion and views of the effect which might be produced by the adoption of measures referred to in the said resolution.

First. "Whether any, and if any, what, effect would be produced upon the revenue, commerce, and navigation of the United States by extending the time within which merchandise may be exported with the benefit of debenture from one to two years, and what amount of duties ought to be retained to repay the disbursements of the Treasury upon that branch of trade."

Second. "Whether any additional Government storehouses will be necessary, if the system of deposit, now applicable to wines, teas, and distilled spirits, should be extended to merchandise of every description."

In considering the first point of inquiry contained in the resolution, I think it highly probable that though the time for exporting merchandise with the benefit of drawback should be extended to two years, much the greater amount will still be exported within the time now prescribed by law. Goods for exportation are generally imported with a view to that end; and, as it will always be the interest of the merchant to avail himself of the use of his debenture in meeting the payment of his duty bonds, there is abundant ground to conclude, and experience justifies the inference, that to whatever time the privilege of exporting with the benefit of drawback may be extended, it is obvious that the time of exportation will generally be regulated by the terms of credit on the importation.

On receiving our exports on dutiable merchandise, within the years 1823 and 1824, when a greater amount has been exported yearly than for several preceding years, it appears that something less than one-twelfth part of the whole has been exported without benefit of drawback. I do not, however, infer that the loss of debenture was owing to the goods not having been exported in due time, but because they consisted of broken packages to make up assorted cargoes, and which, under any extension of time, would not have been entitled to that benefit; and of this twelfth part, perhaps, there may not have been one-twentieth in original packages that had been in the country more than one year from the time of importation. It is proper to state that these observations are made hypothetically, as I have no means by which to test their accuracy, having cognizance only of goods exported with the benefit of debenture.

The net amount of external revenue I presume will always, in times of peace, be commensurate with the demand for home consumption. A judiciously regulated commerce should not allow the importation to exceed the quantity necessary for home consumption beyond what can be advantageously exported to other countries; but as a want of concert amongst merchants, as well as causes over which they have no control, will not always allow this rule to regulate their importations, it might occasionally be to their advantage to be allowed a longer time for exporting with benefit of drawback, when an excess of articles intended for home consumption would render it their interest to export what they might otherwise be obliged to force into our market at an under value. The revenue would, for the present, be so far diminished by as much as the drawback on goods thus exported would amount to, but which I apprehend would be compensated by retaining five per cent. of duty on all merchandise exported with the benefit of debenture; or, what perhaps might be better, five per cent. on that exported in the first year, and four per cent. on that exported in the second year after importation. But as I have already observed that the chief exports will always be made with a view to facilitate the payment of duties on the importation, I would not anticipate any effect from the extensions of the time that would furnish a sufficient motive for making the experiment. If, however, I should be mistaken in the view I have taken of the subject, and an extension of the time from one to two years would tend to increase the exports beyond what I have supposed, the increase of exports would necessarily be accompanied by a corresponding increase of imports. Whatever advantage might accrue to the commerce and navigation of our country by adopting the measure, I do not apprehend that any effect would ultimately be produced on the revenue that the duty proposed to be retained would not compensate.

As the second point of inquiry appears to contemplate the retaining of goods in store until the *duty is paid*, the extent of storage will somewhat depend on the time that may be allowed for *that purpose*. I would suppose that stores of capacity to contain their entire importations one year would be necessary, as teas, under the present regulations, may remain in store two years for the benefit of long credit. The public stores at this place, belonging to the United States, are perhaps not exceeded in dimensions by those of any other port; yet they are not of capacity to receive more than about one-fourth part of the goods now required by law to be stored under the custody of the customs, the residue being secured in the stores of the importers, agreeably to the provisions of the sixty-second section of the impost law of 1799.

If the measure of placing in public stores all the dutiable goods imported should be adopted, it would, I conceive, require an amount at least twenty times greater than we at present possess, which it would be impracticable to procure, unless at an expense that might not be compensated by any advantage that would be derived from the measure.

If the goods were stored at the expense of the importer, it would be highly objectionable to those who have good stores of their own, which, under such regulation, would be rendered useless property to such owners. If stored at the expense of the Government, this, with the addition of the compensation of storekeepers and incidental expenses, would probably amount to more than has ordinarily been lost to the United States by delinquent debtors. Should the measure be deemed eligible, I think it cannot receive too much consideration as to the probable consequences before it be adopted.

I am, sir, very respectfully, your obedient servant,

JOHN STEELE.

SAMUEL L. SOUTHARD, Esq., *Acting Secretary of the Treasury.*

No. 10.

PHILADELPHIA, *(no date.)*

SIR: In replying to the letter of the Acting Secretary of the Treasury of the 23d of April last, wherein he requested such information as I possessed on the subject, and my opinion and views of the effect which might be produced by the adoption of the measures referred to in a resolution of the House of Representatives in Congress, of the 2d of March, which accompanied his letter, the opinion I then entertained and expressed, in respect to the first member of the resolution, I have had no cause to change. Though the difficulties which presented themselves to my mind in considering the plan of depositing in store all imported merchandise, as contemplated in the second member of the resolution, have not, on more deliberate reflection, diminished, I am nevertheless of opinion that a change of system is indispensably necessary to give security to the revenue, which experience demonstrates is not attainable under the present; and I do not conceive of any that will so effectually answer the purpose as that of taking in deposit, at the time of importation, merchandise, as a pledge or security for the payment of the duties; but by no means to the extent proposed in the resolution. The credit system so long sanctioned by use, whatever may be said in its favor, in facilitating mercantile as well as other transactions between man and man, affords many temptations to deception and fraud, besides its tendency to the deterioration of the moral principle. The views and designs of dishonest men can seldom be penetrated until their nefarious purposes are accomplished. They may (as has been done) secretly dispose of their property to preferred creditors, or otherwise conceal it for their own use, so as to leave nothing tangible to discharge their obligations to the United States. Of the particular circumstances of the most reputable men in business, which, if any embarrassment exists, prudence cautiously withholds from public view, there is no less difficulty in obtaining a satisfactory knowledge. But, were the fullest assurance had of the entire solvency of principal and surety at the time of giving bond, unforeseen accidents and losses beyond their control, and which no prudence of theirs could prevent, might, at the end of eight, ten, or twelve months, render both the one and the other completely insolvent. In all these cases loss of revenue would be inevitable. In addition to the observations made in my former communication on the subject of storing all merchandise imported, I will suggest some other difficulties which I think would be found practically involved in the measure. As the delivery of the goods thus stored, on giving the usual bonds, would afford no greater security to the revenue than at present, I presume that payment of cash duty before delivery must have been contemplated. At present, when goods on arrival are delivered to the importer after having given the requisite bonds, the calculation of duty accruing on each invoice is performed by a single operation; but the payment of cash at delivery would render it the interest of the merchant to take at no one time more than suited his present necessity or convenience; hence, you will readily perceive that the demands for delivery of goods from store, the calculation of duty thereon, and the payments of cash, may possibly be increased to the number of packages contained in each invoice, which, besides the risk of mistakes or errors in the multiplied calculations, must necessarily be attended with the expense of as many additional clerks as would be requisite for the purposes. (For these calculations, however numerous, must be made previously to the delivery of the goods from store, or take a cash deposit, which would only increase the risk and labor still further; besides, duties should be paid at bank, and as seldom at custom-house as possible.) A like increase of expense and additional storekeepers, as well as risk of mistakes in such frequent deliveries from the immense quantity under their charge, would consequently follow. With a view to a plan that would afford no less security to the revenue and attended with as little expense in the execution, as well as risk of error in the calculations, keeping the accounts and records of the office, and in rendering accounts to the Treasury, as I conceive practicable, I would propose a substitution of the measure referred to—that, on the importation of all dutiable merchandise, such proportion of each invoice as would amply secure the duty on the whole should be deposited in the custody and under the exclusive control of the customs, which would not require more than one-third of the stores, if so many, as would be necessary to contain the whole, and deliver to the importer, forthwith, the balance of his invoice, (say two-thirds, more or less, as the case might require,) on giving his own bond for the duties.

In frequent conversation with merchants on the subject of cash duties, they have generally stated, in objection to the measure, that it would place mercantile business wholly in the hands of men of large capital. To obviate this objection, and for the accommodation of importers generally, but more especially those of small capitals, allow (as might be deemed advisable) three, six, and nine; six, nine, and twelve; or eight, ten, and twelve months credit, beyond which I think credit in no case should be extended; this course would not impair the security deposited, and be productive of as little incovenience to the merchant as would consist with the safety of the revenue; as, on payment of the first instalment, he would be entitled to receive from store one-third of his goods deposited, and in like manner at the payment of the subsequent instalment. As an inducement to the payment of cash duty at the time of importation, which would proportionably lessen still further the quantity of goods to be taken into store, allow a discount according to the credit given, equivalent to the rate of six per cent. per annum, which, I think, money is always worth to men in business, notwithstanding the reduced rate of interest which has obtained for some time past. A like benefit of discount might be allowed on the payment of bonds in anticipation, provided it was made on or before half the term of credit had elapsed; the labor of calculating discounts on short periods, which in many instances might be of little value to the receiver, should be avoided.

The stores and goods deposited therein should be placed under the care of a principal superintendent, with such assistance as might be necessary, who should report weekly to the Collector the condition of the stores and merchandise under his care.

In stating my views on the subject, which are respectfully submitted for your consideration, I may have fallen short of expressing them as explicitly and intelligibly as I intended.

I have the honor to be, very respectfully, your obedient servant,

JOHN STEELE.

RICHARD RUSH, Esq., *Secretary of the Treasury.*

P. S.—It may not be improper further to remark that the indefinite payment of duties under the general deposit plan, which, I apprehend, would leave it discretionary with the importer what payments he would make within the whole range of time from the importation to the period which would necessarily be fixed for finally discharging the duties thereon, would be materially deficient in giving that precise

view which the definite payments in the plan I have suggested would afford of the prospective revenue coming into the Treasury, which I suppose to be indispensably necessary in conducting the financial arrangements of your office; of this, however, you are the proper judge. J. S.

No. 11.

BALTIMORE, *September* 27, 1825.

According to the existing system of warehousing teas, wines, and spirits, the credits on the duties are longer than if they were not stored; added to which, the quantities which may be eventually exported remain uncertain as long as the limited time of exportation with privilege of drawback. In this view of the subject, if the limit should be extended to two years, and the system of deposit applied to merchandise of every description, the inconvenience above stated would be much augmented, so as to render the necessary anticipations of the receipts into the Treasury very uncertain. There can be little doubt that, if the deposit system was extended, considerable quantities of goods must be deposited to meet the demands for the South American and other markets; and if the right of drawback (as in the existing case of wines and spirits) was made contingent on the deposit, no doubt the quantity would be very large. If the time should be extended to two years, the final settlement of the duties would be procrastinated; it follows that more warehouse room would be wanted for the reception of the increased quantity of goods stored. It is probable, however, that some time would elapse before the measure of deposit would be very generally adopted by the importer; they would be deterred in the outset by the novelty of the plan and the inconvenience and expense to which they would think themselves subjected, and also the trouble of complying with the necessary and multiplied custom-house forms to which they would be liable in getting their goods in detail out of the store. It is presumed that the additional expense of store rent, storekeepers, &c., must be levied in some shape from the goods stored; this, however, would be progressive, and contingent on the increase of trade. It is concluded that the object in view is to improve the commerce of the country. The merchants, ever alive to their interests, will soon test its efficacy. If they find it advantageous, they will not regard the additional expense and trouble; but if they do not find their account in it, they will abstain as far as they can from depositing, and probably petition for a repeal of the law. It is to be recollected that the British Government has extended their deposit system to some of its colonies, evidently with a view of having goods ready and at hand to supply the southern markets. This may deserve the consideration of our Government. It is not supposed that the measure, if adopted, would naturally lessen or increase the net receipts into the Treasury under the existing tariff. The great mass of available duties arises on the goods consumed in the United States; the per centum retained out of the amount of drawbacks is but small when considered as an item of revenue, nor would the increase which might be expected from an augmentation of exports tend to make it a fund of much consequence. The amount retained might, perhaps, be increased; $2 50 on $100 drawback is no great matter; perhaps $5 would not be too much. I would beg leave to go a little further, and say that disproportioned credits now allowed on goods imported from beyond Cape of Good Hope, &c., viz: eight, ten, and eighteen months, should be reduced to periods falling in with other importations, both for the facility of revenue transactions and the safety of State and merchants. In so long a period as the latter the changes are often very great; the risk is increased to the revenue and the merchants, who are connected together; and additional trouble so given to the officers accounting to the Treasury at the custom-houses, &c., besides the delays of collection. So few are interested, and desire to have this long credit, that not more than one person is here recollected to have approved the regulation, and his approval of it was deemed no recommendation. The deposit of wines and spirits is productive of much trouble in keeping the accounts at the custom-house, and the benefit to the public can hardly be made out, while the individuals feel all the inconvenience of having their goods in other men's custody, who are at the same time irresponsible. Laws ought not to be changeable; but this reason should not forbid a return to less exceptionable regulations.—(See act 20th of April, 1818, chapter 124.)

Respectfully submitted.

JAMES H. McCULLOCH, *Collector, Custom-house, Baltimore.*

RICHARD RUSH, Esq.

No. 12.

COLLECTOR'S OFFICE, *Alexandria, May* 3, 1825.

SIR: I have had the honor to receive your letter of the 23d ultimo, covering a resolution of the House of Representatives of the 2d of March last, calling on you to report to that House, at its next session, "whether any, and if any, what, effect would be produced on the commerce and navigation and revenue of the United States by extending the time within which merchandise may be exported with the benefit of debenture from one to two years, and what amount of duties ought to be retained to repay the disbursements of the Treasury upon that branch of trade; and also whether any additional Government storehouses will be necessary, if the system of deposit, now applicable to wines, teas, and distilled spirits, should be extended to merchandise of every description." As to the first branch of the inquiry—what would be the effect upon the revenue and commerce and navigation of extending the limitation of exportation for drawback to two years—I am decidedly of opinion it would be salutary, both on our commerce and navigation, by extending the field of enterprise and giving employment to a greater number of vessels; nor do I believe it would affect the revenue injuriously. But, to render it safe, nothing short of the application of the system of deposit now in use as to wines, teas, and spirits, to all articles of merchandise which are the objects of it, will afford adequate security. With that guard, no objection is perceived to extending the limitation to two years. In the present state of the trade of this port, and until it shall be materially augmented, the present public stores will be abundantly sufficient if the change were made.

As to the retention of duties, I am thoroughly persuaded that less than two and a half per cent., the present sum retained, will not be sufficient to indemnify the United States for disbursements incident to that branch of trade.

With very high respect, I have the honor to be, sir, your most obedient servant,

H. PEAKE, *Collector.*

Hon. SAMUEL L. SOUTHARD, *Acting Secretary of the Treasury.*

No. 13.

COLLECTOR'S OFFICE, *Richmond, November* 29, 1825.

SIR: It will appear a long time to allow an official communication from the Department to remain unanswered, but the bad state of my own health, and that of a part of my family latterly, has denied my doing so till now; beside that, I considered it proper to consult some of the best-informed merchants of this place, who are entitled to great respect, and in whose hands I had placed the communication.

The following is the result of their observations:

"*To the Collector of the District of Richmond:*

"SIR: Your letter, enclosing those of Mr. Southard, Acting Secretary of the Treasury, covering a resolution of Congress of the 2d March last, has been duly considered, viz: *First.* On that of extending the time within which merchandise may be exported for the benefit of debenture. *Second.* What amount of duties ought to be retained to repay the disbursements of the Treasury upon that branch of trade. *Third.* Whether any additional Government stores will be necessary, if the system of deposit, now appli cable to spirits, wines, and teas, should be extended to every description of merchandise.

"It is plain to all here that, whether the debenture laws remain as they are, or be hereafter extended, the commerce of this (James) river can be little affected, as you well know that it is rarely a case occurs at this place where debenture is claimed upon exportation, but as it may affect the commerce of the United States generally, we can scarce hazard an opinion. We think, however, the period within which merchandise may be exported for the benefit of drawback already sufficiently extended; that two years would only lead to larger importations at hazard without real benefit, and will tend to individual loss. It might be doubted whether, if the duties now charged upon imports were paid on entry, it would not improve the prosperity of the United States as well as that of individuals engaged in imports, which, to make effectual, ought to be accompanied with a shorter period on exportation for drawback.

"The period now allowed by law for the payment of duties, for instance on British manufactures, acts as a bounty to the manufacturer, and it is notorious that they have nearly the whole of this branch of our imports in their hands.

"JOHN ALLAN,

"*In behalf of the merchants to whom the resolution was referred.*"

With regard to Government stores at this place, I have been a tenant, from year to year, at my own expense, and have occasionally, where the articles for examination were bulky, been obliged to have it performed in the best way I could. While I make this observation, I do not think, under the existing laws, any additional storage is necessary; but should the system of deposit generally be adopted, then, indeed, not only additional stores, but, at this place, an additional inspector will be necessary.

What may be the effect of such an arrangement I cannot venture to say; but, sir, I have no hesitation in believing, if Congress will make the duties payable on entry, and allow an adequate discount, that then the merchant who trades on a solid capital will be able to do business to advantage, inasmuch as it will have the effect to destroy a ruinous monopoly which now defies competition, and I believe would prevent great losses to the public. It would hold out encouragement to American merchants of solid capital to compete with British manufacturers, particularly, and their auction agents.

I am, very respectfully, your obedient servant,

JAMES GIBBON, *Collector.*

I could enlarge upon this subject, but my own want of health, added to a recent calamity in my family, disqualifies me from doing so.

No. 14.

COLLECTOR'S OFFICE, *Norfolk, May* 31, 1825.

SIR: I have had the honor to receive your letter dated the 23d ultimo, enclosing a copy of a resolution of the House of Representatives calling for information on the following points, viz: 1st. What effect would be produced upon the revenue, and commerce, and navigation of the United States, by extending the time within which merchandise may be exported with the benefit of debenture from one to two years. 2d. What amount of duties ought to be retained to repay the disbursements of the Treasury upon that branch of trade; and 3d. Whether any additional Government storehouses will be necessary, if the system of deposit, now applicable to wines, teas, and distilled spirits, should be extended to merchandise of every description.

In reply to the inquiry contained in the first member of the resolution, although the limited commerce of this place has afforded me the opportunity to acquire but little practical information on the subject, I have no doubt that the extension of the time within which merchandise may be exported, with the benefit of debenture from one to two years, would produce a very salutary effect upon the revenue, and commerce, and navigation of the United States. The character of our merchants for skill and enterprise in trade would induce them to import goods to a much larger amount, in proportion as the time was extended, within which they could export them with the benefit of debenture, as thereby a much fairer opportunity would be afforded to ascertain the state of the most important markets in the commercial world. The extensive markets which have been opened, and which are opening, to the commerce of this country by the revolution in South America, hold out strong inducements to our merchants to supply them with such European and other foreign goods as they consume. The extension of the time within which merchandise could be exported with benefit of debenture, aided by the skill and hardy enterprise of our seamen, would enable our merchants to meet the European merchants in those markets on something like equal terms.

Taking into view the commerce of the country at large, I presume that the chances of frauds being practiced on the Government would be somewhat increased by extending the time within which merchandise

may be exported, with the benefit of debenture, if the deposit system should not be extended to merchandise of every description, because, in the event of such extension, the goods would generally pass through more hands, and thereby, as well as the increased difficulty of identifying them, the chances to commit frauds would be increased; these chances, however, might be greatly diminished, if not entirely removed, by proper legal regulations, such as requiring that the merchandise of every description entered for exportation, with the benefit of debenture, should undergo a particular examination and inspection, and that marks or brands, known to all custom-house officers, should be placed on the bales, cases, packages, &c., containing such merchandise.

In reply to the inquiry contained in the second member of the resolution, I have to remark, that I consider the present retention from the amount of duties paid as fully sufficient to cover all expenses attending the collection of such duties, as well as those attending the exportation of the goods on which they accrued. In reply to the inquiry contained in the third and last member of the resolution, I have to remark, that here I do not believe it would be necessary to have any additional Government storehouses; if the system of deposit, now applicable to wines, teas, and distilled spirits, should be extended to merchandise of every description, the revenue would thereby be completely protected against every species of fraud, until after the shipment for exportation, as the goods could always be identified, and no opportunity would exist until then of substituting other and inferior goods for those entered for exportation with the benefit of debenture. I, however, entertain the opinion that such an extension of the deposit system as appears to be contemplated by the resolution would be attended with serious inconvenience in the large commercial ports, and would completely counteract all the advantages likely to result from extending the time within which merchandise may be exported with the benefit of debenture.

I have the honor to be, sir, with very great respect, your obedient servant,

JAMES JOHNSON, *Collector.*

Hon. SAML. L. SOUTHARD, *Acting Secretary of the Treasury.*

No. 15.

CUSTOM-HOUSE, COLLECTOR'S OFFICE, *Savannah, May* 21, 1825.

SIR: Your favor of the 23d ultimo is received, enclosing a copy of a resolution of the 18th Congress in relation to the following points, viz: "Whether any, and if any, what, effect will be produced upon the revenue, commerce, and navigation of the United States by extending the time within which merchandise may be exported with the benefit of debenture from one to two years?" If the inquiry is intended to be general and comprehensive, embracing the aggregate revenue, commerce, and navigation of the United States, I reply, without hesitation, that in all ports enjoying a large export trade the revenue, commerce, and navigation of such ports will be considerably increased by the passage of a law based upon the principles of the resolution. In many of our large cities a correspondence has been opened with South America, by which information has been obtained in about sixty days, as to their markets, particularly on the Pacific. Hence, by this early information, we are enabled to compete with England even in her own manufactures. Our merchants, therefore, by husbanding a supply, may be the first to participate in all the benefits of a rising market. But, if the inquiry was intended to be confined to the district over which I preside, I reply, that at the present the port of Savannah enjoys comparatively but little export trade, and that, consequently, the revenue, commerce, and navigation will not be materially affected by a change in the laws.

"What amount of duties ought to be retained to pay the disbursements of the Treasury upon this branch of trade?"

If the present retention is deemed to be sufficient to repay the present disbursements upon this branch of trade, I cannot perceive that any additional retention will be necessary to repay disbursements in case of additional trade, because the additional retention growing out of that trade will necessarily furnish the additional means to repay the expenses, except for the erection of additional storehouses.

"Whether any additional Government storehouses will be necessary, if the system of deposit, now applicable to wines, teas, and distilled spirits, shall be extended to merchandise of every description?"

The increase of export trade will for the most part be confined to our large commercial ports; they will become the depots to supply this branch of trade. If, therefore, their present warehouses are only equal to their present wants, it necessarily follows that in proportion to the increase of their trade will be the increased demand for additional storehouses. Perhaps it may not be too speculative to say that the revenue, commerce, and navigation of the United States will probably increase one-fourth if the proposed arrangement is carried into effect; consequently the demand for additional warehouses will increase in the same ratio. In this point of view, therefore, the interest of the sums expended for the erection of warehouses ought to be annually repaid either by the charges on storage or by an increase of the present retention.

The foregoing answers are upon the construction which I have given to the resolution. The inquiries are general and the phraseology obscure. It is, therefore, more than probable that I have misconstrued the objects designed thereby to be effected.

I am, respectfully, sir, your obedient servant,

JOHN STEVENS.

Hon. SAMUEL L. SOUTHARD.

19TH CONGRESS.] No. 742. [1ST SESSION.

REMISSION OF DUTIES ON SUGAR, IT BEING LIBELLED AS PORTUGUESE PROPERTY.

COMMUNICATED TO THE SENATE FEBRUARY 17, 1826.

Mr. SMITH, from the Committee on Finance, to whom was referred the petition of Otway Burns, made the following report:

That it appears from the petition and the vouchers submitted in its support, that on the 14th of August, 1818, a brig, bearing the name of "Fortuna," entered the port of Beaufort, North Carolina, laden with sugar, molasses, cotton, and hides, and was regularly admitted to entry by the Collector of the port. That the master, who called himself Murphy, applied to the petitioner to become security for the duties on the said cargo; that from the conversation of Captain Murphy and the crew, and the appearance of the brig, he, the petitioner, was satisfied that she was engaged in fair trade, and being assured by counsel learned in the law that, as the cargo had been regularly entered in the custom-house, he could run no risk in purchasing the same, he did purchase a part thereof, to the amount of about $11,000, which fully secured him (as he then thought) for the amount of the bonds given; and further, he agreed to carry, on freight, the balance of the cargo, for its owner, in his vessels, to New York. It further appears, from the deposition of G. Rumley, clerk of the petitioner, that about twenty-four or thirty barrels of sugar were sold in Beaufort; that a part was shipped to Philadelphia, as is proved by the manifests of the schooners Ann and Jane, the proceeds whereof were paid to him; and the residue of the cargo he landed, to be transported to New York, where it was seized by the Collector, on the ground that the papers accompanying the goods were not regular; which seizure he relinquished on the receipt of the certificate of the Collector of Beaufort. That in the meantime the Portuguese Consul at New York libelled the sugar, &c., as Portuguese property, which, being proved, was, after near five years of contest, decreed to be the property of a subject of Portugal, by which decree the petitioner lost the amount he had paid on his purchase, the freight of his vessel, and was held bound for the duties for which he had given bonds at Beaufort. Those bonds, amounting to $8,334 22, had been put in suit, March, 1819, and judgment had, as of course, been obtained; the execution was suspended by order of the Treasury Department. In February, 1823, the Marshal of New York paid into the Treasury the sum of $4,180 54, being for duties on the goods that had been libelled and sold by him. It further appears that the petitioner paid to the Collector, in 1823 and 1824, the sum of $907 05, being the presumed amount of duties on that part of the cargo sold in Beaufort and Philadelphia, leaving a balance still due on the aforesaid bonds of $3,246 23, from the payment of which, and the interest thereon, the petitioner prays to be released.

The deposition of Mr. Arundle, the Collector who admitted the Fortuna to entry, states "that he has seen a statement of the sales of that part of the cargo which had been sold at Philadelphia, and that the duties thereon did not amount to more than five or six hundred dollars; and that he knew of but a small part of the goods sold in Beaufort." From which it does appear to your committee that the duties collected at New York on the articles libelled and sold there ought, in justice and fairness, to have been to an amount equal to the balance due on the bonds of the petitioner, after the payment of the $907 05 for the presumed amount of the duties payable on the part which had been sold at Beaufort and Philadelphia; and such appears to have been the opinion of Mr. Anderson, Comptroller of the Treasury, who, in his letter to the Hon. N. Macon, dated January 5, 1825, says: "If the goods were adjudged to be the property of Portuguese subjects, and were directed to be restored to them, I am of opinion that Mr. Burns is not legally liable to the duties, and in such case relief could be afforded him by this Department, if judgment had not been obtained on the bonds given by him, in consequence of which the case is no longer considered within the competency of the Treasury."

The committee are at a loss to account for the difference between the amount of duties recovered in New York and those bonded for by the petitioner at Beaufort. There might have been a loss in the weight of the sugar, arising from its frequent removals from one warehouse to another, from the loss of weight which naturally arises in sugar by its drying and the molasses draining from it. The extent, however, can only be accounted for from the belief that the duty at New York was levied on the articles, not being of that quality which was charged at Beaufort at $4\frac{4}{10}$ cents per pound, but on the quality, which, agreeably to law, is chargeable at $3\frac{4}{10}$ cents per pound, which the petitioner has verbally informed the chairman he believed was the case. There is, however, no proof before the committee to substantiate that fact.

The committee have ample proof submitted to them of the fair and honest character of the petitioner, signed by gentlemen of the first respectability, and are of opinion that the prayer of the petitioner ought to be granted, and ask leave to submit a bill for his relief.

19TH CONGRESS.] No. 743. [1ST SESSION.

AFFAIRS OF THE BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 24, 1826.

TREASURY DEPARTMENT, *February* 23, 1826.

SIR: In obedience to a resolution of the House of Representatives of the 20th instant, I have the honor to transmit "the monthly statements of the affairs of the Bank of the United States for the year 1825."

I have the honor to be, with the highest respect, your obedient servant,

RICHARD RUSH.

The SPEAKER *of the House of Representatives of the United States*

J. ANDREWS, *Assistant Cashier.*

19TH CONGRESS.] No. 744. [1ST SESSION.

FORFEITURE OF CARGO SAILING FROM AN AMERICAN PORT UNDER A BRITISH LICENSE DURING THE WAR OF 1812.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1826.

Mr. DWIGHT, from the Committee of Ways and Means, to whom was referred the petition of Nathaniel Goddard and others, reported:

That the ship Ariadne, owned by the petitioners, with a cargo of flour, on the — of September, 1812, sailed from Alexandria, bound to Cadiz, having on board a British license, and was captured by the Argus on the 15th October, 1812. She was brought in and libelled with her cargo in the District Court of Pennsylvania; bonds were given in the usual form to abide the decision upon the libel, and the vessel and cargo restored to the petitioners and proceeded upon her voyage.

The captors relied upon the possession of the license alone as the cause of capture. There was no allegation that the property belonged to the enemy, or was shipped with any intention of assisting or benefitting him.

The District Court of Pennsylvania ordered the property to be restored and the captors pay damages. Upon an appeal this decree was reversed in the Circuit Court, and the decree of reversal affirmed in the Supreme Court of the United States.

The petitioners, upon the final decree of condemnation in 1821, paid the amount of their bond; one moiety of which went to the captors, the other into the Treasury of the United States. They pray for a remission of this last portion of their forfeiture—

1st. On the ground of unintentional error.

2d. Ignorance, that the possession of a license from the enemy could be considered as giving to the cargo the character of enemy's property.

3d. That the voyage was not contrary to the law of the United States nor to the known policy of the Government, and that they could have no reason to suppose that a voyage, lawful in itself, could be rendered unlawful by the forbearance of the enemy to interfere in its legal exercise. The petitioners regard the possession of the license only as evidence that the enemy would not interfere to prevent that from being done by a citizen of this Government which the laws of this country sanctioned and which the policy of the Government did not condemn.

They attempt to support those views by reference to the fact that the enemy had no particular connexion with the neutral port of Cadiz, to which the cargo was shipped; that the allied armies were then at a great distance from Cadiz, and did not draw their supplies from that quarter.

Although it was well known to the American Government that a trade in flour was carried on with the peninsula, and probably equally well known that it was prosecuted under British licenses, it did not deem it expedient to prohibit that trade; and when, subsequent to the capture of the Ariadne, the subject was before Congress, that body declined to pass a law prohibiting the use of such licenses, and treated the whole as a question of policy and expediency, depending upon the relative circumstances of the two countries at war, and their mutual means of annoyance and defence. At a more recent period, August 2, 1813, Congress, convinced of the inexpediency under then existing circumstances of suffering such trade to continue, passed an act prohibiting the use of such licenses; which act itself, since the war, March 3, 1815, has been repealed.

The petitioners therefore assert that the proceedings of the legislative body evinced their opinion of the legality of using such a license at the period of the capture; that several of the judicial tribunals, both of the State and General Governments, determined in favor of their use, and the Attorney General of the United States himself gave an official opinion to the same effect.

The committee cannot conceal the impression which these strong views in the case of the petitioners has produced upon their minds; and although they agree to the general doctrine that the ignorance of the law excuses no man, yet they are disposed to believe, with the petitioners, that there may be cases in which the new construction of a law or a new promulgation of that construction may be relieved against when that relief does not conflict with the policy of the Government nor sanction a departure from the known principles of legal or moral rectitude.

It remains only to be considered whether the relief prayed for by the petitioners is or is not of the character alluded to; and upon the decision of this question the opinion of the committee will rest. That there may be many cases in which ignorance of the law or a new or unexpected construction of that law have subjected individuals to unmerited hardship, the committee are not disposed to deny, nor would they, under such circumstances, be inclined to refuse relief, could such relief be extended to the petitioners without impairing any of those fundamental principles upon which every political society must be organized, and upon which its continuance may depend. Such principles, when applied to the intercourse between citizens of different countries even in time of peace, are highly important; but they become doubly so when, as in the present case, they relate to the conduct of citizens or subjects of different countries who are at war with each other. Nothing can be more clear than the position, that every sound dictate of policy and principle require of a Government at war to inhibit its citizens from seeking protection under the acts of the other belligerent Power.

The attempt to show that, in the opinion of Congress, sailing under an enemy's license or protection was not illegal, is not sustained by reference to the fact that Congress omitted in 1812 to prohibit the use of such licenses. For by the act passed in the preceding year they were prohibited, and their use rendered the vessel having such license on board liable to a forfeiture of her whole cargo. Nor has the repeal of that law in 1815, as the petitioners would suggest, any tendency to show that the legislative body itself began to feel a distrust of the justice and expediency of its provisions.

The committee cannot fail to perceive in the passage of that law a wise regard to the exigencies arising out of a state of war between this country and England, and in its repeal they can see nothing but an equally wise regard to the circumstances of the two countries resulting from the peace so happily restored between them. The judicial opinions of the highest tribunals of the country seem to have been not less doubtful than those of the legislative body.

In the cases of the Aurora and the Hiram, in the 8th of Cranch, and that of the Julia, in the 9th of the same reporter, the Court seem to have proceeded upon the broad ground that the mere sailing under an enemy's license, without regard to the object of the voyage or the port of destination, constituted in itself an act of illegality which subjected the property to confiscation.

These views seem to be confirmed, if they required any further sanction, by the opinion of the Court in the still later case of the Ariadne herself, where the Court say that sailing under such license is an attempt by one individual of a belligerent country to clothe himself with a neutral character by the license of the other belligerent, and thus to separate himself from the character of his common country.

If, then, these may be considered as the sound legal principles and judicial opinions of the country, the committee feel constrained to give to them that sanction which they are entitled to from every committee of a legislative body. And although they are satisfied of the correct intentions of the petitioners, they cannot see how relief can be extended to them without impairing, in no slight degree, the force of principles which the welfare of the country requires to be rendered inviolate. They therefore ask leave to submit the following resolution:

Resolved, That the prayer of the petitioners ought not to be granted.

19TH CONGRESS.] **No. 745.** [1ST SESSION.

LOAN OFFICE AND FINAL SETTLEMENT CERTIFICATES UNPAID JANUARY 1, 1826.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1826.

TREASURY DEPARTMENT, *Register's Office, February* 27, 1826.

SIR: I have the honor, in compliance with your communication of the 25th instant, to transmit a statement of the Loan Office and final settlement certificates and indents of interest outstanding and unpaid, and beg leave to suggest that five thousand dollars will probably be sufficient to meet all applications should the bill proposed to be reported be passed by Congress. Permit me to observe that by the act of the 12th of June, 1798, provision was made for paying the whole of the unfunded or registered debt;* that payments are made upon the parties applying at the Treasury; and the amount paid annually is carried to the debit of the appropriation of $10,000,000, per act of the 3d of March, 1817. The amount unpaid of that debt is $29,240 97.

I have the honor to be, sir, with great respect, your obedient servant,

JOSEPH NOURSE, *Register.*

Hon. PETER LITTLE.

Statement of Loan Office and final settlement certificates and indents of interest outstanding and unpaid January 1, 1826.

Loan Office certificates issued for money borrowed during the revolutionary war, amount outstanding	$76,397 00
Final settlement certificates issued by John Pierce, Commissioner for adjusting accounts of pay due the officers and soldiers of the revolutionary army	32,385 73
Final settlement certificates issued by the Commissioners for settling accounts with individuals of the several States for supplies furnished during the revolutionary war	14,560 22
Final settlement certificates issued for supplies furnished during the same period to the Commissary, Quartermaster, Marine, and Clothing Departments	3,717 58
Indents of interest issued for interest which accrued on the revolutionary debt prior to the present Government, estimated at	1,000 00
	128,060 63

19TH CONGRESS.] **No. 746.** [1ST SESSION.

OPERATION OF THE MINT IN 1825.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1826.

To the Senate and House of Representatives of the United States:

I transmit herewith a report from the Director of the Mint of the United States, showing the operations of that institution for the year 1825.

JOHN QUINCY ADAMS.

WASHINGTON, *March* 1, 1826.

* In the reports of the Commissioners of the Sinking Fund the payments of the unfunded or registered debt are stated under the head of "payments on account of certain parts of the domestic debt."

MINT OF THE UNITED STATES, *Philadelphia, January* 2, 1826.

SIR: I have now the honor of laying before you a report on the operations of the Mint during the last year.

From the statement of the Treasurer, herewith transmitted, it appears that the coinage effected within the year has amounted to one million seven hundred and thirty-five thousand eight hundred and ninety-four dollars, consisting of five millions one hundred and seventy-eight thousand seven hundred and sixty pieces of coin, viz:

Of gold	33,494	pieces, making	$156,385
Of silver	3,621,166	do.	1,564,583
Of copper	1,524,100	do.	14,926
	5,178,760		1,735,894

The gold coinage of the last year has exceeded that of 1824 by the sum of $63,185. Of this excess it may be interesting to observe a very sensible proportion consists of an increase of gold bullion derived from North Carolina; the value of the deposits received from that quarter within the year having been nearly $17,000—more than three-fold the amount from the same source in any previous year since 1804. Within that year, the first in which deposits of gold from North Carolina are noticed on the records of the Mint, the amount received was about $11,000. The whole amount received to the present time is about $68,000. This gold has very generally been found superior in fineness to the standard of our gold coins.

The value of the gold bullion received from other quarters within the last year may, with a sufficient approximation to accuracy, be stated at $45,000 from Africa, and $75,000 from Mexico, South America, and the West Indies, leaving about $19,000 derived from sources not ascertained.

Of the amount of silver brought to the Mint within the year, nearly one-half has been received from the United States Bank in foreign coins, and the remainder, chiefly from Mexico and South America, in various forms of unwrought bullion. The supply has proved, however, less constant in the last than in the preceding year. The amount in the vaults of the Mint, which on the first day of January exceeded $300,000, was early in October reduced to less than $30,000, deposits of bullion having been about that period nearly suspended for one month. This relaxation of pressure was very usefully improved to effect an emission, frequently called for, of some of the smaller denominations of our silver coin, and to extend the coinage of copper, as will be found particularly exhibited in the statement of the Treasurer before referred to. While, therefore, the whole value of the coinage of the last year is less than that of 1824 by the sum of $122,402, the whole number of coins executed will be found to exceed that of 1824 by nearly 400,000 pieces; and the number of gold and silver coins executed within the last year will be found to exceed by nearly 130,000 pieces that of any previous year since the establishment of the Mint.

During the last two months, the supply of bullion having again been copious, the heavier operations of coinage have been vigorously pursued, and I have the gratification to state that all deposits of silver bullion received up to the 9th of December, and all those of gold up to the 24th of the same month, have been coined, and their value issued. The amount of gold and silver bullion remaining in the vaults of the Mint at the close of the year is $135,335 08, the whole of which has been received since the periods above mentioned, respectively.

The copper coinage executed within the last year has amounted to $14,926, a small portion thereof being in half cents, the coinage of which it has been thought expedient, after a long interval, to resume. For this purpose a supply of half cent planchets was imported in June last. The amount of copper, coined and uncoined, now in our vaults, is $14,993. The amount of copper coins issued within the year is $19,426 25, the profit on which, as exhibited in the usual return made by the Treasurer on the subject, is a reimbursement to that extent of the annual expenditure for the support of the Mint.

On reviewing the transactions of this establishment for the last ten years, in which there has been a general progressive increase of the supply of bullion, it appears that, with a trivial corresponding increase of expenditure, the capacity of the Mint to accomplish the purpose of its institution has still been found equal to the expanding field of its operations. The result of the last two years, a period of heavier pressure than any two which have preceded them, conspicuously sustains this remark, and is believed to warrant the conclusion that the power of the Mint may be relied on to meet any permanent increase of the demand for coinage which can now be inferred from experience or anticipated on any known facts.

I have the honor to be, with great respect, your obedient servant,

SAM. MOORE.

The PRESIDENT *of the United States.*

TRANSACTIONS AT THE MINT IN 1825.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1826.

TREASURY DEPARTMENT, *February* 14, 1826.

SIR: I have the honor to transmit herewith three statements, marked A, B, C, which have been prepared by the Comptroller of the Treasury pursuant to the 7th section of an act of Congress, passed on the 2d of April, 1792, entitled "An act establishing a Mint and regulating the coins of the United States."

These statements contain all the information relative to the transactions of the Mint which the settlements made at the Treasury afford.

I have the honor to remain, with the highest respect, your obedient servant,

RICHARD RUSH.

The Hon. the SPEAKER *of the House of Representatives.*

Summary statement exhibiting the value of the coins made at the Mint; the amount of disbursements on account of the establishment; the amount allowed for wastage; the amount retained of deposits, and the amount gained on the coinage of copper, from the commencement of the institution to the 31st of December, 1825, viz:

Value of gold, silver, and copper coinage, up to December 31, 1824		$23,650,502 71
Gold coins made from January 1 to December 31, 1825, per account A..	$156,385 00	
Silver coins made from January 1 to December 31, 1825 per account A..	1,564,583 00	
Copper coins made from January 1 to December 31, 1825, per account B..	19,496 25	
		1,740,464 25
Total value gold, silver, and copper		25,390,966 96
Net charge on the coinage of gold, silver, and copper, to December 31, 1824	532,795 82½	
Add amount gained on the coinage of copper to the same period	115,686 47	
	648,482 29½	
From which deduct:		
Amount wastage on gold and silver to December 31, 1824	$83,199 49	
Also amount wastage from January 1 to December 31, 1825..	3,786 59½	
	86,986 08½	
		561,496 21
Add amount disbursed on account of the establishment from January 1 to December 31, 1825		22,993 07
Add, also, the amount wastage on gold and silver to December 31, 1825..	86,986 08½	
From the above deduct:		
The amount retained from deposits to December 31, 1824	$13,183 74½	
Also this sum from January 1 to December 31, 1825	2,199 12½	
	15,382 87	
		71,603 21½
		656,092 49½
Deduct amount gained on the coinage of copper from the commencement of the institution to December 31, 1825		118,647 17
Net amount chargeable to the coinage of gold, silver, and copper, from the commencement of the institution to December 31, 1825, including the costs of lots, buildings, and machinery		537,445 32½

LUND WASHINGTON, *Clerk.*

COMPTROLLER'S OFFICE, *February* 2, 1826.

19TH CONGRESS.] No. 748. [1ST SESSION.

ASSAYS OF FOREIGN COINS IN 1825.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 1, 1826.

TREASURY DEPARTMENT, *February* 14, 1826.

SIR: I have the honor to transmit herewith a report, received at this Department from the Director of the Mint, of assays of foreign coins made at that institution during the past year.

I have the honor to remain, with the highest respect, your obedient servant,

RICHARD RUSH.

The Hon. the SPEAKER *of the House of Representatives of the United States.*

MINT OF THE UNITED STATES, *Philadelphia, February* 7, 1826.

SIR: Conformably to general instructions from the Treasury Department, I have caused assays to be made of the foreign coins current by law in the United States, and have now the honor to communicate the result thereof.

FOREIGN GOLD COINS.

From the assayer's report it appears that the gold coins of Great Britain and Portugal contain 22 parts of fine gold in 24 parts; those of France, $21\frac{9}{10}$ parts of fine gold in 24 parts; and those of Spain $20\frac{7}{8}$ parts of fine gold in 24 parts.

Standard gold of the United States contains 22 parts fine in 24 parts, and the eagle of ten dollars contains, as by law established, 270 grains of standard gold, which is at the rate of 100 cents for 27 grains thereof, or 88⅞ cents per pennyweight. According to the present assay, therefore, the intrinsic value of the gold coins of Great Britain and Portugal will be 100 cents for 27 grains thereof, or 88⅞ cents per pennyweight; that of the gold coins of France, 100 cents for $27\frac{55}{100}$ grains thereof, or $87\frac{13}{100}$ cents per pennyweight; and that of the gold coins of Spain, 100 cents for $28\frac{44}{100}$ grains thereof, or $84\frac{34}{100}$ cents per pennyweight.

By a series of the annual assays made of the aforesaid coins during the last ten years, it has been ascertained that the gold coins of Great Britain are uniformly of the same intrinsic value with those of the United States; that the gold coins of Portugal approach this value so very nearly, in the general result, that they may be considered of the same standard; that the average intrinsic value of the gold coins of France is $87\frac{37}{100}$ cents per pennyweight, and that of the gold coins of Spain $84\frac{21}{100}$ cents per pennyweight.

FOREIGN SILVER COINS.

From the assayer's report it appears that the crowns of France contain 10 ounces 18 pennyweights 12 grains of fine silver in 12 ounces; that the five franc pieces contain 10 ounces 16 pennyweights 12 grains of fine silver in 12 ounces; and the Spanish dollars, 10 ounces 15 pennyweights 18 grains of fine silver in 12 ounces.

Standard silver of the United States contain 10 ounces 14 pennyweights $4\frac{5}{13}$ grains of fine silver in 12 ounces, and the dollar contains, as by law established, 416 grains of standard silver, which is at the rate of $115\frac{6}{13}$ cents per ounce. According to the present assay, therefore, the intrinsic value of the crowns of France will be $117\frac{71}{100}$ cents per ounce; that of the five franc pieces $116\frac{63}{100}$ cents per ounce; and that of the Spanish dollar, $116\frac{23}{100}$ cents per ounce.

From the average weight of the aforesaid silver coins, ascertained by numerous trials at the Mint, with the result of a series of assays thereof, made during the last ten years, the following may be considered as their ordinary intrinsic value, severally, viz: that of the French crown 109 cents 1 mill; that of the five franc piece, 93 cents 2 mills; and that of the Spanish dollar, 100 cents 4 mills.

I have the honor to be, with great respect, your obedient servant,

SAMUEL MOORE.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

19TH CONGRESS.] No. 749. [1ST SESSION.

DUTY ON SALT.

COMMUNICATED TO THE SENATE MARCH 17, 1826.

Mr. WOODBURY, from the Committee on Agriculture, made the following report:

That this important branch of our national industry is now compelled to sustain one burden, very severe and partial in its operation. It is the duty imposed upon imported salt; a duty which, at the rate of twenty cents on each bushel weighing fifty-six pounds, is almost unexampled in amount, as it sometimes equals three hundred per cent. on the prime cost of the article; because, while the weight of some salt per bushel does not exceed sixty pounds, that of other species is as high as eighty-four pounds, and is frequently purchased abroad at ten cents per bushel.

So enormous an impost, not on a luxury but on an article of the first necessity, falls also in a great measure upon the agricultural interest.

Because, whether salt be employed as a dressing for the soil, in the manufacture of butter and cheese, in the preservation of beef and pork, in the fodder to sheep and cattle, or in the various other ordinary uses of it, the tax comes, in the first instance, and in most of these particulars, exclusively from our farmers; and, in the end, probably more than five-sixths of it is paid by them, as the purchasers of it, without subsequent remuneration, by any enhanced price of their commodities, and as the greatest consumers of all agricultural products.

Your committee have searched in vain for a justification of the continuance of a burden thus severe and partial.

Because, though Congress possesses the power "to lay imposts" for the purpose of paying "the debts and providing for the common defence and general welfare of the United States;" yet, the Constitution declares that these imposts shall be "uniform throughout the United States," and care has, in general, been exercised to make them uniform in their operation as well as amount, and to lessen their amount wherever and whenever the exigencies of the country will permit it.

The first tax upon imported salt, in July, A. D. 1789, of only six cents per bushel, was declared to have for its two principal objects "the support of Government and the discharge of the debts of the United States."

With a national debt of almost eighty million, and a revenue of only about six million, there might then have existed a sufficient apology for so small a duty on a foreign article, whose use, at that time, was so uniform in different parts of the Union as to render the burden not very unequal.

In August, A. D. 1790, the same objects induced Congress to increase the duty to twelve cents per bushel.

In July, A. D. 1797, the reasons for it became strengthened by our foreign difficulties and augmented expenses. But, while these last furnished an argument to raise the duty still higher, to twenty cents per

bushel, public complaint and apprehension were, in some degree, quieted by limiting the duty to a period short of three years.

In May, A. D. 1800, the time was further extended to ten years; but, ere it expired, and soon as our revenues from other sources had become adequate to our annual expenses and to a gradual reduction of the national debt, Congress interposed with parental watchfulness over the first great interest of society, and, in December, A. D. 1807, put an end entirely to this invidious burden.

Imported salt afterwards remained free from duty till July, A. D. 1813. Then, as in former periods, between A. D. 1788 and A. D. 1801, our ordinary resources, by means of commercial embarrassment and war, were found altogether insufficient to meet the wants of Government, and, among other extraordinary burdens, the tax of twenty cents per bushel upon salt was revived. But it was expressly limited to one year after the close of the war; and, in April, A. D. 1816, would probably not have been retained, and indeed increased, by graduating the duty on the bushel weighing only fifty-six pounds, had not our debt become swollen to the alarming sum of more than one hundred and twenty millions.

Now, however, all the apologies for this tax, whether original or subsequent, seem to have ceased. The national debt is reduced to about its first amount; and our revenue from other sources, to meet our current expenses and to discharge this debt, have increased nearly four-fold. Although those expenses have also increased, yet, in the last nine years, we have had not only ample means to meet them, but to pay off more than forty millions of the debt.

The whole impost on salt within that period has aided in this financial operation only about five millions; and its present annual amount, of about $650,000, appears to us not to be needed either for the support of Government or the gradual discharge of the public debt. While its continuance, operating now principally on the eastern declivity of the Allegany ridge, becomes a tax so severe and so partial, on only a single and indispensable article, as to average in that region from one to two dollars per year in the family of almost every agriculturist. What is still further objectionable, an undue portion of this tax, even among agriculturists, fall upon the middling and poorer classes. If it could be imagined that such a burden was ever imposed with a view to encourage the domestic manufacture of salt—the only apology now left for retaining it—a sufficient answer would be found in the sketch we have given of the periods, occasions, and manner of imposing and repealing it. Still further might an answer be found in the fact that, notwithstanding the duty on salt, its manufacture on the seaboard has declined rather than increased, and, in the interior, has flourished, not from the duty, but from the small cost of the production of the article and the great expense of its transportation.

It can be made in the interior at a price from fifteen to fifty cents per bushel; and a duty of twenty cents would not pay its freight by land much beyond that number of miles. But what is decisive as to the uselessness of this exorbitant and unparalleled duty in a protecting view, so as to lessen the consumption of foreign salt, appears in the records of the Treasury, in the fact that the consumption of it has kept up to more than three million bushels per annum. In A. D. 1823 it was 3,538,323 bushels. The amount of revenue on this article, at different periods, show that the consumption of imported salt has increased, rather than diminished, or remained stationary; because, in A. D. 1801, it was $576,360; in A. D. 1806, $636,819; in A. D. 1820, $803,913; and in A. D. 1823, $889,948.

The tax, therefore, appears to your committee, in every point of view, injudicious; and they entertain an opinion that the interests of agriculture, and the true policy of the Government, require a speedy attention to the reduction of it.

Under this impression they recommend the adoption of the accompanying resolution:

Resolved, That the Committee on Finance be instructed to report a bill providing for a repeal of the duty on imported salt, in a manner gradual, or immediate, as, in their opinion, either mode may be preferable, considering the estimates and probable revenue of the current year.

19TH CONGRESS.] **No. 750.** [1ST SESSION.

AMOUNT OF DRAWBACK OF DUTIES IN 1822-'23-'24.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 17, 1826.

TREASURY DEPARTMENT, *March* 15, 1826.

SIR: I have the honor to transmit herewith a statement exhibiting the amount of drawback payable on merchandise exported from the United States during the years 1822, 1823, and 1824, compared with the amount of duties which accrued in the same, respectively.

I have the honor to remain, with the highest respect, your most obedient servant,

RICHARD RUSH.

Hon. the SPEAKER *of the House of Representatives.*

Statement exhibiting the amount of drawback payable on merchandise exported from the United States during the years ending on the 31st day of December, 1822, 1823, and 1824, compared with the amount of duties which accrued in the same, respectively.

TREASURY DEPARTMENT, *Register's Office, March* 8, 1826.

JOSEPH NOURSE, *Register.*

19TH CONGRESS.] **No. 751.** [1ST SESSION.

DUTY ON IMPORTED SPIRITS.

COMMUNICATED TO THE SENATE MARCH 21, 1826.

Mr. FINDLAY, from the Committee on Agriculture, to whom were referred the memorials of a number of agriculturists in Pennsylvania, and the court, grand jury, and bar of Franklin county, in the same State, praying that the importation of foreign spirits may be prohibited, or the duties thereon increased, so as they may, in their operation, be nearly tantamount to an entire prohibition, made the following report:

That the subject embraced in the memorials appear to involve important interests, which deserve the attentive consideration of those who are intrusted with the guardianship of the public prosperity. Whatever partiality may be felt by the representatives of different States for those interests which are especially committed to their care, there is a higher obligation upon each to guard with scrupulous attention the interests of the whole community; the great purposes for the establishment of this Government having been to promote, within its constitutional sphere, the common defence and general welfare. It is impossible that any measure of practical utility, which is incompatible with the general good, can be justified upon the principles that established our Federal compact; as in the simplest form of government, each individual surrenders a portion of his natural liberty to the society he joins for the sake of securing the higher advantages derived from its protection, so in a compact of States, each must agree to forego a portion of those privileges, which they might have possessed in a state of unqualified sovereignty, for the sake of the common protection and general interests. It may be further observed, that any association or compact, from the pettiest corporation to the most enlarged organization of political government, having its origin in that first law of nature, self-preservation, must be calculated, as well as intended, to promote the common interest of its members, but this common interest being the aggregate of all the particular interests, each must be taken into consideration in important measures of legislation; and whenever any one of the particular interests can be advanced without prejudice to the other, there cannot be a doubt as to the duty of the Government.

The proposition contained in the memorials appears clearly to belong to this class of cases; and it becomes, therefore, unnecessary to determine, by any development of first principles, even if that were practicable, how far Governments might safely go to promote any one of its particular interests at the expense of others.

The particular interests of the United States admit of a very natural and obvious division into three classes, which is adopted by universal consent for their designation, viz: the agricultural, manufacturing, and commercial; these predominate in different sections of the Union, according to their peculiarities of soil, climate, and position; and it seems now to be generally conceded that the true policy of the Government requires that its fostering care should be extended to all. It will readily be granted that the agricultural interests stand foremost in importance, and that it is of the utmost consequence for every nation which has a capacity for agriculture to take all possible care that it shall not languish. In the United States the agricultural interest admits of a division, which is essential to a correct understanding of the subject now under consideration. Our great agricultural staples are *small grain*, *cotton*, and *tobacco*; and it so happens that the regions of country adapted to the growth of cotton and tobacco are also more or less capable of growing small grain; the people of those sections, therefore, derive an important advantage from being able to accommodate their productions to the fluctuations of the demand for them in foreign markets, and are, consequently, less exposed to the depressions that will be occasionally felt in those regions which have a less diversified capacity of production; hence arises this difference in our agricultural interests. All that portion of our country which is adapted only to the production of breadstuffs being dependent on the foreign demand for a single production, is liable to a serious depression of its productive industry, while no inconvenience may be felt where the dependence is upon a demand for either of several products.

In addition to this advantage, it may be observed that the growers of cotton and tobacco have, from peculiar causes, the exclusive benefit of the home market for their products, while foreign spirits are everywhere introduced on the seaboard, and penetrate far into the country, to the exclusion of the only form of the staples of the grain region that could be made to bear the expense of transportation from the interior.

Your committee would briefly advert to the state of the foreign market for the products of the grain growing States; and also to that for the products of the cotton and tobacco region, in illustration of the declining state of the former and the increasing prosperity of the latter.

In three years, commencing on the 1st of October, 1802, and ending on the 30th of September, 1805, the annual average of flour exported was 966,000 barrels. The annual average of the same article exported in three years, commencing on the 1st of October, 1821, and ending on the 30th of September, 1824, was 8,500 barrels. The annual average value of flour, Indian and rye meal, ship-bread, and small grain, exported in the three years last mentioned, was collectively $6,500,000.

The annual average value of cotton and tobacco exported in the three years first above mentioned was $9,000,000; and the annual average value of those articles exported in the three years ending on the 30th of September, 1824, was $28,000,000. These statements, extracted from official documents, though made in round numbers, sufficiently approximate to correctness to prove that the foreign demand for cotton and tobacco has rapidly and vastly increased to the great advantage of our country. They also clearly demonstrate the declension of the foreign demand for breadstuffs, and that the agricultural industry of the region which is only adapted to the production of small grain must have suffered, and are suffering alarming discouragements; and, if it be in the power of the government, there can surely be no want of motive to provide a remedy. A constant and a profitable demand for agricultural products will alone insure at all times an abundant supply, than which nothing can more effectually give life and activity to commerce and manufactures. But as the foreign demand for our surplus breadstuffs is so limited as scarcely to leave any motive for producing a surplus, unless an increased demand shall be found in the home market, there must be inevitably a very great and serious diminution of the quantity produced.

It rarely indeed happens that the people of any country are so circumstanced as not to have the almost exclusive advantage of their home market for their agricultural products, and hence it is that legislative provisions on this subject are less frequent than those intended to promote the interests of commerce and manufactures; but when such an event does occur it becomes highly important that its consequences should be guarded against.

If the enlarged systems of internal improvement contemplated by several of the States shall be carried into effect, so as to enable the agriculturists of the interior to send their breadstuffs, with little expense for transportation, to the commercial towns of the seaboard, still there will be, under any circumstances, a great inequality in the rewards for agricultural labor, and our immense capacity of the interior country to produce will be unimproved, and great resources of individual and national wealth remain wholly dormant, so that whether we regard the peculiar situation of the foreign market for breadstuffs at this time, or the actual condition of our agriculture in a large portion of the grain regions under any change of the foreign market that could take place, there is still an adequate motive for securing the benefits of the home market for the growers of grain. This motive is strengthened by the consideration that the foreign demand for breadstuffs is not under our control. These articles of first necessity, unlike those the demand for which may be increased or diminished by the fluctuations of fashion, are limited by the natural wants of man, and for which the foreign market cannot be extended, either by the efforts of the Government or by the most enlightened commercial enterprise.

The position of the memorialists, that the agriculturists of the grain region largely contribute to the support and protection of commerce, and that it affords them a very limited market for their products, is sustained by the foregoing statements and others that shall be noticed. To present a fuller view of their sentiments on this part of the subject the following is extracted from their memorial:

"Without intending to reflect censure on your predecessors, we can with truth state that great and regular attention have always been given by Congress to foreign commerce, marked by numerous and large appropriations of the public money to objects for the promotion of its prosperity. Light-houses have been erected for its accommodation, and a Navy created and maintained at a vast, if not extravagant, expense to the nation for its protection, while nothing has been done, directly, for the interests of the agriculturists in this and the other grain growing States. They have, it is true, derived some benefit from the late tariff, which might be increased by an extension of the system. The benefits which they indirectly receive from foreign commerce are more than counterbalanced by the proportional part of the expense which they contribute to maintain it, as but a small part of their products find a market through the channel or agency of this commerce; still they do not expect or require its entire abandonment, as it may be advantageous, if not indispensable, to other sections of the Union. It is, however, an incontrovertible fact, that the part of this commerce which imports articles from other countries that compete with and frequently supersede the use of the products of their own soil and labor, either in their raw or manufactured state, is highly injurious to their interests. This would not be the effect if other countries did not impose restrictions and adopt prohibitions for the protection of their internal industry, and which effect ought to be removed by countervailing restrictions and prohibitions. Under existing circumstances, therefore, they consider this part of the foreign commerce as a heavy grievance, which is heightened by the reflection that they, as being part owners, as it were, of the National Treasury, have to contribute their share of the expenditures which uphold and protect it"

The annual expenses of maintaining the Navy, together with those for ambassadors, consuls, &c., all for the purposes of foreign commerce, amount to about one-half of the value of breadstuffs annually exported; to which might be added the expenses of the late war with Great Britain, a consequence of this commerce, and from which future wars are more likely to arise than from any other source.

There is no certain data from which the number of agriculturists exclusively engaged in growing small grain can be accurately ascertained, but a general view of that portion of our country not calculated for the growing of cotton and tobacco would justify the inference that they are more than one-half of the agriculturists in the Union, and perhaps the one-half of our federal numbers; but, whatever their relative number may be to that of the whole population, they must necessarily contribute nearly in that proportion to the expenses of upholding this commerce, from which they derive comparatively small advantages.

These circumstances present a strong claim on the Government to accede to the proposition of the

memorialists for the extension of the home market for their agricultural products. Besides, it is generally admitted that this market, for the extent to which it may be carried for any of the products of the soil, either in their crude or manufactured state, is more important and more certain than a foreign one. The latter, as we have oftentimes experienced, is liable to fluctuations, and frequently depends on the caprice or good will of foreign nations, while the former depends much upon our own internal regulations. Sound policy, therefore, seems to dictate that such articles as our country does produce, or has the capacity to produce, should receive governmental protection from foreign competition, which, though it might occasion a temporary inconvenience to some sections of the Union, they ultimately would be more than remunerated by the reduction of the price and improved quality of the articles arising from the home competition that the protection would afford.

Agriculture, manufactures, and commerce have successfully grown up and flourished in other countries under a system of rigorous exclusion or high taxation on foreign articles, and the beneficial effects of the principle has, in many cases, been experienced in our own, as in the growing of cotton, and particularly in the coarse manufacture of the article.

It may, however, be alleged that the duty on imported cotton was imposed for the purpose of revenue and not for the encouragement or protection of the growers of the article, which, were it conceded, would not affect the principle, as it is the consequences of a measure and not the motive by which it was adopted that tests its utility. It is a fact, as important as it is notorious, that, previous to the imposition of this duty, we did not grow a sufficient quantity of cotton for domestic supply; the inference, therefore, is irresistible that this protection was the most efficient cause of there now being not only an abundance for this supply, at a reduced price, but the surplus exceeds in value any of our articles of export. The same result is witnessed as to the coarse manufactures of it, both as to supply and reduction of price, and which have also become articles of export. The success of our ship building and navigation, the effects of discriminating duties, is, it is believed, unparalleled in the annals of the world. It ought not to be a question in this system of protection what proportion the duty shall bear to the value of the article on which it may be imposed; the only principle to be observed is, that it be commensurate to the object, as it has been in those cases. It is probable, in those cases, the growers, the manufacturers, the shipbuilders, and navigators could now safely dispense with the whole or part of the protection which has been afforded to those branches of industry, but for which they could not have commenced the respective pursuits with profit to themselves or advantage to their country.

As similar causes, by a parity of reasoning, will produce similar effects, it is fair to infer that the principle may be successfully applied to domestic spirits, and which equal justice requires should not be withheld. It is true that duties have been imposed on all kinds of imported spirits, whether for the purpose of revenue or protection is unnecessary to inquire, as it is sufficient to know the fact that they are too low to afford the efficient protection sought for by the memorialists, and which has been given to other domestic articles.

By the official reports of the Treasury Department, the annual average of imported spirits for the three years ending on the 30th of September, 1824, consumed in the United States, may be stated in round numbers at 4,500,000 gallons. Hence, it is evident that the present duties are an inadequate protection, and their augmentation or an express prohibition of the importation of spirits is necessary to effect the object.

The substitution of domestic for the foreign spirits annually consumed would, in the grain region, raise the value of improved land by the increased demand for its products, promote the profits of agriculture, and add to the national wealth the amount of the first cost of the foreign spirits, the annual average value of which, for the three years ending on the 30th of September, 1824, was $2,128,100, and also the expenses of their importation, which, together, amount to more than one-third of the sum which we annually receive from foreign markets for breadstuffs of every description.

It is worthy of remark that, as more than the five-sixths of the imported spirits are distilled from other materials than grain, the diminution of their consumption could not affect the foreign market in any material degree for breadstuffs. The contemplated extension of the home market would stimulate the industry of the grain growers, increase the competition, and excite emulation among the distillers in improving the quality of domestic spirits, so that they might soon obtain a preference for home consumption and become a profitable export.

These facts and reflections forcibly suggest the policy of this extension, if it can be effected consistently with the interest of other pursuits of industry, and which is not expected on any other condition, as would appear from the following extract from one of the memorials.

In answer to an anticipated objection, "that the measure might militate against the interests of other portions of the Union," the memorialists state:

"That it could not possibly affect those as much as the part of commerce alluded to does the interests of the grain States; and as the Constitution is the offspring of mutual concession, it is expected to be administered in the same spirit, by removing any pressure which may bear peculiarly hard on particular districts, so that, by consulting the various interests of the different parts, the welfare of the whole may be promoted."

It has been shown that the advantages which the agriculturists of the grain region derive from the foreign market for their products do not correspond with their proportion of the expense of protecting the commerce through which the market is obtained; and it remains to be inquired whether any injury would be done, by the adoption of the measure under consideration, to the commercial, manufacturing, or other branches of the agricultural interests of our country.

The unlimited capacity of the country to supply the demand will be a constant security against any material advance of the price of spirits, if that could be an objection.

The stimulus which the measure would give to the industry of the grain region must be to increase, in the same proportion, their ability to purchase and consume, not only the products of other regions in the United States, but also a greater quantity of those foreign articles from which the revenues of the Government are derived. In case it should in any degree diminish foreign commerce, it would promote the commerce between the States and increase our coasting trade. It is not, therefore, easy to perceive that it would be productive of injury to either of those interests. If, however, any should arise, they must appear trivial when compared with the positive good that would result from the measure to the people of the grain region.

Still, if a more attentive consideration of this subject should lead to the conclusion that any advantage would occur to the commercial and manufacturing interests by confining the prohibition to consumption

only, to which opinion part of your committee strongly inclines, believing that such regulations may be adopted as will secure the great purpose of the prohibition, without interfering to prevent importations of foreign spirits for reshipment, there could not be any well founded objection to such a modification.

The net annual average revenue arising from foreign distilled spirits for the three years ending on the 31st of December, 1824, was $2,034,965. If, therefore, it should be apprehended that their total and sudden prohibition would produce a temporary diminution of the revenue that would be inconvenient to the Treasury, that consequence might be obviated by giving the prohibition a prospective operation, and, in the mean time, the imposition of a very moderate duty upon domestic spirits would supply the loss, which duty might afterwards be repealed or continued as the condition of the Treasury might require. The advantage derived to the growers of the grain and the manufacturers of domestic spirits from the exclusive possession of the home market would be so much greater than the amount of a duty, equivalent to that which is now received from the imposts on foreign spirits, that it would neither be felt or complained of, if the mode of its collection should be free from the odious features of an European excise.

In the year 1815 there were 11,149,169 gallons of domestic spirits distilled, subject to specific duties. The number of gallons which the distilleries yielded in which the duty was paid, or the capacity of the stills employed therein, cannot be ascertained with precision, but taking the proportion which this duty bears to the aggregate revenue that accrued from domestic spirits as a basis of calculation, they are found to be upwards of 3,000,000. The quantity therefore distilled in the year may be safely stated to have been at least 14,500,000 gallons, more than the nine-tenths of which were from domestic materials. The revenue which accrued thereon was $3,232,806. If to the number of gallons be added that of foreign spirits now annually consumed in the United States, viz: 4,500,000, the place of which would, in case of prohibition, be supplied by a like quantity of domestic spirits, it will be found that a small duty per gallon will be equal to the whole revenue now derived from imposts on foreign spirits, which offers an ample remedy for every possible inconvenience to the Treasury that could, upon any supposition, result from the measure proposed.

It would, therefore, appear from the views which have been taken of the subject that the adoption of the measure would be highly beneficial to a very numerous class of citizens whose pursuits have claims to the fostering care of the Government, at least equal to those of any other, and that it could not be peculiarly detrimental to any, nor incompatible with the general interests, or produce any inconvenience to the Treasury.

The majority of the committee, however, being opposed to an express prohibition of the importation of foreign spirits, and as a bill cannot constitutionally originate in the Senate to increase the duties thereon, they have directed their chairman to report the following resolution:

Resolved, That the committee be discharged from the further consideration of the memorials.

19TH CONGRESS.] No. 752. [1ST SESSION.

FRAUDS UPON THE REVENUE LAWS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 23, 1826.

TREASURY DEPARTMENT, *March* 22, 1826.

SIR: In obedience to a resolution of the House of Representatives of the 27th December last, directing the Secretary of the Treasury to inform the House whether "any, and what, deviations from the instructions given by the Department, or from the course prescribed by law, for securing and collecting the duties on imports and tonnage, have recently taken place; and whether any, and what, extraordinary losses have been or are likely to be sustained by the Government in consequence of such deviations, or from any other cause; stating particularly the circumstances attending them, so far as they may have come to the knowledge of the Department; and whether any, and what, steps have been taken by any officer of the Government in relation to any such losses, if such have occurred," I have the honor to transmit herewith a letter from the Comptroller of the Treasury, dated the 9th of January, with the documents numbered from 1 to 21, inclusive, which accompanied it. Under the act of Congress of the 8th of May, 1792, the superintendence of the collection of the duties on impost and tonnage has been assigned to the Comptroller, and is performed by that officer under the direction of the Secretary. Hence, it was from that officer that the information called for by the resolution was in the first instance to be sought; and the letter and documents above mentioned furnish all of which the Department was in possession at the period when the letter bears date.

But the documents up to that epoch being limited and unsatisfactory in their bearing upon the recent transactions at the custom-house in Philadelphia, to which it was believed the resolution of the House particularly pointed, it was deemed proper to pursue a course which might give promise of shedding upon them more ample light. Accordingly a commission was instituted for the purpose of conducting an inquiry into these transactions in a manner the most full and rigid, through the instrumentality of a person specially deputed to proceed from this city for the execution of the trust. Power was given to him to examine upon oath the Collector and all the other officers of the customs at Philadelphia, down to the most subordinate agents in anywise connected with the business of that establishment, as well as to seek insight into the transactions, from whatever other sources it might be practicable to obtain it. He was also directed to scrutinize the books, records, and papers of the establishment, without limit as to time, to the end that the Government might be fully informed of the modes in which the public business was transacted there. The Commissioner selected was Samuel Harrison Smith, esq., and the precise nature of the instructions given to him upon all points will be seen from copies of them subjoined hereto, dated January 5 and 10, and by the copy of a letter to the Collector, dated January 6. The enclosures

referred to in the letter of instructions of the 5th of January are also transmitted, numbered from 1 to 10, and marked A, B, C, and D. The manner in which the duty was performed by the Commissioner will appear from his report to this Department, dated January 26, with the documents annexed to it, numbered from 1 to 79, and from the papers marked A, B, C, and D. This report and the documents constitute the whole of the information as yet obtained in relation to the transactions in question.

In regard to the losses likely to be sustained by the Government in consequence of these transactions, it is apprehended that they will be considerable, though they cannot be spoken of with any precision or certainty at the present juncture. Much will depend upon the issue of suits at law pending or still to be brought by the Government against the property held by Edward Thompson before his failure, the prior claim to which, as asserted by the United States, is contested by private creditors. Every step which the law will warrant has already been taken, and will continue to be adopted, by the proper officers of the Government, to sustain the interests of the United States under this conflict of claims, and no measure pretermitted which their just rights demand. The most valuable part of the property of Mr. Thompson consisted of five ships, which, with their cargoes, were expected to arrive at Philadelphia during the present and ensuing months, until July, on homeward voyages from Canton. It was deemed important to the interests of the Government that these ships should arrive at Philadelphia without having their destination intercepted. Measures were accordingly put in train to effect this object. Three revenue cutters were despatched to sea, under proper instructions, to bring the ships into the Delaware, and it is satisfactory to be able to state that two of them, with which the cutters fell in, have already arrived at Philadelphia, a result the more satisfactory as it is known that measures were taken to turn them aside from this destination. The cutters are under orders to resume their cruising stations and keep a vigilant look-out for the ships still to come.

I have the honor to remain, with the greatest respect, sir, your obedient servant,

RICHARD RUSH.

The Hon. the SPEAKER *of the House of Representatives.*

TREASURY DEPARTMENT, *Comptroller's Office, January* 9, 1826.

SIR: In compliance with the resolution of the House of Representatives, which you referred to me, and which is in the following words: "Resolved, that the Secretary of the Treasury be directed to inform this House whether any, and what, deviations from the instructions given by that Department, or from the course prescribed by law for securing and collecting the duties on imports and tonnage, have recently taken place, and whether any, and what, extraordinary losses have been, or are likely to be, sustained by the Government in consequence of such deviations, or from any other cause; stating, particularly, the circumstances attending them, so far as they may have come to the knowledge of the Department, and whether any, and what, steps have been taken by any officer of the Government in relation to any such losses, if such have occurred," I have the honor to state that this Department of the Treasury has not been advised of any recent deviation from any instructions given by it, or from the course prescribed by law for securing and collecting the duties on imports and tonnage. Presuming, however, that the resolution may have special reference to a transaction that has recently happened at Philadelphia, respecting a quantity of teas which had been taken from the custom-house or other stores by Edward Thomson and his agents, without the requisite permits having been obtained, I take leave to state that, from a careful examination of the records of this Department, it does not appear that the question has ever been submitted to its consideration, or that instructions have been given to the officers of the customs, whether, when teas deposited in public or other stores, under the provisions of the 62d section of the collection law of the 2d of March, 1799, the certificates required to be issued under the 41st section of that law were to be delivered to the proprietor, importer, or consignee, after the chests shall have been inspected, marked, branded, weighed, &c., in the manner required by the 39th section, or not until after bonds *with sureties* shall have been given for the duties and permits obtained for the delivery of the teas out of the public or other stores. In the correspondence, however, between this Department and the Collector at Philadelphia, in relation to the case of Edward Thomson, the course which the law seemed to authorize, the practice under it, and the course which *should* be adopted in the delivery of those certificates were incidentally noticed, as will be seen by reference to my letter to the Collector under date of the 3d ultimo. It may be proper to remark that the act of 1799 must have received a practical construction by the Collectors upon the first importation of teas into the United States after the passage of that act; and although the construction thus given where teas were imported was not in every port the same, with respect to the *time* at which certificates were to be given under the 41st section of that act, yet it does not appear that this Department had at any time been advised of the construction so given, nor of any difficulties having occurred under the construction which had thus been given by the Collectors, until the recent case of Edward Thomson, of Philadelphia.

No instructions have been given to the Collector at Philadelphia, from this office, respecting the bonding of the teas imported by Edward Thomson, or as to the security proper to be taken. The 62d section of the collection law of 1799 having given the Collectors of the ports where the duties upon imported goods accrue authority to take bonds *to their satisfaction*, this Department has not considered itself authorized to give the Collectors any instructions on that point, or to interfere in any manner therewith. The information that has been obtained from the Collector is not such as to enable this Department at present to form an opinion as to what losses have been, or are likely to be, sustained. The whole of the information which has been received at this office upon the subject, and copies of my correspondence with several of the Collectors, in relation to the teas taken out of the stores by Mr. Thomson and his agents, and of their answers, are herewith transmitted, being as follows:

1, 2, 3, 4. Copies of the letters addressed to you by the Collector at Philadelphia and the District Attorney, under date of the 22d and 30th of November and 1st of December, 1825, and which you referred to me.

5. Copy of the instructions of this Department on the preceding letters.

6. Copy of the petition addressed to you by Benjamin W. Richards, one of the firm, and in behalf of Joshua and William Lippincott & Co., of Philadelphia, which you also referred to me.

7. Copy of the instructions of this Department to the Collector at Philadelphia, on the subject of said petition.

8. Copy of the letter of the Collector at Philadelphia, dated December 6, 1825, with the statement which was enclosed in it.

9. Copy of the letter of the Collector at Philadelphia, dated December 12, 1825.

10. Copy of the letter of the Collector at Philadelphia, dated December 13, 1825.

11. Copy of the letter of the Collector at Philadelphia, dated December 17, 1825, with copies of the endorsements thereon.

12. Copy of the letter of the Collector at Philadelphia, dated December 23, 1825.

13. Copy of the letter addressed to this Department by the Collector at Boston, with copies of his correspondence with the Collector at Philadelphia and the District Attorney at Boston.

14. Copy of a letter addressed to this Department by the Collector at Baltimore, on the 5th of December, 1825, stating the circumstances under which he had seized some teas, being part of those taken out of store by Edward Thomson, without having previously obtained a permit therefor.

15. Copy of the application of Martin Gillet to this Department to have his teas released, which had been seized by the Collector at Baltimore, and of this officer's statement subjoined thereto.

16. Copy of the answer of this Department to the Collector at Baltimore, dated December 20, 1825.

17. Copy of a letter addressed to this Department by John Hone, of the house of I. & P. Hone & Co., of New York, stating the manner in which they became possessed of some of the teas imported by Edward Thomson.

18. Copy of the opinion of the Attorney General of the United States, stating his views as to the proceedings to be adopted in the different cases.

19. Copy of the instructions given to the District Attorneys at Boston, New York, Philadelphia, and Baltimore by this Department, under your directions, in accordance with the views of the Attorney General.

20. Copy of a letter from the Collector at Philadelphia, dated January 2, 1826, stating that the teas in the possession of Haggerty, Austin & Co., at New York, had been seized without recourse having been had to forcible means.

21. Copy of a letter from the Collector at Baltimore, dated January 6, 1826, respecting the disposition of the teas seized in his district.

The resolution of Congress which you referred to me is also returned herewith.

I have the honor to be, with great respect, your most obedient servant,

JOS. ANDERSON, *Comptroller.*

Hon. RICHARD RUSH.

TREASURY DEPARTMENT, *January* 5, 1826.

SIR: The late failure of Edward Thompson, a merchant of Philadelphia, having been preceded by the surreptitious removal from the custody of the custom-house of large quantities of teas, imported by him, before the duties had been paid or secured, it has become necessary to make inquiry into the causes of a transaction so extraordinary, and one by which the United States are likely to sustain a heavy pecuniary loss.

The Collector of the Customs at Philadelphia has already given such an account of them as was in his power, and there is no reason to distrust the fidelity of his narrative; yet it does not throw upon the transaction the light that is desirable, and it is therefore deemed proper to institute a scrutiny more thorough and comprehensive, with a view to the fullest development of facts that may be possible. The President, in entire reliance upon your ability and discretion, has selected you for the performance of this trust.

All the facts that have as yet transpired relative to this transaction are contained in a series of letters to this Department from the Collector and District Attorney at Philadelphia. Copies of these, numbered from 1 to 10, are enclosed, and afford, with other documents that will be mentioned, all the information upon the subject of which the Department is in possession. The letter from the Collector of December 12, addressed to the Comptroller, is, as you will perceive, that which chiefly purports to explain the manner in which the teas were taken off, or otherwise lost; and that of the 6th of the same month states the amount missing, being, as would appear in the whole, more than seventeen thousand boxes, all sizes included.

The 21st section of the collection law of March 2, 1799, making it the duty of the Surveyor, among other things, to ascertain the quantity of all teas imported and grant certificates for the same, you will examine that officer at Philadelphia with great particularity, as to the manner in which he has usually executed this part of his duty, and especially in reference to all the teas imported by Edward Thompson, and missing as above. If there have been any departures from the law under this head, either by the Surveyor himself or those employed under him, you will be careful to have them stated exactly, with the name or names of the officers or persons privy to such departures.

It being the duty of the same officer to place inspectors on board of vessels on their arrival at his port, you will also inquire into the manner in which he has usually executed this part of his duty, and especially in reference to the vessels in which the teas in question were imported. If there have been any departures from the law under this head by the Surveyor himself, or those employed under him, you will, in like manner, be careful to have them stated exactly, with the name or names of the officers or persons privy to such departures.

It being his duty to ascertain whether the goods imported in any ship or vessel, and the deliveries thereof agreeably to the inspector's returns, correspond with the permits for landing the same, you will inquire into the manner in which he has usually executed this part of his duty, and especially in reference to the teas imported as above. If there have been any departures from the law under this head, by the Surveyor himself, or those acting under him, you will be careful to have them stated exactly, with the name or names of the officers or persons privy to such departures.

It being his duty to see that no goods are delivered from any vessel without a permit for that purpose, you will examine into the manner in which he has usually executed this part of his duty, and especially in reference to the teas imported as above. If there have been any departures from the law under this head by the Surveyor himself, or those employed under him, you will be careful to state them exactly, with the name or names of the officers or persons privy to such departures.

It being his duty to superintend and direct all inspectors, and report weekly to the Collector the names of such as may be absent from or neglect to do their duty, you will inquire into the manner in

which he has usually executed this part of his duty, and especially in reference to the safeguard of the teas imported as above. If there have been any departures from the law by the Surveyor under this head you will be careful also to have them stated exactly.

You will question him as to what has been the course usually pursued by the officers of the customs in Philadelphia in storing spirits, wines, and teas, as provided by the 62d section of the collection law, and in delivering the same from store. You will next ascertain if any course was pursued in reference to the teas in question other than that prescribed by law; was any indulgence granted which the law does not sanction; and if so, under what circumstances, to what extent, and, above all, by what officer or officers.

The same section of the collection law declaring that no teas shall be delivered from store but in presence of an inspector, or person deputed by him, and under the authority of a permit, by whose omission, neglect, or connivance did it happen that so large a quantity could have been illegally withdrawn? These, also, are points to which your attention will be particularly directed. In endeavoring to probe them, as well as every other part of the case, you will not content yourself with the examination of the Surveyor only, but will examine all the other officers of the establishment, as you may see occasion, including the highest and descending to the lowest—the Collector, the Naval Officer, the inspectors, any or all of them, the weighers, the measurers, the gaugers. All their examinations will be reduced to writing and sworn to before a magistrate, each person as called being previously advised that his answers are to be under oath.

The letter of the Collector (No. 1) of November 22 states that he was unable at that time to ascertain the amount of teas surreptitiously taken, from not being able to obtain the importer's keys, who alleged that they were in the hands of the Messrs. Lippincotts, who refused to deliver them up on the ground of assignments made to them by Mr. Thomson of a quantity of teas in store. You will hence make careful inquiry into this matter, getting all the light that may be obtainable as to the nature of these assignments. All that is known of them here is contained in three papers enclosed, marked A, B, and C; the first, a memorial presented to the Department on behalf of the above firm, dated December the 7th; the second, a report from the Collector upon that memorial, dated December the 13th; the third, an affidavit of Edward Thomson, dated December 31st.*

The letter of the Collector of December 1, stating that he had been sued by this firm for refusing to deliver over to them teas in store at Philadelphia, some that were seized in the river at that port, and a further quantity seized at New York, it will be proper also to make inquiry into these particulars from any of the witnesses who may be able to throw light upon them.

In stating that you are to examine any or all of the officers of the customs as you may see fit, it is not intended to limit you to these. If the names of any other persons likely to give useful information become known to you, you will examine them also, provided they be willing to give their depositions. From the Collector's letter of the 12th of December it appears that Mr. Thomson had, on several occasions, taken teas from store before they were bonded; that whilst his vessels were discharging, quantities of boxes were not put into store at all, but sent away from the pavement in front of the stores where they were laid down by the porters. Hence these porters may be able to state facts not yet known from other sources.

It appears from the same letter that Mr. Thomson was enabled, at other times, to avail himself of the fact of one custom-house key opening the locks of several different stores; that, some of these stores containing teas that were bonded and others teas that were not bonded, he was enabled, under a permission to enter the former, to go with the same key to the latter, and thus send away teas not bonded. You will hence direct your inquiries into this part of the practice of the custom-house, ascertaining how it has happened that, under any circumstances, importers are permitted to go to the stores unattended by an officer, and through whose omissions or neglect they were so frequented on the present occasion, mentioning the names of all who stand thus implicated.

It is not intended, by any of the questions that I have propounded, to exclude others that may occur when you shall have entered upon the investigation before you. Only an imperfect knowledge of the transaction to be inquired into is possessed as yet at this Department, and it may be that ramifications of it are still to be laid open, towards which you will give to your interrogations such further scope or new direction as events and disclosures, when you are on the spot, may indicate as expedient and judicious.

The witnesses in every instance must be explicitly questioned as to their knowledge of the existence of any collision between any of the officers of the custom-house and Mr. Thomson, or as to any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions under this head.

Whilst the main object of your scrutiny will consist in endeavors to find out the truth in all its bearings of these late extraordinary occurrences respecting the teas, so as to know in what quarters the neglect rests, or the guilt, if there has been guilt, you will not confine yourself to these occurrences, it being the President's desire to be informed through you of the true state of the custom-house at Philadelphia, on any or all such matters connected with the transaction of the public business there as the close inspection which you will have of its affairs may suggest as pertinent and useful. To this end the Collector will be instructed to lay open to your view all the books, accounts, and papers of the establishment for as long a period as you may find it necessary to look into them, and to afford you every other facility that you may stand in need of towards the most ample fulfillment of this trust. Full confidence is felt that it will be executed in your hands so as to elicit all the light that may be practicable, and in modes the most appropriate and unexceptionable.

It may be proper that you should show the Collector these instructions. Upon his integrity every reliance is placed.

You will remain in Philadelphia as long as may be necessary to give completeness and efficiency to your investigations, and when closed you will be pleased to draw up a report of them as full as may comport with your convenience, addressed to me, to be laid before the President.

It only remains for me to add that, should you stand in need of legal advice in prosecuting any part of this investigation, the District Attorney, Mr. Ingersoll, who has already been actively engaged in looking to the interests of the United States upon this occasion, will be instructed to furnish it to you.

I have the honor to remain, with great respect, your obedient servant,

RICHARD RUSH.

SAMUEL HARRISON SMITH, Esq., *Washington City, D. C.*

* See paper marked D, with enclosures E, F, G, and H, in further relation to this part of the subject.

PHILADELPHIA, *January* 26, 1826.

On my arrival in Philadelphia, having, without delay, had an interview with the Collector, the Naval Officer, and Surveyor, I invited from them a general statement of the recent transactions of the custom-house connected with the failure of Edward Thomson. A statement of this description was promptly rendered by each of those officers, for which see documents numbered 1, 2, and 3. This led the way to a more particular and detailed inquiry, which is embraced by the documents numbered from 4 to 57, both inclusive, which exhibit the results of an examination of all the officers of the customs, with the exception of J. H. Fisler, an inspector, who was absent at New York on public business, until the moment of my departure, as well in regard to the aforesaid transactions as to the general administration of the custom-house.

Document No. 58 is the deposition of the head porter employed by Mr. Thomson, under whose superintendence all the teas were taken from the wharves on which they were first landed.

In an early stage of the inquiry I was invited by Mr. Thomson to a personal interview, in which he professed not only a willingness, but a solicitude to make the most unreserved disclosures. The offer was accepted, the fruits of which appear in documents numbered 79.

This offer, in connexion with incidents disclosed in the progress of my researches, led me to invite (see X) a voluntary statement from Peter Mackie, Charles Mackie, and Barclay Arney, the clerks of Mr. Thomson, which they furnished, as shown in the documents numbered 65, 66, and 67, with an accompanying letter from Richard Renshaw and Peter Mackie, assignees of Edward Thomson.

Having been advised by the attorney of the district that the counsel of Messrs. J. & W. Lippincott & Co. had informed him that their clients were determined, in the prosecution of their claims to certain portions of the teas alleged to have been assigned to them by Mr. Thomson, to rest entirely on principle, I considered it, in concurrence with the District Attorney, advisable to obtain from them a free disclosure of the facts pertinent to their claims, as likely both to elucidate it, and, in some degree, the fraudulent transportations of the teas. Document numbered 59 exhibits my inquiries.

Supposing, from a personal intercourse with several respectable merchants, that some light might be shed on the subjects into which I was directed to inquire, by gentlemen of that profession, and considering it proper that an opportunity should be given them to furnish any facts or suggestions that might indicate abuses, I addressed, at an early day, a letter to the prominent China merchants, and some others, inviting any communication from them which they might see fit to make. The document numbered 60 is a copy of my letter, and those numbered 61, 62, 63, 64, are the replies of Messrs. Robert Ralston, Henry Pratt, Lewis Clapier, and John C. and W. Smith.

From the contents of these documents, aided by auxiliary and incidental information, derived principally from the books and papers of the custom-house, the following statement is submitted:

Mr. Thomson appears for a number of years to have been very extensively engaged in the Canton trade, and more particularly in the importation of teas. On all these importations, until the 19th of November, 1825, the duties were regularly paid.

These importations, in the year 1825, were made in the ship William Savary, which arrived on the 28th of February; ship Addison, which arrived on the 5th of April; ship Woodrop Sims, which arrived on the 13th of April; ship Benjamin Rush, which arrived on the 1st of July; ship Thomas Scattergood, which arrived on the 2d of July.

The annexed documents, A, B, and C, received from the Deputy Collector, present a condensed view of the quantities and qualities of the teas entered as stored; those bonded eventually securing the duties; those actually in store, and those which have been surreptitiously removed from store, with the portions of these last which have been seized at Baltimore, Boston, and New York, together with the duties accruing.

By these documents it appears that the unbonded duties of Edward Thomson amount to....	$437,916 75
Of which the duties on teas in store amount to about.....	85,000 00
Leaving.....	352,916 75
If to this be added the bonded debt of Mr. Thomson, arising on goods regularly bonded, amounting to.....	557,330 85
	910,247 60
And there be deducted the estimated amount of debenture.....	53,000 00
There will remain, being the whole debt of Mr. Thomson, (exclusive of interest).....	857,247 60

subject to such reductions as may be effected by the decision on the right of the United States to the teas seized, and to those yet in store, which Messrs. J. and W. Lippincott & Co. claim under an assignment from Mr. Thomson.

Considering the frauds that have been practiced on the cargoes of these vessels, I thought it might be useful to trace them from the time they entered the Delaware bay to their arrival in the port of Philadelphia; but I found, from the collection law, that the district of Philadelphia comprises only that part of the Delaware, within the limits of Pennsylvania, which extend to but about twenty miles below Philadelphia, and learned from the Collector that he exercised no power whatever beyond these limits. My inquires were consequently restricted to the dividing line between the States of Pennsylvania and Delaware. Between this line and the city of Philadelphia the vessels appear to have been boarded by Job Whipple, the inspector in command of the revenue barge, who states that no revenue officer was at the time on board, he being the first one that went on board of them. He also states that it is his practice, after obtaining the necessary papers, to leave the vessel for the purpose of boarding such other vessels as may be coming up the river, and, consequently, that he never remains so long on board any vessel as to be present at the arrival of the inspector, who enters her for the purpose of placing his locks to secure the cargo. By the necessary papers are meant the original manifest, and a copy of it endorsed and certified, as required by the 23d, 24th and 25th sections of the collection law.

The next step, according to the Surveyor, is for such inspector as may first notice the arrival of a vessel, without any special designation or instruction, to go on board and secure the cargo by placing the necessary locks and other fastenings. As soon as this duty is performed, the vessel is sometimes left,

and remains without any revenue attendance until one or more inspectors, detailed by the Surveyor, enter her for the purpose of superintending her unlading. In this instance the names of the inspectors that first went on board these vessels and placed the locks have not been ascertained. No record is kept of them in any case where they are not the same with those who superintend the unlading. Those who superintended the unlading were John Brown, John Boyd, and Robert Hopkins; all the customary measures in the discharge of this duty appear to have been complied with by them, as well as the weighers and markers, and the articles landed to have corresponded with the permits for landing them.

It may be noticed, however, that the 21st section of the act of March 2, 1799, requires the Surveyor to visit or inspect the ships or vessels that arrive, and to make a return in writing every morning to the Collector of all vessels that may have arrived the preceding day. This duty seems now, from the Surveyor's statement, to be fulfilled by the captain of the revenue barge, who makes a report, sometimes written, both to the Collector and Surveyor, which the Surveyor records.

It may be further noticed that, by the 37th section of the collection law, a separate and additional entry of spirits, wines, and teas is required to be made, to be certified by the Collector as conformable to the general entry previously directed, and to be transmitted to the Surveyor, with the further direction that every permit for the unlading of spirits, wines, and teas shall, previous to the unlading, be produced to the officer or inspector, who shall endorse thereupon the word "inspected," without which a penalty is incurred by the master. This course was not pursued in this case, either by the Collector, Surveyor, or inspector. No separate entry or endorsement was made. The Deputy Collector states his unacquaintance at the time with the provision; the Surveyor represents that it has not been practiced since the year 1802, and the inspectors were likewise ignorant of it. Permits, however, in the usual form, appear to have been granted, and although but one entry appears to have been made, it passed through the hands of the Collector, was noted by him, and transmitted by him to the Surveyor, in this way consolidating, in some measure, the provisions of the 36th and 37th sections of the collection law. This is said to have been, for a long time, the invariable usage.

It may also be noticed that the 53d section of the collection law requires the inspectors to constantly attend and remain on board of a vessel, the deliveries from which they are superintending, from the rising to the setting sun. It is in proof that they leave the vessel to take their meals; and I understand that, while vessels are discharging, watchmen are employed during the night.

Several days were consumed in inspecting and discharging the cargoes of each of these vessels. During this time the teas, as soon as they were weighed and marked, were removed from the wharves by porters in the employ of Mr Thomson. The duties on but an inconsiderable portion of them were, at the time, secured by bond and sureties. In respect to the residue, Mr. Thomson availed himself of the provision contained in the 62d section of the collection law, by giving his own bond, with the condition of the teas being deposited in stores, to be agreed upon by the owner and the inspector. Two inspectors, Andrew Jackson and Robert Hopkins, who remained on the wharf during the discharge of the cargoes, had these stores in their charge, being six in number, and rented by Mr. Thomson. The porters, unattended by any revenue officer, removed the teas, which were placed by them on the pavement in front of the stores, from which parcels of them were forthwith taken to packets destined for New York, Boston, or Baltimore, and the residue deposited in the stores. During this time the stores were open, or both the keys in the hands of Mr. Thomson or his agents. In this state they remained until the teas were arranged by persons in Mr. Thomson's service, when they were secured by double locks, the inspector taking possession of the custom-house key, without having previously made any other than a casual examination of their contents. No accurate examination appears to have been subsequently made, which, it is alleged, would have been impracticable, from the impossibility of counting the boxes from the manner in which they were placed, and from the difficulty of obtaining the owner's key, which, it is represented, he is under no obligation to furnish to the inspector. Afterwards, when the owner wished to enter the stores, the inspector, when engaged in other duties, intrusted him with his key. This confidence was extensively abused, and, under cover of permits for taking out a small number of chests, a large number were withdrawn, on which occasions frequently the stores were entered when it was ascertained that the inspector under whose charge they had been placed was busily engaged at a distance. It is ascertained that, in these ways, the number of boxes of teas, as stated in document No. A, have been either never stored, or, if stored, have been surreptitiously withdrawn. But the exact quantity of each does not appear.

It is alleged to have been always the custom for the owner to choose his stores, and it appears that the same custom-house key opened different locks, which were furnished by the Surveyor, and that this was known to the revenue officers.

The inspectors who had charge of the stores represent that they had other duties, which they were required to perform, such as counting the boxes of teas as they were weighed and marked, and attending to none other being taken away, incompatible with a stricter compliance with the law than has taken place, no officer being specially charged to accompany the teas to the stores.

Depositions of several of the inspectors show that sometimes a more guarded course was pursued in regard to the admission of articles into, and their removal from, the stores; but the foregoing is abundantly shown to have been the usual course; and it appears that, besides Andrew Jackson and Robert Hopkins, several inspectors, and among them Joseph R. Dickson, were in the habit of lending their keys to the owners of articles stored.

One of the inspectors, however, Andrew Geyer, states the practice formerly to have been to lodge the custom-house key in the Surveyor's office, and, whenever a permit was granted, for the inspector to take the key of the store, attend in person to the delivery of the goods, lock up the store, and return the key to the Surveyor's office.

The Surveyor's deposition shows that, previous to these occurrences, he had given no special instructions to the inspectors respecting these stores; that the same store frequently contained bonded as well as unbonded goods, and that no return was made to him, or entry made by him in his books, of the contents of the stores.

By the same deposition it appears that, since these occurrences, the articles deposited are, with some exceptions, counted; that an inspector himself invariably opens the stores, but that, when pressed by business, he leaves them open in his absence for a short time; and that the goods at present in the stores have all been counted, and that, with the exception of Thomson's teas, none are missing.

There is reason to fear that these abuses did not commence in the year 1825. The depositions of Peter Mackie, Charles Mackie, and Barclay Arney, clerks of Mr. Thomson, numbered 65, 66, and 67, state that

Mr. Thomson began the practice of surreptitiously removing teas as early as the year 1822, and continued it into 1825; that the plan was first laid down by Floyd S. Bailey, then connected in business with Smith & Nicoll, of New York; that Floyd S. Bailey urged Mr. Thomson to do in Philadelphia as they did in New York—that is, bond a small number of boxes, and, under the color of a permit for them, remove a larger number. These allegations are supported by the copies of sundry letters of Floyd S. Bailey and Edward H. Nicoll to Edward Thomson, numbered 65 X.

In these cases, it is to be remarked, the duties were all eventually paid.

By the existing laws it is provided that the particular certificates accompanying spirits, wines, and teas, shall be furnished in blank by the Collectors, under their signatures, and numbered, to the surveyors or other officers of inspection, who are made accountable therefor to the Collectors, and who are required to make regular and exact entries of all such as shall be delivered by them to individuals.

It appears that the practice, previous to the failure of Mr. Thomson, was, for the surveyor to have these certificates printed, often distinctly for each cargo when its packages were numerous; for the Collector, or a clerk for him, to sign, seal, and number them, and then return them to the surveyor, who filled them up, and countersigned them. The surveyor then delivered them, on demand, to the owner of the wines, spirits, or teas, at any time after their inspection, whether bonded or deposited in stores, taking a receipt for them. No general books are kept of their transmission from the Collector to the surveyor, or of their delivery by the latter to the merchants, but entries are made of their delivery in the particular books of the several commodities kept by the surveyor, and an evidence of such delivery accompanies the Collector's returns to the Treasury. There does not appear to be any periodical accountability in this respect of the surveyor to the Collector. No instructions on this head, or in regard to the delivery of these certificates to individuals, seem to have been given by the Collector to the surveyor; but a general impression existed among the custom-house officers that they were legally demandable as soon as the goods were bonded or deposited in store. Accordingly, in the case of Thomson's teas, they were delivered on demand, after the teas were bonded or stored, as soon as they could be prepared, and covered the whole importations. This usage seems always to have prevailed in this port.

Since the recent occurrences, no particular certificate is delivered, except on the payment of the duty, or its being secured by bond and sureties.

For a long period, so remote as to be incapable of ascertainment, departures from the strict letter of the law, as to some papers and books, appear to have existed. Some of these have been already noticed; others remain to be stated.

The 21st section of the collection law requires the weights, measures, and other instruments, to be examined and tried on the first Mondays in January and July in each year. The surveyor states that, having found that the frost in January materially affected the weights, so as to make them, as then ascertained, incorrect in warmer weather, the examination and trial of them was deferred to and now takes place in the spring, instead of the month of January.

The 21st section of the collection law also requires the surveyor to report to the Collector, once every week, the names of such inspectors, weighers, gaugers, or measurers, as may be absent from, or neglect to do, their duty. No such reports appear to be made. The surveyor deposes that he does make such a report when instances of absence or neglect occur. The Collector deposes that such a report has not been made to him by the surveyor, whence he always inferred that there was no absence from, or neglect of, duty to be reported.

The 53d section of the collection law requires the inspectors to enter in a book, to be kept by them, the names of persons to whom permits are granted, with the particulars therein specified, to be delivered to the surveyor in the month of January in every year for his inspection, and to be by him transmitted, with such observations as he may think necessary, to the Collector, to be deposited in his office. These books, it appears, are kept by the inspectors, copies of which (called reports) are delivered to the surveyor, by whom they are examined and transmitted to the Collector, who files them with the manifests; but the books are not delivered to the surveyor, or, as a consequence, transmitted by him to the Collector.

In regard to the assignments alleged to have been made by Edward Thomson to J. & W. Lippincott & Co., I am not enabled to add much to the knowledge previously had of them. They are said to embrace not only nearly all the teas now in store, but other parcels have been surreptitiously withdrawn, and some of which have been seized by the revenue officers. For such knowledge as I have obtained, I refer to my inquiries addressed to those gentlemen, as given in document No. 59, which, though dated January 19, 1826, have not as yet been replied to, and to the answer of the Collector to an interrogatory put to him, who deposes that there has not been, according to his recollection, any other assignment made of goods in store. It may be proper to add, that the circumstances connected with the entries offered at the custom-house were collected from the Deputy Collector, including the last one, which, although dated the 19th of November, was not signed, it seems, until the 26th of that month, and that the letter of William Lippincott, one of the firm, numbered 68, was received in consequence of a conversation held with him, on the 18th of January, at the stores in which the teas claimed by him were deposited, and which I examined in the company of Mr. Andrew Jackson. My conversation with several intelligent merchants has not elucidated the subject. There may have been many assignments of this kind which were not exposed to light, from the objects to which they related having never been placed in the predicament of these teas, the duties on them having been duly paid or secured.

Document No. 69 contains a rough statement of the auction advertisements of the teas of Mr. Thomson, as inserted in the National Gazette, from February 28 to October 4, 1825.

The practice in these sales, as collected not only from the officers of the revenue, but from respectable merchants, is, to make them by sample chests, and in case of a sale, the right to the teas in store is transferred to the purchaser, who may immediately take them out of store by paying the duty, or bonding them; or may suffer them to remain there within the time prescribed by law, subject to his disposal on paying or securing the duty. How far these advertisements, giving the name of the ship in which the teas were imported, with their qualities, and sometimes the quantities, should have attracted the attention of the revenue officers, is a matter of opinion, not embraced by my instructions.

Having found from my personal intercourse that an impression prevailed that the Collector had taken insufficient sureties on the bonds of Mr. Thomson, to whom it was thought unusual favor had been extended; and it appearing undoubted that the sureties were worth very little, compared with the sums for which they were answerable, I considered it my duty to call upon the Collector for an explanation on this head; for the answer to which, I refer to his deposition, with the abstract of Mr. Thomson's bonds, as given in document No. 70.

Having been confidentially informed, from a source of undoubted respectability, that, subsequently to the failure of Mr. Thomson, Mr. Peter Mackie, one of his clerks, had been engaged at the custom-house, late at night, in signing, as attorney of Floyd S. Bailey, bonds previously given by Mr. Thomson, I also made inquiry on this head. The Collector admits the fact, and says that, from information from the Deputy Collector, it appears that some of Edward Thomson's bonds which, through oversight, were incomplete at the time they were given, had a surety, by his attorney, added on the evening of the 19th November.

The Collector, as explanatory of these transactions, has adduced nine powers of attorney, bearing date June 13, 1822, October 14, 1822, May 14, 1823, October 3, 1823, December 12, 1823, April 17, 1824, April 17, 1824, August 19, 1824, and August 23, 1824, of Floyd S. Bailey, of the city of New York, to Peter Mackie, to execute all the bonds for duties on teas imported by Edward Thomson in the recited vessels, including all bonds on teas entered for delivery from store previous to the date of the power of attorney, and all bonds on teas which might thereafter be entered out for delivery from store, the last six of which are irrevocable. The same document, No. 70, designates the bonds executed in this manner.

Some other papers accompany this report, which only require enumeration, viz:

A letter from Charles Mackie to Andrew Jackson, dated December 8, 1825, numbered 71; notes of Edward Thomson, of January 17, 1826, January 20, 1826, January 20, 1826, January 21, 1826, January 23, 1826, and January 23, 1826, Nos. 72, 73, 74, 75, 76, 77; and an anonymous letter respecting general certificates, received too late to make an inquiry on the subject, No. 78.

After putting in a train for accomplishment the special inquiry intrusted to me, I proceeded to an examination of the books and papers of the custom-house, with the mode of transacting business. As far as I could judge from an examination, which, without the consumption of a great length of time, and which would involve a close inspection of details, the books of the several officers appeared to be regularly and faithfully kept, the papers systematically arranged and carefully preserved, and the business promptly and satisfactorally transacted. This remark is of course qualified by the information heretofore communicated, of a departure, in some cases, from the provisions of law.

I am happy to add that, so far as my knowledge extends, but one opinion prevails in Philadelphia of the integrity of all the officers in the custom-house, as well as their dispositions, by all proper means, to accommodate the mercantile interest by a prompt and obliging discharge of their duty. The existence of this impression is evinced by the voluntary attestations of Messrs. Ralston, Pratt, Clapier, and Smith, who stand eminent in the commercial world. An indignant feeling at the recent scenes is universally expressed, accompanied, however, with an exoneration of all the officers of the customs from any criminal participation in them.

All which is respectfully submitted.

SAMUEL H. SMITH.

N. B.—The following papers, whose contents as not relevant to the main objects of the inquiry are not stated in the report, are among the documents:

Letter from R. Renshaw and P. Mackie, assignees of E. Thomson, January 25, 1826, stating his vessels now at sea, their cargoes, assignments, &c., &c.

Letter from John Cook, January 25, 1826, stating his transactions with E. Thomson.

Also a copy of a blank certificate.

Copy of a letter to J. Steele, Collector, January 18, 1826, desiring a particular examination to be made of the teas in store, &c.

Letter from Deputy Collector, giving names of E. Thomson's vessels, and inspectors engaged on them.

PAPERS TO BE ANNEXED TO DOCUMENT H. R. NO. 137.

No. 1.

COLLECTOR'S OFFICE, *Philadelphia, November* 22, 1825.

SIR: I have the painful task to perform of announcing to you the failure of Edward Thomson, which was made to me on Saturday, by which I fear the United States will sustain a very heavy loss; I am the more inclined to think so from information I received on Sabbath afternoon, which affords strong ground to suspect a premeditated fraud.

One of the officers obtained information from a young man in Mr. Thomson's employ that a large quantity of Mr. Thomson's teas, which had *not been permitted* on entry at the custom-house, had been transmitted, the greater part to New York and the residue to Boston, mentioning the several houses to whom the teas were sent.

Immediately on the receipt of this intelligence, which was near the hour the mail stage departs, I despatched therein two officers to New York to have those teas seized, if they could be found, and wrote to the Collector requesting his aid in the matter. I wrote to the Collector at Boston to make seizure of the teas sent to that place.

I would have written to you yesterday, but delayed with the expectation of being able to inform you of the exact amount of tea surreptitiously taken from store, by taking an inventory of teas actually remaining; but in this I have as yet been disappointed, as I have not been able to obtain the importer's keys, who alleges that they are in the hands of Messrs. Lippincott & Co., auctioneers, (to whom Mr. Thomson has assigned a quantity of teas,) and who refuses to give them up. From all these circumstances you will perceive strong indications of fraud.

Not knowing whether any of those teas have been sent elsewhere, or to whom, I have felt a difficulty about writing to any other Collectors on that subject. As soon as I may have it in my power to communicate to you more particularly it will be done, and request you will be pleased to give me any advice you may deem necessary in the premises.

I am, very respectfully, sir, your obedient servant,

JNO. STEELE.

RICHARD RUSH, Esq., *Secretary of the Treasury.*

No. 2.

COLLECTOR'S OFFICE, *November* 30, 1825.

SIR: I am informed by one of the officers just returned from New York, who had been sent in quest of Thomson's teas, surreptitiously taken from store, that several seizures had been made, but inconsiderable in amount, in comparison with the whole quantity which we have reason to believe was sent to that place.

There is good reason to believe that a considerable quantity of those teas are in the custody of auctioneers, who have peremptorily refused access, and have threatened prosecution if violent means are used for that purpose. The officer prudently omitted, until otherwise advised, to take any step that would involve my personal inconvenience, or occasion me any pecuniary disadvantage or damage, but adopted the milder course of placing a lock on the door of the store where the teas are deposited, and for the further security of which the Collector has kindly promised the assistance of a night watch. There is another store wherein, it is believed, a greater quantity is deposited than the abovementioned; but access to the teas has not been demanded, apprehending that a like reply would be made as that which I have stated; but like caution will be observed, as in the other case, to prevent the removal of the teas until instructions are forwarded of the course finally to be taken in the premises. Your advice and instructions in this matter you will be pleased to give me as soon as practicable.

Yesterday I received advice from the Collector of Boston that immediately on the receipt of my letter he seized teas of Thomson's importation to a large amount, the number of chests not yet ascertained, or the kinds and qualities, or particular vessel in which imported.

Having recently received information that a small quantity of those teas had been sent to Baltimore, I have advised the Collector accordingly. As soon as we can state with precision the amount of depredation committed it shall be forwarded to you.

It is highly probable that the certificates directed to be issued under the collection law of 1799, 41st section, may accompany part, if not the whole, of the teas unlawfully taken from store, as I find they have been issued by the importer.

I am, very respectfully, &c.,

JNO. STEELE.

RICHARD RUSH, Esq., *Secretary of the Treasury.*

No. 3.

PHILADELPHIA, *November* 30, 1825.

SIR: Before the receipt of your letter of the 24th instant, concerning the failure of Edward Thomson, as well as since, my attention has been constantly bestowed on that deplorable and disgraceful transaction. According to present information, fifteen thousand chests of teas have been fraudulently taken by him and his assistants from the custom-house custody without securing the duties, of which but about six thousand chests have as yet been traced (at New York;) and, from all I can learn, the public loss will be very great. I propose to visit New York for a short time, to see if I can be of any use in the further pursuit by ascertainments on the spot; and, at all events, you may rely on my best endeavors to apply the proper remedies to an affair which, I think, will introduce more litigation, loss, and discredit, than any one that has ever occurred here.

I am, very respectfully, your humble servant,

C. J. INGERSOLL.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

No. 4.

COLLECTOR'S OFFICE, *Philadelphia, December* 1, 1825.

SIR: I have, agreeably to instructions contained in your letter of the 24th ultimo, applied to the District Attorney for advice in the measures to be pursued in prosecuting a seizure and recovery of E. Thomson's teas, unlawfully taken from store, as well as every other matter connected therewith in which the interest of the United States is involved, and will act agreeably to such advice as I have received, or may hereafter receive from him on the subject.

A suit has been instituted, yesterday, against me, by Messrs. Lippincott & Co., for refusing to deliver to them, from store, a quantity of E. Thomson's teas, and also a further quantity seized at New York, and some chests seized on board a vessel in this place which had been assigned to them some time ago by E. Thomson; and as I have reason to apprehend that other suits may be instituted against me in this business, I request you will either authorize me to call on Mr. Ingersoll to appear on behalf of the United States to defend such suit or suits, or give him such directions as you may deem proper in the premises.

I am, very respectfully, sir, your obedient servant,

JOHN STEELE.

RICHARD RUSH, Esq., *Secretary of the Treasury.*

No. 5.

TREASURY DEPARTMENT, *Comptroller's Office, December* 3, 1825.

SIR: The Secretary of the Treasury has referred to me your letters of the 22d and 30th ultimo, and of the 1st instant, together with one from Mr. Ingersoll, the District Attorney, respecting the conduct of

Edward Thomson, (who, it must be presumed, had accomplices in the business,) in removing, without a permit, from the stores in which they had been deposited, a large quantity of teas on which the duties had not been secured, and stating the course which had been pursued for the recovery of those teas.

The Secretary of the Treasury having authorized you to obtain the advice and assistance of the District Attorney in this business, I presume it may be considered to be perfectly within the range of that authority that he should defend you in the suits which have been or which may be instituted against you, in the exercise of your official duties, in recovering and holding the teas thus fraudulently taken out of your possession.

You state that, in one instance, an auctioneer, in whose store some of the teas were suspected to have been placed, peremptorily refused access, and it was apprehended that others, who also were suspected of having some of those teas in their possession, would adopt a similar course.

The 68th section of the collection law of March 2, 1799, appears to me to make ample provision when any obstacles occur in the examination of any place suspected to contain any goods *subject to duty*.

The enormity of the present case would seem to justify a rigid exercise of the authority contained in that section.

Adverting to the assignments to which you have alluded, I am under the impression their validity, according to the principles laid down by Judge Story, in the case of United States *vs.* Theodore Lyman, (see circulars from this Department, page 138,) cannot be sustained; at least as regards such of Thomson's teas as are still in your possession, and such as may have been transported coastwise, unaccompanied by the certificates required by law.

With respect to such of them as were accompanied by the requisite certificates, I have to observe that it will depend upon circumstances whether the United States have been divested of their legal lien on them; and therefore I deem it inexpedient, on this occasion, to give an opinion on that point; the more so, as it may be considered proper to refer the question to the Attorney General for his opinion thereon.

In your letter of the 30th ultimo you observe, that it was highly probable that the certificates directed to be issued, under the 41st section of the collection law referred to, may have accompanied a part, if not the whole, of the teas unlawfully taken from the store, as you found they had been issued to the importer.

From an examination of the law, I am of opinion it authorizes, and such I presume has been the general practice, to issue the certificates in question after the teas shall have been landed, inspected, marked, and weighed; but the present instance, I think, fully shows the impropriety of such a course when applied to cases where the teas, instead of the duties thereon being paid, or secured by bond, *with sureties*, and taken into the possession of the importer at the time of being landed, are deposited in store as collateral security for the payment of the duties; because, if, in the latter case, these certificates were not issued until the teas were regularly obtained from the public stores, when fraudulently or irregularly obtained, the want of the certificates to accompany them would increase the difficulties of introducing, without detection, such teas, so obtained, into other ports than that of importation.

If the particulars of the manner in which the teas were obtained and removed have come to your knowledge, be pleased to state them.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

JOHN STEELE, Esq.

No. 6.

To the Honorable Richard Rush, Secretary of the Treasury of the United States:

The memorial of Benjamin W. Richards, of the firm of Joshua and William Lippincott & Co., of Philadelphia, for and in behalf of the said firm:

Your memorialist respectfully shows that, on the 5th day of May, 1825, Edward Thomson, then a merchant of high standing in the city of Philadelphia, by a regular article of assignment and conveyance, legally transferred to the said firm of J. & W. Lippincott & Co. certain teas and cassia, which had been previously imported into the United States by the said Edward Thomson, and then remaining in store under the provision of the law, the duties thereon not having been paid. About the same time, and as part of the same transaction, the said Thomson endorsed the bills of lading of said articles, according to the usual mode of passing merchandise.

And your memorialist further shows that, on the 12th day of July, and afterwards on the 20th September, the said Edward Thomson did execute and deliver to the said J. & W. Lippincott & Co. other assignments and conveyances of certain other teas and cassia, the bills of lading whereof were also endorsed by him as aforesaid. Your memorialist respectfully submits to your inspection the foregoing instruments of assignment and transfer, and the said bills of lading so as aforesaid endorsed.

And your memorialist further shows that these assignments and transfers were regularly and *bona fide* made and received by the parties, respectively, in the regular course of business for the purpose of securing to the said J. & W. Lippincott & Co., commission merchants and auctioneers, moneys advanced to the said Edward Thomson, and for no other purpose whatsoever.

That the keys of the stores in which the teas and cassia were deposited, agreeably to the provisions of the collection law, were transferred by the said Thomson to the said firm, and held by them from that period.

Your memorialist further shows that, by the laws and customs of merchants, such transfer and delivery operated to vest the title and possession of the said teas and cassia fully in the said J. & W. Lippincott & Co., and as completely divested the right, title, and possession of the said Thomson. That, unless impeached as fraudulent and collusive, which has never been suspected by them, or to the knowledge and belief of your memorialist by any one, the title of the said J. & W. Lippincott & Co. was as perfect and complete as it could be made. And your memorialist shows that the said firm became entitled to the sole possession and property in the said articles on the payment or securing of the duties accruing on the same to the Government of the United States. In this persuasion and belief they did apply to the custom-house in Philadelphia for a permit for the same, having tendered and delivered a good and sufficient bond to secure the payment of said duties, which was deemed sufficient, and accepted in the said custom-house by the proper authorities.

Owing to the accidental absence of the naval officer, whose signature could not then be procured to the permit, the granting of it was postponed, but it was promised that it should be allowed. In the meantime, as your memorialist has understood and believes, the officers of the custom-house ascertained that the said Edward Thomson, or other persons, had surreptitiously removed from certain stores other teas and articles imported by him without paying or securing the duties on the same. Having made this discovery of a transaction in which no other person, as your memorialist believes, has been implicated than the said Edward Thomson and the officers of the customs themselves, and which could never have been effected without at least the most culpable negligence on the part of the latter, the permit which had been promised was refused. Your memorialist believes that this refusal was made upon the ground that, until the duties which said Thomson ought to have paid or secured upon other articles were thus paid or secured, no goods imported by him should be admitted to entry.

Your memorialist has not been able distinctly to understand the ground upon which the Collector has proceeded in denying the permit, but, so far as he has been able to ascertain them, there is no other than that which has been mentioned. Your memorialist is advised and believes that no proposition of law can be more clear and indisputable than that the Government of the United States cannot claim to hold goods or articles imported into the country as a security for the payment of other duties accruing on other goods imported by the same or any other merchant, without an express pledge of the same for that purpose. That every article when imported is liable to the specific duty imposed on it by law, and to no other duty whatever.

That it is illegal, and a most dangerous and unprecedented exercise of power, to withhold a permit for goods after the duties upon the same are paid or secured. That the possession by the United States is for the single purpose of securing the payment of the duties due for the identical goods themselves; and that the retaining that possession for any purpose, and particularly to enforce the payment of duties on other goods, is equally a violation of confidence and of law.

That the custom-house officers cannot lawfully sell or dispose of those articles, or sequester the same, or in any manner obtain from them the payment of any duties accruing on any other goods.

Your memorialist, considering these propositions to be beyond question, cannot hesitate to pronounce the conduct of the Collector at Philadelphia illegal and oppressive, and he will not permit himself to doubt but that the Department, after ascertaining the facts, will disavow the proceeding. He respectfully submits that the consequences necessarily resulting from the exercise of such acts must be, in the highest degree, pernicious to the community as well as to individuals. That all confidence in the Government must be destroyed if custom-house officers are permitted to avail themselves of the possession and control of imported goods to effect any other purposes, or to enforce the payment of any other claims than those which that possession and control were designed to secure. If the officers of the customs have negligently or fraudulently permitted Mr. Thomson, or any other person, to convey out of their possession and to remove beyond their control goods upon which the duties payable by law have not been paid or secured, it is in the highest degree inequitable and unjust to visit upon others, who had no participation in this illegal or negligent conduct, and who, consequently, cannot be deemed in any manner responsible for it, all the injurious consequences resulting from it. Your memorialist submits to the Department that, if Edward Thomson were himself, at this time, the proprietor of these articles, the custom-house officers could not legally detain them one hour after the duties accruing on them were paid, upon any pretence whatever. If this be so, and it is a plain and undoubted principle of law, how devoid of even an appearance of foundation in law is this refusal to individuals who have fairly and honestly acquired the property months before Mr. Thomson's embarrassments were known?

Your memorialist claims the interposition of the Department upon another ground. The immense amount of property involved, valued at a moderate rate, and considerably more than one hundred thousand dollars beyond the duties accruing thereon, are unexpectedly withheld from his house. To withdraw instantaneously such an amount of available funds from any commercial house in our country threatens it with embarrassment, if not with inevitable ruin. The engagements made upon the credit of this property are becoming due; even the protraction of this unlawful act must lead to consequences as disastrous as they are irreparable. Any relief through the instrumentality of courts of justice must necessarily be tedious, precarious, and, your memorialist need scarcely say, perfectly inefficient. No judicial relief can repair commercial credit when once shaken, or compensate for ruin that has been consummated. At present your memorialist only claims from the Department a speedy investigation of the circumstances attending the case. The necessity for immediate relief induces the hope that the Department will conceive the matter of sufficient importance to send an agent to Philadelphia for the purpose of obtaining a knowledge of all the facts, and thoroughly to understand the grounds upon which the Collector acts, or to take such other steps as may be equally efficacious and equally speedy.

BENJAMIN W. RICHARDS.

WASHINGTON, *December* 7, 1825.

No. 7.

TREASURY DEPARTMENT, *Comptroller's Office, December* 10, 1825.

SIR: The Secretary of the Treasury has referred to me a petition addressed to him by Mr. Benjamin W. Richards, one of the firm of Joshua & William Lippincott & Co., of Philadelphia, for and in behalf of said firm, representing that, on the 5th of May, 12th of July, and 20th of September, 1825, Edward Thomson, then a merchant of high standing, by regular articles of assignment and conveyance, legally transferred to the said firm certain teas and cassia, which had been previously imported by the said Thomson, and were then remaining in store under the provisions of law, the duties thereon not having been paid; that the said Thomson endorsed the bills of lading of said articles, according to the usual mode of passing merchandise; that the said assignments were regularly and *bona fide* made and received by the parties, respectively, in the regular course of business, for the purpose of securing to the said firm, as commission merchants and auctioneers, moneys advanced to the said Thomson, and for no other purpose whatsoever; that the keys of the stores in which the said teas and cassia were deposited were, agreeably to the provisions of the collection law, transferred by the said Thomson to said firm, and held by them from that period; and that upon application to you by said firm to give bond with sureties for the pay-

ment of the duties on the teas and cassia thus assigned and transferred, and to obtain a permit for their delivery, which was at first promised to be granted, but on the discovery in the meantime of the fraudulent removal of a greater quantity of the teas imported by the said Thomson, and deposited in store, the permit applied for by said firm was refused.

The question which arises in this case is, whether the teas and cassia thus deposited in store, and subsequently assigned and transferred to said firm, are liable for the duties on any other goods imported by said Thomson, or are liable only for the duties on the teas and cassia claimed by said firm.

With a view to a correct decision on this question, I deem it proper to inquire whether, from all the circumstances which have come to your knowledge of the transactions alluded to, the sales and transfers were *bona fide*, and at what time the failure or bankruptcy of Mr. Thomson became a matter of notoriety. Also, whether you have any reason to believe that at the times of those sales or transfers, or any one of them, the said firm had any intimation of the approaching insolvency of said Thomson.

From the importance of the case your early attention to it is requested.

A copy of the petition of Joshua & William Lippincott & Co. is enclosed herewith.

Respectfully,

JOS. ANDERSON, *Comptroller.*

JOHN STEELE, Esq.

No. 8.

COLLECTOR'S OFFICE, *Philadelphia, December* 6, 1825.

SIR: I would have informed you of the amount of teas fraudulently taken from E. Thomson's store as soon as it was correctly ascertained, but delayed with the hope that I might be enabled to accompany it with some more satisfactory information of the quantity of those teas seized in behalf of the United States; as, also, those mentioned in my letter to you of the 30th ultimo, of which (access to them being still persisted in) I can give you no further information. The larger quantity mentioned in my letter, supposed to be in the store of Hone & Co., I am informed is not in the store they occupy, though acknowledged by them to be in their custody. The officer is prosecuting every means in his power to discover where they are deposited.

Enclosed is a statement of the quantity fraudulently removed from store, and also of the seizures made in New York, Boston, Baltimore, and in this place. The quantities, by information, stated to be in custody of auctioneers in New York, say in custody of Haggerty & Austin, to which access has been refused, 3,631 chests, and of Hone & Co., 2,245 chests—in all 5,876.

Since I commenced writing I have received information from New York that Mr. Ogden, the counsel for Haggerty & Austin, has advised them to dispose of or remove their teas wherever they may think proper. The District Attorney here advises forcible means to be employed to effect a seizure. A copy of Mr. Ingersoll's advice will be forwarded to the officer by this day's mail.

Having obtained from Thomson, and the persons in his employ, all the information we could obtain (and the only information we have had) respecting the places where, and the persons to whom those teas were sent, on Friday morning last I stated to the District Attorney that I thought it indispensably necessary that a criminal suit against Mr. Thomson should be forthwith instituted. He informed me, in reply, that at present he deemed the measure inexpedient; alleging, as reason for delay, that important information might yet be obtained which might be checked or destroyed by a prosecution against him. I am this moment informed that Mr. Thomson and his clerk left this city in a dearborn at an early hour on Sabbath morning, but whence, and for what purpose, has not been intimated.

Though I am satisfied that unwarrantable laxity of conduct or improper indulgence has been allowed in the Department having charge of Thomson's teas, I have forborne saying anything to you on that subject until I shall have ascertained, if possible, how, and by what means, so great a quantity had been taken away, and where the culpability properly lies.

As before requested, you will be pleased to give me generally, in relation to Mr. Thomson's transactions, such advice and instructions as you may deem necessary.

I am your obedient, humble servant,

JNO. STEELE.

[This letter came from the Secretary of the Treasury; the clerk who copied it says there was not any direction on the letter.]

List of teas seized at Baltimore, (boxes) ..... 36 ..... 132 ..... 1 10
Do ..... Boston ..... 652 ..... 84 217
Do ..... New York, (by agent from Philad'a) 25 ..... 177 ..... 2 ..... { 126 / 56 } 1,000
In store (55 Front street) of Haggerty, Austin & Co., (locks placed on this store by inspector) 3,408 223
In store of J. and P. Hone & Co., supposed also in No. 55 Front street, but not ascertained 800 1,445

It appears from letters in our possession that Haggerty, Austin & Co. have advanced a considerable amount on the teas in their possession to Edward Thomson; and from J. and P. Hone & Co. a large advance was obtained by said Edward Thomson. The letter from Hone & Co. acknowledges the quantity above stated to be in their possession. The quantity in possession of Haggerty, Austin & Co. is in the handwriting of one of their clerks.

No. 9.

COLLECTOR'S OFFICE, *Philadelphia, December* 12, 1825.

SIR: On the 6th, previously to the receipt of your letter of the 3d instant, I wrote to the Secretary of the Treasury enclosing a statement of amount of teas fraudulently taken from Thomson's stores, the seizures made at New York, Boston, and Baltimore, and every other information I could then communicate on the subject, which, I presume, has also been referred to your Department.

In yours you request me to state, if they have come to my knowledge, "the particulars of the manner in which the teas were obtained or removed." The information received, and the means taken to acquire it, I will state, not foreseeing the probability of obtaining any further light on the subject.

On the 5th instant I wrote to the surveyor, proposing several queries relative to the duties of the Department under his superintendence and direction, to which I requested distinct and explicit answers; two of which, touching the point on which you require particular information, and his answers thereto, are as follows:

1st. What has been the usual course pursued by the officers of the customs in storing spirits, wines, and teas; as, also, in delivering of the same from store?

2d. Do you know of any course pursued in the premises other than that prescribed by law, or any indulgence granted which the law does not authorize; and, if such has been the case, say by whom?

Answers.—1st. The usual course pursued has been, that when the vessel is discharging, the spirits, wines, and teas, have been taken from the wharf to the stores of the merchants; and, when all have been delivered from the vessel, some days have been allowed, by the inspectors, to the merchants to assort the different chops of teas and stow properly the spirits and wines. In delivering the same from store, the inspectors have unlocked their stores and superintended the delivery; but, in some cases, when very busily employed, the inspectors have intrusted the keys to the merchants, it being deemed necessary for the furtherance of business, which otherwise would have caused ruinous and unnecessary delays to the merchants. This has always been the practice and custom allowed by the different surveyors; and, in storing, it would be impossible to do otherwise, unless the inspectors were to follow the loads of every dray, when, in many instances, twenty or more stores have been taken to receive the goods in various parts of the city.

2d. The course pursued in the premises, in allowing the merchants possession of the keys, was not according to law; but, as described in *answer first*, indulgence was specially granted, in one instance by me, to Messrs. Smiths, for removing the locks for the purpose of sooner making sales, and arranging them for the inspection of the purchasers, and was without any loss to the Government. This was two years or more past.

The information I received from the officer who had charge of Thomson's store, as also from others of the inspectors, corresponds with that stated by the surveyor; but, believing that so great a quantity could not have been removed, when teas were taken from store under permit, which the improper indulgence mentioned might be supposed to afford, I advised the obtaining, if possible, from the young man in Thomson's employ, who gave us the first intimation of fraud, such information as I presumed he could give of the means employed to accomplish the nefarious purpose.

This young man has recently communicated to the officer employed to obtain the information that, from what he now understands, Thomson had on previous occasions taken teas from store before they were bonded, but not to such extent as in the present instance. That, whilst the vessel was discharging, quantities of teas, which were not put into store, were sent away from the pavement of the store doors, where they were laid down by the porters as they brought them from the wharf. That Thomson had availed himself of occasions when the officer who had charge of the store would be most busily engaged on the wharf, to bond and take permits for delivery, that he might have the better chance of being allowed possession of the keys; and that advantage was also taken of one custom-house key opening the locks of those of several stores, which, when obtained for a particular description of teas bonded, was frequently used for opening other stores containing teas not bonded, of which parcels were sent away without the knowledge of the officer.

I have now communicated to you the manner in which the teas in question have been obtained and removed, as far as anything relating thereto has come to my knowledge.

I am, very respectfully, sir, your obedient servant,

J. STEELE.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

No. 10.

COLLECTOR'S OFFICE, *Philadelphia, December* 13, 1825.

SIR: In answering yours of the 10th instant, accompanied by a copy of Mr. Richards' petition to the Secretary of the Treasury, I beg leave to submit the following statement of facts:

On the morning of the 19th ultimo, (Saturday,) Edward Thomson's failure was first known at the custom-house. In the course of that morning, Mr. William Lippincott presented three several entries of teas per ships William Savary, Benjamin Rush, and Thomas Scattergood, requesting permission to enter into bond, with surety, for the duties thereon, and to obtain permits for the delivery of those teas from store. The entries presented by him contained a specific quantity of teas by those several vessels; and an endorsement was on the back of each entry, purporting to be an assignment of the teas, as therein specified, from Edward Thomson (the original importer of the cargoes of those vessels) to J. & W. Lippincott & Co., dated 19th November, 1825. Acceptance of those entries was refused, on the ground that Thomson's failure being on that day notorious, no assignments from him could be admitted—at any rate, some time ought to be allowed us for reflection. Mr. William Lippincott then exhibited, and *for the first time to our knowledge*, papers to show that an assignment of a larger portion of teas, I believe by the ship Benjamin Rush, had been made to them on the 12th July last. Permission to enter and bond those teas was still refused. Two bonds for duties given by Thomson were due at bank and returned, at 3 o'clock of that day, as unpaid. On Lippincott's & Co. proposing to give a check for the amount of Thomson's bonds, then unpaid, the entries were admitted; as, also, one additional entry per Benjamin Rush; and, as Messrs. Lippincott & Co. were very pressing to give the bonds and obtain permits, they were suffered to sign bonds, (which bonds I had afterwards directed to be cancelled.) This was done about 5 o'clock in the evening of Saturday, and, being long after office hours, the signature of the naval officer could not be obtained had permits been prepared; the permits were promised them for Monday following. It must have been observed that no suspicion of improper conduct on the part of Thomson was entertained, or suspected to exist in any degree at this time. Lippincott & Co. can, no doubt, explain the reasons which induced the very pressing demands for permits on Saturday; it was stated to Mr. William Lippincott that no bonds of Thomson's would fall due until the 25th following. On comparing the entries presented by them, and that at a late hour on the same evening, with the balances of teas which ought to have been in store, and taking Thomson's written admission, produced after the bonds had been signed, which stated that those entries were intended to embrace the balance of teas belonging to him which remained unbonded by those ships—taking all these circumstances into consideration, there were indications which induced a belief that all was not right. With the information received next day, (Sunday,) and the measures taken thereon, you are acquainted, as mentioned by me in my letter of 22d ultimo to the Secretary of the Treasury. On Monday the permit was refused; and, had it even been granted on Saturday, the delivery from store would have been refused, until fraud, as intimated the day

preceding, could be investigated; another ground of refusal was, that I believed that when teas were deposited in store as a pledge or security to the government for the duties accruing thereon, and though part might be destroyed and unlawfully taken away, the remainder was justly answerable for the whole, in like manner I considered the teas in store responsible for the duties on the whole that had not been permitted, though part had been unlawfully removed.

The assignments made by Thomson to Lippincott & Co. were not known at the custom-house until on the morning of the 19th ultimo, as before stated. Had they made us acquainted with the assignments at the time they were made to them, and that they held the keys of Thomson's stores, this latter circumstance, in particular, would have excited suspicions of Thomson's affairs which we did not entertain, and would necessarily have led to investigations which might have prevented, in a considerable degree, the loss to which the United states is now exposed.

As respects the *cassia*, I did not know that any of that article remained in store until I saw it so stated in the petition. They must know that a demand for cassia, or any other article than teas, was never made; and, consequently, no refusal to deliver could ever have been given. They may, however, take it for granted that, in the present state of things, all Thomson's property in our possession will be retained for the present. So totally unacquainted were we at the custom-house of the assignments referred to being in existence, that Thomson, a few days before his failure, contended at the office that "he owed the United States *nothing*, so long as property of *his* remained in charge of the custom-house officers greater in value than the amount of his liabilities to the United States." These assertions were not contradicted, as we believed he had stated what was matter of fact. Had it been known that Lippincott & Co. had conveyances of this property, and that they held the keys of his stores from the conveyance, as since stated by themselves, such expressions from Thomson would never have been made in a public office. I rather suppose he was aware that this circumstance was confined to a particular circle. We knew not that the Lippincotts had the keys until on Monday morning, 21st ultimo, when a demand was made from Thomson of those keys, for the purpose of examining the state of those stores; nor were we allowed access to the stores, with the view of ascertaining the amount of teas therein, for near a week after the first information of fraud, Lippincott & Co. refusing to deliver up the keys of Thomson which they had in their possession. From the latter circumstance, the exclusive possession in the custom-house officers of all goods stored for drawback, or long credit, must be very obvious.

The teas mentioned in the petition are those on account of which suit was brought against me by Lippincott & Co., as stated in my letter to the Secretary of the Treasury, which you now have in your possession. The district attorney was consulted, and he was of opinion that Lippincott & Co. could not be allowed to enter and bond the teas in question.

I am, very respectfully, sir, your obedient servant,

JNO. STEELE.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

P. S. As the claim of Lippincott & Co. on Thomson's teas, the assignment of which was kept by them in mysterious silence until after his failure, I have thought it proper to lay before you extracts of two letters from them to me in relation to the subject.

From theirs of the 21st of November: "We have reason to believe, from what we have heard, that there are one hundred chests of teas now on board the schooner Enterprise, at Chestnut street wharf, which have been shipped by E. Thomson to Messrs. Smith & Nicholl, and Francis H. Nicholl, of New York."

Of the one hundred chests mentioned by them, only fifty were found and seized by the Surveyor and put into custom-house store. These appear to be a part of four hundred chests which were designed to be sent, but could not all be taken, on board the brig Waterloo, which cleared from New York on the 19th ultimo, and which, after a tedious passage, arrived, and three hundred and fifty chests seized and put into public store, as per advice from our officer at New York, on the 7th instant.

On the 26th ultimo, 650 or 669 chests were seized in the stores of Smith & Nicholl, by whom shipped we were not informed. In reference to those 650 or 669 chests, as also the 50 chests above mentioned, (the 350 chests on board the Waterloo being seized a considerable time after,) the Lippincotts addressed a note to me, dated 23d ultimo, of which the following are extracts:

"We hereby offer to enter and bond the tea comprehended in the bill of lading transferred to us, and were yesterday found by the custom-house officers." "Those seized at New York by your officers, being under similar circumstances, we likewise claim the same right, and that we may be allowed to enter and bond them also."

I cannot easily comprehend how Thomson had the opportunity of shipping teas claimed by them on his assignment, they having in their custody Thomson's keys from the period of the first assignment. The 650 or 669 chests of skin teas per B. Rush, as stated above, the 350 chests of the same per Waterloo, and 50 chests per Enterprise, same kind, in all 1,050 or 1,069 chests, appear to have been fraudulently shipped by Thomson, and consigned to Smith & Nicholl, as since informed, and which are now claimed by Lippincott & Co., who have the certificates, and, as they say, were in possession of said certificates at the time they were thus fraudulently taken from store by Thomson.

On the epithets applied in their petition to myself and other officers of the customs I forbear comment.

J. S.

No. 11.

COLLECTOR'S OFFICE, *Philadelphia, December* 17, 1825.

SIR: On the 6th instant, I mentioned in my letter to the Secretary of the Treasury, and which letter I supposed might have been handed to you, the opinion of the District Attorney, as to using forcible means in obtaining possession of teas in custody of Haggerty, Austin & Co., and which are withheld from the officer sent from this place to take them in charge. I also communicated that opinion to the officer, who, (Haggerty, Austin & Co. having threatened a criminal prosecution, in case forcible means were used,) feeling unwilling, on account of personal responsibilities to which he might be liable, has hitherto declined acting under these instructions.

Be pleased to advise whether forcible means shall be used, as recommended by the District Attorney; and also whether it would not be advisable for the District Attorney to attend the prosecution of those suits at New York.

Your instructions on these points are requested with early convenience.

I am, respectfully, your obedient servant,

JNO. STEELE.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

No. 12.

COLLECTOR'S OFFICE, *Philadelphia, December* 23, 1826.

SIR: On receiving intelligence, on Monday evening, that E. Thomson was seen the day before near Wilmington, I immediately communicated the information to the District Attorney. The marshal, accompanied by one of the clerks from my office, set out about 10 o'clock at night in pursuit, and succeeded in arresting him at Newcastle about 5 o'clock on Tuesday evening, and on the next day he was brought to Philadelphia.

Thomson no doubt intended to make his escape from the United States, as I have since learned that he had with him a considerable sum in foreign gold, and there were two or three vessels yet in the river which had cleared for Europe a short time before.

I would have advised you sooner of his arrest, but, finding that the marshal, on his arrival, instead of placing him in prison, as affording the best security against escape, had indulged him by remaining out under the charge of an officer, and I delayed the information until I could say he was secure in a place from whence escape would be rendered less probable.

I am this moment informed that Thomson, on account of ill health, is still in custody of the marshal.

I am, respectfully, sir, your obedient servant,

JOHN STEELE.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

P. S. I had omitted to state, in my answer to yours of the 10th instant, that Wm. Lippincott presented an entry, per ship Woodrop Sims, for 272 chests and 65 half chests young hyson teas, with Thomson's endorsement on the back thereof, empowering and authorizing Jos. & Wm. Lippincott & Co to enter the same. This was dated the 19th of November last, but acknowledged by Mr. Lippincott to have been signed on the 26th, the day when presented, and immediately after the examination of the teas in Thomson's stores, of which stores Lippincott & Co. had the keys.

Thomson's assignment to P. Mackie and R. Renshaw was executed on the 19th of November last.

J. S.

CUSTOM-HOUSE, *Boston, December* 13, 1825.

SIR: In consequence of the information and request communicated by the Collector of Philadelphia, in a letter of the 21st ultimo, a copy of which is enclosed, (No. 1,) I took possession of 953 boxes of teas, in the stores of Messrs. Stanton, Fiske & Nichols, and informed him of the fact in a letter, a copy of which is enclosed, (No. 2.) Subsequently the correspondence marked Nos. 3, 4, 5, 6, 7, passed. On the receipt of the last letter from the Collector of Philadelphia, I submitted it in a letter (No. 8) to G. Blake, esq., United States Attorney, with its enclosures from the Comptroller, and he returned the answer No. 9.

I had determined, on the receipt of the schedule of the teas on which the duties *had not been secured,* to request the United States Attorney to libel them; but the Collector of Philadelphia not being able to furnish it, I am now in doubt what course to pursue.

I have held the teas in custody, and shall continue to until otherwise directed. I have never doubted but that such on which the duties *had not been paid* were liable for the duties; and, from the claimants, I understand that a large portion of them are thus situated.

With the highest respect, your most obedient servant,

H. A. S. DEARBORN, *Collector of Customs.*

JOSEPH ANDERSON, Esq.

COLLECTOR'S OFFICE, *Boston, December* 14, 1825.

SIR: Your communication of the 7th instant was received this morning when I had just finished the preceding communication.

I have made inquiries of the firm, in conformity to your request, and enclosed are their answers, (No. 10,) the truth of which I do not doubt. There are no other facts, other than what are contained in the correspondence accompanying this, which occur to me, that will tend to elucidate the subject.

I am, with the highest respect, your most obedient servant,

H. A. S. DEARBORN, *Collector.*

JOS. ANDERSON, Esq.

No. 1.

COLLECTOR'S OFFICE, *Philadelphia, November* 21, 1826.

DEAR SIR: I have cause to believe that a large quantity of teas, imported in the ships Thomas Scattergood, William Savary, and Benjamin Rush, the Woodrop Sims, and Addison, within the current year,

by Edward Thomson of this city, have been surreptitiously taken from store, (the duties thereon not having been paid or secured, or permit obtained for their delivery.) And having cause to believe that 1,200 or 1,500 boxes of those teas have been sent to Messrs. Stanton, Fiske & Nichols, of Boston, in whose possession they probably are, I request you will, as soon as practicable, have said teas seized for adjudication, and transmit to me an account of the kinds and qualities that may be found, particularly designating the vessel or vessels in which they were imported.

As the matter was only communicated to me yesterday afternoon, I regret that I cannot, until investigation is had of those actually in store, (which is in progress,) inform you of the amount or description of the teas unlawfully removed, but will forward to you information in the premises as soon as possible. A list of the teas which *should* be in the stores is enclosed, but no examination has as yet been made. The quantity taken without permit must be considerable, by the account of the party himself.

I am, respectfully, sir, your obedient servant,

JNO. STEELE.

HENRY A. S. DEARBORN, Esq.

The schedule referred to contains 19,614 chests and packages.

No. 2.

CUSTOM-HOUSE, *Boston, November* 25, 1825.

DEAR SIR: Your letter of the 21st instant was received this morning, and I have taken possession of about one thousand chests of teas, in Messrs. Stanton, Fiske & Nichol's store, but the exact number, kinds, and the names of the vessels in which they were imported cannot be sent you until a schedule is made of them, which will be done by to-morrow. I have taken about 40 chests just arrived from Philadelphia. I understand that other teas, of the same importations, have been sent here, sold, and consumed, during the summer. I am on the look out, and all that can now be found in the city will be seized.

Very respectfully, your most obedient servant,

H. A. S. DEARBORN.

J. STEELE, Esq.

No. 3.

CUSTOM-HOUSE, *Boston, November* 26, 1825.

SIR: I find it will be impossible to have a schedule made out of the teas to send off to-day.

I wish you would send me a list of such of the teas on which the duties have been secured, and of those that were taken from the public store, on which the duties were not secured, that I may *retain* all of the latter, and *restore* the others to the claimants.

The 40 boxes named in my letter yesterday came in the schooner Superb, Reed, master. They were imported in the Benjamin Rush, on the 1st of July, by Edward Thomson, came here to J. Baker & Son, entitled to debenture, with the usual certificate from your office.

I wish to know, as soon as possible, whether these have been bonded and may be delivered to the claimant.

Very respectfully, your most obedient servant,

H. A. S. DEARBORN.

J. STEELE, Esq.

A schedule of the teas was sent to the Collector, containing 953 chests.

No. 4.

Extract of a letter from the custom-house at Philadelphia, dated November 26, 1825.

"On the 21st instant General Steele addressed a letter to the Collector of the port of Boston, and is very desirous to hear from him on the subject of his communication. A letter received from the Secretary of the Treasury, at this moment, approves of the measures taken in regard to the subject, and recommends consulting the District Attorney of the United States as to further proceedings. General Steele calculates on the prompt aid of your Collector.

"I am, very respectfully, your obedient servant,

"_____ _____, *Deputy Collector.*"

Here follows an account of teas sent to Boston as acknowledged by the party:

Imported per Benjamin Rush, July 1, 1825:
200 chests hyson skin tea, sent to Stanton, Fiske & Nichols.

Imported per Thomas Scattergood, July 2, 1825:
300 chests hyson skin tea,
620 chests hyson tea, } sent to Stanton, Fiske & Nichols.

Imported per Woodrop Sims, April 13, 1825:
965 chests young hyson tea,
358 half chests young hyson tea,
510 chests souchong tea, } sent to Stanton, Fiske & Nichols, or Cutler & Hammond.

Imported per Addison, April 5, 1825:
283 chests young hyson tea,
100 half chests young hyson tea, } sent to Stanton, Fiske & Nichols, or Cutler & Hammond.
572 chests souchong tea,
Imported per William Savary, February 28, 1825:
400 chests young hyson tea, sent to Stanton, Fiske & Nichols.

No. 5.

COLLECTOR'S OFFICE, *Port of Philadelphia, December* 1, 1825.

SIR: Your favor of the 26th ultimo is received. The forty boxes (5 catty) of imperial teas, mentioned in your letter, were regularly bonded. The United States can have no claim on them. The following list will put you in possession of all the teas shipped by Edward Thomson, of his importations to Boston, exhibiting the quantity and kind, and the parcels not entered according to law. This statement, in substance now given, has been furnished by himself.

I am, very respectfully, your obedient servant,

——— ———, *Deputy Collector.*

HENRY A. S. DEARBORN, Esq.

Per ship William Savary.

Shipped by E. T..... 400 chests young hyson.
Not entered..... 400 do do.
Sent to Stanton, Fiske & Nichols, Boston; duties thereon *not secured.*

Per ship Addison.

	YOUNG HYSON. Chests.	Half chests.	SOUCHONG. Chests.
Shipped by E. T.	233	100	572
Entered.....	...	...	210

Entered.....	130	200
Balance not entered.....	490	100

Consigned as above.

No. 6.

CUSTOM-HOUSE, *Boston, December* 5, 1825.

DEAR SIR: I have received your letter of the 1st instant, but I cannot proceed to libel the teas until I receive the schedule of the marks and numbers of the identical boxes on which the duties have not been paid, which I have daily expected, and most anxiously await, and trust you will be so good as to send as soon as possible.

I presume you have referred the case to the Secretary of the Treasury, and have his sanction to proceed against the teas on which duties have not been secured, but which were taken previous thereto, and without a permit, from the public store. Please to inform me what the Secretary has directed to be done for my government.

Very respectfully, your obedient servant,

H. A. S. DEARBORN.

JOHN STEELE, Esq., *Collector, Philadelphia.*

No. 7.

COLLECTOR'S OFFICE, *Philadelphia, December* 9, 1825.

DEAR SIR: In reply to yours of the 5th instant, wherein you request a schedule of the marks and numbers of the identical boxes on which the duties have not been paid, or secured to be paid, I have to mention that the certificates having been delivered by the Surveyor to the importer as soon as they were completed, which has been his usual practice, it is now impossible, from any documents in our possession, to designate those fraudulently taken from store from such as have been delivered on permit, as in such delivery nothing is noted but the marks, kinds, and quantities mentioned in the permit.

I early, and occasionally since, communicated to the Secretary of the Treasury everything which came to my knowledge of this fraudulent business; and except his answer to my first letter, approving of the measures I had taken for the recovery of those teas, and to have the advice and assistance of the District Attorney, I have had no instructions from him.

By a letter from the Comptroller of the Treasury, received yesterday, it appears that all my letters to the Secretary have been handed over to the Comptroller, a copy of whose letter is herewith transmitted, which will exhibit to you all that I have yet received from the Treasury Department on the subject.

As the Government will doubtless prosecute such unparalleled fraud to the utmost extremity, and the question arising out of the certificates which have been issued to the importer, and considered by many as a bar to the claim of the United States, may be taken up to the highest judicial tribunal, it would be of importance in the present stage of the business if you could obtain from Stanton, Fiske & Nichols, which they will probably not refuse, information of the time when the teas you have seized came into their possession; which would afford considerable light as to those taken unlawfully from store; as Thomson has given a statement of the time of shipments to New York and Boston, and also the kinds and quantities transmitted, which had been taken without permit, and though this is the only information we could obtain of the destination of those teas, yet it cannot be relied on altogether, as the quantity given in that statement of teas fraudulently removed falls materially short of the actual deficit ascertained on taking an inventory of those yet in store. The teas seized by you do not quite amount to one-third of what have been forwarded to Stanton, Fiske & Nichols. The want of certificate No. 1 would warrant a belief that the duties thereon were not paid or secured.

Any instructions or information which I may receive shall be forwarded to you without delay.

I am, very respectfully, your obedient servant,

JOHN STEELE.

HENRY S. DEARBORN, Esq.

No. 8.

CUSTOM-HOUSE, *Boston, December* 13, 1825.

DEAR SIR: I enclose you a letter this morning received from the Collector of Philadelphia, and a copy of one from the Comptroller, in relation to the teas about which we had a conversation yesterday. Will you be so good as to give me your opinion as to the course it is most proper to pursue. Is it best to libel the teas immediately, or wait for further information or instructions from Philadelphia or from the Treasury, or write directly to the Secretary for directions what to do?

I wish you, if possible, to give me an answer this forenoon.

Very respectfully, your most obedient servant,

H. A. S. DEARBORN.

Col. G. BLAKE, *U. S. Attorney.*

No. 9.

DECEMBER 13, 1825.

DEAR SIR: Having carefully examined the letter received by you this morning from the Collector of Philadelphia, as also that recently addressed to him by the Comptroller of the Treasury, I am of opinion, that it would not be *prudent* and *safe* for you, upon the authority merely of a request from the Collector, to proceed to an immediate and actual seizure of the teas; especially as I am not apprised of there being any legal ground upon which, even under all the circumstances stated by Mr. Steele, they can be claimed by the United States as a forfeiture.

It appears, at any rate, from the letter of the Comptroller, that as to the principal, and, in my view, the turning point of the case, he has considered it as a matter of so much doubt and delicacy as to have declined the expression of any opinion respecting it, and that this point is probably now under the consideration of the Attorney General. If, then, the case be of such novelty and perplexity that the *principal officer* of the Treasury Department has deemed it "*inexpedient*" to pronounce even an opinion upon it, much less to direct the course of procedure to be adopted, which it would be his duty to do in ordinary cases, surely I should imagine it cannot be your duty upon your own *responsibility* to make the seizure.

Were I, therefore, in your situation, I should certainly adopt no further measures in this case, without express directions thereto from the Treasury Department.

Most truly and faithfully your friend,

G. BLAKE.

Gen. DEARBORN.

No. 10.

The teas were unaccompanied by a general or particular certificates.

The advances were made on all the teas after they arrived here, or after having received the invoices and bills of lading.

We had no knowledge of the approaching insolvency of *Edward Thomson at any time*, and were much astonished when we heard of his failure, as we had supposed his business to have been very profitable for the last two years.

STANTON, FISKE & NICHOLS.

BOSTON, *December* 14, 1825.

No. 14.

CUSTOM-HOUSE, *Baltimore, Collector's Office, December* 5, 1825.

SIR: We have had a singular case here respecting certain teas, said to have been taken out of the public keeping at Philadelphia by Edward Thomson, without entry, &c. At the request of the Collector of that district, we seized a number of chests here, and advised him of the particulars, at the same time requesting such legal instructions as he possessed, and his assent to a proposal to sell them for the benefit of all parties, as likely to lose value every day, and especially in case of judicial decisions being sought for, as was to be expected. It is understood the purchasers or consignees of the teas would prefer this as far as we have spoken on the subject; but I wish your direction in the case, as no doubt having it presented to your view in all its aspects before now by the party officially concerned in Philadelphia. There is, however, another circumstance mingling in the business here. Some of the teas now seized came here under the proper certificate of the office there, cleared regularly coastwise, for benefit of drawback, and some have been exported and certified from hence as entitled to it. Is not the certificate of the office in these cases an assurance sufficient to the purchasers that they were lawfully offered at sale, and might be, without fear, bought and transferred, and therefore an effectual bar interposed to any future claims of the United States?

I beg your instructions, that we may proceed legally and successfully, as early as possible, and remain, in haste, sir,

Your obedient servant,

JAS. H. M'CULLOCH.

JOSEPH ANDERSON, Esq.

No. 15.

BALTIMORE, *December* 6, 1825.

SIR: In March, April, and May last, I purchased teas at auction in Philadelphia, imported by Edward Thomson, esq., in the ships Wm Savary, Addison, and Woodrop Sims, which I have sold to grocers in this city, (except three packages.)

With these teas I received the usual certificates, (which have been always received as evidence of their having been bonded for;) but in consequence of an order (or information) from the Collector of the port of Philadelphia, they have been seized, and where the holders refused to give receipts to hold them subject to the order of the Collector of the port of Baltimore, they have been removed to the public store.

I submit these facts to you, under the impression that it is only necessary for you to know them to give an order for the release of the teas.

I remain, sir, with great respect, your very obedient servant,

MARTIN GILLET.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury of the United States.*

P. S. I am aware, sir, that these seizures have not been made for the want of certificates, but upon suspicion that they have been improperly obtained. Whether this be the case or not, it is not my fault, and I ought not to be made answerable for the faults of others, over whom I could have no control. M. G.

CUSTOM-HOUSE, *Baltimore, December* 6, 1825.

The facts being as stated, it is only necessary to remark, on the above application, that the certificates spoken of are those only which are issued to accompany spirits, wines, and teas, which purport no more than their regular importation; but at present, the persons implicated in the business, by purchase, &c., all without knowledge, suppose these to be sufficient vouchers of the payment of duties, and, therefore, that the action of the custom-house is against the rules resulting from the law in the case.

It may not be amiss to state our practice in relation to these certificates. They are made out with all expedition as fast as they are gauged and marked. They are delivered to the importer at once, it neither suiting the convenience of one party or the other to retain them at the custom-house, where they would have to be called for whenever a chest, &c., is to be delivered. The teas remain for the duties.

JAS. H. M'CULLOCH.

No. 16.

TREASURY DEPARTMENT, *Comptroller's Office, December* 20, 1825.

SIR: I received your letter of the 5th instant, stating that, at the request of the Collector at Philadelphia, you had seized a number of chests of tea, which had been deposited in store at that place, but had been removed by Edward Thompson without having given bonds, with sureties, for the duties; and, of course, without having obtained a permit for the removal of the teas; that some of the chests were accompanied by the proper certificate of the officer there, were regularly cleared coastwise for benefit of drawback, and some had been exported from Baltimore, and certified as entitled to that benefit.

In reply, I have to observe that similar seizures were made in Philadelphia, New York, and Boston, but no definitive opinion has, as yet, been formed as to the disposition which should be made of the teas seized, this depending entirely upon the facts and circumstances in each case.

With a view of forming a correct opinion in relation to the case at Baltimore, I have to request that you will be pleased to state, so far as has come to your knowledge, whether the persons who had the teas in their possession were *bona fide* purchasers in a fair course of trade, or whether all, or any of them, were mere consignees and agents of Mr. Thomson to sell the teas on his account; whether all the chests were accompanied with the certificate required by the 41st section of the collection law of March 2, 1799, and if not, furnish a list of such, with the names of the persons in whose possession they were found; also, whether there is any reason to believe that the parties, or either of them, had any intimation of the approaching insolvency of Mr. Thomson.

Respectfully, JOS. ANDERSON, *Comptroller.*

JAMES H. MCCULLOCH, Esq.

No. 17.

CITY OF WASHINGTON, *December* 6, 1825.

SIR: Availing myself of your permission to communicate the circumstances and facts respecting a quantity of teas held by the house of J. & P. Hone & Co., of New York, in which I am a partner, I have the honor to state that on or about the 20th of August last a clerk of Edward Thomson, of Philadelphia, with authority to act for him, applied to us for an advance on 2,245 chests of Tonkay and Hyson skin tea, then in the city of New York. We agreed to advance 53 cents per pound, and estimated the weight to be 166,000 pounds, making the sum of $87,980, in our notes, at an average of 8 months. The teas, with the policies of insurance against fire risk, were regularly transferred to us, and are, with the certificates, now in our possession. It was agreed that the teas should be sold at such time and credit as would place funds in our hands to meet the payment of the said notes. Just about the time we contemplated selling them, Mr. Thomson failed, and it was reported that he had previously taken from the custody of the custom-house large quantities of teas, which were not entered; and to our great surprise we have since discovered that 1,795 of ours are part of those which have been thus fraudulently removed.

By the preceding statement, you will perceive that this was on our part a regular mercantile transaction, and that we had no reason to suspect the fraud, the teas having been publicly shipped in Philadelphia for New York, and there landed under inspection of the custom-house officers, and accompanied with the usual certificates. Under these circumstances, I cannot but trust and hope that the Treasury, after deliberating on this subject, will interfere and prevent any seizure of the property, and that we may, as innocent holders, be permitted to sell it without embarrassment.

I am, sir, with great respect, your most obedient servant,

JOHN HONE.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

No. 18.

OFFICE OF THE ATTORNEY GENERAL OF THE UNITED STATES, *January* 3, 1826.

SIR: I have examined with attention the documents submitted on yesterday for my opinion in the case of Edward Thomson. The facts are not as yet developed. They are as yet so very imperfectly known that it would be premature to hazard a legal opinion on them. Enough, however, is disclosed to satisfy me that the liability of these teas to the claim of the Government for duties ought to be submitted to judicial scrutiny and decision; and this I think may be done promptly and without any material inconvenience to the claimants. The district judges having the power of holding special sessions whenever they please, and their courts being, I believe, in practice, almost continually open in the larger commercial cities, if the claimants are disposed to bring this subject to a judicial test, the teas might at once be libelled for the whole duties due to the United States, and on their paying the duties which they are understood to be willing to pay on the specific parcels, the teas might, according to the course of the court, be delivered back to them on stipulation and satisfactory surety to abide the final decree on the question of the liability of those teas to the whole amount of duties. They would then have the benefit of selling the teas at once, and the Government would be rendered secure by force of the stipulation in case the question should be decided in their favor. If the claimants will assent to this course, the teas may be seized and libelled, and the claim and answer filed, and the teas delivered to the claimants on stipulation on one and the same day.

If the claimants will not assent to this course, I advise a seizure under the 68th section of the collection law of 1799, and a libel for a forfeiture, with a separate libel setting forth all the facts of the case, and charging the teas for the whole amount of duties.

I would advise, also, that the teas remaining stored in Philadelphia should be libelled for the whole duties, that the Messrs Lippincott may have it in their power to submit their claim to judicial investigation, and that we may have the sanction of a court for any step that may be taken with regard to them.

If the refusal of the claimants to assent to a judicial examination and settlement should make a seizure necessary in the first instance, they will still have it in their power to take out the teas on stipulation, if they shall think proper to ask it.

If in any of these cases the attorneys for the United States shall not be satisfied with the state of evidence, and wish from the claimants a more full disclosure of facts, I apprehend that an information in the nature of a bill of discovery would lie, as suggested by Judge Story, in the case of the United States *vs.* Lyman, 1 Wheaton, 2.

I will suggest that the suit already instituted by the Messrs. Lippincott against the Collector of Philadelphia, as well as any others which may be brought against other officers for seizures under this opinion, ought to be removed into the courts of the United States, if originated in a State court, according to the provisions of the acts of Congress. If upon the communication of this opinion to the district attorneys any difficulty which has not occurred to me should arise, or any further explanation should be asked, I shall be glad to hear further from you.

I forbear the expression of an opinion on the specific questions, because the facts are confessedly incomplete, and because, as the whole subject must, I think, go before our courts, I can perceive no purpose which can be answered by the expression of an opinion on my part. It would not influence the decision of the court; and so far as might influence the movements of your Department, I presume that it is enough for me to say, as I have said, that, on the facts as presented to me, the whole case is, in my opinion, a very proper one for the decision of our courts, and that we should fail in our duty if we were not to bring it before them.

The documents are returned.

I have the honor to remain, sir, very respectfully, your obedient servant,

WM. WIRT.

No. 19.

TREASURY DEPARTMENT, *Comptroller's Office, January* 6, 1826.

SIR: I enclose herewith a copy of the opinion of the Attorney General of the United States, in relation to certain teas imported by Edward Thomson, and which have been taken possession of by the officers of the United States, or remain in the hands of other persons in the cities of Boston, New York, Philadelphia, and Baltimore, and are intended to be taken possession of and, in compliance with instructions from the Secretary of the Treasury, have to request that you will proceed in the case or cases in your district in manner as suggested and advised in that opinion, allowing to the several claimants every accommodation compatible with the course to be pursued under it and with the interests of the United States.

With great respect,

JOSEPH ANDERSON, *Comptroller.*

GEORGE BLAKE, Esq., *D. A., Boston.*
ROBERT TILLOTSON, Esq., *D. A., New York.*
CHARLES P. INGERSOLL, Esq., *D. A., Philadelphia.*
NATHANIEL WILLIAMS, Esq., *D. A., Baltimore.*

No. 20.

COLLECTOR'S OFFICE, *January* 2, 1826.

SIR: By advice from New York I am informed that the teas of E. Thomson's importation, deposited in the store of Haggerty, Austin & Co., have been seized without having recourse to forcible means, as they opened the store to the officer, whom I had instructed to make a formal demand for admission before any violence would be employed for that purpose.

From the manner in which the apartments were filled up with the teas it was impossible to ascertain the quantity, by minute examination, without removing a quantity of them to other apartments, which would have been attended with considerable labor; and as Messrs. Haggerty, Austin & Co. gave to the officer a statement, as per annexed memorandum, which, corresponding in quantity with what we had previously understood was in their possession, a further investigation was deemed unnecessary.

All the diligence and industry hitherto employed by the officer to find the teas acknowledged by Hone & Co. to be in their possession have been unattended with success, which induces me to think that the continuance of an officer there any longer will be useless. I now regret that the Collector of New York had not acted in the case as the Collectors of Boston and Baltimore, with much promptitude, proceeded to do on receiving information of the fraud that had been committed; no doubt the number of the officers employed in that port, and possessing the knowledge they must have of the different stores, would have succeeded in making discoveries of the teas in question which would be unattainable by a stranger. I therefore respectfully submit for your consideration whether it might not yet be of much importance were you to instruct the Collector at New York to assume the business. The officer from Philadelphia having lately discovered in a store six or seven hundred chests of tea of E. Thomson's importation, which, on examination, were found to be of the years 1822, 1823, and 1824, induces the opinion that there may be in New York a greater quantity of those of 1825 than we have had any particular information respecting, as it is highly probable that the older teas would be first disposed of, whilst the latter would be cautiously kept out of view for the present by the possessors.

I have not been informed whether the Collectors of Baltimore and Boston have had the teas, by them respectively seized, libelled; I presume they will receive instructions from you as respects the necessary measures to be adopted.

I am informed that Payson & Co., of Baltimore, in whose hands a quantity of E. Thomson's teas were seized by the Collector, are indebted to Thomson $8,000; that the teas under seizure are worth about $5,000. Would it not be advisable to relinquish the seizure in case I can obtain from Thomson's assignees an order on Payson & Co. to pay to me, for the use of the United States, the amount due by them to Thomson, which will be placed to his credit in our accounts?

I will not withdraw the officer from New York until I receive your advice and instruction on the subject.

I am, very respectfully, your obedient servant,

JNO. STEELE.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

Memorandum of teas in possession of Messrs. Haggerty, Austin & Co.

E. T.	916 chests H. Skin teas,	imported per ship	Addison.

	2,459	do	Woodrop Sims.
	3,631 chests.		

No. 21.

CUSTOM-HOUSE, *Baltimore, Collector's Office, January* 6, 1826.

SIR: In the close of your letter of the 4th instant, deciding Mr. Tyson's case, at Key West, you remind me of the letter of the 20th ultimo, which had remained unanswered. This was occasioned by directions from the Collector of Philadelphia, which disposed of the subject so far as to render the detailed report you had required a needless labor to the Department and myself.

He had, subsequently to my letter of the 5th ultimo, desired me to release the several parcels detained here, as far as they appeared to have been held by innocent purchasers, or were of a particular description, all of which they had found at home. This left but a single parcel, which appeared to be a consignment from Mr. Thomson, and was in the hands of a most respectable house here, H. Payson & Co.

It would have been, therefore, requesting a judgment upon a case no longer existing; which, however it might serve at a future occasion, would have unnecessarily exercised the consideration of the Department prospectively to have drawn out the case in the manner required.

I remain, sir, your obedient servant,

JAS. H. McCULLOCH.

JOSEPH ANDERSON, Esq.

TREASURY DEPARTMENT, *January* 10, 1826.

SIR: Since my letter of instructions to you of the 5th instant it has been represented to me that, from a period commencing with the last spring and continuing until the close of the autumn, Mr. Thomson was in the habit of selling, at public auctions, in Philadelphia, boxes or parcels of the very teas which he fraudulently withdrew from store; which sales were matter of common notoriety, advertisements and other notices of them constantly appearing in the newspapers. You will be pleased to direct your special attention to these representations, inquiring, first, if they be founded in fact, and if so, through what causes it happened that the officers of the customs were not excited into wakefulness by such conduct on the part of Mr. Thomson. Their indifference to it, after all that has transpired, requires at least full explanation.

In pursuing your examinations on all the objects of your commission, you will call before you the clerks of the custom-house, as well as others, an authority which my instructions of the 5th cover, and which is here specified only from greater caution.

I have the honor to remain, with great respect, your obedient servant,

RICHARD RUSH.

SAMUEL HARRISON SMITH, Esq., *Philadelphia.*

TREASURY DEPARTMENT, *January* 6, 1826.

SIR: Samuel Harrison Smith, Esq., has been selected by the President to institute an examination into the affairs of the custom-house at Philadelphia under circumstances and with objects that are fully explained in instructions to him from this Department, dated yesterday. As he will show you these instructions I need say nothing more respecting them, and have only to convey to you the President's desire that he be permitted to inspect, in as full a manner as he may think proper, all the books, papers, and accounts of the establishment; and that you will afford him every facility in your power, whether as to the examination of persons or documents, or regarding any other matter or thing, that may tend to effectuate in any degree all or any of the ends contemplated by his instructions.

I remain, very respectfully, your obedient servant,

JOHN STEELE, Esq., *Collector of the port of Philadelphia.*

[*Enclosures, from No.* 1 *to* 10, *and A, B, C, D, in the letter of instruction to the Commissioner.*]

No. 1.

COLLECTOR'S OFFICE, *Philadelphia, November* 22, 1825.

SIR: I have the painful task to perform of announcing to you the failure of Edward Thomson, which was made known to me on Saturday, by which, I fear, the United States will sustain a very heavy loss; I am the more inclined to think so from information I received on Sabbath afternoon, which affords strong ground to suspect a premeditated fraud.

One of the officers obtained information from a young man in Mr. Thomson's employ that a large quantity of Mr. Thomson's teas, which had *not been permitted* on entry at the custom-house, had been transmitted, the greater part to New York and the residue to Boston, mentioning the several houses to whom the teas were sent.

Immediately on the receipt of this intelligence, which was near the hour the mail stage departs, I despatched therein two officers to New York to have those teas seized if they could be found, and wrote to the Collector requesting his aid in the matter. I wrote to the Collector at Boston to make seizure of the teas sent to that place.

I would have written to you yesterday, but delayed with the expectation of being able to inform you of the exact amount of teas surreptitiously taken from the store, by taking an inventory of teas actually remaining; but in this I have as yet been disappointed, as I have not been able to obtain the importer's keys, who alleges that they are in the hands of Messrs. Lippincott & Co., auctioneers, (to whom Mr. Thomson has assigned a quantity of teas,) and who refuse to give them up. From all these circumstances you will perceive strong indications of fraud.

Not knowing whether any of those teas have been sent elsewhere, or to whom, I have felt a

difficulty about writing to any other Collectors on the subject. As soon as I have it in my power to communicate to you more particularly it will be done, and request you will be pleased to give me any advice you may deem necessary in the premises.

I am, very respectfully, sir, your obedient servant,

JOHN STEELE.

RICHARD RUSH, Esq., *Secretary of the Treasury.*

No. 2.

COLLECTOR'S OFFICE, *Philadelphia, November* 30, 1825.

SIR: I am informed by one of the officers just returned from New York, who had been sent in quest of Thomson's teas, surreptitiously taken from the store, that several seizures had been made, but inconsiderable in amount in comparison with the whole quantity which we have reason to believe was sent to that place.

There is good reason to believe that a considerable quantity of those teas are in the custody of auctioneers, who have peremptorily refused access, and have threatened a prosecution if violent means are used for that purpose. The officer prudently omitted, until otherwise advised, to take any step that would involve my personal inconvenience, or occasion me any pecuniary disadvantage or damage, but adopted the milder course of placing a lock on the door of the store where the teas are deposited, and for the further security of which the Collector has kindly promised the assistance of a night watch. There is another store wherein, it is believed, a greater quantity is deposited than in the above mentioned; but access to the teas has not been demanded, apprehending that a like reply would be made as that which I have stated; but like caution will be observed, as in the other case, to prevent the removal of the teas, until instructions are forwarded of the course finally to be taken in the premises. Your advice and instructions in this matter you will be pleased to give me as soon as practicable.

Yesterday I received advice from the Collector of Boston that, immediately on the receipt of my letter, he seized teas of Thomson's importation to a large amount, the number of chests not yet ascertained, or the kind and qualities, or particular vessel in which imported.

Having recently received information that a small quantity of those teas had been sent to Baltimore, I have advised the Collector accordingly. As soon as we can state with precision the amount of depredation committed it shall be forwarded to you.

It is highly probable that the certificate, directed to be issued under the collection law of 1799, 41st section, may accompany part, if not the whole, of the teas unlawfully taken from store, as I find they have been issued to the importer.

I am, very respectfully, sir, your obedient servant,

JOHN STEELE.

RICHARD RUSH, Esq., *Secretary of the Treasury.*

No. 3.

COLLECTOR'S OFFICE, *Philadelphia, December* 1, 1825.

SIR: I have, agreeably to instructions contained in your letter of the 24th ultimo, applied to the District Attorney for advice in the measures to be pursued in prosecuting a seizure and recovery of E. Thomson's teas unlawfully taken from store, as well as every other matter connected therewith in which the interest of the United States is involved, and will act agreeably to such advice as I have received or may hereafter receive from him on the subject.

A suit has been instituted yesterday against me by Messrs. Lippincott & Co. for refusing to deliver to them, from store, a quantity of E. Thomson's teas, and also a further quantity seized at New York, and some chests seized on board a vessel in this place which had been assigned to them some time ago by E. Thomson; and, as I have reason to apprehend that other suits may be instituted against me in the business, I request you will either authorize me to call on Mr. Ingersoll to appear in behalf of the United States to defend such suit or suits, or give him such directions as you may deem proper in the premises.

I am, very respectfully, sir, your obedient servant,

JOHN STEELE.

RICHARD RUSH, Esq., *Secretary of the Treasury.*

No. 4.

COLLECTOR'S OFFICE, *Philadelphia, December* 6, 1825.

SIR: I would have informed you of the amount of teas fraudulently taken from E. Thomson's store as soon as it was correctly ascertained, but delayed with the hope that I might be enabled to accompany it with some more satisfactory information of the quantity of those teas seized in behalf of the United States, as also those mentioned in my letter to you of the 30th ultimo, of which (access to them being still persisted in) I can give you no further information. The larger quantity mentioned in my letter, supposed to be in the store of Hone & Co., I am informed is not in the store they occupy, though acknowledged by them to be in their custody. The officer is prosecuting every means in his power to discover where they are deposited.

Enclosed is a statement of the quantity fraudulenty removed from store, and also of the seizures made in New York, Boston, Baltimore, and this place. The quantities, by information, stated to be in custody of auctioneers in New York, say in custody of Haggerty & Austin, to which access has been refused, 3,631 chests, and of Hone & Co. 2,245 chests—in all, 5,876 chests.

Since I commenced writing I have received information from New York that Mr. Ogden, the counsel of Haggerty & Austin, has advised them to dispose of or remove their teas wherever they may think proper. The District Attorney here advises forcible means to be employed to effect a seizure. A copy of Mr. Ingersoll's advice will be forwarded to the officer by this day's mail.

Having obtained from Thomson and the persons in his employ all the information we could obtain (and the only information we have had) respecting the places where, and the persons to whom, those teas were sent, on Friday morning last I stated to the District Attorney that I thought it indispensably necessary that a criminal suit against Mr. Thomson should be forthwith instituted. He informed me, in reply, that at present he deemed the measure inexpedient; alleging, as a reason for delay, that important information might yet be obtained, which might be checked or destroyed by a prosecution against him. I am this moment informed that Mr. Thomson and his clerk left this city in a dearborn at an early hour on Sabbath morning, but whence, or for what purpose, has not been intimated.

Though I am satisfied that unwarrantable laxity of conduct or improper indulgence has been allowed in the department having charge of Thomson's teas, I have forborne saying anything to you on that subject, until I shall have ascertained, if possible, how, and by what means, so great a quantity had been taken away, and where the culpability lies.

As before requested, you will be pleased to give me, generally, in relation to Mr. Thomson's transaction, such advice and instruction as you may deem necessary.

I am your obedient, humble servant,

JOHN STEELE.

In store of J. and P. Hone & Co., supposed also in No. 55 Front street, but not ascertained 800 1,445

It appears from letters in our possession that Haggerty, Austin & Co. have advanced a considerable amount on the teas in their possession to Edward Thomson; and from J. and P. Hone & Co. a large advance was obtained by said Edward Thomson. The letter from Hone & Co. acknowledges the quantity above stated to be in their possession. The quantity in possession of Haggerty, Austin & Co. is in the handwriting of one of their clerks.

No. 5.

COLLECTOR'S OFFICE, *Philadelphia, December* 12, 1825.

SIR: On the 6th, previously to the receipt of your letter of the 3d instant, I wrote to the Secretary of the Treasury, enclosing a statement of amount of teas fraudulently taken from Thomson's stores, the seizures made at New York, Boston, Baltimore, and every other information I could then communicate on the subject, which I presume has also been referred to your Department.

In yours you request me to state, if they have come to my knowledge, "the particulars of the manner in which the teas were obtained or removed." The information received, and the means taken to acquire it, I will state, not foreseeing the probability of obtaining any further light on the subject.

On the 5th instant I wrote to the surveyor, proposing several queries relative to the duties of the department under his superintendence and direction, to which I requested distinct and explicit answers—two of which, touching the point on which you require particular information, and his answers thereto, are as follows:

1. "What has been the usual course pursued by the officers of the customs in storing spirits, wines, and teas, as also in delivering the same from store."

2. "Do you know of any course pursued in the premises other than that prescribed by law, or any indulgence granted which the law does not authorize? and if such has been the case, say by whom."

Answers:

1. The usual course pursued has been, that, when the vessel is discharging, the spirits, wines, and teas have been taken from the wharf to the stores of the merchants, and when all have been delivered from the vessel, some days have been allowed by the inspectors to the merchants to assort the different chops of teas, and stow properly the spirits and wines. In delivering the same from store, the inspectors have unlocked the stores and superintended the delivery; but in some cases, when very busily employed, the inspectors have intrusted the keys to the merchants, it being deemed necessary for the furtherance of business, which otherwise would have caused ruinous and unnecessary delays to the merchants. This has always been the practice and custom allowed by the different surveyors, and in the storing it would be impossible to do otherwise, unless the inspectors were to follow the loads of every dray, when, in many instances, twenty or more stores have been taken to receive the goods in various parts of the city.

2. The course pursued in the premises, in allowing the merchants possession of the keys, was not according to law, but as described in *answer first.* Indulgence was especially granted, in one instance, by me, to Messrs. Smiths, for removing the locks, for the purpose of sooner making sales, and arranging them for the inspection of the purchasers, and was without any loss to the Government. This was two years or more past.

The information I received from the officer who had charge of Thomson's store, as also from others of the inspectors, corresponds with that stated by the surveyor; but believing that so great a quantity could not have been removed, when teas were taken from store under permit, which the improper indulgence mentioned might be supposed to afford, I advised the obtaining, if possible, from the young man in Thomson's employ, who gave us the first intimation of fraud, such information as I presumed he could give of the means employed to accomplish the nefarious purpose.

This young man has recently communicated to the officer employed to obtain the information that, from what he now understands, Thomson had, on previous occasions, taken teas from store before they were bonded, but not to such extent as in the present instance. That, whilst the vessel was discharging, quantities of teas which were not put into the store were sent away from the pavement of the store doors, where they were laid down by the porters as they brought them from the wharf. That Thomson had availed himself of occasions, when the officer who had charge of his store would be most busily engaged on the wharf, to bond and take permits for delivery, that he might have the better chance of being allowed possession of the keys; and that advantage was also taken of one custom-house key opening the locks of those several stores, which, when obtained for a particular description of teas bonded, was frequently used for opening other stores containing teas not bonded, of which parcels were sent away without the knowledge of the officer.

I have now communicated to you the manner in which the teas in question have been obtained and removed, as far as anything relating thereto has come to my knowledge.

I am, very respectfully, sir, your obedient servant,

JOHN STEELE.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

No. 6.

COLLECTOR'S OFFICE, *Philadelphia, December* 23, 1825.

SIR: On receiving intelligence on Monday evening that E. Thomson was seen the day before near Wilmington, I immediately communicated the information to the District Attorney. The marshal, accompanied by one of the clerks from my office, set out about ten o'clock at night in pursuit, and succeeded in arresting him at Newcastle, about five o'clock on Tuesday evening, and on the next day he was brought to Philadelphia.

Thomson no doubt intended to make his escape from the United States, as I have since learned that he had with him a considerable sum in foreign gold, and there were two or three vessels yet in the river which had cleared for Europe a short time before.

I would have advised you sooner of his arrest, but finding that the marshal, on his arrival, instead of placing him in prison, as affording the best security against escape, had indulged him by remaining out, under the charge of an officer, and I delayed the information until I could say he was secure in a place from whence escape would be rendered less probable.

I am this moment informed that Thomson, on account of ill health, is still in the custody of the marshal.

I am, respectfully, sir, yours very truly,

JOHN STEELE.

P. S.—I had omitted to state, in my answer to yours of the 10th instant, that Mr. Lippincott presented an entry, per ship Woodrop Sims, for 272 chests and 65 half chests Young Hyson tea, with Thomson's endorsement on the back thereof, empowering and authorizing Joseph and William Lippincott & Co. to enter the same. This was dated the 19th of November last, but acknowledged by William Lippincott to have been signed on the 26th, the day when presented, and immediately after the examination of the teas in Thomson's stores, of which stores Lippincott & Co. had the keys.

Thomson's assignment to P. Mackie and R. Renshaw was executed on the 19th November last.

JOHN STEELE.

No. 7.

PHILADELPHIA, *November* 30, 1825.

SIR: Before the receipt of your letter of the 24th instant, concerning the failure of Edward Thomson, as well as since, my attention has been constantly bestowed on that deplorable and disgraceful transaction. According to present information, fifteen thousand chests of teas have been fraudulently taken by him and his assistants from the custom-house custody, without securing the duties, of which but about six thousand chests have as yet been traced, (at New York,) and, from all I can learn, the public loss will be very great. If my incessant engagements here will permit, I propose to visit New York for a short time, to see if I can be of any use in the further pursuit, by ascertainments on the spot; and at all events you may rely on my best endeavors to apply the proper remedies to an affair which, I think, will introduce more litigation, loss, and discredit than any one that has ever occurred here.

I am, very respectfully, your humble servant,

C. J. INGERSOLL.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

No. 8.

PHILADELPHIA, *December* 2, 1825.

Enclosed I submit copies of two affidavits, by which Mr. Francis H. Nicolle, of New York, has been held to bail to day, in the sum of $500,000, at the suit of the United States. The grounds of action disclosed by these proofs are, that Mr. Nicolle, having possessed himself by various assignments of all Mr. Thomson's property, with full knowledge of his insolvency, becomes, by such fraudulent attempt to frustrate the public priority, an assignee liable to pay the United States in the first instance, and to his own postponement. The case of Downing & Kintring, in the second volume of Sergeant & Rawle's Reports, page 326, furnishes the principle and authority by which I have been governed in this proceeding; and as Nicolle's is a much stronger case than that, I think the action may be maintained. If so, the Government will save from three to five hundred thousand dollars out of the wreck of this extraordinary failure, by which, as you will perceive from one of the affidavits, the public loss will otherwise be a million of dollars, to which amount Mr. Thomson's public liabilities extend, without a cent to pay for them beyond the effects held by Mr. Nicolle.

As half a million of dollars is a large sum to give bail for, I beg leave to suggest for your consideration, and that of the President, the expediency of authorizing me to enlarge Mr. Nicolle, on condition that he will deposit in court the documents and evidences of the funds in question, so as to enable the court to hold the money as realized to abide the event of the suit. Otherwise, Mr. Nicolle may be kept in confinement during the two or three years that probably will elapse before the controversy is ended by final adjudication.

In taking the step I have done in this affair, I did what appears to me to be necessary and proper for the public interest; and as such I flatter myself it will receive the Executive sanction. But personally I shall feel gratified, if authorized, on seeing the property in dispute made sure, to enlarge Mr. Nicolle from confinement. The decision, after argument this morning, was to hold him to bail. But the case is to be reheard (in consequence of its magnitude and importance) next Friday, by which time I hope to be honored with your instructions.

Most of the property consists of ships and cargoes on China voyages, to return next spring. To prevent injury to the public claims on them, it will be necessary to instruct the national vessels on the southern station to speak these ships on their return, and prevent the masters of them from being induced to put into other ports than this, which may be apprehended as part of the plan to defeat the public priority. I will take care to furnish you in time with the names of the vessels and masters, together with written orders from Mr. Thomson, who has promised to give them.

I beg leave to submit to the President, for his direction, my opinion that it would be inexpedient to institute prosecutions as yet against Thomson or any of those concerned in the illegal delivery of the 15,000 chests of tea. We are every day deriving important information from him and them, by which the whole fraud may be ascertained, and at least part of the property reclaimed. These disclosures have not been encouraged by the slightest promise or hope of omitting to prosecute. No trial can take place till next April, and by deferring the commencement of the prosecution, instead of neglecting, we may the better mature the measure suitable to this transaction, which, no doubt, the Government, as well as the public, will think worthy to be made a memorable example of.

I remain, very respectfully, your humble servant,

C. J. INGERSOLL.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

No. 9.

PHILADELPHIA, *December* 5, 1825.

SIR: Apprehensive that there may be inaccuracies in the copies of affidavits accompanying my last letter, I send, enclosed, other copies, which I have compared with the originals.

I am, respectfully, your humble servant,

C. J. INGERSOLL.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

[*Enclosures in Mr. Ingersoll's letter No.* 9.]

Circuit Court of the United States, Pennsylvania district, April session, 1825. Capias case. Bail $500,000.

THE UNITED STATES OF AMERICA
vs.
FRANCIS H. NICOLLE.

Peter Mackie, of Philadelphia, being duly sworn, deposes that he has been clerk to Edward Thomson for ten years last past, and well acquainted with his affairs and transactions. For at least five years last past Edward Thomson has been insolvent—that is to say, unable to pay his debts on a settlement of his concerns. Francis H. Nicolle, of New York, in the spring of 1824 came to Philadelphia to recover a debt claimed of Edward Thomson by Smith & Nicolle, amounting to about five hundred thousand dollars. At that time there were bills of sale to Edward H. Nicolle, of Edward Thomson's ships, named, respectively, the William Savery, the Woodrop Sims, the Addison, the Thomas Scattergood, and the Benjamin Rush. The Savery has since been condemned as unseaworthy. At this time Francis H. Nicolle holds bills of sale from Edward Thomson for the other four ships aforenamed. In September last Francis H. Nicolle received from Edward Thomson respondentia bonds for about one hundred and sixty thousand dollars on property, per ships Woodrop Sims and Addison; in the month of November last Francis H. Nicolle received from Edward Thomson respondentia bonds for near fifty thousand dollars on property, per ships Rush and Scattergood; in September last Edward Thomson made an assignment to Francis H. Nicolle of seventy-five thousand dollars on the freights of ships Addison, Superior, and Woodrop Sims, valued at that sum; and, as deponent understands, other conveyances for freights of ships Scattergood and Rush, made in November last. All the bills of sale and respondentia bonds, and freight assignments aforesaid, are in the name and to the use of Francis H. Nicolle. Besides this property, he holds, moreover, Edward Thomson's bonds and judgments, obtained in November last, for at least one hundred and twenty thousand dollars, as this deponent understands. The foregoing property comprises all the property of Edward Thomson, within the knowledge of this deponent, including his furniture and effects levied upon at the execution of the said Francis H. Nicolle. There may be some debts collected, but the foregoing comprises the bulk and nearly all, if not quite all, the property of Edward Thomson. Deponent has no doubt that Francis H. Nicolle was perfectly aware of Edward Thomson's insolvency when he obtained from him the property conveyed and assigned by Thomson to Nicolle as aforesaid. The whole of it, according to deponent's estimate, amounts to near four hundred thousand dollars, received by the said Francis H. Nicolle from Edward Thomson when insolvent, and well known to Mr. Nicolle to be so. In the spring of 1824, when Mr. Nicolle was urging Mr. Thomson for money, Mr. Thomson, in this deponent's presence and hearing, assured Mr. Nicolle that he (Mr. Thomson) had no means, funds, property or credit, but the credit on his duty bonds, of which Smith & Nicolle, whose agent Francis H. Nicolle then was, had already got four hundred thousand dollars. This deponent urged to Mr. Nicolle that Mr. Thomson had already committed a fraud on the custom-house by paying Smith & Nicolle the funds appropriated to pay duties, and the only money, as they knew, he had for that purpose, and that this deponent would consider him (Mr. Nicolle) the perpetrator of the fraud, if anything more like it should be done. Francis H. Nicolle said, in reply, he cared nothing for the custom-house; he must have the money or notes. Mr. Nicolle's instances were constant and most urgent, accompanied with threats of executing judgments upon him, and stopping the ship Woodrop Sims, unless he (Mr. Thomson) yielded. Finally, Mr. Thomson did yield, and gave notes for about one hundred and fifty thousand dollars at that time, most of which are since paid. Deponent has often mentioned Mr. Thomson's desperate situation to Francis H. Nicolle, and lately told him that, in this deponent's belief, Mr. Thomson's debts for duties did not fall short of eight hundred thousand dollars, and might be a million, which he could not pay, because Francis H. Nicolle held all his property. This deponent is intimately acquainted with all Edward Thomson's affairs, including his concerns with Francis H. Nicolle, and verily believes, as he has every reason to know, that Edward Thomson does not owe Francis H. Nicolle one cent. This deponent is one of the assignees under Edward Thomson's general and last assignment, and knows of no property available to pay his debts but that assigned by him to Francis H. Nicolle when insolvent, when his insolvency was known to Mr. Nicolle, and, as this deponent has declared, held by Mr. Nicolle when nothing is due to him from Mr. Thomson, who has no property, except the small expectancies before alluded to.

PETER MACKIE.

Sworn to before me, December 2, 1825.

RICHARD PETERS.

Circuit Court of the United States of America, Pennsylvania district, April session, 1826.

THE UNITED STATES OF AMERICA
vs.
FRANCIS H. NICOLLE.

Charles Treichel, of Philadelphia, on his oath, declares that the sum of at least nine hundred thousand dollars is due from Edward Thomson to the United States of America, for duties on goods imported at the port of Philadelphia.

CHARLES TREICHEL.

No. 10.

PHILADELPHIA, *December* 16, 1825.

SIR: Desirous, in an affair of such magnitude and interest as that of Edward Thomson, to keep the Executive constantly advised of what occurs, and particularly of my own proceedings, I submit, enclosed, a copy of a letter from him, this day received by me through the post office. The day and place of date are omitted, and the address on the outside is in a disguised writing. The whole of the inside is written and signed by Thomson. This rather strange communication justifies in the main my conviction that he would not abscond; for where can he fly to, and what punishment would be so severe as such an exile? Yet as, on the other hand, his conduct defies all reasoning, and his concealing himself, as he does, is at least a partial contradiction of my belief that he would not go off, I have thought it proper, since the receipt of this letter, on the best consideration I could give, to order capiases against him for some of his bonds unpaid. If taken for these debts, it will serve to insure his detention for any ulterior measures against him. I have conferred with the marshal, and suggested, with the assistance of the clerk, every precaution we can think of to make certain of the arrest. But you must be aware that it will be a matter of chance, and that, after the attempt, if it fails, the future prospect will be more doubtful than ever. Still it appears to me that, concealed as he keeps himself, it is our duty to try to take him at all hazards.

I remain, very respectfully, your humble servant,

C. J. INGERSOLL.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

The hearing in Mr. Nicolle's case was to have taken place this morning, but the interruption of Thomson's business, added to a cold so severe as to incapacitate me for such an exertion, have induced me to plead the latter as an excuse for adjourning the argument till next Tuesday.

Though there is no *day* of date in Thomson's letter, the recurrence of *to-morrow* twice in it shows it to have been written yesterday, and the post-mark, as well as I can make it out, is the 15th.

[*Enclosure in Mr. Ingersoll's No.* 10.]

DECEMBER, 1825.

DEAR SIR: During the two last weeks, (after dropping you a note,) I thought it most prudent to retire to the country to avoid arrests from various debts; and especially as my health had so much declined, it was necessary to change the scene of misfortune. Occasionally I hear what is going on; and when anything comes under my notice which I think may be beneficial to the Government, I shall drop you a line through the medium of the post office. I understand to-morrow the subject is again to come up as to the bail of F. H. Nicolle. I would recommend your having P. Mackie at the court, as you may wish some of his explanations. Should you not succeed to-morrow as to your position in holding to bail, it may not be so important, because about $400,000, I believe, of the property shipped will be returned to me, so that you will then have a fair chance. It was respondentiaed to Nicolle too long after the ship sailed to make any change; and you may rely on my co-operation for the benefit of the Government, to whom it is justly due.

The more snug, however, we are on this point the better it will be—that is, the less he suspects, he will, of course, be accordingly unprepared. I have thought, since I last saw you, of your remarks as to their endeavors to take the ships into New York—I am confident it would be a great matter with them; but I have a smart young man that I have often sent to the capes, and with him there is nothing to fear. On this point it would be beneficial perhaps for me, in due time, to have a conversation with you; but I would not wish to come to the city and be put in confinement, where I would be of no service to myself or any others. Mr. Mackie is not fond of attending court; therefore, please not mention its being at my suggestion, otherwise he would not be pleased.

With great regard,

E. THOMSON.

C. J. INGERSOLL, *Attorney for the United States.*

A.

To the honorable Richard Rush, Secretary of the Treasury of the United States.

The memorial of Benjamin W. Richards, one of the firm of Joshua and William Lippincott & Co., of Philadelphia, for and on behalf of the said firm.

Your memorialist respectfully shows that, on the 5th day of May, 1825, Edward Thomson, then a merchant of high standing in the city of Philadelphia, by a regular article of assignment and conveyance, legally transferred to the said firm of J. & W. Lippincott & Co. certain teas and cassia which had been previously imported into the United States by the said Edward Thomson, and then remaining in store under the provision of the law, the duties thereon not having been paid. About the same time, and as part of the same transaction, the said Thomson endorsed the bills of lading of said articles, according to the usual mode of passing merchandise.

And your memorialist further shows that, on the 12th day of July, and afterwards on the 20th September, the said Edward Thomson did execute and deliver to the said J. & W. Lippincott & Co. other assignments and conveyances of certain other teas and cassia, the bills of lading whereof were also endorsed by him as aforesaid. Your memorialist respectfully submits to your inspection the foregoing instruments of assignment and transfer, and the said bills of lading so as aforesaid endorsed.

And your memorialist further shows that these assignments and transfers were regularly and *bona fide* made and received by the parties, respectively, in the regular course of business, for the purpose of securing to the said J. & W. Lippincott & Co., commission merchants and auctioneers, moneys advanced to the said Edward Thomson, and for no other purpose whatsoever; that the keys of the stores, in which the said teas and cassia were deposited agreeably to the provisions of the collection law, were transferred by the said Thomson to the said firm, and held by them from that period.

Your memorialist further shows that, by the laws and customs of merchants, such transfer and delivery operated to vest the title and possession of the said teas and cassia fully in the said J. & W. Lippincott & Co., and as completely divested the right, title, and possession of the said Thomson; that, unless impeached as fraudulent and collusive, which has never been suspected by them, or to the knowledge and belief of your momorialist by any one, the title of the said J. & W. Lippincott & Co. was as perfect and complete as it could be made. And your memorialist shows that the said firm became entitled to the sole possession and property in the said articles on the payment or securing of the duties accruing on the same to the Government of the United States. In this persuasion and belief they did apply to the custom-house in Philadelphia for a permit for the same, having tendered and delivered a good and sufficient bond to secure the payment of said duties, which was deemed sufficient, and accepted in the said custom-house by the proper authorities. Owing to the accidental absence of the naval officer, whose signature could not then be procured to the permit, the granting of it was postponed, but it was promised that it should be allowed. In the meantime, as your memorialist has undersood and believes, the officers of the custom-house ascertained that the said Edward Thomson, or other persons, had surreptitiously removed from certain stores other teas and articles imported by him without paying or securing the duties on the same. Having made this discovery of a transaction in which no other person, as your memorialist believes, has been implicated than the said Edward Thomson and the officers of the customs themselves, and which could never have been effected without at least the most culpable negligence on the part of the latter, the permit which had been promised was refused. Your memorialist believes that this refusal was made upon the ground that, until the duties which said Thomson ought to have paid, or secured upon other articles were thus paid or secured, no goods imported by him should be admitted to entry.

Your memorialist has not been able distinctly to understand the ground upon which the Collector has proceeded in denying the permit, but so far as he has been able to ascertain them, there is no other than that which has been mentioned.

Your memorialist is advised, and believes, that no proposition of law can be more clear and indisputable than that the Government of the United States cannot claim to hold goods or articles imported into the country, as a security for the payment of other duties accruing on other goods imported by the same or any other merchant, without an express pledge of the same for that purpose; that every article, when imported, is liable to the specific duty imposed on it by law, and to no other duty whatever; that it is illegal, and a most dangerous and unprecedented exercise of power, to withhold a permit for goods after the duties upon the same are paid or secured; that the possession by the United States is for the single purpose of securing the payment of the duties due for the identical goods themselves; and that the retaining that possession for any other purpose, and particularly to enforce the payment of duties on other goods, is equally a violation of confidence and of law; that the custom-house officers cannot lawfully sell or dispose of those articles, or sequester the same, or in any manner obtain from them the payment of any duties accruing on other goods.

Your memorialist, considering these propositions to be beyond question, cannot hesitate to pronounce the conduct of the Collector of Philadelphia illegal and oppressive; and he will not permit himself to doubt but that the Department, after ascertaining the facts, will disavow the proceeding. He respectfully submits that the consequences necessarily resulting from the exercise of such acts must be in the highest degree pernicious to the community as well as to individuals; that all confidence in the Government must be destroyed if custom-house officers are permitted to avail themselves of the possession and control of imported goods to effect any other purposes, or to enforce the payment of any other claims than those which that possession and control were designed to secure. If the officers have negligently or fraudulently permitted Mr. Thomson, or any other person, to carry out of their possession, and to remove beyond their control goods upon which the duties payable by law have not been paid or secured, it is in the highest degree inequitable and unjust to visit upon others who had no participation in this illegal or negligent conduct, and who consequently cannot be deemed in any manner responsible for it, all the injurious consequences resulting from it. Your memorialist submits to the Department that, if Edward Thomson were himself at this time the proprietor of these articles, the custom-house officers could not legally detain them one hour after the duties accruing on them were paid, upon any pretence whatever. If this be so—and it is a plain and undoubted principle of law—how devoid of even an appearance of foundation in law is this refusal to individuals who have fairly and honestly acquired the property months before Mr. Thomson's embarrassments were known.

Your memorialist claims the interposition of the Department upon another ground. The immense amount of property involved, valued at a moderate rate, and considerably more than one hundred thousand dollars beyond the duties accruing thereon, are unexpectedly withheld from his house. To withdraw instantaneously such an amount of available funds from any commercial house in our country threatens it with embarrassment if not with inevitable ruin. The engagements made upon the credit of this property are becoming due; even the protraction of this unlawful act must lead to consequences as disastrous as they are irreparable. Any relief through the instrumentality of courts of justice must necessarily be tedious, precarious, and, your memorialist need scarcely say, perfectly inefficient. No judicial relief can repair commercial credit when once shaken, or compensate for ruin that has been consummated.

At present your memorialist only claims from the Department a speedy investigation of the circumstances attending the case. The necessity for immediate relief induces the hope that the Department will conceive the matter of sufficient importance to send an agent to Philadelphia for the purpose of obtaining a knowledge of all the facts and thoroughly to understand the grounds upon which the Collector acts, or to take such other steps as may be equally efficacious and equally speedy.

BENJAMIN W. RICHARDS.

WASHINGTON, *December* 7, 1825.

Accompanying document A.

WASHINGTON, *December* 24, 1825.

SIR: I received the enclosed letter this day from Mr. Richards. It covers a document from Mr. James Schott, which Mr. Richards wishes to add to the papers which he has already submitted to your consideration. In transmitting it to you, I take the liberty to remark that Mr. Schott is a merchant of high standing in Philadelphia, upon whose representations entire reliance may be placed.

I am, sir, very respectfully, your obedient servant,

JOHN WURTS.

Hon. RICHARD RUSH.

PHILADELPHIA, *December* 8, 1825.

On Saturday, November 19, 1825, Messrs. J. and W. Lippincott & Co. called on me to sign some bonds with them to the custom-house, for duties on teas imported by Edward Thomson, which I accordingly did. After the bonds were signed, one of the Messrs. Lippincott asked Mr. Kerns, the Deputy Collector, for a permit; he replied, he could not give it because the Naval Officer was not there, but said it would make no difference, or words to this effect. I understood him to say the permit would be given on Monday; and the Deputy Collector further said, "*Now, Mr. Lippincott, if we had the wish, we have not the power, to deprive you of a chest of these teas.*" This was after the bonds were signed.

JAMES SCHOTT.

PHILADELPHIA, *December* 22, 1825.

DEAR SIR: I forward you Mr. James Schott's statement; it was accidentally omitted when I left here for Washington.

Please have it placed among our papers, with the Comptroller.

Yours, very respectfully,

B. W. RICHARDS.

Mr. WURTS.

B.

COLLECTOR'S OFFICE, *Philadelphia, December* 13, 1825.

SIR: In answering yours of the 10th instant, accompanied by a copy of Mr. Richards' petition to the Secretary of the Treasury, I beg leave to submit the following statement of facts:
